Oil and Gas Lease Sale 36, Louisiana, May 1: Proposed is the sale of oil and gas leases to 295 tracts (totaling 1,421,739.13 acres) of outer continental shelf lands Louisiana. Seventy-two tracts are situated in water depths of 200 meters or more. All tracts pose some degree of pollution risk. Each tract offered is subject to a matrix analytical technique in order to evaluate significant environmental impacts should leasing occur and subsequent oil and gas exploration ensue. The sale is tentatively scheduled for late fall, 1974. (two volumes). (ELR Order No. 40704.)

BUREAU OF RECLAMATION

Draft

Palmetto Bend Project, Jackson County, Tex., April 30: The statement refers to the Palmetto Bend Project, which is intended to provide municipal and industrial water supply and associated recreational, fish, and wildlife facilities. Project measures will include an earthfill dam, concrete spillway, multiple level river outlet works, and a dual-level outlet for municipal water releases. A total of 16,300 acres of land, including 1,000 acres of cropland and 8,300 acres of pasture, will be committed to project measures; 11,000 acres of wildlife habitat and 47 miles of fish stream habitat will be inundated. Downstream freshwater and nutrient inflow to the Lavaca-Matagorda estuarine system will be reduced by as much as 15 percent. (ELR Order No. 40694.)

Unit 2, Huntington Canyon, and Transmission Line, Emery County, Utah, May 1: Proposed is Federal approval, (because of the terms of a water sale contract), for the addition of a 415 MW coal burning generating unit to the Utah Power & Light Co.'s Huntington Station. There will also be 75 miles of 345KV transmission line constructed in conjunction with the plant. Operation of the unit would require an additional 1.4 million tons of coal annually from Deer Creek Mine. There will be emissions of particulates, sulfur dioxide. The transmission lines will interfere with deer and elk range lands. (ELR Order No. 40705.)

BUREAU OF SPORTS FISHERIES AND WILDLIFE

Draft

Proposed UL Bend National Wildlife Refuge, Phillips County, Mont., May 2: The statement refers to the proposed legislative designation of 20,893 acres of the UL Bend National Wildlife Refuge as wilderness within the National Wilderness Preservation System. Any impact would derive from protection against exploitation of the natural resources (73 pages). (ELR Order No. 40716.)

Proposed Back Bay Wilderness Area, Va., May 2: Proposed is the legislative designation of 1,950 acres of Back Bay National Wildlife Refuge in Virginia Beach as wilderness within the National Wilderness Preservation System. Any impact from the action would derive from protection against exploitation of the natural resources (57 pages). (ELR Order No. 40717.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Quality, 400 7th Street SW., Washington, D.C. 20590, 202-426-4357.

FEDERAL AVIATION ADMINISTRATION

Draft

Bay County Airport, Panama City, Bay County, Fla., May 2: The statement refers to Panama City-Bay County's proposal to install a medium intensity approach lighting system with runway alignment indicator light. Approximately 45 piles will be sunk in North Bay. Adverse impacts are danger to the retina of the eye caused by light emissions from the sequenced flasher, and short-term negative effects normally associated with construction (25 pages). (ELR Order No. 40712.)

Brookhaven Municipal Airport, Lincoln County, Miss., May 2: The project consists of the extension and levelling of a runway, and the replacing of existing low intensity lighting with new medium intensity lights. There will be minor short-term adverse effects normally associated with construction (20 pages). (ELR Order No. 40713.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

Western Access Road, Kougarok to Kobuk, Alaska, April 30: The statement refers to the construction of the Western Access Road, approximately 340 miles in length, from the Kougarok Road on the Seward Peninsula to the Village of Kobuk on the Alaska mainland. Adverse impact will include the loss of vegetation, and increases in stream turbidity, and air and noise pollution (245 pages). (ELR Order No. 40693.)

103rd St., and Timuquana Road, Jacksonville, Fla., April 29: The statement refers to the proposed upgrading of 103rd Street and Timuquana Road in Jacksonville from an existing two-lane facility to a modern multilane urban facility. The project follows the existing alignment to Wescornett Boulevard then eastward on new alignment north of Manor Drive, then southeastward across Fishing Creek to Timuquana Road. Adverse impacts include increased noise levels, loss of frontage property, temporary degradation of water quality in Fishing Creek, and the displacement of 18 families and 11 businesses (55 pages). (ELR Order No. 40684.)

Twelfth Street, Detroit, Wayne County, Mich., April 29: The statement refers to the proposed widening of Twelfth Street. The southerly portion, between Fort and Howard, 0.14 mile in length and the northerly portion from south of Bagley to Fisher Freeway South Service Drive is about 0.43 miles in length. Adverse impacts include disruption of local traffic, displacement of people and businesses, and increased levels of air and noise pollution (52 pages). (ELR Order No. 40689.)

I-440, Oklahoma City, Oklahoma County, Okla., April 29: The statement refers to the proposed upgrading of existing US 66, a ground-level four-lane expressway to provide the north leg of the I-440, a six-laned freeway with full control of access through Oklahoma City. Adverse impacts are the displacement of 27 families and 12 businesses (already have been relocated), the reduction of privately owned lands and the disruption of traffic services during construction (45 pages). (ELR Order No. 40685.)

SH 288, Houston, Harris County, Tex., April 29: The statement refers to SH 288 on new location from Bellfort northward 4.5 miles to Elgin Street in the southerly portion of Houston. It is proposed as a dual-dual freeway consisting of 4 service lanes in each direction. Adverse impacts consist of small amounts of erosion and sedimentation during construction, and increased noise levels (80 pages). (ELR Order No. 40686.)

Randall Road Interchange, Thurston County, Wash., April 29: The statement proposes the replacement of a grade intersection with a new one on SR 101, a principal highway linking Puget Sound with points west and the Olympic Peninsula. The interchange will consist of 4 ramps, providing traffic movements in all directions, crossroads, with bridge structure, and a frontage road. Adverse impacts include the acquisition of 3 acres for right-of-way, displacement of 1 business, and Perry Creek and Mud Bay will receive increased run off because of the improvement (63 pages). (ELR Order No. 40682.)

Rock Springs Circumferential Rte. (Belt Loop), Wyo., April 30: The statement refers

V 39 I 93 MAY 13 74 XUM

to the construction of a circumferential route (Belt Loop) around the developed areas lying south of the Union Pacific Railroad in Rock Springs. The length of the project is 4.1 miles. Adverse impacts include the taking of right-of-way, the displacement of people, and the increase of noise levels (47 pages). (ELR Order No. 40699.)

Final

Route 99, Stanislaus County, Calif., May 3: The proposed project is the conversion of a portion of Route 99 from four to six lanes. Total length of the project is 5.1 miles; land acquisition will total 25 acres, with 1 family and 2 businesses being displaced. Noise and air pollution will increase. Comments made by: DOI, EPA, state and local agencies, and concerned citizens. (ELR Order No. 40725.)

Penn Central and B & O Railroad Grade Separations, New Castle County, Del., May 2: The proposed safety project on Ruthby Road is the construction of 2 railroad grade separations, totalling 0.6 mile in length. Four families would be displaced by the project (50 pages). Comments made by: HUD, USDA, EPA, DOI, state and local agencies. (ELR Order No. 40709.)

Madison North and South (U.S. 81), Madison County, Nebr. April 29: The proposed project is the reconstruction of a 7.39 mile segment of U.S. Highway 81, including a proposed bypass section east of Madison. The improvements include grading, full safety sections, roadway drainage structures, and a crossing of Union Creek (47 pages). Comments made by: DOT, COE, USDA, HUD, DOI, EPA, and state agencies. (ELR Order No. 40680.)

Final

S.R. 44, Sandoval County, Sandoval County, N. Mex., May 2: The statement refers to the proposed improvement and realignment of 8.6 miles of New Mexico State Route 44 from 2.6 miles south of San Ysidro in Sandoval County. Adverse impacts include the loss of approximately 100 acres of land, displacement of 2 businesses, and increased levels of air, water, and noise pollution during construction (40 pages). Comments made by: USDA, HEW, HUD, DOI, state and local agencies, and concerned citizens. (ELR Order No. 40706.)

U.S. 52, Davidson and Forsyth Counties, N.C., May 2: The statement refers to the proposed continuation of new U.S. 52 southward from Winston-Salem on new location for 6 miles to existing U.S. 52 north of Welcome. The corridor will be a 4 lane divided highway. Adverse impacts include the displacement of 53 families and 2 businesses, siltation of creeks, and loss of 350 acres of land (85 pages). Comments made by: USDA, COE, GSA, HEW, HUD, DOI, EPA, and state and local agencies. (ELR Order No. 40708.

Lane Street, Kannapolis, Cabarrus County, N.C., May 2: The statement refers to the proposed widening of Lane St. in Kannapolis from I–85 westward to Cannon Boulevard to a four lane curb and gutter street. Project length is 2.6 miles. Adverse impacts include the taking of additional land for right-of-way and the displacement of 2 businesses (75 pages). Comments made by: USDA, COE, DOC, EPA, GSA, HEW, HUD, DOI, and State and local agencies. (ELR Order No. 40710.)

Coose Bay—Roseburg Highway, Douglas County, Oreg., May 2: The proposed project involves widening of 3.8 miles of the existing Coos Bay—Roseburg Highway from a two-lane to a four lane highway. The project will provide for four 12-foot travel lanes; an 8-foot bicycle lane; revision of three intersections and installation of a 3-phase traffic signal. Forty-four acres of land will be committed to right-of-way. Other adverse impacts of the action include loss of flora and fauna; relocation of 16 families; removal or modification of 31 structures and increased noise levels (80 pages). Comments made by: USCG, USDA, EPA, DOC, DOT, and State and local agencies. (ELR Order No. 40707.)

I–82, Yakima and Benton Counties, Wash., April 30: The project consists of the construction of a 42 miles section of I–82 from Union Gap to Prosser. Adverse impacts include the displacement of 78 families, and the increase of air and noise pollution (three volumes). Comments made by: HUD, DOI, EPA, DOC, and USDA. (ELR Order No. 40692.)

S.T.H. 70, Oneida and Vilas Counties, Wis., April 29: The proposed project is the reconstruction and realignment of S.T.H. 70 for a distance of 10.6 miles. The facility will traverse portions of the Chequamegon National Forest and the Lac du Flambeau Indian Reservation. One hundred and forty acres of timberland will be acquired for right-of-way. The facility will traverse the Squaw, Koernet and Lower Creeks. Adverse affects are loss of timberland and wildlife habitat (38 pages). Comments made by: EPA, DOI, and USDA. (ELR Order No. 40679.)

URBAN MASS TRANSPORTATION ADMINISTRATION

Final

Archer Avenue Line, Queens, N.Y., April 29: The New York City Transit Authority has filed an application for Federal capital grant assistance to construct a rapid rail transit extension 2.5 miles in length on the Archer Avenue Line. The whole structure will be underground except for 0.2 mile. Displacements include 12 families and 11 businesses (200 employees). Increases in noise will occur (142 pages). Comments made by: DOT, EPA, DOI, HEW, USDA, and state and local agencies. (ELR Order No. 40691.)

PENNSYLVANIA AVENUE DEVELOPMENT CORPORATION

Draft

Pennsylvania Avenue Plan, 1974, District of Columbia, May 3: Proposed is the adoption of a comprehensive development plan for the Pennsylvania Avenue Development Area, for transmittal to Congress, and upon Congressional approval, implementation by the Corporation. The plan would encompass a 21 block area along the north side of the Avenue, from Third Street to the White House. The main objectives of the plan are to reinforce the proper development and uses of the Ave. and its adjacent area in a manner suitable to its ceremonial physical, and historic character; and to eliminate urban blight. (ELR Order No. 40727.)

The following environmental impact statements were received during the week of April 22 through April 26, 1974. Notice of these statements appeared in the May 6, 1974 FEDERAL REGISTER, and the commenting period for them began on that date. Summaries of the statements were not available at that time, however, and therefore are provided below.

DEPARTMENT OF AGRICULTURE

Contact: Dr. Fred H. Tschirley, Acting Coordinator, Environmental Quality Activities, Office of the Secretary, U.S. Department of Agriculture, Room 331–E, Administration Building, Washington, D.C. 20250, 202–447–3965.

FOREST SERVICE

Draft

Elkhorn Planning Unit, Helena National Forest, Mont., April 22: Proposed is the implementation of a revised multiple use plan for the 95,000 acre Elkhorn Planning unit of the Helena National Forest. Planning is designed to a Level 2 intensity, for such values as timber harvest, grazing, wildlife habitat, and recreation. The unit contains 40,100 acres of inventoried roadless areas, of which 33,600 acres would remain undeveloped. 48 pages). (ELR Order No. 40628).

Final

West Fork Ranger District, Bitterroot National Forest, Ravalli County, Mont., April 26: The statement refers to a proposed revised management plan for 157,075 acres of the West Fork Ranger District of the Forest. The planning unit has been subdivided into eight smaller units which will be managed for such values as timber production, wildlife habitat enhancement, and recreational values. Of the 157,075 acres in the unit, 111,240 are inventoried as roadless. Implementation of the plan will result in management keyed to road development of 75,946 acres. The remaining 81,129 acres will continue to be managed in a roadless condition. Comments made by: EPA, DOI, USDA, state and local agencies, and concerned citizens. (ELR Order No. 40677.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Mr. Francis X. Kelly, Director, Office of Public Affairs, Attn: DAEN–PAP, Office of Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314, 202–693–7166.

Draft

Starlings Creek Navigation Project, Accomacki County, Va., April 25: Proposed is the maintenance dredging of a navigation channel from Pocomoke Sound into Starlings Creek, where a turning basin will also be dredged. An estimated 55,000 cu. yds. of bottom material will be removed, and deposited offshore along Saxis Island. Adverse impact would occur to marine biota (Norfolk District) (21 pages). (ELR Order No. 40663.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202–343–3891.

NATIONAL PARK SERVICE

Final

Transpark Road, Bighorn National Recreation Area, Mont. and Wyo., April 26: The proposal calls for the construction of a 50 mile roadway from Horseshoe Bend, Wyoming to Fort Smith, Montana including a major bridge over Dryhead Canyon. The primary purpose of the road is that of increasing access to the National Recreation Area. Adverse impacts will include increased visitor impact, scarring by construction, bisecting of a wild horse range, the loss of some archeologic values, animal road mortality, and the visual impact of fencing. The Crow Indian Reservation will be crossed by the roadway (two volumes). Comments made by: USDA, DOI, EPA, DOT, and state and local agencies. (ELR Order No. 40666.)

Draft

Proposed Buffalo National River Master Plan, several counties, Arkansas, April 26: The statement refers to the proposed master plan for the Buffalo National River. The plan includes the acquisition of 95,730 acres of land. The action will result in increased visitation to the river; approximately 330 area residents will be displaced due to the acquisition. (ELR Order No. 40669.)

Proposed Klondike Gold Rush N.P., Washington and Alaska, April 26: The statement refers to the proposed legislative designation of a national historical park of four separate units to commemorate the Klondike Gold Rush epic. The proposed park will join at the international boundary with the Canadian Klondike Gold Rush Park, creating the first Canada-United States international historical park. Impact includes the removal of land from tax rolls; temporary construction disruption; and the effects of increased visitation (two volumes). (ELR Order No. 40673.)

BUREAU OF RECLAMATION

Final

Gila Gravity Main Channel, Arizona, April 26: The statement refers to the proposed rehabilitation and improvement of the Gila Main Canal. Included would be the benching of rock cuts, modifying of wash inlet structures, and construction of new maintenance roads. Adverse impact will include the loss of a small seepage pond and some waterline habitat; disturbance to wildlife; and changes in aesthetics. Comments made by: DOI, EPA, USDA, COE, and state and local agencies. (ELR Order No. 40670.)

BUREAU OF SPORTS FISHERIES AND WILDLIFE

Draft

Bombay Hook National Wildlife Refuge, Kent County, Del., April 26: Proposed is the legislative designation of two islands, totalling 120 acres, of the Bombay Hook National Wildlife Refuge as wilderness within the National Wilderness Preservation System. The option to intensively manage for maximum wildlife production would be foregone by the action (47 pages). (ELR Order No. 40668.)

INTERNATIONAL BOUNDARY AND WATER COMMISSION

Contact: Mr. T. R. Martin, ARA/Mex., State Department, Room 3906 A, Washington, D.C. 20520, 202–632–1317.

Draft

Tijuana River Flood Control Project, San Diego County, Calif., April 26: The statement refers to a proposed flood control project on the Tijuana River near the international boundary with Mexico. Project measures will include 300 feet of concrete lined trapezoidal channel; a 3,650 foot long energy dissipator; and 1.3 miles of levee. Adverse impact will include the loss of some riparian habitat (75 pages). (ELR Order No. 40676.)

The following statement was received by the Council on Environmental Quality on April 19, 1974, and should have appeared in CEQ's FEDERAL REGISTER listing of April 26, 1974. Because the statement was erroneously omitted, the commenting period will be calculated from April 26.

TENNESSEE VALLEY AUTHORITY

Contact: Dr. Francis Gartrell, Director of Environmental Research and Development, 720 Edney Building, Chattanooga, Tenn. 37401, 615–755–2002.

Draft

Duck River Project, Supplement, April 19: The document supplements a final statement which was filed with the Council on May 8, 1972. The supplement, which was prepared in response to a court order, contains information on: the Duck River project's impact on agriculture; the costs to be paid under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; the possibility of a wildlife management area near Normandy Reservoir; and the impact of the project on future canoeing and floating recreational demands (104 pages). (ELR Order No. 40688.)

GARY L. WIDMAN,
General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–32000/57]

NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered In Support of Applications

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB–37, East Tower, 401 M Street, SW., Washington, D.C. 20460.

On or before July 12, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held for the 60-day period before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received within 60 days, the applicants against whom the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 12, 1974.

APPLICATIONS RECEIVED

EPA Reg. No. 275–23. Abbott Laboratories, Abbott Park, North Chicago, Illinois 60064. *Dipel 150 Dust.* Active Ingredients: *Bacillus thuringiensis*, Berliner, Potency of 320 International Units per mg. (at least 0.5 billion viable spores per g.) 0.064%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 275–18. Agricultural and Veterinary Products Division, Abbott Laboratories, Abbott Park, North Chicago, Illinois 60064. *Dipel Biological Insecticide Wettable Powder.* Active Ingredients: *Bacillus thuringiensis*, Berliner, 16,000 International Units of Potency per mg. (at least 25 billion viable spores per g.) 3.2%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 4828–UO. ABCO Inc., P.O. Box J, Irwin, Pennsylvania 15642. *GF–250 Disinfectant—Sanitizer—Deodorizer.* Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 2.5%; n-Alkyl (68% C12, 21% C14) dimethyl ethylbenzyl ammonium chlorides 2.5%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 8866–EN. Arco Chemical Corporation, 4871 North 119th Street, Milwaukee, Wisconsin 53225. *Chlorine Concentrated Tablets for Swimming Pool Disinfection.* Active Ingredients: Trichlorostriazinetrione 99.5%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 34137–R. BECO Chemical Company, Inc., 3201–C N. Alameda Street, Compton, California 90222. *BECO Pine Oil Disinfectant.* Active Ingredients: Pine Oil 80%; Soap 10%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 3125–EOO. Chemagro Division of Baychem Corporation, Box 4913, Kansas City, Missouri 64120. *Dasanit+Di-Suston 4-2 Spray Concentrate Insecticide—Nematicide.* Active Ingredients: *O,O-*Diethyl *O* - [4 - (methylsulfinyl) phenyl] phosphorothioate 43%; *O,O*-Diethyl *S*-[2-(ethylthio)ethyl] phosphorodithioate 21%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 3125–GOO. Chemagro Division of Baychem Corporation, Box 4913, Kansas City, Missouri 64120. *Dasanit+Di-Syston 10%—5% Granular Insecticide—Nematicide.* Active Ingredients: *O,O-*Diethyl *O* - [4 - (methylsulfinyl) phenyl] phosphorothioate 10%; *O,O*-Diethyl *S*-[2 - (ethylthio)ethyl] phosphorodithioate 5%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 10147–GU. Birko Chemical Corporation, 5600 Brighton Boulevard, P.O Box 1315, Denver, Colorado 80201. *Birko Chemical Egg Wash Chlorinated Cleanser and Sanitizer.* Active Ingredients: Trisodium phosphate, dodecahydrate 90.83%; Sodium hypochlorite 3.22%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 7173–113. Chempar Chemical Co., Inc., 260 Madison Avenue, New York, New York 100'6. *Rozol Tracking Powder for Mice and Rats.* Active Ingredients: 2-[(p-chlorophenyl) phenylacetyl] 1,3-indandione 0.2%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 239–2402. Chevron Chemical Co., 940 Hensley Street, Richmond, California 94801. *Dibrom LVC 10.* Active Ingredients: Naled 15%; Aromatic Petroleum Derivative Solvent 80%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 5549–TN. Coastal Chemical Corp., P.O. Box 856, Greenville, North Carolina 27834. *Coastal 2% Methomyl Insecticide Dust.* Active Ingredients: Methomyl (S - methyl - N - [(methylcarbamoyl)oxy] thioacetimidate 2%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 4715–EUE. Colorado International Corp., 5321 Dahlia Street, Commerce City, Colorado 80022. *Best 4 Servis Brand Four-Way Hospital Disinfectant Cleaner.* Active Ingredients: Didecyl dimethyl ammonium chloride 4.25%; Tetrasodium ethylenediamine tetraacetate 1.60%; Sodium carbonate 2.00%; Sodium metasilicate, anhydrous 0.50%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA Reg. No. 3813-14. **Crouch Supply Company**, Inc., P.O. Box 906, Fort Worth, Texas 76101. *Crouch Improved Steep #2-A Liquid Acid Sanitizer Concentrate*. Active Ingredients: Phosphoric Acid 30.00%; Dodecyl Benzene Sulfonic Acid 5.00%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 14950-E. DAL Industrial Products, 2609 Parvia, Dallas, Texas 75212. *Dip Quick Kill Fogging Type*. Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl - 3 - (2-methylpropenyl)-cyclopropanecarboxylate 0.250%; Related compounds 0.034%; Aromatic petroleum hydrocarbons 0.331%; Petroleum distillate 99.375%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 11741-A. D. W. Davies and Company, Inc., 3200 Phillips Avenue, Racine, Wisconsin 53403. *San-A-Kleen 160*. Active Ingredients: Alkyl (60% C14, 30% C16, 5% C12, 5% C18) Dimethyl Benzyl Ammonium Chlorides 1.28%; Alkyl (68% C12, 32% C14) Dimethyl Ethylbenzyl Ammonium Chlorides 1.28%; Sodium carbonate 2.00%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA Reg. No. 3772-8. **Earl May Seed & Nursery Co.**, Shenandoah, Iowa 51601. *Earl May Chlordane E. C.* Active Ingredients: Technical Chlordane 42.29%; Aliphatic Petroleum Hydrocarbons 53.71%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 1871-OU. **Farmcraft**, Inc., 8800 SW Commercial Street, Tigard, Oregon 97223. *Farmcraft Dust Thuricide-HP 216M*. Active Ingredients: *Bacillus thuringiensis* Berliner, potency of 480 International Units (at least 600 thousand viable spores) per milligram 0.096%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 279-EITG. **FMC Corporation**, Agricultural Chemical Division, 100 Niagara Street, Middleport, New York 14105. *Thiodan 1.5 Toxaphene 6 EC*. Active Ingredients: Endosulfan (Hexachlorohexahydromethano-2,4,3-benzodioxathiepin oxide) 13.50%; Toxaphene 54.00%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 279-EOTU. **FMC Corporation**, Agricultural Chemical Division, 100 Niagara Street, Middleport, New York 14105. *Pyrenone 50-5 W-B Intermediate For Aqueous Pressurized Insecticide*. Active Ingredients: Pyrethrins 5.0%; Piperonyl Butoxide, Technical 50.0%; Petroleum Distillate 43.0%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 279-EOTL. **FMC Corporation** Agricultural Chemical Division, 100 Niagara Street, Middleport, New York 14105. *Captan Terraclor 10-10 Soil Treater*. Active Ingredients: Captan N-Trichloromethylthio-4-cyclohexene1,2 - dicarboximide 10.00%; Pentachloronitrobenzene 10.00%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 9598-2. **Fults Chemical**, Inc., P.O. Box 239, 863 Levin Avenue, Tulare, California 93274. *Iodet Iodine Disinfectant and Detergent Sanitizer*. Active Ingredients: Nonylphenox Poly(Ethyleneoxy) Ethanol-Iodine complex (Provides 1.75% Titratable Iodine) 17.0%; Phosphoric Acid 8.0%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 5905-GAG. **Helena Chemical Company**, 5100 Poplar Avenue, Memphis, Tennessee 38137. *Hel-Dust*. Active Ingredients: *O,O*-Diethyl *O*-[3-chloro-4-methyl-2-oxo-(2*H*)-1benzopyran-7-yl] phosphorothioate 1%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 2907-RL. **Arch C. Heller Co., P.O. Box 88, Darby, Pennsylvania 19023.** *Home Garden Fast Insect Killer*. Active Ingredients: Tetramethrin 0.250%; Related compounds 0.034%; (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl cyclopropanecarboxylate 0.106%; Related compounds 0.014%; Petroleum distillate 9.000%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 2907-RA. Arch C. Heller Co., P.O. Box 88, Darby, Pennsylvania 19023. *Exo Long Distance Spray Fast Acting Wasp & Hornet Killer*. Active Ingredients: Pyrethrins 0.10%; Piperonyl butoxide, technical 0.20%; N-Octylbicycloheptene dicarboximide 0.33%; o-Isopropoxyphenyl methylcarbamate 0.50%; Petroleum distillate 83.87%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 27995-E. Henry Interdonati, Inc., 295 Northern Boulevard, Great Neck, Long Island, New York 11021. *Strychnine Alkaloid N.F.X. Powder*. Active Ingredients: Strychnine Sulfate Pentahydrate 100%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 407-GTR. Imperial Inc., P.O. Box 423, Shenandoah, Iowa 51601. *Imperial Ciodrin Insecticide Emulsifiable*. Active Ingredients: Dimethyl phosphate of alpha - methylbenzyl 3-hydroxy-cis-crotonate 14.4%; Petroleum hydrocarbons 72.3%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 6311-G. K & E Chemical Co., 16810 Miles Avenue, Cleveland, Ohio 44128. *Klenztone Mint 7 Disinfectant Cleaner*. Active Ingredients: Alkyl (C14 58%, C16 28%, C12 14%) dimethyl benzyl ammonium chloride 2.0%; Isopropanol 2.0%; Methyl salicylate 0.5%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA Reg. No. 1381-5. Land O'Lakes, Inc., 2827 8th Avenue South, Fort Dodge, Iowa 50501. *Pyrenone Dairy Cattle Spray*. Active Ingredients: Piperonyl Butoxide technical 0.30%; Pyrethrins 0.03%; Mineral Oil 99.67%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 1381-46. Land O'Lakes, Inc., P.O. Box 423, Fort Dodge, Iowa 50501. *Ciodrin 150 Emulsifiable Concentrate*. Active Ingredients: Dimethyl phosphate of alpha-methylbenzyl 3 - hydroxy - cis - crotonate 13.1%; Aromatic Petroleum Hydrocarbons 76.9%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 12310-0. Misco International Chemicals, Inc., 1021 South Noel Avenue, Wheeling, Illinois 60090. *Glycol Disinfectant Deodorant Spray*. Active Ingredients: Isopropyl Alcohol 28.46%; Triethylene Glycol 10.80%; Propylene Glycol 3.0%; Paradiisobutylphenoxyethoxyethyl Dimethyl Benzyl Ammonium Chloride 0.24%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 259-LE. Missouri-Kansas Chemical Company, 1708-16 Campbell, Kansas City, Missouri 64108. *Balance Disinfectant and Cleaner*. Active Ingredients: Isopropanol 20%; Triethanolamine dodecyl benzene sulfonate 4.5%; Soap 3.5%; o-benzyl-p-chlorophenol 3.0%; o-phenylphenol 3.0%; Para-Tertiary-Amylphenol 1.5%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 1812-ERE. Parramore & Griffin, P.O. Box 188, Valdosta, Georgia 31601. *Methomill Tobacco Dust*. Active Ingredients: Methomyl [S-methyl-N-(methylcarbamoyl)oxy] thioacetimidate 2.25%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 32849-G. The Pest Patrol Ltd., 4743 North 11th Street, Philadelphia, Pennsylvania 19141. *XL-100*. Active Ingredients: Diphacinone (2-Diphenylacetyl-1,3-Indandione) 0.005%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 3095-14. Pic Corporation, 28 Sylvan Street, Linden, New Jersey 07036. *Pic Mosquito Coils*. Active Ingredients: D-trans allethrin (allyl homolog of Cinerin I) 0.25%; Vegetable matter & wood fiber 65.00%; Pyrethrum constituents 32.00%; Xylene-green 0.35%; Potassium nitrate 0.90%; Sodium Benzoate 0.50%; Polyethylene Glycol 1.00%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 655-LNG. Prentiss Drug & Chemical Co., Inc., 363 7th Avenue, New York, New York 10001. *Prentox Encapsulated Rax Powder #A For The Formulation of A Rodenticide Bait*. Active Ingredients: Warfarin (3-(a-acetonylbenzyl)-4-hydroxycoumarin) 0.5%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 655-LNU. Prentiss Drug & Chemcial Co., Inc., 363 7th Avenue, New York, New York 10001. *Prentox Encapsulated Rax Powder #B For The Formulation of A Rodenticide Bait*. Active Ingredients: Warfarin (3-(a-acetonylbenbyl)-4-hydroxycoumarin) 0.5%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 523-TO. Roberts Laboratories, 4995 North Main Street, Rockford, Illinois 61101. *Roberts Flygon 2-E Systemic Insecticide*. Active Ingredients: Dimethoate (0,0-dimethyl S-(N-methylcarbamoylmethyl) phosphorodithioate) 23.4%; Xylene 38.4%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 572-EIL. Rockland Chemical Co., Inc., P.O. Box 204, Caldwell, New Jersey 07006. *Rockland Pyrenone Vegetable Garden Spray*. Active Ingredients: Pyrethrins 0.02%; Piperonyl Butoxide, technical 0.20%; Petroleum distillate 0.08%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 14416-R. Wm. Schlueter & Son, 301 Nottingham Road, Syracuse, New York 13210. *Concord Pine Oil Disinfectant*. Active Ingredients: Pine Oil 75.45%; Soap 15.19%. Method of Support: Application proceeds under 2(c) of interim policy.

FEDERAL COMMUNICATIONS COMMISSION

[Report 699]

COMMON CARRIER SERVICES INFORMATION [1]

Domestic Public Radio Services Applications Accepted for Filing [2]

MAY 6, 1974.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cut-off dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60 day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[1] All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

[2] The above alternative cut-off rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio and Local Television Transmission Services (Part 21 of the rules).

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

20990-C2-MP-74, Polito Communications, Inc. (KUO606). Mod. Permit to change antenna system operating on 454.050 MHz located at 101 Walnut Street, Rochester, New York.

21058-C2-P-74, Bloomingdale Home Telephone Company, Inc. (KSJ817). C.P. to change antenna system operating on 152.72 MHz located at West side of Main Street at Smith Street, Bloomingdale, Indiana.

21306-C2-AL-74, Racom, Inc. (KCA752). Consent to Assignment of License from Racom, Inc., Assignor to Yankee Microwave Corporation, Inc., Assignee. Station: KCA752, Auburn, Maine.

21307-C2-AL-74, Northern Ohio Telephone Company (KQK723). Consent to Assignment of License from Northern Ohio Telephone Company, Assignor to General Telephone Company of Ohio, Assignee. Station: KQK723, Medina, Ohio.

21308-C2-P-74, S & H Communications (New). C.P. for a new 2-way station to operate on 152.18 MHz to be located NE of Harvester Rd., & Hwy 36, Chillicothe, Missouri.

21309-C2-P-(2)-74, Yakima County Communications (New). C.P. for a new 1-way station to operate on 158.70 MHz and 35.22 MHz to be located at Ahtanum Ridge, 4 miles South of Yakima, Washington.

21310-C2-P-74, Empire Paging Corporation (KEC933). C.P. to add antenna location #2 to operate on 454.150 MHz at 1 Strawberry Hill Court, Stamford, Connecticut.

21311-C2-AL-74, Jersey Information Center, Inc. Consent to Assignment of License from Jersey Information Center, Inc., assignor to Vineland Mobile Telephone Company, Assignee. Station: KSW209, Greenwich Township, New Jersey.

21312-C2-AP-74, Jersey Information Center, Inc. Consent to Assignment of Permit from Jersey Information Center, Inc., Assignor to Vineland Mobile Telephone Company, Assignee. Station KWH306, Salem, New Jersey.

21313-C2-P-74, General Communications Service, Inc. (KOF328). C.P. to relocate facilities operating on 158.70 MHz to be located at 4400 E. Broadway, Southern Arizona Bank Financial Center, Tucson, Arizona.

21314-C2-P-74, Williston Telephone Company (KIY790). C.P. for additional facilities to operate on 152.63 MHz located 5.75 miles, 58 degrees East of Williston, South Carolina.

21316-C2-TC-(2)-74, Communications Engineering, Inc. Consent to Transfer of Control from Mary C. Forsberg Harris, Robert Lally, Francis J. Nosek III, Transferors to Sernco, Inc. (formerly Serendipity, Inc.), a California corporation, Transferee. Stations: KWA634 and KWB404, Anchorage, Alaska.

21317-C2-P-74, Rogers Radio Communication Services, Inc. (KTS204). C.P. to add antenna location #6 to operate on 152.24 MHz located at 171 Hart Road, Batavia, Illinois.

21318-C2-P-74, Chillicothe Communications (New). C.P. for a new 2-way station to operate on 152.06 MHz to be located at Narrows Road, South of Mount Logan, Chillicothe, Ohio.

Renewal of License expiring April 1, 1974. Term: April 1, 1974, to April 1, 1979.

New Mexico

Associated Telephone Answering Service, KUO581.

Corrections

7231-C2-P-73, New Jersey Mobile Telephone Company, Inc. (KEK290). Change the location of the 454.20 MHz facility to 125 Broad Street, Elizabeth, New Jersey. Also, change the antenna system. All other particulars of operation to remain as reported on PN #643 dated April 9, 1973.

20133-C2-P-(2)-74, West Texas Rural Telephone Cooperative, Inc. (KUA223) Correct to read C.P. for two additional channels on frequencies 454.400 and 454.525 MHz for station KUA223. All other particulars to remain as reported on PN #661 dated August 13, 1973.

RURAL RADIO SERVICE

60282-C6-TC-74, Communications Engineering, Inc. Consent to Transfer of Control from Communications Engineering, Inc., Transferor to Sernco, Inc. (formerly Serendipity, Inc.), a California corporation, Transferee. Station: KXP26, Temporary-fixed.

60283-C6-P/L-74, The Mountain States Telephone and Telegraph Company (New). C.P. for a new rural subscriber station to operate on 158.01 MHz to be located 26.0 miles SSE of Point-of-Rocks, Wyoming.

POINT-TO-POINT MICROWAVE RADIO SERVICE

3549-C1-ML-74, American Telephone and Telegraph Company (KYC30). Bingham, Idaho. Mod. of License to change polarity from H to V on freqs. 3730 3810 4130 MHz towards Mud Lake, Idaho.

3550-C1-ML-74, Same (KYC29), Birch Creek, Idaho. Mod. of License to change polarity from H to V on freqs. 3770, 3850, 4170 MHz towards Atomic City, Idaho.

4009-C1-P-74, General Telephone Company of the Northwest. Inc. (KTF53), Paradise Ridge, 3.8 miles SE of Moscow, Idaho. Lat. 46°40'42" N., Long. 116°58'29" W. C.P. to add freq. 2126.8H MHz towards a new point of communication at Deary, Idaho.

4010-C1-P-74, Same (New), ½ Block South of Fifth on Oregon Street, Deary, Idaho. Lat. 46°48'01" N., Long. 116°33'12" W. C.P. for a new station on freq. 2176.8H MHz towards Paradise Ridge, Idaho.

4011-C1-P/ML-74, Hawaiian Telephone Company (KUQ93). Within the operating territory of the grantee. C.P. and Mod. of License to use portable Hewlett Packard Sweep Generators on freqs. 3700-4200. 5925-6425, and 10,700-11,700 MHz.

4012-C1-R-74, Same (KUQ93). Within the operating territory of the grantee. Application for Renewal of License for Term: May 23, 1974, to May 23, 1975.

4013-C1-AL-74, The Mountain States Telephone and Telegraph Company. Consent to Assignment of License from the Mountain States Telephone and Telegraph Company, Assignor to Navajo Communications Company, Assignee for Station KPP86—Defiance Plateau, Arizona.

4014-C1-P-74, The Offshore Telephone Company (New), Gulf of Mexico, Block 513, West Cameron Area. Lat. 28°26'04" N., Long. 93°11'53" W. C P. for a new station on freq. 2162.0H MHz towards East Cameron Block 261 on azimuth 81°21'; freq. 2178.0V MHz towards West Cameron Block 587 on azimuth 205°54'.

4015-C1-P-74, Same (WGI40), Block 261, East Cameron Area, Gulf of Mexico. Lat. 28° 28'19" N., Long. 92°54'55" W. C.P. to add freq. 2112.0H MHz towards Block 513, West Cameron on azimuth 261°21'.

4016-C1-P-74, Same (New), Block 587, West Cameron Area, Gulf of Mexico. Lat. 28° 09'39" N., Long., 93°20'47" W. C.P. for a new station on freq. 2128.0V MHz towards West Cameron Block 513 on azimuth 25°54'.

4017-C1-ML-74, American Telephone and Telegraph Company (KSA47), Cloverdale, 4.0 miles N of Wheaton (Du Page), Illinois. Lat. 41°56'05" N., Long. 88°05'57" W. Mod. of License to change polarity from H to V on freqs. 3710, 3790, 3870, 3950, 4030, and 4110 MHz towards Plato Center, Illinois, on azimuth 286°34'; from V to H on freqs. 3730, 3810, 3890, 3970, 4050, and 4130 MHz towards Plato Center, Illinois.

4018-C1-ML-74, Same (KSA48), Plato Center, (Kane) Illinois. Lat. 42°01'10" N., Long. 88°29'02" W. Mod. of License to change polarity from V to H on freqs. 3770, 3850, 3930, 4010, 4090, and 4170 MHz; from H to V on freqs. 3990, 4070, and 4150 MHz towards Cloverdale, Illinois, on azimuth 106°19'; change polarity from V to H on freq. 3830 and from H to V on freq. 4010 MHz towards Lee, Illinois on azimuth 242°15'.

4019-C1-P-74, Southern Bell Telephone and Telegraph Company (KJG22), Corner SW "E" Avenue and State Road #717 Belle Glade (Palm Beach) Florida. Lat. 26°41'02" N., Long. 80°40'56" W. C.P. to change freqs. and transmitter to 6226.9V, 6286.2V, 6404.8V MHz towards Loxahatchee, Florida, on azimuth 90°01''; change transmitter on freqs. 6226.9V and 6345.5V MHz towards Clewiston, Florida, on azimuth 286°21'.

CABLE TELEVISION TECHNICAL ADVISORY COMMITTEE PANEL 7

Notice of Meeting

MAY 2, 1974.

Pursuant to Public Law 92–463, notice is hereby given of a meeting of the CTAC Panel 7 Committee on May 16, 1974, to be held at 2025 M Street, N.W., Washington, D.C. in Room 6331 (Conference Room). The time of the meeting is 10 a.m.

The agenda is as follows:

(1) Chairman's Report.
(2) Review of Minutes of February 20, 1974 Meeting.
(3) Review of Points Raised at Ohio Meeting April 23, 1974.
(4) Review of First Draft of Final Report.
(5) Discussion of Other Areas.
(6) Establish Milestones for Next Meeting.
(7) New Business.
(8) Establish Date, Time and Place for Next Meeting.

Any member of the public may attend or may file a written statement with the Committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Inquiries may be directed to Mr. Cort Wilson, FCC, 1919 M Street, N.W., Washington, D.C. 20554—(202) 632–9797.

Dated: April 30, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

DATAPHONE DIGITAL SERVICE

Notice of Meeting

MAY 7, 1974.

A meeting has been called for 9:30 a.m., May 21, 1974 in the Commission's Offices for the purpose of obtaining clarification of AT&T's filing relating to Dataphone Digital Service (DDS). This meeting will afford an opportunity for any interested party to raise pertinent questions as an aid in the evaluation of the use of Data Under Voice, (DUV) facilities in the provision of DDS service. Representatives of the Bell System will be present to answer and discuss questions raised by the parties. Questions should be submitted in writing to

Thomas W. Scandlyn, Assistant Vice President
American Telephone and Telegraph Company
195 Broadway
New York, New York 10007

no later than May 14, 1974. Every effort should be made to limit the questions to important elements that will aid the Staff and the parties in their analysis and preparation of comments by the parties on AT & T's application for operational authority.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[Dockets Nos. 20030, 20031; Files Nos. BPH–8341, BPH–8472]

WAVV COMMUNICATIONS, INC. AND AVALON BROADCASTING CO.

Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of WAVV Communications, Inc., Avalon, New Jersey, Docket No. 20030, File No. BPH–8341; Request: 94.3 MHz, #232; 3 kW (H & V); 281 feet.

Avalon Broadcasting Co., Avalon, New Jersey, Docket No. 20031, File No. BPH–8472; Requests: 94.3 MHz, #232; 3 kW (H & V); 300 feet, for Construction Permits.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned and described applications for construction permits.

2. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

3. *Accordingly, it is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

(1) To determine which of the proposals would, on a comparative basis, better serve the public interest.

(2) To determine, in light of the evidence adduced pursuant to the foregoing issue which, if either, of the applications should be granted.

4. *It is further ordered,* That, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to apear on the date fixed for the hearing and present evidence on the issues specified in this Order.

5. *It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

Adopted: April 25, 1973.

Released: May 3, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

SELECTIVE SERVICE SYSTEM

[Temporary Instruction 613–6]

REGISTRANTS PROCESSING MANUAL

Mail-in Registration Survey

The Registrants Processing Manual is an internal manual of the Selective Service System. The following portion of that Manual is considered to be of sufficient interest to warrant publication in the FEDERAL REGISTER.

Temporary Instruction No. 613–6. Subject: Mail-In Registration Survey.

BYRON V. PEPITONE,
Director.

MAY 6, 1974.

[Temporary Instruction 613–6]

MAIL-IN REGISTRATION SURVEY

APRIL 29, 1974.

1. To provide State and National Headquarters with initial data by which the effectiveness of the Mail-In Registration Program can be evaluated, a one-year survey program has been established which will require quarterly reports from each local board and State Headquarters.

2. The Mail-In Registration Survey, (SSS Form 1–S (Temporary)), with format as shown in the Attachment to this Temporary Instruction shall be prepared by local boards to reflect the periods May 1–July 31, August 1–October 31, November 1–January 31, and February 1 to April 30, with the reports to be received by the State Headquarters within five days of the end of the reporting period.

3. Each State Director shall consolidate the quarterly reports from local boards within his state and prepare a state report to be received by National Headquarters, Operations Division, Attention: OOPR, on or before the 15th of the month following the end of the reporting period.

4. This Temporary Instruction will serve as the Procedural Directive for SSS Form 1–S (Temporary). State Directors will receive an initial distribution of this form in early May.

This Temporary Instruction will terminate on May 31, 1975.

BYRON V. PEPITONE.

[Docket No. CI74–560, etc.]

AUTHORIZATION TO SELL NATURAL GAS

Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

MAY 3, 1974.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 30, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI74–217]

AIKMAN BROTHERS

Notice of Petition for Special Relief

MAY 6, 1974.

Take notice that on April 25, 1974, Aikman Brothers (Petitioner), 1204 Vaughn Building, Midland, Texas 79701, filed a petition for special relief in Docket No. RI74–217, seeking a rate above the applicable area ceiling under Opinion No. 586. Petitioner seeks a price of 22.0 cents per Mcf for the sale of gas to Natural Gas Pipeline Company of America under its FPC Gas Rate Schedule No. 5 from the Zaerr Gas Unit, NW, Quinlan Field, Woodward County, Oklahoma. The petition is based upon the escalation in costs of materials, labor, and services in the oil and gas industry and the current energy crisis.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to

[2] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket No. RI74-218]

AIKMAN BROTHERS

Notice of Petition for Special Relief

MAY 6, 1974.

Take notice that on April 25, 1974, Aikman Brothers, (Petitioner), 1204 Vaughn Building, Midland, Texas 79701, filed a petition for special relief in Docket No. RI74-218 seeking a rate above the applicable area ceiling under Opinion No. 586. Petitioner seeks a price of 22.0 cents per Mcf for the sale of gas to Natural Gas Pipeline Company of America under its FPC Gas Rate Schedule No. 20 from the Ames Gas Unit, Quinlan Field, Woodward County, Oklahoma. The petition is based upon the escalation in costs of materials, labor, and services in the oil and gas industry and the current energy crisis.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 28, 1974 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

[Docket No. E-8755]

CENTRAL KANSAS POWER CO., INC.

Notice of Filing of Proposed FPC Electric Tariffs

MAY 6, 1974.

Take notice that Central Kansas Power Company, Inc., (CKP) on April 30, 1974, tendered for filing a proposed change in its existing FPC Electric Tariff, together with a proposed initial rate to its existing wholesale customer for service in excess of the amount covered by such existing tariff. The proposed rate filing would increase revenues from jurisdictional sales and service by $373,776, based upon the twelve-month period ending December 31, 1973, as adjusted for known and measurable changes in its costs and revenues.

Since the present rates became effective, the Company has experienced increases in the costs of capital, labor, materials and taxes. CKP states that the proposed rates are necessary to provide the Company with a fair return on its investment so as to maintain the financial integrity of the Company and enable it to continue to provide its customers with safe and adequate service. CKP requests an effective date of June 1, 1974.

Copies of this filing were served upon the Company's only jurisdictional customer, Sunflower Electric Cooperative, and upon the State Corporation Commission of the State of Kansas.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 21, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. CP72-15]

CITIES SERVICE GAS CO.

Notice of Petition To Amend

MAY 6, 1974.

Take notice that on April 22, 1974, Cities Service Gas Company (Petitioner), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP72-15 a petition to amend further the order of the Commission issued in said docket on November 1, 1971 (46 FPC 1110), as amended July 17, 1972 (48 FPC 102), April 20, 1973 (unreported), and January 21, 1974 (51 FPC ——), pursuant to section 7(c) of the Natural Gas Act authorizing an exchange of natural gas between Petitioner and Arkansas Louisiana Gas Company (Arkla), by authorizing the construction and operation of additional points of delivery and a modification in the transportation charge paid under the exchange agreement, all as more fully set forth in the petition to amend, which is on file with the Commission and open to public inspection.

By the order issued on November 1, 1971, as amended by the orders issued July 17, 1972 and April 20, 1973, Petitioner was authorized, in order to aid Arkla in transporting natural gas from certain wells in Hemphill and Roberts Counties, Texas, and Woodward County, Oklahoma, to receive under an exchange agreement with Arkla, dated June 11, 1971, up to 10,000 Mcf per day of natural gas from three points in Hemphill County and one point in Woodward County, and to deliver to Arkla an equivalent amount of gas at points in Reno and Rice Counties, Kansas, and Caddo County, Oklahoma. Arkla was to pay a transportation charge of 6 cents per Mcf of gas, although it was not clear for which volumes of gas Arkla was to pay. Said agreement was to continue for two years from November 1, 1971, or until Arkla constructed its own facilities for transporting gas from said areas, whichever came first. The amending order issued January 11, 1974, provided for Petitioner to deliver gas to Arkla, as part of the exchange, from the MuCulloch-State Well in Hemphill County and for the parties to continue the exchange until March 31, 1978. Said order clarified that Arkla was to pay a transportation charge of 6 cents per Mcf for the volume of gas delivered only at the three Hemphill County points at which Arkla delivered gas to Petitioner.

Petitioner herein requests, pursuant to a further amendment to the June 11, 1971, exchange agreement, authority to construct and operate two additional delivery points on its pipeline in Woods and Ellis Counties, at a combined cost of $10,200, in order to receive gas from Arkla; and to operate, as an additional point of delivery, existing facilities, constructed pursuant to budget-type authority granted by the Commission order issued on November 6, 1973 (50 FPC ——), which facilities are connected to the Shaller Well in Hemphill County, in order to receive for Arkla's account Arkla's share of the production from the Shaller Well lease.

Petitioner states that Arkla has filed in Docket No. CP72-9 a petition to amend further the November 1, 1971, order by permitting Arkla to receive for Petitioner's account, pursuant to the further amendment to the June 11, 1971, agreement, the 12.5 percent interest committed to Petitioner from the McCulloch-Wright Well in Hemphill County.

Petitioner further proposes that Arkla pay to Petitioner, under said further amendment to the exchange agreement, a transportation charge of 6 cents per Mcf for each Mcf of exchange gas transported by Petitioner from all seven exchange points at which Arkla delivers gas to Petitioner after deducting therefrom the volumes of exchange gas delivered by Petitioner to Arkla at the exchange point in Caddo County, and the McCulloch-State and McCulloch-Wright exchange points in Hemphill County.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-10911 Filed 5-10-74;8:45 am]

[Docket No. CP74-269]

COLUMBIA GAS TRANSMISSION CORP.

Notice of Application

MAY 6, 1974.

Take notice that on April 19, 1974, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE, Charleston, West Virginia 25314, filed in Docket No. CP74-269 an application pursuant to sections 7 (b) and (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a natural gas transmission loop replacement pipeline and an increase in the volumes of natural gas exchanged by it with Washington Gas Light Company (Washington Gas) all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 8.4 miles of 36-inch transmission pipeline loop in Loudoun County, Virginia, replacing approximately 20.1 miles of existing 26-inch gas transmission pipeline, which has experienced failures during operation and testing, in the same county.[1] Applicant alleges that the capacity of the proposed line is sufficient to replace the loss in capacity due to the retirement of the 20.1 miles of pipeline and that the new capacity will be sufficient to permit the proposed increase in service to Washington Gas.

Applicant states that it was authorized by the Commission in Docket No. CP71-198 on April 26, 1971 (45 FPC 600), to provide an exchange service to Washington Gas pursuant to a letter agreement between Washington Gas and Applicant dated December 15, 1970, which agreement is on file with the Commission as Applicant's Rate Schedule X-30 in its FPC Gas Tariff, Original Volume No. 2. Applicant indicates that it receives 35,000 Mcf of gas per day from Washington Gas' subsidiary, Hampshire Gas Company, at Applicant's Lost River Compressor Station in Hardy County, West Virginia, and that Applicant simultaneously delivers equivalent volumes to Washington Gas at existing points of delivery in Washington Gas' market area. Applicant states that Washington Gas has requested that Applicant increase the existing exchange service from 35,000 Mcf of gas per day to 50,000 Mcf of gas per day. Applicant indicates that it is willing to provide the expanded service to Washington Gas and indicates that the terms and conditions of the new exchange detailed under an April 9, 1974, agreement between Applicant and Washington Gas will be identical to the existing agreement except for the volumes exchanged. The application states that no change is contemplated in the basis of Applicant's charges to Washington Gas and that the identical unit rate is maintained and applied to the proposed increase in exchange volumes.

Applicant estimates that the cost of the proposed construction, including Commission filing fees is $2,710,000, which cost will be financed by the sale of securities to Applicant's parent company, Columbia Gas System, Inc. Applicant also indicates that the estimated net debit to retirement due to the proposed retirement of the 20.1 miles of 26-inch pipeline will be $1,468,105.

Any person desiring to be heard or to make any protests with reference to said application should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to teh authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-10909 Filed 5-10-74;8:45 am]

[1] The application indicates that 21,634 feet of 26-inch pipe will be removed, 32,777 feet of 26-inch pipe will be utilized in place as ground bed, and the remaining 51,458 feet of 26-inches pipe will be retired in place.

[Docket No. CP73-70]

COLUMBIA GULF TRANSMISSION CO.

Notice of Amendment to Application

MAY 6, 1974.

Take notice that on April 22, 1974, Columbia Gulf Transmission Company (Applicant), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP73-70 an amendment to its application currently pending before the Commission in said docket, which application requests a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act for authorization to exchange and transport natural gas, by proposing an additional delivery point for said exchange of natural gas and additional delivery volumes, all as more fully set forth in said amendment to the application, which is on file with the Commission and open to public inspection.

In its application Applicant proposed, pursuant to an agreement between Applicant and Amoco Production Company (Amoco), dated July 31, 1972, to take natural gas into its pipeline system for the account of Amoco at two points in Vermilion Parish, Louisiana, and to deliver said gas into the pipeline system of Florida Gas Transmission Company (Florida Gas) at the point near Judice, Lafayette Parish, Louisiana, where Applicant's pipeline and Florida Gas' pipeline intersect at a price of 0.434 cent per Mcf of gas.

Applicant states that its affiliate, Columbia Gas Transmission Corporation (Columbia), has entered into a gas purchase and sales agreement with Amoco providing for the purchase and sale for resale of 50 percent of Amoco's available gas from the Lake Boudreaux Field, Terrebonne Parish, Louisiana, provided a certificate of public convenience and necessity satisfactory to the parties is issued in this docket, as amended. Applicant further states that it has been requested to transport such gas for Columbia and intends to attach the Lake Boudreaux reserves to its existing transmission system by constructing gas purchase facilities under its budget-type authorization in Docket No. CP74-88.

In connection with said purchase and sale for resale of gas, Applicant proposes, pursuant to an amendment, dated March 7, 1974, to the exchange and transportation agreement of July 31, 1972, to transport for Amoco through Applicant's facilities the 50 percent of gas from the Lake Boudreaux Field which is not committed to Columbia and redeliver said gas to Florida Gas for Amoco's account at the Judice delivery point at a price of 2.28 cents per Mcf of gas.

Any person desiring to be heard or to make any protest with reference with said amendment should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the

V 39 I 93 MAY 13 74 XUM

regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed petitions to intervene or protests need not file again.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-10912 Filed 5-10-74;8:45 am]

[Docket No. CP74-268]

CONSOLIDATED GAS SUPPLY CORP. AND NORTH PENN GAS CO.

Notice of Joint Application

MAY 6, 1974.

Take notice that on April 18, 1974, Consolidated Gas Supply Corporation (Consolidated), 445 West Main Street, Clarksburg, West Virginia 26301, and North Penn Gas Company (North Penn), 76-80 Mill Street, Port Allegany, Pennsylvania 16743, filed in Docket No. CP74-268 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the joint operation and further development of the Tioga Storage Pool, Tioga County, Pennsylvania, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicants state that the Tioga Storage Pool consists of the Palmer Storage Pool (West End Tioga), which has been operated by North Penn or its predecessor in interest, Allegany Gas Company, under Commission order issued March 16, 1943 (3 FPC 943), and the Boom Storage Pool (East End Tioga), which has been operated by Consolidated or its predecessor in interest, New York State Natural Gas Corporation, under Commission Orders issued on October 27, 1942 (3 FPC 844), September 12, 1945 (4 FPC 1047), March 29, 1950 (9 FPC 620), and January 2, 1958 (19 FPC 5). Applicants state further that these storage pools are in geological communication, which fact has resulted in the migration from time to time of gas toward that portion of the pool which was being operated at a lower pressure, thereby depriving the applicant whose gas had migrated of the full turnover capability of its inventory.

In order to permit each applicant to make full use of its storage capability, Applicants propose to connect their respective pipeline facilities and to operate jointly the said portions of the Tioga Pool, pursuant to an agreement, effective January 1, 1974, although each applicant will remain in full control and ownership of all facilities which it has previously constructed and proposes to construct.

In furtherance of the above scheme, Applicants propose the following:

(1) To construct and operate approximately 2,500 feet of 8-inch pipeline to interconnect their respective pipeline facilities in the Tioga storage area, in order to maintain an open system that will equalize pressures throughout the field,

(2) To revamp their existing pipeline system to permit operation throughout both areas of the pool at 1,500 psig;

(3) To reclassify their respective base gas storage inventories in the pool from 5 million Mcf for North Penn and 4,720,225 Mcf for Consolidated to 6 million Mcf for each;

(4) To increase storage turnover capability from 5.9 million Mcf for North Penn and 6 million Mcf for Consolidated to 9 million Mcf for each.

In addition, North Penn intends to construct approximately 15,450 feet of 6-inch and 400 feet of 8-inch pipeline to connect 8 additional wells for active storage.

Applicants estimate the cost of these facilities to be $1,640,465 for Consolidated to be financed from funds on hand and funds to be obtained from Consolidated's parent corporation, Consolidated Natural Gas Company, and $851,730 for North Penn to be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 24, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-10914 Filed 5-10-74;8:45 am]

[Docket No. CI74-589]

CONTINENTAL OIL CO.

Notice of Application

MAY 6, 1974.

Take notice that on April 22, 1974, Continental Oil Company (Applicant), P.O. Box 2197, Houston, Texas 77001, filed in Docket No. CI74-589 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale of natural gas in interstate commerce to Texas Gas Transmission Company (Texas Gas) from the Block 217 Field, Eugene Island Area, offshore, Louisiana, and delivery of said gas to Michigan Wisconsin Pipe Line Company, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas to Texas Gas within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale after the end of the emergency period for one year at 50.0 cents per Mcf at 15.025 psia, subject to upward and downward Btu adjustment from a base of 1,000 Btu per cubic foot of gas, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant is willing to accept a certificate conditioned to a price of 45.0 cents per Mcf. Applicant estimates monthly deliveries of gas to Texas Gas at 30,000 Mcf.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion, believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[Docket No. E-7769]

DELMARVA POWER & LIGHT CO.

Notice of Tendered Tariff Sheets

MAY 6, 1974.

Take notice that on April 12, 1974, Delmarva Power and Light Company (Delmarva) tendered the followir.g revised tariff sheets for filing with the Commission:

Delmarva Power & Light Company:
First Revised Leaf No. 6—FPC Electric Tariff Volume No. 4
Supplement No. 2 to Rate Schedule FPC No. 35
Delmarva Power & Light Company of Maryland:
First Revised Leaf No. 6—FPC Electric Tariff Volume No. 4

Delmarva states that this filing is being made pursuant to the Commission order of April 1, 1974, in this docket and that the changes reflected in the tariff sheets will be effective March 1, 1973, as required in that order. Delmarva states further that a revised fuel adjustment clause will be prepared and filed, as required by Ordering Paragraph (B) of the Commission's April 1, 1974 order, as promptly as such clause can be drafted and the supporting material completed. At that time, Delmarva states, the fuel adjustment clause in Supplement No. 2 to Rate Schedule FPC No. 35 will be revised and filed as well.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 16, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-10915 Filed 5-10-74;8:45 am]

[Docket No. CI74-579]

HYDROCARBON DEVELOPMENT CORP.

Notice of Application

MAY 6, 1974.

Take notice that on April 1, 1974, Hydrocarbon Development Corp. (Applicant), P.O. Box 2806, Corpus Christi, Texas 78403, filed in Docket No. CI74-579 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to transport natural gas in interstate commerce for Occidental Petroleum Corporation (Occidental), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that in the early part of 1966, Lumar Gas Corporation (Lumar) borrowed $150,000 from Occidental for use in the construction of 8.6789 miles of 8-inch pipeline from the Lacal Field, Willacy County, Texas, to a connection with Texas Eastern Transmission Corporation's 30-inch transmission line in Hidalgo County, Texas. Under the terms of the loan agreement Lumar was to repay such monies, including interest calculated at a rate of 5½ percent per annum, to Occidental with repayment to be made at the rate of one cent per Mcf of gas transported through said 8-inch pipeline produced by Occidental, its associates, and others from leases held by them in the Lacal Field, which gas would subsequently be sold in interstate commerce.

Applicant states that it acquired the subject pipeline from Lumar and has continued to transport gas in accordance with the terms of the loan agreement between Lumar and Occidental as described above. Applicant states further that $50,000 of the loan is still due and owing Occidental. Applicant asserts that inasmuch as Occidental, its associates, and others are currently producing only 5,000 Mcf of gas per day from the Lacal Field, repayment of such indebtedness solely on the basis of the original rate of one cent per Mcf of such production transported is doubtful. Applicant, therefore, requests authorization to transport gas produced by Occidental in the Lacal Field for a transportation charge of one and one-half cents per Mcf for all gas so transported for delivery to Texas Eastern for resale in interstate commerce until such indebtedness is satisfied and for a transportation charge of one-half cent per Mcf transported thereafter, pursuant to an agreement between Applicant and Occidental dated December 29, 1972.

Applicant indicates that Occidental has filed an application in Docket No. CI74-260 requesting a limited term certificate authorizing such a sale of up to 5,000 Mcf of gas per day at 45 cents per Mcf at 14.65 psia to Texas Eastern, which gas may be delivered by Applicant for Occidental. Applicant states that it is currently transporting 4,000 Mcf of gas per day through the subject pipeline for Occidental.

Any person desiring to be heard or to make any protests with reference to said application should on or before May 24, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to United Gas Pipe Line Company (United) from the Lake Hatch Field, Terrebonne Parish, Louisiana, by permitting said sale to continue for an additional year at an increased price, all as more fully set forth in the petition to amend, which is on file with the Commission and open to public inspection.

The order of May 4, 1973, authorized Petitioner to sell to United up to 2,000 Mcf of natural gas per day from the subject acreage for one year ending May 4, 1974, at a rate of 45.0 cents per Mcf at 15.025 psia, subject to upward and downwarn Btu adjustment from a base of 1,000 Btu per cubic foot of natural gas, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70).

Petitioner requests the Commission to amend said certificate to authorize said sale at 59.0 cents per Mcf of gas, subject to Btu adjustment, for one year commencing with the date of expiration of

V 39 I 93
MAY 13 74
XUM

the certificate or the date on which Petitioner shall be issued and shall accept the certificate amendment as sought herein, whichever shall last occur. Applicant's amended contract with United provides that if authorization is not received prior to May 5, 1974, Applicant shall commence deliveries thereunder within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29).

Any person desiring to be heard or to make any protest with reference with said petition to amend should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20423, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

MARY B. KIDD,
Acting Secretary.

[Docket No. CP74–272]

LONE STAR GAS CO.

Notice of Application

MAY 6, 1974.

Take notice that on April 22, 1974, Lone Star Gas Company (Applicant), 301 Harwood Street, Dallas, Texas 75201, filed in Docket No. CP74–272 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and the transportation of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 18.5 miles of 8-inch pipeline extending its existing Line E–32 from a point southeast of Durant, Bryan County, Oklahoma, to Line E, east of Denison, Grayson County, Texas. Applicant further proposes to install one 400 horsepower reciprocal compressor unit at the Denison Compressor Station. Applicant states that the proposed facilities are required due to a decline in the reserves and deliverability in the Cumberland Field area which necessitate the transportation of volumes of gas from Line E to augment gas supply to the Southeast Oklahoma area. Applicant indicates that its existing pipeline system capacity is not sufficient to transport the required volumes of gas.

The application states that the proposed facilities will not be installed for the purpose of providing new service, but for the continued service of residential, commercial and industrial customers in the Southeastern Oklahoma area and that such facilities are required to provide service to these customers during the 1974–75 heating season. Applicant estimates the cost of the proposed extension of Line E–32 to be $781,261 and the compressor facilities to be $189,000, such costs to be financed with working capital.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 24, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74–10918 Filed 5–10–74;8:45 am]

[Docket No. RP72–149]

MISSISSIPPI RIVER TRANSMISSION CORP.

Notice of Proposed Rate Changes

MAY 6, 1974.

Take notice that on April 29, 1974 Mississippi River Transmission Corporation (MRT) tendered for filing the following tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1:

1. Eighteenth Revised Sheet No. 3A
2. Alternate Eighteenth Revised Sheet No. 3A

MRT states the said Sheets are to supersede either Substitute Seventeenth Revised Sheet No. 3A or Alternate Substitute Revised Sheet No. 3A, as may be appropriate.

MRT states that the said Revised Sheets are being filed pursuant to the provisions of its Purchased Gas Cost Adjustment Clause to its tariff to reflect rate change filing made its pipeline supplier.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. CP74–270]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Application

MAY 6, 1974.

Take notice that on April 19, 1974, Natural Gas Pipeline Company (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP74–270 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon its Compressor Station No. 157 in Stephens County, Oklahoma, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant proposes to abandon its Compressor Station No. 157, which consists of one 2,745 SHP compressor unit and appurtenant facilities, located on Applicant's 26-inch pipeline extending from Wise County in North Central Texas to Hutchinson County in the Texas Panhandle. Applicant states that said compressor station was placed in service on December 28, 1965, pursuant to a Commission order issued on August 13, 1965 (34 FPC 507), in order to increase by 185,000 Mcf the daily design sales capacity of Applicant's transmission system, and that that segment of Applicant's system served by Compressor Station No. 157 is now operating at reduced capacity due to decline in gas volumes from sources of supply in the general area upstream from the station. Applicant states further that the proposed abandonment will not reduce system capability of transporting scheduled new gas supplies.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 24, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74–10920 Filed 5–10–74;8:45 am]

[Docket No. CP74–260]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Application

MAY 6, 1974.

Take notice that on March 29, 1974, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP74–260 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to sell and deliver additional volumes of natural gas during winter months to 17 existing customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell and deliver 47,846 Mcf of gas per day, plus additional quantities of gas as available, to 17 existing customers who participated with Applicant in funding the development by Shell Oil Company (Shell) of certain reserves underlying nine blocks offshore Louisiana. The application states that these customers reimbursed Applicant in the aggregate approximately $36,000,000 of the $40,000,000 advanced by Applicant to Shell pursuant to an agreement dated April 19, 1971.

Under related agreements with Applicant, participating customers, in consideration for their funding, received rights to obtain from Applicant a winter service based on deliverability from the Shell reserves. These agreements provide that such service is to commence when the average deliverability of gas contracted for purchase from Shell by Applicant reached 100,000 Mcf. Sales are to be limited to 100 times the peak day amount of such service during the Winter Period and will be made to said participating customers with deliveries and sales of the subject gas to be made in proportion to their contribution in the funding and under the terms and conditions of their agreements with Applicant and a new Rate Schedule WS. A tabulation of said customers' proportionate shares of winter service daily quantity for deliveries from the Shell reserves of 51,000 Mcf per day is included as the appendix hereto.

Applicant anticipates that the Shell deliveries will attain 51,000 Mcf per day by November 1, 1974, and although the terms of the funding arrangements do not require an offer of service until daily availability reaches 100,000 Mcf, Applicant proposes to initiate such deliveries of gas to meet the customers' need for additional winter gas supply. Applicant projects that this service will commence December 1, 1974; however, the service is not to be implemented until, in Applicant's judgment, deliveries from the Shell reserves can be maintained at the level of 51,000 Mcf per day.

The application states that the proposed service would make available to participating customers 100/365 of the availability from the Shell reserves on an annual basis providing such customers with 100 day's deliverability from these reserves over a 120-day period commencing December 1 of each year. The remainder of the gas from the Shell reserves will be added to Applicant's overall gas supply.

Applicant states further that it does not propose to construct any new facilities and that flow gas from the Shell reserves will be utilized to serve customers whose needs are now supplied from storage, thus releasing storage gas for participating customers without jeopardizing current levels of service to all customers. The proposed rate for the new service is $1.03 per Mcf.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 24, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

APPENDIX

Sales and Deliveries to Participating Customers based on deliveries from the Shell reserves at the level of 51,000 M ft³ [1] of natural gas per day:

DMQ–1 customers	Winter service daily quantity (thousand cubic feet) [1]

[Docket No. E–8752]

NORTHERN STATES POWER CO. (MINNESOTA)

Notice of Application

MAY 7, 1974.

Take notice that on April 29, 1974, Northern States Power Company (Applicant) filed an application pursuant to section 204 of the Federal Power Act

V 39 I 93
MAY 13 74
XUM

seeking an order authorizing the Applicant to enter into Guaranty Agreements with Midland National Bank of Billings, Montana, guaranteeing payment of the principal and interest on borrowings by Cormorant Corporation, a Montana corporation, a wholly owned subsidiary of applicant. The principal amount of such obligations shall not exceed $1,000,000 at any one time.

Applicant is incorporated under the laws of the State of Minnesota with its principal business office at Minneapolis, Minnesota, and is engaged primarily in the electric utility business in central and southern Minnesota, southeastern South Dakota, and in the Fargo-Grand Forks and Minot areas of North Dakota.

Expenditures during 1974 for the total construction program of Applicant are estimated at $258 million, of which $239 million is for electric facilities, $11 million for gas facilities, and $8 million for heating, telephone, and general facilities.

Any person desiring to be heard or to make any protest with reference to said application should, on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file and is available for public inspection.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74–10922 Filed 5–10–74;8:45 am]

[Docket No. E–8751]

NORTHERN STATES POWER CO.

Notice of Firm Power Agreement

MAY 6, 1974.

Take notice that on April 26, 1974 Northern States Power Company (NSP) tendered for filing as an initial rate schedule Firm Power Agreement dated April 24, 1974 between NSP and the City of Sleepy Eye, Minnesota (Sleepy Eye).

NSP states the said Agreement provides for the sale of 200 KW of power and associated energy to Sleepy Eye for the period May 20, 1974 to May 19, 1975. The charge for such service is determined by the following rate:

1. Capacity Charge: $4260 per year per kilowatt of Billing Demand.

2. Energy Charge: 0.66¢ per kwh.

3. Fuel Clause: Adjustment of .012¢ per kwh for one-half cent increase above or decrease below 47.50¢ per million BTU and for each whole cent thereafter in the cost of fuel used in the preceding month by NSP's system.

NSP proposes an effective date of May 20, 1974 for said Agreement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 16, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74–10929 Filed 5–10–74;8:45 am]

[Docket No. CP66–43]

TEXAS EASTERN TRANSMISSION CORP.

Notice of Petition To Amend

MAY 6, 1974.

Take notice that on April 19, 1974, Texas Eastern Transmission Corporation (Petitioner), P.O. BOX 2521, Houston, Texas 77001, filed in Docket No. CP66–43 a petition to amend the Commission's order issued April 29, 1966, in said docket (35 FPC 655), pursuant to section 7(c) of the Natural Gas Act, by authorizing, to the extent required, the repair or replacement of Petitioner's Staten Island, New York, LNG storage tank and connecting facilities and by deleting the rate condition imposed by ordering paragraph (G) of the order of April 29, 1966, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

The order of April 29, 1966, among other things, authorized Petitioner to construct and operate the LNG facility on Staten Island with a total capacity of 2,040,000 Mcf and a vaporization-redelivery capability of 199,000 Mcf per day. Said order also contained the following condition in ordering paragraph (G) thereof:

(G) That Applicant shall not, in any rate proceeding, assess against any other class of service any deficiency in revenues under its Storage Service Rate Schedule below the cost of service associated with (i) the facilities proposed herein to be assigned to storage Service deliveries, plus (ii) any additional facilities which may be required to provide the Storage Service deliveries.

Petitioner states that on February 10, 1973, the LNG tank, which constituted a major, integral part of the LNG facility, was partially destroyed by fire and that at the time the fire occurred, the tank was undergoing repair and maintenance work. Petitioner now requests authorization, to the extent required, to repair or replace the LNG tank and to modify the storage capacity of the LNG facility as previously certificated. Applicant indicates that the proposed repair or replacement operations will involve the installation of a double-walled, 9 percent nickel-steel liner for cryogenic service and a permanently attached dome roof of carbon steel which has a 9 percent nickel-steel sector in the process piping area. The installation operations will be conducted within the original concrete wall and earthen berm and will occupy the same location and land area. Applicant further states that upon completion of repairs, the LNG tank will have a total storage capacity of 1,734,000 Mcf, and further that the total maximum daily delivery quantity and total storage volume under the Storage Service Rate Schedule previously authorized will be unchanged, with no reduction or abandonment of service rendered by means of such facility. The application shows that the total estimated cost of the proposed project is $21,817,000.

Further, Petitioner requests deletion of the condition imposed by ordering paragraph (G) of the order of April 29, 1966. Petitioner asserts that such condition provided in effect that Petitioner should absorb any deficiency in revenue from the operation of the Staten Island LNG facility not recovered through the Storage Service Rate Schedule. Petitioner asserts further that at the time the certificate was initially issued, the facility capacity in excess of the 1,100,000 Mcf necessary for the storage service was not required for peaking service to Petitioner's jurisdictional customers. It is stated that because of changing load patterns and gas supply conditions, all of the capacity of the Staten Island LNG facility in excess of the 1,100,000 Mcf required for the storage service is now neeeded to satisfy peak-day requirements and to provide flexibility in Petitioner's system to assure maximum utilization of its facilities and the rendering of the highest possible level of service to Petitioner's customers. Petitioner states that all customers will benefit from the use and operation of this portion of the capacity of the Staten Island LNG facility, and, accordingly, all of the costs associated therewith are properly includable in Petitioner's jurisdictional cost of service.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

MARY B. KIDD,
Acting Secretary.

TOLEDO EDISON CO.

[Docket No. E–7929]

Notice of Revised Tariff Sheets

MAY 7, 1974.

Take notice that The Toledo Edison Company (Toledo) on April 30, 1974, tendered for filing service agreements with the City of Bryan, Ohio, and the village of Pemberville, Ohio, under Toledo's FPC Electric Tariff, Original Volume No. 1. Toledo states that the existing contracts (Rate Schedule FPC Nos. 7 and 17) with these two customers terminate on May 31, 1974, and that as of that date they will be served under Toledo's Tariff. An effective date of June 1, 1974, is requested.

Any person desiring to be heard or to protest said unexecuted service agreements should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 20, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of these revised tariff sheets are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74–10931 Filed 5–10–74;8:45 am]

[Docket No. RP74–20]

UNITED GAS PIPE LINE CO.

Order Granting Permission To Amend Suspended Rates

MAY 6, 1974.

On September 21, 1973, United Gas Pipe Line Company (United) filed in this docket proposed changes in its FPC Gas Tariff, First Revised Volume No. 1. The proposed changes would increase revenues from jurisdictional sales and services by approximately $34.9 million, based upon the 12 month period ended June 30, 1973, as adjusted. By order of November 6, 1973, the Commission suspended the proposed charges until April 6, 1974, set the matter for hearing and permitted various interventions.

On February 15, 1974, as later supplemented on March 8, 1974, United filed with the Commission Substitute Fifteenth Revised Sheet No. 4, with a proposed effective date of April 6, 1974. United states in its filing that the Substitute Sheet is intended to modify those tariff sheets filed on September 21, 1973, and suspended until April 6, to reflect certain events which have occurred that materially affect the rates reflected therein. United states that the Substitute Sheet makes the following changes:

(1) The Sheet reclassifies and reallocates the fixed transmission costs in the proportions of 25 percent to demand charges and 75 percent to commodity charges in accordance with the Commission's cost allocation embodied in Order No. 671.

(2) The Sheet reflects changes in the Louisiana Severance Tax rate enacted in December 1973.

(3) The Sheet includes the current gas cost of 29¢ per Mcf as reflected in United's PGA filing in Docket No. RP72–133, which became effective January 1, 1974.

(4) The Sheet changes the surcharge adjustment of .69¢ as filed, which expired December 31, 1973, and substitutes the surcharge adjustment of 2.06¢ applicable to the period commencing January 1, 1974.

The February 15 filing was noticed on March 20, 1974, with protests and petitions to intervene due on or before April 1, 1974. On March 26, 1974, Laclede Gas Company (Laclede), previously permitted to intervene in the docket, filed a Protest which states that United's Substitute Sheet is, at least in part, a new general rate increase filing which appears to recover additional commodity charges in excess of proposed demand reductions. Laclede also asserts that there is no apparent reason to support what appears to be a redesign of rates in purported compliance with the Commission's order issued October 31, 1973, in Docket No. RP72–75 (Phase II) without a proper allocation of costs which such rates are designed to recover, and that there may be a misallocation of costs between jurisdictional and nonjurisdictional service. Laclede also takes exception to the inclusion of the effects of the Louisiana severance tax increase and increased average cost of purchased gas in an existing rate proceeding rather than in its deferred purchased gas account. Laclede urges that the Commission reject the proposed Substitute Sheet, or, in the alternative, suspend the filing for the full statutory period and set the matter for hearing. On April 1, 1974, Memphis Light, Gas and Water Division, City of Memphis, Tennessee (Memphis) filed a Protest and Petition to Intervene. Memphis was permitted to intervene in this docket by order of November 6, 1973, and therefore no further permission to intervene need be granted. Memphis also requests that the substitute tariff sheet be rejected and if not rejected, be suspended for the full statutory period of five months. In addition to making substantially the same arguments as made by Laclede, Memphis states that United's filing should reflect other determinations in Opinion No. 671 which affect the rates originally filed in this docket. Memphis states that the entire original filing should be reformed, as such reformation would reduce the unit rates originally

V 39 I 93 MAY 13 74 XUM

filed, because, since United made its original filing, it has been determined that sales by United exceed the original estimate by 24,579,244 Mcf.

By order of March 29, 1974, the Commission, inter alia, denied United special permission to amend its rates suspended in this docket, as such amendment would relate to an increase in Louisiana severance tax, and rejected the proposed Substitute Sheet without prejudice to United refiling to reflect adjustments other than increases in Louisiana severance tax.

On April 5, 1974, United filed Sixteenth Revised Sheet No. 4 (Revised Sheet) in purported compliance with the March 29 order, reflecting the same changes previously discussed, except for the elimination of the Louisiana severance tax adjustment. Also included in the filing was a motion to make the Revised Sheet effective as of April 6, 1974, and an agreement and undertaking. The filing was noticed on April 19, 1974, with protests and petitions to intervene due on or before May 1, 1974. No further protests or petitions were received.

On April 11, 1974, United filed an Answer to Laclede's Protest stating that by virtue of action of the Commission and United subsequent to the filing of Laclede's Protest, that protest is moot except that the Revised Sheet complies with Opinion No. 671 contrary to an apparent allegation of Laclede. United states that, in any event, Laclede's objections may properly be considered in the hearing established in the docket. United urges the Commission to deny Laclede's Protest.

Our review of the April 5 filing indicates that the proposed adjustments appear to reflect the Commission's cost allocation embodied in Order No. 671. We do not believe that the other adjustments are, at least on their face, improper. While the allegations set forth in the protests of Laclede and Memphis may or may not have some basis in fact, the questions they raise are best resolved through an evidentiary hearing such as the one presently established in this docket. We therefore believe that it is in the public interest to grant United permission to amend its rates, under suspension prior to April 6, 1974, and shall permit United to place in effect, subject to refund, its Revised Sheet effective April 6, 1974.

The Commission finds: It is necessary and proper and in the public interest in carrying out the provisions of the Natural Gas Act that the Commission grant United permission to amend its rates under suspension in Docket No. RP74–20 and to accept United's amended Revised Sheet filed April 5, 1974, to be effective subject to refund, April 6, 1974.

The Commission orders: (A) Permission is hereby granted to United to amend its rates under suspension in Docket No. RP74–20.

(B) United's Revised Sheet filed April 5, 1974, designated Sixteenth Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1, is hereby accepted to be effective April 6, 1974, subject to refund, pending the outcome of the hearing established in Docket No. RP74–20.

(C) The Commission Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.[1]

[SEAL] MARY B. KIDD,
Acting Secretary.

[Docket No. RP74–85]

WESTERN GAS INTERSTATE CO.

Notice of Change in Rate Schedule

MAY 7, 1974.

Take notice that on April 24, 1974, Western Gas Interstate Company (Western) filed with the Commission a proposed change in rates for natural gas service rendered by its Southern Division System and its Northern Division System to customers served under Original Volume No. 1 of its FPC Tariff.

Western states that its current jurisdictional rates for natural gas service rendered to customers served under Original Volume No. 1 of its FPC Tariff are deficient by some $669,538.37 annually, based on test period sales volumes from its transmission systems.

Western proposes an effective date of June 15, 1974, for said changes.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 27, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. CP73–329]

CHATTANOOGA GAS CO.

Notice of Technical Conference

MAY 8, 1974.

In order to effect a rapid and satisfactory resolution of the problems involving safety aspects of the operation of Chattanooga Gas Company's liquefied natural gas (LNG) facility which is the subject of the above-entitled proceeding, a technical conference to be attended by members of the Staff of the Federal Power Commission, the Office of Pipeline Safety of the Department of Transportation, and representatives of the Applicant shall be convened in this proceeding. Such meeting shall be for the purpose of establishing procedures agreeable to all concerned parties for the early return to a safe operation of the subject facility. Any interested persons, whether formal intervenors in the instant proceeding or not, are invited to attend.

Whereby, Notice is given to all interested parties that a technical conference to be presided ove: by the Commission Staff, will be convened at 10 a.m. on May 20, 1974, in a conference room of the Federal Power Commission.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74–11078 Filed 5–10–74;8:45 am]

FEDERAL RESERVE SYSTEM

FIDELITY FINANCIAL CORPORATION OF MICHIGAN

Acquistion of Bank

Fidelity Financial Corporation of Michigan, Birmingham, Michigan, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares of Fidelity Bank of Southfield, Southfield, Michigan. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than May 31, 1974.

Board of Governors of the Federal Reserve System, May 6, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74–10935 Filed 5–10–74;8:45 am]

FIRST BANC GROUP OF OHIO, INC.

Order Approving Acquisition of Bank

First Banc Group of Ohio, Inc., Columbus, Ohio, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire the successor by merger to The Citizens Baughman National Bank, Sidney, Ohio ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. The Board has considered the application in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the seventh largest bank holding company in the State, controls 14 banks with aggregate deposits of $1.1 billion, representing about 4 per cent of deposits in commercial banks in Ohio.[1] The acquisition of Bank (deposits of $36.8 million) would not significantly increase the concentration of banking resources in the State.

Bank is the largest of three banks located in the relevant banking market and controls approximately 56 percent of the total deposits in commercial banks in the market.[2] One of Applicant's subsidiary banks is located in a separate and adjacent banking market, and there is some slight existing competition between that subsidiary and Bank, but the amount of competition does not appear to be substantial. None of Applicant's other subsidiaries compete with Bank to any significant extent. Furthermore, due to the distances involved and Ohio branching laws, among other factors, it is unlikely that substantial competition would develop in the future between Bank and any banking subsidiary of Applicant. Although Bank is the largest banking organization in terms of deposits in the relevant market, there is no evidence in the record that the present proposal would alter in any significant respect the existing position of Bank. Moreover, Applicant's entry into the market de novo is unlikely since the market is unattractive for such entry as measured by the low population and deposits per banking office ratios relative to the State averages. On the basis of the record, the Board concludes that competitive considerations relating to the application are consistent with approval.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks, and Bank are considered to be generally satisfactory and consistent with approval of the application. Considerations relating to the convenience of the community to be served lend some support for approval of the application since Applicant plans to expand and improve the quantity and quality of Bank's services such as initiating trust services and expanding lending services. Specifically, Applicant plans to provide increased funds and managerial expertise for agricultural loans which should benefit this primarily agricultural area. It is the Board's judgment that the acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be executed (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Cleveland pursuant to delegated authority.

By order of the Board of Governors,[3] effective May 6, 1974.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.74–10936 Filed 5–10–74;8:45 am]

NATIONAL DETROIT CORP.

Acquistion of Bank

National Detroit Corporation, Detroit, Detroit, Michigan, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of National Bank of Dearborn, Dearborn, Michigan, a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than June 3, 1974.

Board of Governors of the Federal Reserve System, May 6, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

NATIONAL ENDOWMENT FOR THE HUMANITIES

NATIONAL COUNCIL ON THE HUMANITIES ADVISORY COMMITTEE

NOTICE OF MEETING

MAY 8, 1974.

Pursuant to the Provisions of the Federal Advisory Committee Act (Public Law 92–463) notice is hereby given that a meeting of the National Council on the Humanities will be conducted at Washington, D.C., on May 23 and 24, 1974.

The purpose of the meeting is to advise the Chairman of the National Endowment for the Humanities with respect to policies, programs, and procedures for carrying out his functions, and to review applications for financial support and gifts offered to the Endowment and to make recommendations thereon to the Chairman.

The meeting will be held in the Shoreham Building, 806 15th Street, NW., Washington, D.C. The morning session will convene at 9:30 a.m. on Thursday, May 23, and will be open to the public. The agenda for the morning session will be as follows:

I. Minutes of Previous Meeting
II. Reports
A. Introduction of New Members
B. Summary of Recent Business
C. Appropriation Prospects
D. Bicentennial Activities
E. Application Report
F. Gifts and Matching Funds
G. Report on Chairman's Grants
H. Science, Technology, and Human Values Program
I. Selected Project Evaluations
J. NEH Support of Foreign Nationals

Because the remainder of the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call area code 202–382–2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

[FR Doc.74–10978 Filed 5–10–74;8:45 am]

NATIONAL ENDOWMENT FOR THE ARTS

ARCHITECTURE AND ENVIRONMENTAL ARTS PROGRAM

Guidelines, Fiscal Year 1975

The following are guidelines for grants made under the Architecture + Environmental Arts Program of the National Endowment for the Arts, an independent agency of the Federal government which makes grants to organizations and individuals concerned with the arts throughout the United States.

Notice is hereby given that the deadlines for the following programs are: Public Education and Awareness and Assistance to State Arts Agencies, July 1, 1974; and Professional Education and Development, January 6, 1974. Interested persons should contact Bill N. Lacy, Director, Architecture + Environmental Arts Program, National Endowment for the Arts, Washington, D.C. 20506 (202) 382–6657. Only the Architecture + Environmental Arts Program Office may distribute application form.

Signed at Washington, D.C. on May 3, 1974.

FANNIE TAYLOR,
Director, Program Information.

[1] Commissioner Brooke, concurring, agrees only to the disposition of the rate filings and not to the rate design of the principles involved.

[1] All banking data are as of June 30, 1973, and reflect bank holding company acquisitions approved by the Board through March 31, 1974.

[2] The relevant banking market is approximated by Shelby County excluding McLean Township.

[3] Voting for this action: Vice Chairman Mitchell and Governors Sheehan, Bucher, Holland, and Wallich. Absent and not voting: Chairman Burns and Governor Brimmer.

V 39 I 93 MAY 13 74 XUM

INTRODUCTION

The National Endowment for the Arts, an independent Federal agency, was established in 1965. The major goals of the Endowment are to make the arts more widely available to Americans, to preserve our rich cultural heritage for present and future generations, to strengthen cultural organizations, and to encourage the creative development of our nation's finest talent.

Architecture + Environmental Arts constitutes one of the Endowment's twelve program areas. The primary concern of the Architecture + Environmental Arts Program is the quality of the man-made environment. The scope of the program, especially as it relates to the "environmental arts," is subject to broad interpretation. Thus, it is useful to think of the program's operational setting as encompassing those design professions whose main function is the shaping of the physical environment—architecture, landscape architecture, urban design, city and regional planning interior design, and industrial design.

Architecture + Environmental Arts grants are available for the support of research, program development, and exploratory design studies. The National Council on the Arts has recommended that the Endowment not support the acquisition of real property, capital construction, or the renovation/modification of existing structures. *No grant requests will be considered for these purposes.* (NOTE: The Endowment has a modest program to assist museums in preserving collections of aesthetic and cultural significance. The program seeks to encourage renovation of facilities for climate control, security, and storage in existing structures. For further information write: Museum Program, National Endowment for the Arts, Washington, D.C. 20506.)

APPLICATION DEADLINES

	Application deadline	Announcement of results	Earliest beginning project date
Public education and awareness	July 1, 1974	October 1974	November 1974.
Assistance to state arts agencies	do	do	Do.
Professional education and development:			
Academic and professional research grants	Jan. 6, 1975	June 1975	July 1975.
Design fellowships	do	do	August 1975.
Services to the field	do	do	July 1975.

GENERAL INFORMATION

ELIGIBILITY

Grants may be awarded to individuals, universities, state and local governmental entities, or groups possessing nonprofit, tax-exempt status. Professional offices are not eligible for grants, but may participate as part of a team under the employment or contract of an applicant who meets the eligibility requirements.

Submissions are limited to one grant proposal per "applicant" or "applicant organization" in each program category.

Architecture + Environmental Arts grants to individuals are available on a non-matching basis for amounts up to $10,000. By statute, Endowment grants may be awarded only to individuals of exceptional talent. Generally grants are available only to citizens or permanent residents of the United States.

Grants to universities, governmental entities, and other organizations range from $10,000 to $50,000. At least one-half of the total project cost must be funded from non-Federal sources. The matching funds must be expended as a part of the funded project and during the specified grant period.

Departments or schools within a university should submit a grant request with the university acting as the "applicant organization."

Grant awards are generally for less than the maximum dollar amount listed in each grant category and rarely exceed a one-year period. Applicants are urged to budget realistically and present minimum figures for Federal support needed to achieve the purpose of the project.

By statute, Endowment support is limited to organizations meeting the following criteria:

(a) Only those organizations which meet the requirements of Title VI of the Civil Rights Act of 1964 for the duration of any project supported in whole or in part by the National Endowment for the Arts.

(b) Only those organizations in which no part of net earnings inures to the benefit of a private stockholder or individual and to which donations are allowable as a charitable contribution under Section 170(c) of the Internal Revenue Code of 1954, as amended. *A copy of an Internal Revenue Service Determination letter for tax-exempt status must be submitted with each application.*

(c) Only those organizations which compensate all professional performers, related or supporting professional personnel, laborers, and mechanics at the equivalent of the prevailing minimum compensation level on the basis of negotiated agreements which would satisfy the requirements of Parts 3, 5, and 505 of Title 29 of the Code of Federal Regulations for the duration of any project supported in whole or in part by the National Endowment for the Arts.

Generally all projects receiving funding must be performed within the 50 states, Washington, D.C., Puerto Rico, Guam, American Samoa, or the Virgin Islands.

SELECTION PROCEDURES

Architecture + Environmental Arts staff reviews all applications and refers them to an advisory committee made up of design and planning professionals. The recommendations of the committee are submitted to the National Council on the Arts, an advisory group of twenty-six Presidentially-appointed members. The National Council reviews and makes recommendations on applications to the Chairman of the National Endowment for the Arts. Applicants are notified in writing of rejection or approval of proposed projects as indicated in each category. Applicants are requested not to seek information about the status of their applications prior to this notification.

EVALUATION CRITERIA

In the evaluation of applications, particular consideration will be given to proposals that meet the following criteria:

Proposals that respond to a genuine public need.

Proposals that set forth achievable objectives and establish realistic methods of attaining those goals within the specified budget and time frame.

Proposals that are conducted by persons with professional qualifications for undertaking the intended projects.

Proposals that reveal broad support within a community (geographical, academic, or professional) and offer substantial promise of successful implementation.

Proposals in which the matching requirement consists mainly of cash contributions rather than overhead or in-kind services.

TREASURY FUND GRANTS

When the National Endowment for the Arts was created, Congress included a unique provision in its enabling legislation. This provision allows the Endowment to work in partnership with private and other non-federal sources of funding for the arts. Designed to encourage and stimulate increased private funding for the arts, the Treasury Fund allows non-federal contributors to join the Endowment in the grant-making process, generally for projects supported by the Endowment under the established program guidelines.

The Endowment encourages use of the Treasury Fund method as an especially effective way of combining federal and private support, and as an encouragement to all potential donors, particularly those representing new or substantially increased sources of funds.

The Endowment may accept gifts in the form of money and other property. Bequests may be made to the Endowment as well. Donations to the Endowment are generally deductible for federal income, estate, and gift tax purposes.

Donations may be made to the Endowment, under its regular program guidelines, for the support of a nonprofit, tax-exempt, cultural organization which has been notified that the Endowment intends to award it a grant—such as a museum, a symphony orchestra, a dance, opera, or theatre company—or for an Endowment program, such as fellowships, touring, conferences, or workshops.

When a donation is received it frees an equal amount from the Treasury Fund, and the doubled amount is then made available to pay 50% of the project costs.

The Endowment also accepts unrestricted gifts to be used for projects recommended to the Chairman by the National Council on the Arts.

How a Treasury Fund Grant Is Arranged:

Those interested in giving for a specific purpose should note the step by step process described below.

(1) If a project is eligible for consideration under the Architecture + Environmental Arts program guidelines, the applicant submits to the Endowment a formal application, which may include a list of potential donors.

(2) The application is reviewed first by a panel of architects and other designers and then by the National Council on the Arts and is recommended for approval or rejection. Based on these recommendations, the Chairman makes the final determination and notification is sent to the applicant.

(3) If the grant award is approved, the applicant then requests that the donors forward their contributions to the National Endowment for the Arts accompanied by a letter specifying the restricted purpose of the gift (i.e. the name of the applicant and specific project supported.)

For further information on the Treasury Fund, contact the Architecture + Environment Arts Program, National Endowment for the Arts, Washington, D.C. 20506.

The Architecture + Environmental Arts Program encourages applicants to apply for Treasury Fund grants when applying for substantial and relatively costly projects.

BICENTENNIAL PROJECTS

The Endowment recognizes that the arts will play an important role in the celebration of our country's bicentennial. The Endowment welcomes this involvement on the part of artists and cultural organizations. The Endowment has an active interest in participating in these efforts, within funds available to it, and insofar as they are directed to professional creation and presentation of new works, improvement of artistic standards, preservation of our cultural heritage, and increasing the availability of the arts for all Americans. If funds under these guidelines are sought for projects deemed by the applicant to be related to the bicentennial, a brief description of this relationship should be made in the application.

CATEGORIES OF FUNDING

PUBLIC EDUCATION AND AWARENESS

Increased professional competence will be of limited value unless it is accompanied by an increased public sensitivity to the man-made environment, its problems, and the potential for improvement.

The physical fabric of a country can be no better than the level of awareness of its citizens. Individuals outside the design professions are called upon daily to make design-related decisions—as consumers, clients, and voters. The objective of this program is to provide information on design topics to educate the public to the importance of their role in the design process, to heighten public appreciation of the designed environment, and to supply self-help tools to individuals and groups wishing to participate directly in design projects. Grants in this category will support the development of materials and methods for communicating design awareness in a variety of ways—through textbooks, films, and tape cassettes, exhibitions, workshops, and journalistic criticism.

Priority consideration will be given to proposals that reflect a clearly identifiable audience and a well-defined means for broad dissemination. Applicants should possess substantial expertise in the specified communication medium.

Deadline: July 1, 1974. Completed applications must be postmarked no later than July 1, 1974. Announcement of results will take place by October 1974 and, as a result, project commencement dates may not be earlier than November 1974.

Eligibility. Grants may be awarded to individuals, universities, governmental entities and organizations possessing nonprofit, tax-exempt status.

Grant amounts. Matching grants to organizations generally do not exceed $30,000 with most grants for less than the maximum. Non-matching grants to individuals generally do not exceed $10,000

How to apply. Application forms may be requested from the Architecture + Environmental Arts Program, National Endowment for the Arts, Washington, D.C. 20506. Individuals wishing to apply should request NEA–2 (Rev.); Organizations should request NEA–3 (Rev.).

ASSISTANCE TO STATE ARTS AGENCIES

During fiscal 1975 a limited number of grants will be offered on a pilot basis to assist state arts agencies in undertaking programs in architecture and related design fields. These grants are intended to encourage support of the design professions within the states and to stimulate design-related research possessing statewide applicability.

Deadline: July 1, 1974. Applications for submission must be postmarked no later than July 1, 1974. Announcement of results will be made in October 1974; therefore, the project commencement date may not be earlier than November, 1974. Applications for fiscal 1976 funding will be accepted throughout the year.

Eligibility. Grants are available only to the officially designated state arts agencies on behalf of themselves or for cities within their states.

Grant amounts. In general, these matching grants will not exceed $10,000.

How to apply. Application forms (OMB–A–102) may be obtained from the Architecture + Environmental Arts Program, National Endowment for the Arts, Washington, D.C. 20506.

PROFESSIONAL EDUCATION AND DEVELOPMENT: ACADEMIC AND PROFESSIONAL RESEARCH GRANTS

A number of Federal funding sources currently award grants for research projects that deal with the more technical and scientific aspects of design. There are relatively few agencies, however, which provide support for projects whose major emphasis is on design as a form of artistic expression. The Endowment therefore invites research proposals from university research groups, undergraduate programs residing within professional design schools, and nonprofit, tax-exempt design organizations on subjects that will improve the processes, or the state of knowledge, concerned with the designed elements of our environment. In such requests, priority should be given to those projects that embody humanistic considerations, creative design approaches, and qualitative benefits.

Deadline: January 6, 1975. Applications for submission must be postmarked no later than January 6, 1975. Announcement of results will not be made before June 1975; thus, the project commencement date may not be earlier than July 1975.

Eligibility. The program is not open to individual applicants.

Grant amounts. Matching grants up to $20,000 with most grants for less than the maximum.

How to apply. Application forms [NEA–3 (Rev.)] may be obtained from the Architecture + Environmental Arts Program, National Endowment for the Arts, Washington, D.C. 20506.

DESIGN FELLOWSHIPS

This program provides professional designers with the opportunity to undertake independent projects or studies which will further their midcareer development. The program will identify young men and women whose career goals could benefit substantially from an intensive "office sabbatical" to pursue a subject of special interest. Candidates should be sufficiently experienced in practice to possess a broad understanding of their profession. Fellowships are not intended to support further graduate work or the purchase of major items of equipment, but rather for the development of personal skills and concepts of lasting value to designers and their profession.

Applicants are asked to formulate their own fellowship programs which will be evaluated according to their potential for advancing the individual's personal development and the value of the work to the profession.

Deadline: January 6, 1975. Applications for submission must be postmarked no later than January 6, 1975. Announcement of results will not be made before June 1975. Project commencement dates may not be earlier than August 1975.

Eligibility. Applicants must be currently engaged in the professional practice in the fields of architecture, planning, landscape architecture, interior design or industrial design. They must possess a minimum of a Bachelor of Arts degree or the equivalent in the applicant's field of practice. Finally, they must hold a license if so required by the profession and must have a minimum of five years of professional practice.

V 39 I 93 MAY 13 74 XUM

Amount of grants. Fellowships will be awarded for $10,000 each to generally cover a 6 to 12 month period.

NOTE: For tax information on fellowship grants, please consult Publication 520 (10–72), Department of Treasury, Internal Revenue Service. Copies may be obtained from local Internal Revenue Service Offices.

How to apply. Application forms [NEA–2 (Rev.)] may be requested from the Architecture + Environmental Arts Program, National Endowment for the Arts, Washington, D.C. 20506. Completed applications should include the following information:

A comprehensive resumé of past experience including information on educational, professional practice, honors, travel and publications.

A description of the study to be undertaken, research objectives, anticipated benefits to the individual and the profession, and a proposed schedule of work, procedures and plans for presentation must be included within the "Project Description" (Applicant may submit material to supplement the information required on the application form.)

SERVICES TO THE FIELD

A minimum of three letters of endorsement accompanying the application attesting to the applicant's professional competence, his qualifications for executing the proposed study, and the relation of the applicant to his employing office during the fellowship period.

The Architecture + Environmental Arts Program will continue to provide assistance to those national membership organizations which serve the design professions. Proposal requests should concentrate on projects of national priority that will benefit the widest possible range of members.

Deadline: January 6, 1975. Applications for submission must be postmarked no later than January 6, 1975. Announcement of results will not be made before June 1975, thus, project commencement dates may not be earlier than July 1975.

Eligibility. Grants will be awarded only to national membership organizations representing design professionals in the fields of architecture, landscape architecture, urban design, city and regional planning, interior design, and industrial design.

Grant amounts. Matching grants up to $20,000 with most grants for less than the maximum.

How to apply. Application forms [NEA–3 (Rev.)] may be obtained from the Architecture+Environmental Arts Program, National Endowment for the Arts, Washington, D.C. 20506.

NATIONAL THEME PROGRAM: CITY EDGES AND CITY OPTIONS

In fiscal year 1973 Architecture+Environmental Arts initiated a National Theme category. The first theme, City Edges, emphasized design and planning for problems relating to urban boundary conditions. City Edges grants were awarded to thirty-seven projects representing communities across the country and featuring "edges" ranging from waterfronts to highways and historic edges.

Funds for fiscal years 1974 and 1975 are being combined to support a second National Theme program entitled City Options. Grants under this program will support projects concentrating on special settings within cities that provide distinctive character and identity. Both programs have been designated bicentennial projects by the National Council on the Arts in recognition of their stated aim of promoting and preserving America's cultural heritage.

The deadline for submission of City Options applications was January 15, 1974; therefore, no City Options applications will be accepted during fiscal year 1975. During the coming year, the Architecture+Environmental Arts Program will develop the means for distributing the results of the City Edges/City Options projects and initiate plans for a future National Theme program.

The following design-related programs are non-granting activities conducted by Architecture + Environmental Arts and are included in these guidelines for information purposes only.

EXCELLENCE IN FEDERAL DESIGN

The Endowment recognizes that excellence in design-related fields should be a major concern of public agencies at all levels of government.

In May 1972 President Nixon designated the National Endowment for the Arts as the lead agency to implement the Federal Design Program. In response to the President's initiatives, the Endowment is coordinating a number of efforts to upgrade the quality of design among Federal agencies. In addition to these efforts, the Endowment is seeking to encourage "design excellence" programs by state and local governments.

While the following Endowment programs are directed at Federal agencies, they may also serve as models to state and local governments desiring to initiate their own design improvement programs. These efforts have been designated as bicentennial programs by the National Council on the Arts.

DESIGN ASSEMBLIES

In April 1973, the First Federal Design Assembly was held under the sponsorship of the Federal Council on the Arts and the Humanities and administered by the National Endowment for the Arts. Structured around the theme, "The Design Necessity," the event provided a rare opportunity for interaction between professional designers and Federal agency officials. In addition to drawing considerable professional and public attention to the importance of public design quality, the Assembly resulted in a number of actions by Federal agencies to upgrade their design standards.

The Second Federal Design Assembly will be held in October 1974. Its theme, "The Design Reality," will concentrate on elements of the design process.

FEDERAL ARCHITECTURE PROJECT

Initiated in October 1973, the Federal Architecture Project is nearing completion of a thorough study of opportunities and constraints affecting the quality of Federal architecture. In addition to a review and expansion of the 1962 *Guiding Principles for Federal Architecture*, the study has explored several major elements of architecture in the Federal realm: landscaping, interior, and urban design; architecture/engineer selection, adaptive use of older buildings, and mixed-uses in Federal facilities. Findings and recommendations of the Project will be reviewed in the Spring by members of the Federal Architecture Task Force composed of distinguished citizens and design professionals.

FEDERAL GRAPHICS

The Endowment-sponsored program to achieve graphics excellence throughout the Federal Government has gained momentum among Federal agencies. Sixteen agencies—twenty-five percent of the total number—have had their graphic materials evaluated by an expert panel, with most agencies implementing recommendations to upgrade graphics and improve communication effectiveness.

CIVIL SERVICE COMMISSION TASK FORCE

The Task Force recently reported its conclusions and recommendations on Federal recruitment, hiring, and training of design professionals. Copies of the Task Force Report, *Excellence Attracts Excellence*, are available directly from the Civil Service Commission, Washington, D.C. 20415.

ONGOING FEDERAL AGENCY EFFORTS

In conjunction with these activities, additional design-related programs are planned for the coming year. *Federal Design Matters*, a newsletter for designers and administrators, will be published periodically during Fiscal Years 1974 and 1975. The newsletter will seek to publicize Federal agency design accomplishments, as well as progress of the Federal Design Program. The newsletter may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

As an outgrowth of the Civil Service Commission Task Force Report, a pilot Design Management Seminar will be held for Federal administrators in the Summer of 1974.

As a participant in continuing interagency design efforts, the Endowment is working with the Federal Prison Industries (FPI), a government corporation, to improve the design quality, manufacturing processes, and marketing potential of products manufactured by the FPI.

Another area of potential influence on the quality of public design consists of the Endowment's newly-acquired responsibility for commenting on the environmental impact statements required for all Federal or Federally-funded projects.

AREAS OF SPECIAL INTEREST

PRESERVATION THROUGH ADAPTIVE USE

The preservation of America's architectural heritage has long been a subject of major interest to the Architecture + Environmental Arts Program. While the program encourages and supports historic preservation, the primary interest is not in the preservation or restoration of individual historic structures, but rather in the sympathetic adaptation of buildings and districts to create new vitality within communities.

In keeping with this interest, the program is sponsoring staff and contractual research to examine the adaptive use potential of older structures to serve as centers of cultural, recreational, or commercial activity. Special emphasis will be placed on possible new uses for underutilized railroad stations, churches, and surplus Federal property.

The end result of these studies will be the development of appropriate resource materials for distribution to public officials, design professionals, and interested citizens.

The National Council on the Arts has designated this program as one of the Endowment's official bicentennial projects.

CULTURAL FACILITIES

At a meeting in September 1973, the National Council on the Arts adopted a resolution stating the policy of the National Endowment for the Arts regarding accessibility to the arts for the handicapped.

One of the main goals of the National Endowment for the Arts is to assist in making the arts available to all Americans. The rts are a right, not a privilege. They are central to what our society is and what is can be. The National Council on the Arts believes very strongly that no citizen should be deprived of the beauty and the insights into the human experience that only the arts can impart.

ACCESSIBILITY TO THE ARTS FOR THE HANDICAPPED

Architecture + Environmental Arts recognizes the necessity for the development and utilization of cultural facilities to meet the needs of an increasing public interest and participation in the arts. While the greatest needs are for financial assistance to support construction costs and professional design fees, limited resource restrict the Endowment's ability to respond to requests of this nature. The focus with respect to cultural facilities is aimed at the development, through contractual means, of publications and resource materials pertaining to the design, planning, and utilization of facilities for the arts.

Architecture + Environmental Arts-initiated research will be directed towards developing information on traditional physical settings for the arts, such as museums, galleries, and theatres, as well as exploring ways in which railroad stations and endangered old buildings can be rehabilitated and made adaptable for use by the arts. Since many facilities, housing cultural activities are of a highly specialized nature with exacting technical requirements of lighting, acoustics, air/temperature controls, security and appropriate interior environments, another important research aim is to develop publications of a technical assistance nature which will answer questions and serve as directory to consultants in this field.

The National Council on the Arts believes that cultural institutions and individual artists could make a significant contribution to the lives of citizens who are physically handicapped. It therefore urges the National Endowment for the Arts to take a leadership role in advocating special provision for the handicapped in cultural facilities and programs.

The Council notes that the Congress of the United States passed in 1968 (P.L. 90–480) legislation that would require all public buildings constructed, leased or financed in whole or in part by the Federal Government to be accessible to handicapped persons. The Council strongly endorses the intent of this legislation and urges private interests and governments at the State and local levels to take the intent of this legislation into account when building or renovating cultural facilities.

The Council further requests that the National Endowment for the Arts and all of the program areas within the Endowment be mindful of the intent and purposes of this legislation as they formulate their own guidelines and as they review proposals from the field. The Council urges the Endowment to give consideration to all the ways in which the agency can further promote and implement the goal of making cultural facilities and activities accessible to Americans who are physically handicapped.

In view of the National Council on the Arts' interest in the accessibility of cultural facilities to the physically handicapped, Architecture + Environmental Arts Program will continue to develop pilot studies and resource materials pertinent to this field. The primary emphasis of these efforts will be on increasing public awareness of the need to eliminate the environmental and physical barriers facing the handicapped. In addition, resource materials will aim to provide technical assistance to architects and planners by proposing exemplary models and design solutions for making cultural facilities accessible to all people. These materials will be made available to architects, planners, government officials, arts administrators, and arts organizations.

GENERAL PROGRAMS

In order to ensure budgetary flexibility, funds have been set aside to enable the program to respond to new developments in the field of design.

SPECIAL INSTRUCTIONS FOR SUBMISSION OF APPLICATIONS

Application forms should be requested from the Director, Architecture + Environmental Arts, National Endowment for the Arts, 806 15th Street, N.W., Washington, D.C. 20506. All formal applications should be *submitted in triplicate* to the Grants Office, National Endowment for the Arts, 1425 K Street, N.W., Washington, D.C. 20506.

Inquiries regarding program interests or application content should be directed to the Architecture + Environmental Arts Program (202) 382–6657. Questions of a fiscal nature should be directed to the Grants Office (202) 382–6057.

Applications must be *postmarked* no later than the deadline date for the program for which you are applying. The Endowment regrets that because of time-consuming review procedures, applications postmarked after the appropriate deadline cannot be considered.

Although there may be more than one investigator involved in executing a proposed project, only one entity may be the legal recipient of a grant. The name of this person (or organization) should appear as the first item on the application form. This entity will be responsible for complying with all requests and regulations concerning the grant application and for informing co-investigators of the application's status.

Names and titles should be *typed or printed* beneath all signatures appearing on the application.

Selected *supplemental material* describing a project may be submitted along with the application. However, a complete summary of the project description must be contained within the space provided on the application form. It is most important that this summary present a clear and concise statement of the intent and purpose of the proposal. *No material will be returned.*

Applications must be supported by a minimum of three *letters of endorsement* pertaining to the project's desirability and to the investigator's general qualifications to undertake the project. Such letters, each in triplicate (one original, two copies), should accompany the application. Endorsement letters must be received by the deadline date.

Applicants should submit resumés for the project director and other principal investigators.

FINAL REPORTING PROCEDURES

All Endowment grantees must provide to the Endowment, within 90 days of the termination of the grant period, both a Final Expenditure Report and a Final Descriptive Report on the project undertaken with the grant.

SAMPLE APPLICATION

Information to be provided in Final Descriptive Reports will, of course, vary with the project. Grant award letters will include a paragraph specifying the information to be contained in the Final Report.

The attached sample application form is intended to provide general guidance for the presentation of budget information by organizational applicants. Regardless of the amount requested from the Endowment, applicants should provide detailed budget information in each section which applies to the proposed budget.

The individual application form is relatively self-explanatory.

IV. SUMMARY OF PROJECT DESCRIPTION (COMPLETE IN SPACE PROVIDED. DO NOT CONTINUE ON ADDITIONAL PAGES.)

Funds are requested to investigate alternative uses for a block of 19th century warehouses in the historic Coffey Street area. The study will include economic and structural feasibility as well as design concepts. The final products will include an illustrated report and a public exhibit to stimulate public and private interest in the redevelopment of the area. As indicated in the enclosed letters of support, there is a strong base of community involvement and support for this project. The successful restoration of three blocks of 19th century rowhouses adjacent to the study area provides encouragement for the implementation potential of this project.

(This sample project description is presented for the purpose of illustrating the need for conciseness and clarity of project intent.)

MUSIC PROGRAM

Opera Guidelines for Fiscal Year 1976

The following are guidelines for grants made under Opera division of the Music Program of the National Endowment for the Arts, an independent agency of the Federal government which makes grants to organizations and individuals concerned with the arts throughout the United States.

Notice is hereby given that the deadline for this program is October 1, 1974. Interested persons should contact Walter Anderson, Director, Music Program, National Endowment for the Arts, Washington, D.C. 20506, (202) 382–5755, for further information and application forms. Only the Music Program office may distribute application forms.

Signed at Washington, D.C. on 7 May 1974.

FANNIE TAYLOR,
Director, Program Information.

GENERAL INFORMATION

The National Endowment for the Arts in Fiscal Year 1976 (July 1, 1975–June 30, 1976) plans a program of assistance to opera companies. Although it is anticipated that total resources available for this program may not be known before the fall of 1975, the Endowment is requesting applications at this time in recognition of the need for opera companies to plan well in advance and to facilitate development and processing of applications.

DEADLINE

Applications must be postmarked no later than October 1, 1974.

The deadline will be adhered to strictly. Applications postmarked later than October 1, 1974 will not be considered under the Fiscal Year 1976 Opera Program.

Applications for opera companies meeting the eligibility criteria as set forth on page 2 may be obtained from the Music Program, National Endowment for the Arts, Washington, D.C. 20506. Project Grant Application Forms (# NEA–3/Rev.) should be requested.

The completed application forms in triplicate, and all accompanying material, in duplicate, should be returned to the Grants Office, National Endowment for the Arts, Washington, D.C. 20506.

GENERAL PURPOSE

The purpose of this program is:

(1) To encourage and strengthen the performances of fully staged opera in all sections of the country and to improve the level of artistic quality.

(2) To broaden the repertory to include works from various historical periods with particular emphasis on the performance of American works.

(3) To provide sustained professional opportunities for American artists.

THE BICENTENNIAL CELEBRATION

The Endowment recognizes that the arts will play an important role in the next few years in the celebration of our country's bicentennial. The Endowment welcomes this involvement on the part of artists and cultural organizations. The Endowment has an active interest in participating in these efforts, within funds available to it, and insofar as they are directed to professional creation and presentation of new works, improvement of artistic standards, preservation of our cultural heritage, and increasing the availability of the arts for all Americans. If funds under these guidelines are sought for the projects deemed by the applicant to be related to the bicentennial, a brief description of this relationship should be made in the application.

While most music projects in support of the nation's bicentennial will fall into one of the regular music categories, it is possible that projects may be developed which do not readily meet the regular program guidelines. If funding levels permit, an additional grant may be considered for support of a special bicentennial project. Such grants are not expected to be awarded to all organizations meeting eligibility criteria, but will be reserved for imaginative and significant activities. It is anticipated that these grants will be on a highly competitive basis to a limited number of organizations. Further information will be forwarded concerning applications if the program is initiated.

ELIGIBILITY

By statute the National Endowment for the Arts is limited to the support of organizations which meet the following criteria:

(1) Only those organizations which compensate at the equivalent of the prevailing minimum compensation level or on the basis of negotiated agreements which would satisfy the requirements of Parts 3, 5, and 505 of Title 29 of the Code of Federal Regulations for the duration of any project support in whole or in part by the National Endowment of the Arts.

(2) Only those organizations which meet the applicable requirements of Title VI of the Civil Rights Act of 1964 for the duration of any project supported in whole or in part by the National Endowment for the Arts.

(3) Only those organizations in which no part of net earnings inures to the benefit of a private stockholder or individual and to which donations are allowable as a charitable contribution under section 170(c) of the Internal Revenue Code of 1954, as amended. Copy of Internal Revenue Service determination letter for tax-exempt status must be submitted with each application.

Assistance, further, will be limited to professional opera companies which have maintained an annual operating budget in excess of $100,000 for a minimum of three seasons and:

(1) Which have national or regional impact and (a) produce fully-staged performances with orchestra; (b) provide sufficient rehearsal time to assure performances of uniform artistic quality; and (c) are of high artistic integrity and rely primarily on their own artistic resources.

(2) Which perform annual resident seasons of no fewer than two performances each of three productions;

(3) Which perform with orchestras and choruses in rehearsal on a seasonal rather than on a pickup basis.

(4) Which serve unique needs due to geographical location or other special conditions and demonstrate high standards of performance and administration.

GRANT PERIOD

The proposed period of grant support should not begin prior to September 1, 1975. Generally, the projected grant period may not extend beyond a one-year period.

NOTICE OF APPROVAL OR REJECTION

Notice of approval or rejection will be sent as the Chairman authorizes in the summer or fall of 1975. Applicants are requested not to seek information on the status of their applications prior to notification. Funding levels will not be confirmed until Congressional appropriations are known.

GRANT AMOUNTS

Grants to opera companies will be considered in amounts within the following budget ranges:

Budget in excess of $1,000,000. Opera companies with expenditures in the 1973–1974 season in excess of $1,000,000 may request assistance of up to $150,000 in federal funds. Applicants in this category should request assitance through a combination of Program Funds and Treasury Funds with no more than $100,000 through the Program Fund. Please refer to: Methods of Funding, Option 3, page 6.

In some instances grants will be for lesser amounts; therefore, companies are urged to limit any requests for increased support above previous funding to moderate increments.

Budgets of $750,000 to $1,000,000. Opera companies with expenditures in the 1973–1974 season within this range will be considered for grants in varying amounts up to a maximum of $100,000 in federal funds.

In most instances grants will be for lesser amounts; therefore, companies are urged to limit any request for increased support above previous funding to moderate increments.

Budgets of $100,000 to $750,000. Opera companies with expenditures in the 1973–1974 season within this range will be considered for grants in varying amounts up to $60,000 in federal funds.

In most instances grants will be for lesser amounts; therefore, companies are urged to request assistance above Fiscal Year 1975 levels in moderate amounts.

Opera companies not previously receiving assistance, and which are now eligible, are asked to request only moderate amounts; that is, amounts within the scope of realistic fiscal planning.

NOTE TO ALL APPLICANTS

Grants in each category will not be considered in amounts:

(1) Exceeding the limits set forth in the above category;

(2) Exceeding 50 percent of the total cost of the project(s).

For clarification of assistance available through the Program Funds, the Treasury Fund and the Combined Program Funds and Treasury Fund Method, see "Methods of Funding," page —.

PROJECT PRIORITIES

(1) Activities which reflect high artistic standards.

(2) More opportunities for young American performers on a repertory basis.

(3) Variety in repertory, particularly the presentation of more American operas.

(4) The use of a wider variety of qualified and imaginative stage directors and conductors.

(5) Greater stress on performances in English.

(6) Activities which will increase and/or generate new funding sources.

PROJECT EXAMPLES

Although the Endowment welcomes the vitality of new programs and, under all conditions, encourages applicants to develop new sources of funds, applications first and foremost should represent the genuine needs of the applicant organizations. Accordingly, opera companies may request assistance to strengthen existing programs. Also, assistance may be requested to support the same project for more than one year. In no instance, however, should organizations attempt to extend their programs beyond their capacity to accommodate and sustain the level of proposed expansion into future seasons.

The following are examples of projects that are eligible for assistance. The National Council on the Arts has recommended that the Endowment extend first priority to applications which would provide assistance and recognition to American artists.

(1) Programs designed to reach larger and more diversified audiences than those usually served by the subscription series; i.e., improved services to local communities, such as schools, inner-city areas, parks, neighborhoods, churches, industries, etc.

(2) Quality performances and/or services (e.g., workshops, coaching), adaptable to in-school presentations. Project proposals directed to this area should include:

(a) Full description of the proposed project to include planning, program implementation and evaluation.

(b) Letters of interest from cooperating organizations involved.

(3) Projects to improve artistic direction and performance quality, including increased rehearsal time.

(4) Fees for guest stage directors and guest conductors.

(5) Professional apprentice programs in performance and/or management.

(6) Professional coaching for local or area performers.

(7) Regional touring programs, particularly to areas where live opera is not ordinarily available. Cooperative planning with state and regional arts councils as sponsoring organizations to develop concentrated regional programs.

(8) Extended seasons designed to increase the number of productions and performances. Evidence that the extension, without continuing Endowment support, would not jeopardize the company's continued existence will be required.

(9) Exploration of new ways to improve earned and contributed income, including development programs staffed by professional development personnel, and new methods of promotion to increase audiences and improve ticket sales procedures.

(10) Projects designed to improve quality of management.

(11) Increased collaboration with and/or sponsorship of programs with other performing organizations, such as professional orchestras and dance companies.

Other projects may be initiated on recommendation of the Opera Section of the Music Advisory Panel.

LIMITATIONS

(1) Applications will rarely be considered for non-specific support.

(2) Projects do not have to be new or innovative. Assistance may be requested for strengthening and continuing existing programs.

(3) The Endowment's assistance is never intended to discourage admission fees irrespective of how nominal the charge may be.

(4) The Endowment's assistance is never intended to substitute for previous local support but, instead, is designed to encourage continuing and increased local contributions.

(5) Applicants are required to limit their requests to a single application; however, requests for more than one project may be presented in the application if:

(a) The total funds sought do not exceed the maximum funding stipulated on page 3.

(b) The overall project description does not attempt to encompass all aspects of the opera company's total program.

THE NATIONAL OPERA INSTITUTE

The Endowment, through a Treasury Fund grant with matching private funds, provides substantial support to The National Opera Institute, an independent organization which offers assistance to organizations and individuals. Aiding young artists of exceptional talent through individual grants to performers, training in allied operatic professions, assisting with production of new or rarely performed operas and innovative programs in production techniques, and intercompany cooperative projects, all fall within the purview of the Institute.

Inquiries and applications for assistance from the Institute should go directly to The National Opera Institute, John F. Kennedy Center for the Performing Arts, Washington, D.C. 20566.

METHODS OF FUNDING

OPTION 1: PROGRAM FUNDS METHOD

Applicants requesting assistance from Program Funds must present evidence in the proper space provided on the application that one-half the total cost of the project will be provided by the applicant. Sources of matching funds must be identified.

Example:

Grantee receives endowment award	$20,000
Required matching by the grantee	20,000
Minimum required budget	40,000

OPTION 2: TREASURY FUND METHOD

Applicants are encouraged to use the Treasury Fund Method. See enclosed brochure.

Example:

Restricted gift(s)	$50,000
Endowment Treasury funds	50,000
Proposed award	100,000
Required matching by the grantee	100,000
Minimum required budget	200,000

OPTION 3: COMBINED PROGRAM FUNDS AND TREASURY FUND METHOD

Applicants may request assistance through a combination of funds through the Treasury Fund method and Program Funds method, but the combined amount of federal funds cannot exceed the program maximum.

Example:

Program funds	$50,000
Restricted gift(s)	25,000
Endowment Treasury funds	25,000
Combined restricted gift(s) and endowment Treasury funds	50,000
Proposed award	100,000
Required matching by the grantee	100,000
Minimum required budget	200,000

GRANT APPLICATION

THE APPLICATION FORM

Typewritten application forms must be submitted in triplicate. All essential elements of the proposal must be included in a concise project description in the space provided on the first page of the application. If additional space is needed, no more than two additional 8½" x 11" pages may be attached to each of the application forms.

If the applicant develops a multi-purpose application, please number each project separately with its own budget. For example: if the application contains three projects numbered 1, 2, 3—develop the budget numbered 1, 2, 3 to correspond with the appropriate project description. Budget detail for the individual projects should be in accordance with the categories on the application, such as: Personnel, Fringe Benefits, Supplies, etc. The budget figures appearing on the first page of the application must represent the sum of all expenses related to the projects.

The Music Staff advises applicants to study carefully, point by point, the Eligibility Criteria, Maximum Grant Amounts and Program Limitations, as described earlier, before submitting an application. Applicants are urged to retain duplicates of any materials sent to the agency.

Additional required materials:

Please forward in duplicate the following:

(1) Copy of Internal Revenue Service determination letter for tax exempt status. Although this letter may have been submitted previously, it must be submitted with each application.

(2) Audited financial statement for the most recent completed fiscal period. Unaudited financial statement is acceptable if audited statement is not available, but the audit should be forwarded when available.

(3) Total operating budget showing estimated income and expenses for the 1974–75 and 1975–76 seasons.

(4) Season brochure for 1973–74 and 1974–75.

(5) Complete representative reviews of regular performances from the past year with dates provided.

(6) Biographical sketches of artistic director and chief administrator.

(7) The supplementary information sheets completed in full. See pages 11–12.

SUPPLEMENTARY INFORMATION

The following material is required of all applicants which have not received assistance in Fiscal Year 1975 and applicants for which previously submitted information is not up to date. Please submit, in duplicate:

(1) A brief history of the organization.

(2) The number of members of the board and the executive committee.

(3) The number of times the board and the executive committees meet.

SUPPORTING STATEMENTS

The following statements are required of applicants as indicated below, in duplicate:

Statements to confirm the involvement of cooperating organizations and/or individuals must accompany all applications in the following areas:

(1) School-related proposals. The Endowment must be assured that school-related proposals have the cooperation of the appropriate officials and classroom teachers and that careful, coordinated planning for in-school concerts or educational programs has been accomplished.

(2) Programs in special areas. The Endowment must be assured that proposals for programs in special areas, such as the inner city, have the cooperation of the leaders in those areas and that businesses and other involved organizations are prepared to identify with the program plans.

The Endowment is anxious to know where and when presentations will occur, recognizing that some details must be tentative from time to time but, that in general, a well-defined proposal is under consideration.

APPLICATION REVIEW

The application, if not completed properly, will be returned to the applicant for corrections. If the corrected application is not received by the Endowment in time for processing in accordance with the deadline date, it will not be considered under the Fiscal Year 1976 appropriations. The Endowment cannot accept responsibility for delays occasioned by

V 39 I 93 MAY 13 74 XUM

the late arrival of applications or requests which have been improperly submitted.

Incomplete application files.—If all additional required material has not been submitted, the application may be rejected.

APPLICATION PROCESSING

After an application with all necessary information has been received, the file will be reviewed as follows:

(1) The Endowment Music Staff, the Music Advisory Panel, and the National Council on the Arts successively review the application.

(2) The applicant is notified concerning final action taken by the Chairman of the Endowment.

Applications are reviewed according to the following criteria:

(1) Artistic quality;
(2) Merit of the project;
(3) Organizational stability;
(4) Capacity to achieve objectives;
(5) Professional service to the maximum constituency.

Notices of approval or rejection will be sent, as the Chairman authorizes. Applicants are requested not to seek information on the status of their applications prior to such notification. While the Endowment welcomes expressions of interest in a project, extraordinary pressures beyond direct negotiations are not helpful.

FINAL REPORTS

At the conclusion of the grant period, the Endowment requires final reports from all grantees. Reporting suggestions will accompany the grant letter. All grantees are required to submit the following in triplicate:

(1) *Final Descriptive Report.* A detailed narrative report describing what was accomplished during the grant period with NEA funds.

(2) *Final Expenditure Report.* An accounting of total expenditures and matching funds related to the project. Note: This report is to be submitted on the same form #NEA-7 (Rev. 71), used for interim cash requests. The final cash request may also serve as a final expenditure report if all income and expenditures for the project are detailed.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 8, 1974 (44 USC 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget Washington, D.C. 20503, (202–395–4529).

TARIFF COMMISSION

CONSUMPTION OF KNIVES, FORKS, AND SPOONS WITH STAINLESS STEEL HANDLES

Report to the President

MAY 1, 1974.

To the President:

Pursuant to headnote 2(c) to part 2, subpart D of the Appendix to the Tariff Schedules of the United States, the U.S. Tariff Commission herein reports its determination of the apparent U.S. consumption of knives, forks, and spoons with stainless-steel handles in 1973 to have been 51,363,141 dozen pieces.

The data for each of the components used in the computation of apparent annual consumption of knives, forks, and spoons with stainless steel handles are shown in the table below.

Knives, forks, and spoons with stainless-steel handles: Shipments by U.S. manufacturers, U.S. exports, U.S. imports for consumption, and apparent U.S. consumption, 1973

[In thousands of dozen pieces]

Components	*Quantity*
Total shipments by U.S. manufacturers[1]	22,464
Exports	442
Imports for consumption	29,341
Apparent U.S. consumption[2]	51,363

[1] Includes only shipments of domestically produced products.

[2] Total shipments by U.S. manufacturers, plus imports, minus exports.

SOURCE: Shipments and exports as reported to the Tariff Commission by the domestic producers; imports compiled from official statistics of the U.S. Customs Service.

By order of the Commission.

[SEAL] G. PATRICK HENRY,
Acting Secretary.

RCA CORP.

Workers' Petition for a Determination; Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the workers and former workers of the Woodbridge, New Jersey, plant of the RCA Corp., New York, New York, the United States Tariff Commission, on May 8, 1974, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with electronic receiving tubes and components thereof known as mounts (of the types provided for in item 687.60 of the Tariff Schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed on or before May 23, 1974.

The petition filed in this case is available for inspection at the Office of the Secretary, United States Tariff Commission, 8th and E Streets, N.W., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

By order of the Commission.

Issued: May 8, 1974.

[SEAL] KENNETH R. MASON,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 293 (Sub-No. 1); Northeastern Rail Investigation]

RAIL SERVICE IN THE MIDWEST AND NORTHEAST REGION

Evaluation of the Secretary of Transportation's Rail Services Report

MAY 2, 1974.

Virtually every member of the staff of the Rail Services Planning Office contributed to the accompanying report. It is a staff of which I am proud, and one which I believe to be fully capable of making a continuing contribution to the success of the railroad restructuring process. We look forward to the opportunity of working with you and your colleagues as the planning process proceeds during the forthcoming months.

Sincerely,

GEORGE M. CHANDLER,
Director.

The accompanying report is submitted pursuant to section 205(d)(1) of the Regional Rail Reorganization Act of 1973 which requires the Rail Services Planning Office to submit to the United States Railway Association its evaluation of the Report of the Secretary of Transportation entitled "Rail Service in the Midwest and Northeast Region."

There are two major themes which dominate our report.

First, both the public testimony and our own comments reflect many areas of fundamental dissatisfaction with the Secretary's report. The Secretary understandably limited his report in response to the statutory mandate to present his "recommendations with respect to the geographic zones within the region in and between which rail service should be provided." As so limited, his report has not, in our view, provided the Association with a valid statistical basis for approaching the planning of a unified rail system for a substantial part of the country—a system which the Congress has directed be designed to meet a variety of social as well as economic goals.

The second principal feature to which the Association's attention should be directed is the overwhelming public response to the opportunity to participate in the rail restructuring process. The public has demonstrated not only that it is most insistent that its views be heard, but also that it can make a valuable contribution to the planning process by supplying both vital information and ideas which are timely and imaginative.

INTRODUCTION

The Regional Rail Reorganization Act of 1973 (Public Law 93–236; 45 U.S.C. sec. 701 and following) (the "Act") provides for the restructuring of the railroad sys-

V 39 I 93 MAY 13 74 XUM

tem in the Midwest and Northeast Region of the United States, defined in the Act as encompassing 17 states and the District of Columbia. The Act requires that there be created, through the restructuring process, a financially self-sustaining rail system capable of providing adequate rail service in the region, while effectuating specified social, economic, and environmental goals.

The Act created, or provided for the creation of, three new entities to which reference will be made throughout this report. They are: the Rail Services Planning Office (the "Office"), created by the Act in the Interstate Commerce Commission (the "Commission"); the United States Railway Association (the "Association"), a nonprofit corporation to which is delegated the basic system planning responsibility; and the Consolidated Rail Corporation (the "Corporation"), which is to be a for-profit corporation created to operate the rail system designed by the Association.

The principal features of the restructuring process are as follows:

Within 30 days of enactment, the Secretary of Transportation was to submit a report containing his recommendations and conclusions for rail service between and within geographic zones of the region and describe the criteria used.

The Office was to hold public hearings on the Secretary's report and prepare a report containing an evaluation of the Secretary's recommendations based on the hearings and its own appraisal of the report.

Based on information and reports provided by the Secretary, the Office, and interested persons, the Association will prepare a Preliminary System Plan.

The Office will hold public hearings, and issue a report, on the Preliminary System Plan.

Based on these public hearings, comments by interested persons, and evaluation by the Office of the Preliminary System Plan, the Association will prepare a Final System Plan, and submit it to the Congress.

The Commission will prepare an evaluation of the Final System Plan.

The Congress will pass upon the Final System Plan submitted by the Association before it is implemented. If rejected by Congress, the Plan must be revised by the Association and returned to Congress for approval.

Once approved by the Congress, the Final System Plan will become the basis upon which specific rail properties of the existing bankrupt and solvent railroads in the region are to be transferred or conveyed to the Corporation or other solvent railroads to make up the restructured system or are abandoned (unless retained to provide rail services under the subsidy provisions of the Act).

The first step of this sequence was completed February 1, 1974, with the issuance of the Secretary of Transportation's report entitled, "Rail Service in the Midwest and Northeast Region" (The "DOT Report").

Principal conclusions and recommendations of the DOT Report are:

Existing interstate mainlines should be consolidated into a high volume upgraded network shared by the Corporation and other carriers in the region, with unnecessary duplicative lines and facilities downgraded or eliminated.

Local rail service requirements should be filled generally by a single carrier in a given geographic area, with rail facilities which are not financially self-sustaining being abandoned unless subsidized by state or local transportation agencies.

Rail competition should be maintained only over the interstate network from traffic centers that generate a minimum of eight daily trains traveling more than 200 miles in the same direction.

The second step in the statutory planning process was the conduct, by the Office, of public hearings providing an opportunity for interested persons to express their views on the DOT Report. Hearings were held during March in 17 cities in the region. Copies of all oral testimony and written statements have been supplied to the Association.

In issuing this report, the Office fulfills its responsibility to submit a report to the Association on the DOT Report within 120 days of enactment of the Act. In the time available to it thus far, the Office has instituted its own analysis and review of the DOT Report, and it has begun the review and evaluation of the massive amount of material that has been received to date as a result of the public hearings which have been held. The analysis of both the DOT Report and the public submissions is continuing, and public demand for an opportunity to participate in the planning process has made it necessary to schedule additional hearings at a number of locations during the next several months. So that the fruits of the continuing analysis and the results of the further hearings may be made available to the Association and the public generally, the Office plans to issue supplemental reports prior to the date of issuance of the Preliminary System Plan.

In this report we have described the public participation in the hearings held to date. We have explained in some detail the methodologies which led to certain of the basic conclusions of the DOT Report. We have described the results of our own analysis of these methodologies and of a number of assumptions upon which the DOT Report was provided. We have suggested a number of directions which might be taken by the Association in developing the Preliminary and Final System Plans. Our principal recommendations to the Association are listed at the beginning of this report; others will be found throughout the text.

It is equally important that there be a clear understanding of what we have not attempted. It was not possible in the time allotted under the Act to review every decision in the DOT Report respecting individual rail services. The record in this proceeding contains valuable, and in many instances most specific, data concerning local rail operations. Time did not permit the recital and discussion in this report of all the information received. In particular it should be noted that the discussion of the public participation which follows focuses largely upon the oral testimony taken at the hearings, and that the analysis of the written statements which have been received is still in a relatively early stage.

Finally, this report contains a brief description of what the Office plans to do between now and the issuance by the Association of the Preliminary System Plan next October. Most importantly, we wish to stress that there remains a major role for the public in the railroad restructuring process, and that continued public participation is both necessary and welcome.

Principal Recommendations

Having reviewed the DOT Report and the public testimony which has been submitted, the Office makes the following principal recommendations to the Association:

THE STATUTORY GOALS

The Association should give full consideration to the social goals enumerated in section 206(a) of the Act which time constraints prevented the Secretary from addressing in depth.

TRANSPORTATION DATA

The Association should seek more complete traffic data than was used in the Secretary's Report, ideally collecting sufficient data to develop historical trends and future traffic projections. A 1980 time horizon is suggested as reasonable for traffic projections.

The Association should give consideration to obtaining information from users of rail services and other available sources, including reliable industrial and population growth projections, and not rely solely on traffic flow data furnished by the railroads.

SYSTEM DESIGN AND ITS IMPLEMENTATION

The Association should consider lines as segments of a total system and evaluate their capabilities for contributing to overall system efficiency, rather than requiring that each line or mile of track meet a test of independent profitability.

The Association should scrutinize with great care the results of any attempt, based upon purely statistical methods, to identify particular rail facilities as redundant, and should test any such statistical conclusions in the light of the practical knowledge of those with experience in conducting railroad operations.

The Association should consider for inclusion in the system facilities which will permit the routing of through traffic around, instead of through, densely populated areas and which will permit the removal of yard and switching operations from areas where they now unduly obstruct traffic or impede rational urban development.

The Association should not limit its selection of prospective main lines to lines which are now equipped with automatic signal systems, as did the Secretary.

The Association should consider alternate means of handling freight traffic now moving over the Northeast passenger corridor between Boston, New York City, and Washington. The Final System Plan should include and provide for the improvement of routes which would make it possible to remove as much freight traffic as possible from the corridor.

The Association should give priority consideration to the selection of yard and terminal facilities needed to provide rail services in the region. This should be done in conjunction with, if not prior to, the selection of mainline routes.

The Association should recognize the problems attendant upon consolidating the services and facilities of a number of individual railroads and provide in the Final System Plan for a transition period during which the Corporation, or other acquiring railroads, can do the planning and personnel training, and make the capital improvements, necessary for implementation of the Plan.

LOCAL SERVICE

The Association should reject the Secretary's method of determining branch line viability which was based primarily—if not solely—upon the number of carloads handled.

The Association should consider whether to include certain marginal branch lines in the system. Their exclusion could result in their operation as independent short-line railroads, thus commanding a division of the joint revenues which would result in the Corporation being placed in a poorer financial position than if it had operated these lines as branches.

SYSTEM CAPACITY

The Association should scrutinize with great care the rail line capacity assumptions made by the Secretary.

In addition to the potential design capacity of a line, such other factors as grades, curvature, clearances, sidings, train mix, and maintenance requirements should be taken into account.

The Association should determine the capacity of yards and terminals, both as an end in itself and as yard capacity affects the ability of main lines to achieve their theoretical capacity.

The Association should consider the deteriorated condition of much of the rail plant in the region and include in the Final System Plan, at least temporarily, facilities sufficient to meet service needs while other facilities—perhaps potentially superior—are being upgraded to a capacity level which can provide the service required.

EQUIPMENT SUPPLY AND MAINTENANCE

The Association should give consideration to the selection of car building and car and engine repair facilities necessary to sustain the operations of the Corporation.

RAIL COMPETITION

The Association should reevaluate the Secretary's conclusions concerning competitive rail service.

The extent to which intramodal rail competition can be sustained should be addressed carefully, and consideration should be given to alternative dispositions of the properties of the railroads in reorganization which would make possible the profitable co-existence of competing rail systems in the region.

The Secretary's assumption that the ability of a particular route, point, or market to sustain competitive rail service can be determined on the basis of the number of train operations experienced in a given period should be tested with care.

The Association should consider whether the Secretary's conclusions as to what constitutes an "efficient size" train are valid, and the extent to which adjustments in those conclusions would affect his recommendations concerning the degree to which competitive rail service can be provided economically.

In determining where intramodal rail competition can be maintained, the Association should consider grouping several of the zones into which the Secretary divided the region, especially in the Northeast where the zones tend to cover small geographic areas.

JOINT USE

The Association should accept and implement the Secretary's recommendation that rail facilities be used jointly by more than one carrier wherever it is feasible and cost-effective to do so.

PASSENGER SERVICE

The Association, in making mainline selections, should consider those lines which currently carry passenger traffic, and those which have passenger service potential, in three separate categories: long-haul intercity; intermediate distance, high-density intercity; and commuter.

IMPACT UPON PROFITABLE RAILROADS

The Association should consider the competitive impact of the operations to be conducted by the Corporation upon all the surviving profitable railroads including switching and terminal companies in the region, and take steps to assure the continued viability of those carriers.

PUBLIC PARTICIPATION

The Association should scrutinize with care the material—both factual and conceptual—submitted, and to be submitted, to the Office by users of rail services, government officials at all levels, and other interested members of the public.

The Association should begin at once to devise a means for making prompt and widespread distribution of the Preliminary and Final System Plans. Otherwise effective public participation in further stages of the planning process will be impossible in view of the extremely tight statutory timetable.

Public Response to the DOT Report

The Act directs the Office not only to study and evaluate the rail service recommendations of the Secretary of Transportation in the DOT Report, but also to elicit public views on the present and future rail service needs of the region. In connection with this latter responsibility, section 205(d)(2) of the Act provides that the Office shall—

> employ and utilize the services of attorneys and such other personnel as may be required in order properly to protect the interests of those communities and users of rail service which, for whatever reason, * * * might not otherwise be adequately represented * * *.

Pursuant to that Congressional mandate, the Director of the Office appointed a Public Counsel, whose function is to provide legal representation and assistance to the public throughout the restructuring process set in motion by the Act.

In connection with its review and analysis of the DOT Report, the Office was directed by the Act to hold public hearings to solicit views and comments. Since the statutory timetable requires the Office to issue its evaluation of the Report by May 2, 1974, it was considered necessary to begin public hearings only a month after its issuance. Thus it was determined that hearings should be held in representative cities throughout the region beginning early in March. On the basis of geographic location and traveling distances from other points in the region, 17 cities were selected as hearing sites. Eight hearings were conducted during the week of March 4; eight more during the week of March 11; and one during the following week. The hearing locations, and the number of witnesses appearing at each point, were as follows:

Albany, N.Y.	160
Baltimore, Md.	142
Boston, Mass.	179
Charleston, W. Va.	50
Chicago, Ill.	195
Columbus, Ohio	266
Detroit, Mich.	200
Green Bay, Wis.	75
Hartford, Conn.	188
Indianapolis, Ind.	257
New York, N.Y.	78
Philadelphia, Pa.	185
Pittsburgh, Pa.	122
St. Louis, Mo.	181
Scranton, Pa.	207
Trenton, N.J.	138
Washington, D.C.	68

A total of 2,691 witnesses testified at the hearings, and in all 71 days of testimony were taken, resulting in a hearing record of 14,531 pages. Over 1,500 documents were submitted in lieu of oral testimony prior to the March 28 cut-off date which had to be established for submissions to be considered in the preparation of this report. Several thousand additional statements have been submitted since that time.

At each hearing location one, in most instances two, attorneys from the Public Counsel's office were assigned to represent the public. For this series of hearings the Public Counsel's permanent staff of four attorneys was supplemented by 26 other attorneys who were retained for this purpose. The Public Counsel's office attorneys supplemented the Office's other governmental and industrial liaison activities by spreading information about

V 39 I 93 MAY 13 74 XUM

the Act and the DOT Report directly to those most immediately affected. Each hearing city was visited by at least one attorney several days prior to the scheduled hearing in order to assist the public directly and to solicit suggestions firsthand.

DISSEMINATION OF THE DOT REPORT

One factor which made effective public participation difficult was a general lack of knowledge about, and the inability to obtain copies of, the DOT Report. Section 204(b) of the Act required the Secretary to submit his report to "the Governor and public utilities commission of each State studied in the report, local governments, consumer organizations, environmental groups, the public, and the Congress." However, the broad distribution contemplated by the statute was not fully accomplished. Many witnesses, and other interested persons contacting the Office, complained that they were unable to obtain copies of the DOT Report, and particularly of Volume II containing individual zone maps. Many of those most heavily affected were not aware of the Report until informed of its existence by representatives of the Office. Even then, it often proved impossible for them to obtain copies, either from DOT or the local outlets of the Government Printing Office. To avoid a repetition of this unfortunate situation, the Association is urged to begin making plans immediately for the prompt and widespread distribution of the Preliminary and Final System Plans.

PUBLIC PARTICIPATION

Participants in these proceedings represented a cross-section of public interests including federal, state, and local governmental officials; manufacturing, wholesaling, retailing, and agricultural shippers; carriers; environmental, conservation, consumer, and passenger groups; and a variety of other diverse interests. Written statements have been received from the United States Department of Agriculture, the Department of Defense, and the Environmental Protection Agency; several States in the region; and the National Railroad Passenger Corporation (Amtrak).

The sophistication and specificity of comment varied widely, from the highly technical remarks of economists and engineers to the more general comments of other concerned citizens. Some witnesses presented detailed maps and extensive specific information regarding carload counts, tonnage, track conditions, revenue projections, and alternate modes of transportation. Others registered their general concern for the future of rail transportation in the region. Still others made valuable contributions to the development of a restructuring methodology.

Geographically, the witnesses represented the entire northeastern quarter of the United States. Participation was particularly heavy from the rural agricultural areas of Illinois, Indiana, and Ohio, Pennsylvania and New York. Various individual locations, such as the Delmarva Peninsula, the Lehigh Valley in Pennsylvania, and the Dayton, Ohio area were especially well-represented.

By far the largest group of witnesses appearing were the shippers and manufacturers who saw themselves as directly affected by the identification of potentially redundant lines contained in the DOT Report. The next largest group represented were government officials, followed by planners and agricultural shippers.

The bulk of the testimony focused on local rail service needs and problems. This testimony generally was concerned with criticizing and questioning the methodology, criteria, and conclusions contained in the DOT Report. The substance of public sentiment on these issues was: local rail needs and problems are many and serious; the social, economic, and environmental impact of rail service discontinuance in many instances would be severe; and DOT's suggested blueprint for resolving the rail crisis in the Northeast and Midwest is inadequate.

The level of participation in the hearings emphasizes the widespread and deep seated public interest in the rail planning process. The public contribution has been a valuable one to date, and the general views and comments, as well as the mass of factual material, are worthy of careful consideration. In fact, in view of the railroad data deficiencies discussed later in this report, it may well be that only through information obtained from rail users can an accurate picture be developed, even of historic rail traffic originations and terminations.

Copies of the hearing transcripts and all other written material submitted to the Office are being supplied directly to the Association. Their careful study is recommended. The Office itself has not had sufficient time to make as thorough a review of the materials submitted for the record as it would have liked to do prior to the issuance of this report. That review and analysis is continuing, and its results will be made public as soon as possible.

PUBLIC REACTION

It can fairly be said that the DOT Report left a substantial portion of those into whose hands it came either confused or angered, or both. It is to be expected that individuals taking the time and making the effort to attend a public hearing or to submit their views on a government planning proposal will be those who see their own oxen as being gored. Thus a great deal more critical than favorable comment can be anticipated in a proceeding of this kind. However, that fact of human nature does not mean that much of the misunderstanding caused by the DOT Report was unwarranted. Much of it was probably inevitable, given the form the Report took, but it could have been greatly reduced had there been included a more complete, or simpler, explanation of its purposes and methodology.

One of the questions most frequently asked members of the Office's staff was what was the effect of DOT's labeling as "potentially excess" the lines of profitable railroad. (This is a question for which a really satisfactory answer has not yet been found.) Another question often heard was why lines which carry heavy passenger traffic, and which may even be subsidized by a state or local government, were identified as potentially excess, and whether it was anticipated that freight service would be terminated on such lines even though they might be kept in operation for passengers. (The answer here apparently is that DOT showed these lines as potentially excess because the freight service did not satisfy a statistical formula. Nevertheless, DOT assumed that freight service would be operated over these lines as long as they were needed for passenger traffic.)

Another question that arose frequently was whether individual stations shown as not entitled to rail service in the DOT report, but which were located on lines not identified as potentially excess, would actually lose their service. (The answer is that this was not DOT's intention.) There was considerable public confusion also concerning application of the criteria by which individual stations and lines were determined to be entitled to, or not entitled to, continued rail service. (Since the basis for the application of these criteria on a zone-by-zone basis was not made public, it was often impossible to determine how they were applied to individual local branch lines.)

Certainly the greatest single factor that generated fear, anger, and frustration among the public was the failure of DOT to explain clearly what the report meant by classifying a particular rail line as "potentially excess". To most readers, this meant simply that a governmental decision had been made, arbitrarily and without the opportunity for public comment, that the line in question was to be abandoned. Admittedly, this was a misunderstanding, but the general outcry against such an anticipated action should convince government planners and policy makers alike that the public is not willing to accept any proposal resulting in massive abandonment of rail service while ignoring the social, environmental, and economic costs of such an action, and not providing the opportunity for full public hearings.

METHODOLOGY AND DATA BASE

Testimony on the DOT Report was generally critical of the methodology and provided enough specific data to question its accuracy. In short, the public viewed the Report with great skepticism and considered it myopic in assessing the viability of rail service on particular segments of a railroad.

More specifically, the public was highly critical of the DOT dependence on the narrowly-conceived criteria of carloads per mile. It was repeatedly suggested

that the only acceptable means of determining branch line viability is a detailed cost and revenue analysis, taking into account not only what is actually transported on a specific line, but what could be transported on a well-maintained and efficiently operated railroad.

The DOT Report's reliance upon the 1969 one percent waybill sample for evaluating interstate, long-haul service requirements and upon 1972 origination and termination carload data for branch-line evaluation drew numerous adverse comments. It was noted that these data do not reflect recent substantial increases in traffic volume, and therefore, are of questionable value. More importantly, it was continually stressed that 1972 rail traffic volume in the Northeast was critically influenced by Hurricane Agnes. Many branch lines were not operated for substantial periods and, therefore, traffic volumes for 1972 were unusually low.

Many discrepancies were cited between DOT's volume figures and information on actual shipment volume available to the shippers themselves. Numerous witnesses pointed out that waybill and carloading data inaccurately reflect origination and termination points. These data, in many cases, identify only a billing station, which may or may not be the actual origin or terminal point of the shipment. Many points, therefore, were not recommended for continued rail service although they were, in fact, the origination or termination points for a large number of shipments.

It was also pointed out that data reflecting volume, standing alone, cannot properly be used to determine the financial viability of any particular line. Witnesses in almost every state in the region pointed out particular lines which were financially viable but which had been designated as potentially excess by the DOT Report. In addition, it was shown that carload counts do not always accurately reflect even the volume of goods shipped to and from any given point. Farmers and grain elevator operators in Illinois, Indiana, and Ohio, for example, have in recent years switched from regular hopper cars to "jumbo" hopper cars, thereby reducing the number of cars shipped by 50 percent in some areas. But in almost every case, where car supply has permitted, the actual tonnage shipped has steadily increased. The same experience was reported by New England paper manufacturers, whose use of higher volume cars has resulted in increased tonnages being handled in fewer carloads.

The DOT Report was criticized also because it does not reflect the relative profitability of transporting various kinds of freight. The carload count does not differentiate between a shipment of manufactured goods and one of bulk commodities, for example, for which both the revenues received and costs incurred may be vastly different. But perhaps the most telling criticism of the DOT Report's methodology came from those witnesses who pointed out that by applying the criteria developed for use in the Report to such profitable railroads as the Detroit, Toledo and Ironton; the Akron, Cantan, and Youngstown; and the Toledo, Peoria, and Western, the result was the finding that virtually all the lines of these carriers, despite their demonstrated ability to thrive, were potentially excess.

Finally, DOT's findings and recommendations, which the public considered to be based on unacceptable methodology and criteria and inaccurate data, were challenged on the basis that in some cases: (1) the only rail segments between two viable points were recommended for discontinuance; (2) service was recommended on lines which already had been abandoned; and (3) some lines were not considered at all.

ABANDONMENT AS A CURE FOR RAILROAD PROBLEMS

The DOT Report was seen by the public witnesses as based largely on the premise that if all lines which do not make a profit are removed, the rail system will be profitable. At every hearing, the belief was voiced that the concept of large-scale abandonment as a cure for the evils of unprofitability is the wrong approach, advanced at the wrong time, and for the wrong reasons.

Certainly, it was the possibility of rail service discontinuance and abandonment which raised the greatest public furor. Witness after witness described the adverse economic, social, and environmental impact such actions would have on communities. It was contended that rail service discontinuance would result in market distortions, economic depression and social dislocations. Moreover, it was repeatedly stated that rail discontinuance is inconsistent with our national environmental and energy conservation policies. Decreased rail service would result in increased truck transport and greater consumption of scarce energy resources, more pollution, and increased pressures on land use for additional highway construction. Public sentiment was strong that these factors must be of primary importance in determining the final rail plan.

In the coal-mining areas of the region, most shippers anticipate a great increase in coal shipments as a result of the shortage of domestic petroleum and increased price of foreign oil. Also, due to the international oil situation, metropolitan areas such as Baltimore, Philadelphia, and New York anticipate an increased demand for commuter train service. In the industrial areas of upstate New York and Michigan, many new industrial parks have been located where rail service is available. In short, numerous witnesses in every state testified that increased industrial and commercial activities would provide traffic for the railroads, and that the success of these businesses depends upon rail service.

There was evidence, too, to support the concept that there is a need for some excess capacity in the rail system. The witnesses fear that by following the theory of the DOT Report to its logical conclusion, traffic could become so concentrated on a few inter-city lines that there would be no time for repair and maintenance. If a derailment or other blockage should occur, it could be possible that there would be no parallel line available over which to effect an alternate routing. Others pointed out that too much emphasis on consolidation of the present rail system would result in even more traffic having to move through already congested gateways. Shippers in southern Illinois, for example, try to avoid the Chicago gateway because of lengthy delays, and they fear that retirement of too many lines would eliminate that option. It was noted, too, that elimination of routing flexibility could seriously affect national defense needs, as concentration of traffic on a few routes would increase the possibility of successful attack or sabotage.

Concern was expressed that in identifying particular lines as potentially excess, the DOT Report gave too little consideration to the effect which possible elimination of those lines would have on the movement of through traffic in the region. Some connecting railroads testified that their ability to act as intermediaries between larger systems would be eliminated. Similarly, it was noted that the Report apparently did not consider the potential disruption of existing patterns of freight movement, and how these patterns could be revised. In brief, the witnesses questioned whether a system designed in accordance with a theory that sought to eliminate every line whose individual profitability could not be proven would be able to function as a system at all.

Also of concern to the public witnesses was the impact of excessive abandonments upon prices, and especially food prices. Estimates of the result of abandonments on the scale suggested by the DOT Report's classification of lines as potentially excess upon the price of grain ran as high as 25 cents a bushel. It was suggested, too, that the loss of rail service, and the concomitant loss of revenue, to the farmer would hinder achievement of another national goal: namely, increased food production, which is not only important as an anti-inflation measure, but is vital to the Nation's balance-of-payments posture. Many of those testifying pointed out that agricultural commodities are the country's largest (and only replenishable) export. Reduced rail service, it is argued, could not only result in decreased food production, but also in increased costs of moving these products to ocean ports.

Fuel conservation is a recent and urgent national policy, and it is believed that rail service will have a major impact upon the goal of attaining national energy autonomy by 1980. The coal producing areas of West Virginia, Pennsylvania, Ohio, and Illinois depend heavily on rail service. In most cases, the opening or reopening of mines could not be accomplished unless rail service were retained or expanded.

V 39 I 93
MAY 13 74
XUM

Also important to the fuel conservation picture is the fact that rail service is an energy efficient mode of transportation. Estimates were submitted to the effect that rail transportation uses as much as four times less petroleum than motor carriage to move the same volume of goods the same distance.

A number of witnesses took issue with the DOT Report's assumption that alternate modes of transportation could fill in the gap if major reductions in rail service were effectuated. They argued that truck and barge facilities would be wholly unable to meet the shipping demand reflected by even the present level of rail service. Forcing reliance on motor carriage would affect the rural agricultural areas most heavily. There was evidence of a shortage of trucking capacity. Also, some witnesses characterized motor transportation as considerably more expensive (from 10 to 25 percent) and much less efficient than rail for moving bulk commodities. Estimates varied as to the number of trucks needed to replace rail service if the lines identified by DOT as potentially excess were actually abandoned, but they ran as high as two million additional truck trips annually.

The result would be an obvious increase in fuel consumption. Several local highway commissioners testified that in many cases county roads, bridges, and overpasses are unequipped to handle this heavy traffic. Many county roads are already in poor condition, and reduced rail service would cause increased road, bridge, and police expenditures, as well as increased traffic congestion in many communities.

The "Frost Law" in Illinois, which provides that no vehicle over 5 tons may travel on county roads between February 1 and May 1, would effectively isolate many rural areas of that state from any transportation mode during those months.

The DOT Report contemplates that service on the abandoned branch lines will be taken up by short-haul truck service which will connect with piggyback rail service on the remaining lines, generally at a point within 20 miles of the station losing direct rail service. However, there was little evidence to support the assumption that piggyback facilities would in fact be available, and much testimony of their inadequacy or non-existence. Clearly, if piggyback is to substitute for direct rail service in any real sense, substantial expenditures for new and improved facilities will be necessary.

SERVICE COMPLAINTS

One of the pervasive themes running through the hearings is the public's dissatisfaction with the quality of existing rail service. Witnesses complained of slow and unreliable freight and passenger service, of deteriorating facilities, of what are assumed to be arbitrary rate structures, of inadequate maintenance and few capital improvements, and—most of all—of severe shortages of freight cars.

In the grain belt of Illinois, Indiana and Ohio, for example, farmers and grain elevator operators tell of chronic shortages of railroad cars. Typical testimony indicated that 400 percent more cars were needed than were received. The car shortage is so acute that there was testimony, under oath, that a black market in hopper cars exists in Indiana. One grain shipper testified that a large exporter had offered him all the cars he wanted for "20 percent of his after tax profits". (This situation is under investigation by the Commission.)

A common viewpoint of those testifying was that the underutilization of many rail lines is caused not by lack of demand, but by poor service, and the inability to obtain cars when required. Thus, it was repeatedly urged that the initial step in the planning process be a comprehensive analysis of the existing deficiencies in the level and quality of rail service, which could then be utilized in determining which lines, given improved performance, could become profitable segments of the regional rail system.

ECONOMIC IMPACT

Another major criticism of the DOT Report in general, and of the concept of abandonment in particular, was the serious economic hardship that would be created throughout the Northeast. Many shippers who handle bulk commodities, being totally dependent on rail service, could not use truck transportation even if it were available, and the loss of rail service would force them to go out of business. Still others could turn to trucks, but only if they were willing to forfeit their competitive advantage, which could make it impossible for them to stay in business. Even the shippers who retained some, but not all, of their rail service face the loss of a portion of their markets.

Some consignees cannot obtain products by any other method than rail, because of the nature or size of the material, or both. Certain hazardous materials can only be received by rail, and some industrial shippers, including power plants, need huge pieces of machinery which are far too large to be moved by truck. Still other consignees could receive materials by truck, but their shipping facilities are geared entirely to rail service. The cost and inconvenience of shifting to truck service would be substantial, and could lead to the closing of a marginal plant and its relocation outside the region.

Local, state, and federal government officials were particularly concerned with the loss of jobs that would be caused by rail abandonment. Although total figures are difficult to estimate, abandonment of lines marked as potentially excess in the DOT Report could destroy several hundred thousand jobs, with a commensurate loss of tax revenue and increased welfare costs for the affected areas. Almost unanimously, witnesses agreed that abandonment on this scale would have a massive and disastrous effect on employment.

Even more important than the actual economic loss caused by rail abandonment would be the effect of economic retardation on an expanding economy. Hundreds of witnesses testified that their commercial and industrial expansion plans would grind to a halt without continued or improved rail service. Many industrial parks have been deliberately planned along rail lines, only to find that their rail service might now be cut off. In the midwest, hundreds of grain elevator operators are expanding their grain handling facilities in anticipation of bumper crops. Any discontinuance of rail service would seriously affect the viability of this commercial expansion and the financing upon which it is based.

Rail abandonment would also affect the programs of local and state planning agencies. Some states, such as Connecticut, have sophisticated land use plans which contemplate the clustering of industrial sites around rail facilities. Zoning decisions have been made on the assumption of continuing or improved rail service. Highway departments are basing their road construction estimates on the ability of railroads to transport more and more commuters.

PASSENGERS AND THE ENVIRONMENT

The DOT Report, by its own admission, did not consider two other major goals of the Act—the establishment of an improved high-speed rail passenger system and the attainment and maintenance of environmental standards.

All witnesses concerned with the environmental issue agreed that without the continuation and expansion of existing rail service, environmental degradation is assured. A good deal of comment concerned the Clean Air Act Amendments of 1970. Metropolitan jurisdictions such as Philadelphia, Baltimore, Boston, and especially New York are relying on growing rail service to decrease exhaust emission pollution. Without rail service, heavily urbanized states agree that they will be hard pressed to meet federal air quality standards.

Environmentalists also criticized the DOT Report for implicitly encouraging increased road and highway construction. There is no doubt that such construction would be required in some areas if rail service were lost. The cost of constructing one mile of a federal highway can be 100 times greater than the cost of constructing a mile of rail track. Furthermore, in most cases, rail rights-of-way already exist, waiting to be used. On the other hand, new highway construction is time-consuming, costly, and often produces social dislocations.

Environmentalists also pointed out that rail cutbacks will deal a serious blow to fuel conservation. The United States no longer has such extravagant petroleum resources that it can afford to encourage inefficient transportation modes.

Dismay was also expressed that the Act removed the Final System Plan from certain Environmental Policy Act requirements. Many persons expressed the hope that the Final System Plan will studiously observe the language in the Act which calls for a close scrutiny of environmental considerations.

Passenger groups were similarly concerned that DOT identified as potentially excess many lines needed for passenger service. In Baltimore, city officials agreed that reutilizing existing rights-of-way for passenger service is clearly preferable to increased highway construction or expensive rail rapid transit. Similarly New York City is anxious to increase its rail passenger service. The recent combination of high gasoline prices and long lines at the service station has caused a noticeable increase in rail passenger volume. Numerous witnesses from the New York area testified that they could not tolerate the proposed abandonment of essential commuter rail lines.

Witnesses from several areas, including Fredericksburg, Virginia, the Catskills in New York, the Poconos in Pennsylvania and Cape Cod, Massachusetts, pleaded for continued or improved rail service to carry tourist traffic. These areas experienced a slowdown of business during the fuel shortage, and the tourist industry is anxious to encourage non-auto transportation modes, not only to promote conservation, but also to reduce automobile traffic in recreation areas.

The view was also expressed that the Corporation should be required to set up commuter service on existing lines. Past experience, such as that of the Chicago and North Western railroad in Chicago, was pointed to as indicating that some commuters prefer fast and reliable rail service to the automobile.

OTHER SUGGESTIONS AND COMMENTS

Various witnesses at the hearings made suggestions which, while they do not relate directly to the rail restructuring process detailed in the Act, nevertheless are deemed worthy of reporting. Among these views and recommendations are the following:

Provision should be made for public interest, environmental, and passenger representatives on the Association Board of Director. The public interest will not be adequately represented without such membership.

Any rail service restructing should consider the needs of the handicapped, as service for handicapped persons is now inadequate.

Only a minimum amount of track should be abandoned, but that which is eliminated should be kept in a "track bank" to meet rail needs which may emerge in the future. If the rail trackage is actually removed, the rights-of-way should be transferred to the public domain, since they would be ideally suited for walking and cycle paths, horse trails, linear parks, or malls. It was noted that railroad rights-of-way often represent the only linear recreational land available for public use in urbanized areas.

The Federal Government can no longer afford to continue massive subsidization of air and highway transportation while ignoring the railroads. The railroads are currently saddled with unreasonable tax and regulatory burdens that must be remedied by Federal help. Furthermore, without substantial regulatory reform and capital subsidy programs, mere operating subsidies will be ineffective.

Regulatory policies, as administered by the Interstate Commerce Commission, should be altered either to permit less (or no) economic regulation or to treat railroads as true public utilities with guaranteed rates of return; to require necessary upkeep of rail plant; and to require the keeping of accounts which would permit the ready computation of branch line costs and revenues.

Several witnesses were of the view that rail rights-of-way should be nationalized and rail companies charged a fee for their use, like federal highways. This seems to be a reflection of the philosophy expressed in much of the testimony that rail transportation is a necessity of modern life and should be subsidized if necessary to meet the public need. "Financial viability" was criticized again and again as an improper criterion upon which to base the decision for continuation of rail service. Rather, "public need" emerged as the more appropriate benchmark for measuring rail service.

Overall, the proceedings highlighted the depth and breadth of public frustration and concern with the present state of rail services, as well as what individuals perceived to be the misguided direction of the proposed rail planning process. The overwhelming sentiment expressed during the hearings, and in the written submissions, was that the restructured rail system must consider the social, economic, and environmental needs of the local communities throughout the region. For this to happen, the public insists that the planning process should include ongoing, informed public participation.

EVALUATION OF THE DOT REPORT

The Congress, in enumerating the duties of the Rail Services Planning Office, listed as its first responsibility that it should "study and evaluate" the Secretary of Transportation's Report on rail services in the region. That Report, as required by the Act was published on February 1, 1974, and contains the Secretary's "conclusions and recommendations with respect to the geographic zones within the region in and between which rail service should be provided and the criteria upon which such conclusions and recommendations are based." The quoted language, taken from section 204 (a) of the Act, constitutes the Congressional directive pursuant to which he prepared and issued his Report.

The Secretary looked primarily to the economics of railroad service, and attempted to develop quantitative, statistical guidelines which would aid the Association in making route selection and other decisions affecting future rail service in the region. He conceded that such other statutory goals as environmental protection and job preservation were not considered in framing his recommendations, and he made it a point to urge the Association to give full consideration to these and the other factors which the Act requires be taken into account.

A stated purpose of the DOT Report was "to launch the planning process" for reorganizing and restructuring the region's rail system and "to give direction" to planning for the provision of rail service. Its objectives were to describe the existing system, to analyze capital and operating problems and possible improvements that must be realized, and to provide recommendations on restructuring and consolidation.

The DOT Report concludes that a fundamental reorganization and restructuring of the region's railroads is required if the policy directives enunciated in the Act are to be fulfilled, and that this will provide improved capital productivity and a viable financial base, leading to higher quality rail service. It finds that the interstate mainline system should be consolidated into a high volume upgraded network, coordinating operations and sharing facilities where practical; that local service requirements generally should be met by single rail carriers in a given area; and that nonprofitable rail facilities should be abandoned or subsidized. It visualizes competition on the local level as being provided by carriers of other modes, with intramodal competition retained only on the interstate network between main traffic generating centers. Its result is seen as rail financial self-sufficiency.

The DOT Report further concludes that the restructuring process can improve effectiveness of competition, balance (indirectly) federal investment among transportation modes; increase the ability of the railroads to attract investment capital; and improve operating efficiency and service quality. While stating that significant improvements can be realized in operating efficiency through increased labor and capital productivity, the Report states that "The Act does not provide any direct mechanism" for modifying "inflexible labor work rules," in which there is "one of the greatest opportunities for increasing productivity." Thus, the Report concentrates on the "development of recommendations for improving the operating efficiency of both the bankrupt and solvent railroads in the region" as the method for improving capital productivity.

This section addresses those aspects of the DOT Report relating to:

Approach taken
Sources of basic data
Methodologies used
Evaluation of assumptions and criteria

The Office believes that a thorough review of these factors will be helpful to the Association in developing a viable railroad network for the region.

It should be noted here that the discussion of the data sources and methodology used by DOT in its Report is based

V 39 I 93 MAY 13 74 XUM

on many hours of conversation with Federal Railroad Administration staff members. They willingly gave of their time and experience, and the Office wishes to acknowledge its appreciation.

BASIC APPROACH TAKEN BY DOT

There is no question but that the DOT Report can be credited for "launching the planning process." Despite the fact that it was widely misunderstood, as indicated in the preceding section of this report, and perhaps because of the direction taken by that misunderstanding, it served to alert the public to the very real dangers which threaten the continuation of rail service in the region. The number of lines identified as "potentially excess" in the DOT Report brought home the fact that many rail services have become unprofitable, and that the possibility of a shut-down by at least some of the railroads in reorganization is a real possibility.

As indicated previously in the discussion of the public testimony, a reader of the DOT Report can only come away with the conviction that the Secretary has concluded that the basic cure for the problems of the railroads in the region is major surgery—in the form of excision. Two of his formal conclusions reinforce this interpretation. He finds that:

> In order to achieve improved productivity, the existing, highly duplicative and underutilized individual railroad interstate mainlines in the region should be consolidated into a high volume, upgraded interstate network.

and,

> The existing, highly duplicative, feeder and local service network used for local rail services should be streamlined by permitting the abandonment of rail facilities which are not financially self-sustaining.

It is unquestionably true that there are excess rail lines in the region. Some are branch lines which do not, and will not, generate enough traffic—or the right kind of traffic—to turn a profit or otherwise to justify their continued existence. Despite hardships to individual users, their retention cannot be supported through cross-subsidization by users of other parts of the rail system, nor are they important enough to the national or regional economy to warrant their receiving public subsidies. Others are routes which can be identified as carrying traffic that could be diverted to other rail lines with no diminution in service quality, and with resulting reductions in costs and increases in efficiency—that is, assuming that the available alternate routes are in good enough physical condition to carry the additional traffic.

The first question which must be asked about the approach of the DOT Report is whether large scale reductions in rail mileage will solve the problem which the Act was designed to solve—the economic ills which beset the railroad industry and which resulted in wholesale rail bankruptcies in the region. While the definitive analysis of this point has not yet been done, there are indications, at least, that abandonment of substantial amounts of rail line will have relatively little impact upon railroad profitability compared to such other factors as the high cost of terminal operations in the Northeast, labor costs, and the debilitating and expensive effects of many years of deferred maintenance. The Penn Central Trustees, in support of their previously advanced proposal to reduce their 20,000 mile system to about 15,000 miles, estimated that the 5,000 mile track reduction would result in annual savings of about $20 million. Considering that Penn Central has consistently reported annual losses in excess of $100 million, it is clear that the savings of even $20 million would go only a short way toward solving its long-range financial problems.

Even accepting the fact that a good deal of pruning of the railroad plant is called for—whether or not it will prove to be the panacea which some seem to think it will—it must be asked whether the process followed by the Secretary and described in the DOT Report is an acceptable method for determining which lines should be incorporated into a new rail system. At this point, it seems worth stressing that the task faced by the Association is not to decide which lines should be abandoned in order to improve the health of existing railroad companies. It is to select those lines, and other facilities as well, of the unreorganizable bankrupts which are to be purchased for the Corporation in order to create a self-sufficient and viable system, capable of meeting the public need for rail service and of meeting the other goals outlined in the Act.

The Secretary was not called upon to make suggestions as to which yards and terminals, and other facilities, such as car and engine shops, should be included in the basic system. Nevertheless, the location of such facilities, and especially railroad yards, is an important factor in deciding which mainline routes can be operated most efficiently. Also, and obviously, the system must include those lines that provide access to principal terminals. Perhaps not so obvious, but of vital importance nevertheless, is that lines must be included which provide access to available equipment repair facilities. The failure to take these factors into account constitutes a major flaw in the DOT Report's approach to route selection.

We must agree with those public witnesses who questioned whether there would be enough lines remaining after applying the DOT criteria to form a rail "system" at all. Efficient routes handling substantial volumes of traffic would be eliminated in favor of others which today are less direct but, largely because of their ownership, more heavily utilized. In other cases, routes which appear superficially less efficient than others, but which in fact may have more favorable grades or clearances, were listed as potentially excess. While points originating and terminating large traffic volumes may retain direct rail connections, trackage between major rail yards—equally important—is often dropped. And even if historical carload counts can be effectively used for a preliminary screening of unprofitable rail lines, it seems clear that the "thresholds" adopted by DOT, and described below, were set at unreasonably high levels. In short, the results of the DOT Report do not encourage faith in any statistical method as a basic route selection guide.

SOURCES OF BASIC DATA

The DOT Report draws on two basic sources for traffic volume data—the 1969 one percent waybill sample and 1972 carload origination and termination data supplied by Class I railroads. DOT's dependence on these data sources in developing the recommendations and conclusions warrants discussion of their application.

1969 One Percent Waybill Sample

Results of a sample of waybills collected continuously from Class I railroads are published periodically. The 1969 one percent waybill sample was used by DOT to develop origin-destination traffic flows between zones in the region. This traffic flow information was the basis for recommendations as to routes able to support competitive service.

The importance of traffic flow in the route selection process requires that additional pertinent data be collected for evaluation by the Association. The Office recommends that the traffic flow data collected cover several years in order to minimize the effect of anomalies in the traffic volume for a given year, and that waybill sample data be used with care, or supplemented with complete data or larger samples, when applied to short or low-volume lines.

1972 Carload Origins and Terminations

The carload origin and termination data, collected from the railroads for 1972, were the basis for determining which stations were to be recommended for direct local rail service. Frequently, these data do not accurately reflect the origination and termination points of the traffic. Further, data for a single year cannot provide a sufficient base for developing local service recommendations.

The 1972 carload data represent traffic at billing points, which in many cases are not the origination or termination points. We found many instances in which traffic originating at a point was not reported at that point but was included in the carload generation total for the billing point. As a consequence, the origin point was often not recommended for direct local rail service, although it actually generated sufficient traffic to satisfy the local service criteria.

A single shipper located at Yatesville, Pennsylvania in Zone 72 generated 610 carloads in 1972. Yatesville is 1.4 miles from the nearest viable rail station (Pittston). This traffic was not shown for Yatesville and, as a result, Yatesville was not recommended for service although it exceeded the "DOT Upper Criteria." (The "DOT Upper Criteria" is discussed later in this report under the heading "Development of the Local Service Network".) A shipper at Berea, Ohio, in Zone 94 generated 535 carloads in 1972. Berea is approximately 3 miles from the nearest viable rail station, but was not recommended for rail service because the traffic volume was not credited to Berea, the point of origin.

Testimony at the hearings highlighted the effects of Hurricane Agnes on the 1972 traffic data, demonstrating that this was not a typical year. The Office further believes that data for any single year will include factors skewing its traffic volume from the average. In 1973, for example, rail grain and soybean movements were significantly higher than average.

The Act requires that the future rail service needs of the region be addressed in the restructuring plan. The initiation of service by the Corporation is still at least one and one-half years away. The Corporation must be structured to meet the needs of that and subsequent future periods. The Association's traffic data, as a result, should include projected traffic demands for those periods. We suggest 1980 as being a reasonable time horizon for the Association's planning function.

The Office recommends that, in preparing the Preliminary and Final System Plans, the Association:

(1) Collect information on consignees and consignors by billing stations to facilitate the identification of actual traffic origination and termination points.

(2) Use traffic data from several years to minimize the effects of anomalies in any given year.

(3) Project future traffic requirements through 1980.

Inadvertent Errors

In reviewing testimony on stations generating sufficient traffic but not recommended for service, the Office found errors in DOT's analysis. In a number of instances, we found that a point was not recommended for service even though traffic had been properly credited to its origination point and the volume was sufficient to exceed the "DOT Upper Criteria". Two examples are Lyons Falls, N.Y., Zone 44, and Akron, N.Y., Zone 49.

The Department of Defense highlighted a similar error in Zone 131. In DOT's analysis, the traffic volume for the Joliet, Illinois, Army Ammunition Plant (AAP) was grouped with traffic for the City of Joliet, and Joliet AAP (shown as Joliet AR 1 and AR 2 on the Zone Map) was not recommended for direct local rail service. If the traffic volume had been properly credited, the Joliet AAP would have exceeded the "DOT Upper Criteria" for direct rail service from Joliet, approximately 15 miles away.

Although the Office recognizes the difficulty of avoiding errors in a study of this magnitude, the Association must take steps to minimize them in formulating the Preliminary and Final System Plans.

METHODOLOGIES

In developing recommendations for the restructured rail system, DOT evaluated:

Points recommended for direct local rail service

Potentially excess rail lines

Major interstate traffic flows

Competitive interstate rail services

Testimony presented at the hearings indicated that many witnesses were confused about the methodologies used in the analyses. This was particularly evident in the analysis of local rail service and in the designation of potentially excess rail lines.

Following is a description of each DOT methodology with critical or key decision points highlighted. Where applicable, a decision flow chart is provided.

Direct Local Rail Service

DOT's methodology for determining points recommended for direct local rail service was a two-step procedure: the first step identified major traffic centers; the second evaluated lower volume points relative to the major traffic centers (Figure 1).

The data source for this analysis was 1972 carload origination and termination information provided by the railroad companies in the region. These data, as highlighted earlier, represent the billing point for a shipment, and thus not necessarily the origination or termination point of the movement. As a result, the annual carloads originated or terminated at a particular point may not be accurate if the billing point is different from the origination point.

The methodology used in analyzing direct local rail service was:

Step 1—Identification of major traffic centers

1. Determine the annual carloads originated or terminated at each station (subject to limitations of using billing points rather than origination points).

2. Eliminate all stations originating or terminating less than 75 carloads per year.

3. Identify all stations generating 5,000 or more carloads per year as major traffic centers.

Step 2—Evaluation of lower volume points

4. For each rail line at a major traffic center, determine the distance to the nearest station which generates 75 or more carloads per year.

5. Apply "DOT Upper Criteria" to the station, using the carloads generated and the distance from the major traffic center.

6. If station does not meet criteria, repeat (5.) for the next station.

7. If station does meet criteria, station is recommended for local rail service and the line from the major traffic center to the station is considered viable.

8. For successive stations along the line, the "DOT Upper Criteria" is applied using the distance from the nearest station recommended for local rail service.

9. For branches connecting to a line considered viable (but not directly connecting to a major traffic center) the criteria is applied using the distance from the station to the junction with the viable line.

Three decision points, shown as diamonds on the decision flow chart, are critical in the methodology. These are:

Exclusion of stations generating less than 75 carloads per year

Establishment of 5,000 carload per year threshold level for major traffic centers from which lower volume points are evaluated

Application of "DOT Upper Criteria"

Their impact on recommendations of points for service should be determined by the Association.

The Office performed preliminary sensitivity analyses on these decision criteria. The results indicate that the recommendations of points for local rail service are sensitive to changes in both the "DOT Upper Criteria" and the 75-carload criteria, with the effect of the former over-shadowing the latter. The results, however, are generally insensitive to reductions in the 5,000 carload threshold in establishing major traffic centers.

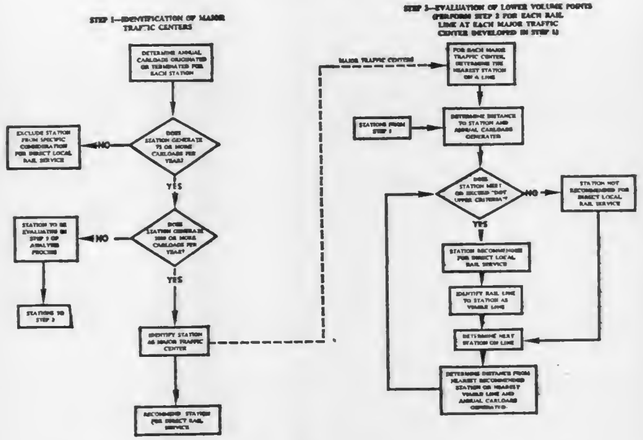

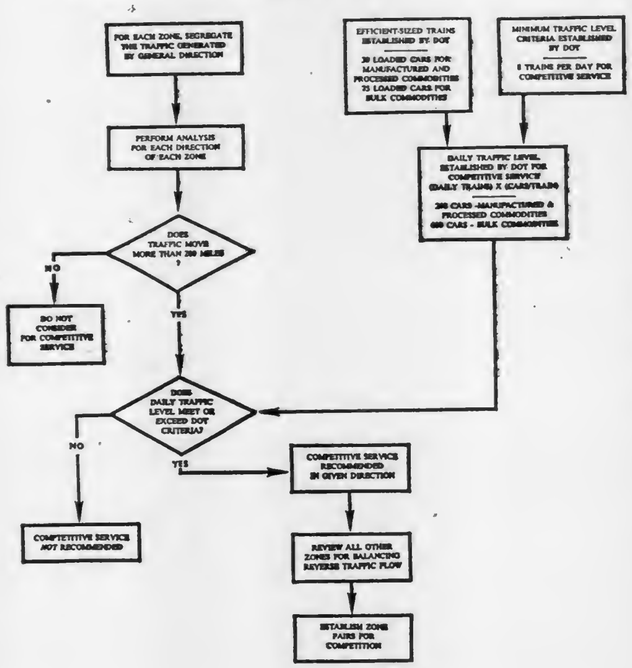

FIGURE 2

IDENTIFICATION OF ZONES WHICH SHOULD RECEIVE COMPETITIVE SERVICE
DECISION FLOW CHART

Potentially Excess Rail Lines

In DOT's methodology, a line would not be identified as potentially excess if it met any of four criteria. Basically, a line would not be excess if it were the only line serving a point or area recommended for direct rail service or if it were an alternate line which also satisfied additional criteria (Figure 2).

To be retained, a line must:

Provide the only rail connection at the;

Local Level—a line was the only line serving a station recommended for direct rail service, again subject to the limitations of using billing points rather than origination points

Feeder Level—a line was the only line connecting an area of recommended points with a mainline

Provide an alternate line at the;

Local Level—an alternate line to a station recommended for direct rail service was retained if the line also met "DOT Upper Criteria"

Feeder Level—an alternate line connecting an area to the mainline was retained if existing traffic density on the alternate line met certain minimum criteria (annual densities of 10 million gross tons for bankrupt carriers' lines or 5 million gross tons for solvent carriers' lines)

Major Interstate Traffic Flow

DOT's determination of the major traffic flows in the region was based on the 1972 carload origination and termination data and other information on existing densities on mainlines in the region, and was not based on specific criteria. The major traffic flows generally reflect the existing traffic flow pattern in the region.

Competitive Interstate Rail Service

The methodology followed by DOT in recommending zones for interstate competition is illustrated in the decision flow chart in Figure 3. The methodology used in analyzing competitive service was:

1. For each zone, determine the annual carloads originated to and terminated from other zones, grouping the other zones by general direction from the zone being evaluated.

2. Eliminate the traffic of all zones within 200 miles of the zone being evaluated.

3. Determine those directions in which sufficient traffic is handled to require eight "efficient sized" trains a day. An "efficient sized" train was defined by DOT to be 30 loaded cars for manufactured and processed commodities or 75 loaded cars for bulk commodities.

4. Evaluate other zones with sufficient traffic to satisfy the competition criteria in order to balance the traffic flows between zones selected for competitive service.

The 1969 one percent waybill sample was the data source for this analysis. The results are affected by considering only the traffic from a single zone and not aggregating the zones into groups representing economic areas. The results are

also influenced by the exclusion of extra-regional and overhead traffic in the analysis. If a zone generated traffic for destinations or received from origins outside the region, this traffic was not included in the zone's traffic flow. Similarly, intra-regional traffic passing through a zone, but not originating or terminating in the zone, was not considered in the zone's traffic flow. Inclusion of extra-regional and overhead traffic in a zone's flow might be sufficient to put the zone over the eight daily trainload competitive service threshold.

The definition of "efficient sized" trains and the establishment of the eight daily train threshold are critical elements in the competitive service methodology. These are evaluated in the following section, Assumptions and Criteria.

The Office recommends that the Association review the competitive service methodology and determine the effects of the considerations discussed above.

ASSUMPTIONS AND CRITERIA

Certain assumptions, criteria, and methodologies incorporated in DOT's Report are critical in the development of DOT's recommendations. This section addresses the Report's basic cost assumptions, the assumptions and criteria involved in developing the interstate network, and the criteria used in analyzing local rail service.

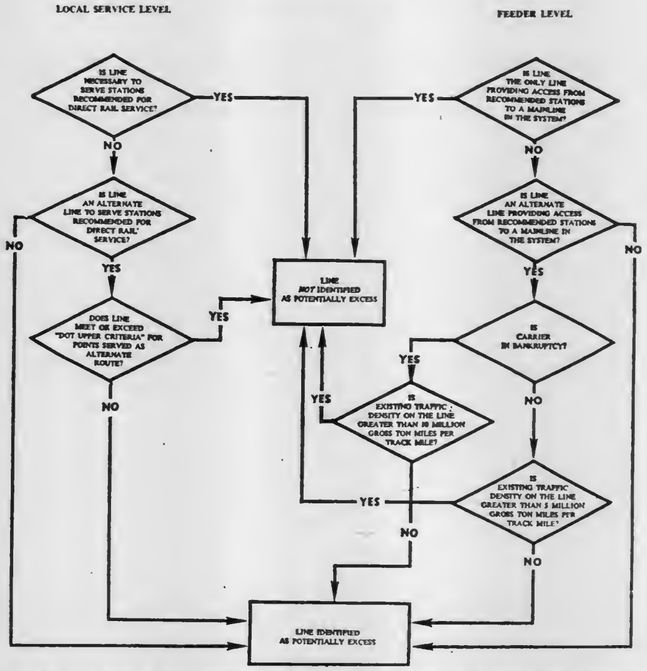
COSTS

The primary cost considerations addressed by the DOT Report are the estimates of the cost of track and roadway modernization and maintenance, and the variable costs for railroads in the region. Local rail service costs, also quite significant, are discussed separately.

In developing the total cost for a consolidated rail system, DOT estimated the cost of a major rebuilding of signalled track at $225,000 per mile, and a minor rebuilding of signalled or unsignalled track at $20,000 per mile. DOT estimated the annual cost of maintaining modernized track and roadway at $12,000 per mile for signalled track and $5,000 per mile for unsignalled track. The basic data sources for these estimates are studies performed around 1968 on the costs of maintaining track and roadway. These studies were performed prior to the issuance of the Federal Railroad Administration (FRA) track safety standards and revised cost estimates in light of these standards would be adviseable.

Modernization. Evaluation of the costs of rebuilding track and roadway requires detailed consideration of the unit costs for each major cost element. Cost estimates for subgrade and ballast, ties, rails, and signal systems must be reviewed in detail. The Office recommends that the Association determine actual costs for these major elements so that costs of upgrading lines can be considered in the selection of interstate routes in the Preliminary System Plan.

Maintenance. Maintenance costs were estimated primarily by class of track (FRA Track Safety Standards), traffic density (annual gross tons), and the percentage of the line having a high degree of curvature. The Office agrees with the general classes of variables included, but believes that the Association should strive to develop a more specific formula than DOT's for estimating the actual maintenance costs to be incurred.



Because of the importance of rebuilding and maintenance cost estimates, the Office recommends that the Association begin immediately to determine the actual costs of rebuilding and maintaining the track and roadway in the region.

Variable costs. The DOT Report takes the position that the greatest potential for improving capital productivity lies in increasing the rate at which rights-of-way and yards are utilized, thus reducing variable costs. The Report concluded also that substantial savings would result from the consolidation of services and traffic flows.

We are in complete agreement that increases in productivity can be obtained through the improvement of yard and terminal facilities. There is probably no single area in which costs could be more quickly reduced, and service improved, than in the modernization and rationalization of terminal facilities. The DOT Report provides a vivid description of the Philadelphia terminal situation. Three major railroads, Penn Central, Reading, and Baltimore and Ohio, operate in yards and at terminals located, and in some instances constructed, in the nineteenth century. Service is provided at many small and widely scattered team tracks. Cars are delivered to shippers over decrepit tracks running down the center of city streets. Costs are high, and the service provided often very poor.

FIGURE 3

DETERMINATION OF POTENTIALLY EXCESS RAIL LINES
DECISION FLOW CHART

In the port area around Newark, New Jersey, three railroads now operate yard facilities—Penn Central, Central of New Jersey, and Lehigh Valley. None operates its yards to their design capacity, although some of them are in such poor condition that they are probably being used to the extent of their actual present capacity. Again, operating costs are high, and service is poor.

In both these situations modernization and consolidation of facilities would lead to far more efficient operation, lower costs, and far better service. The Association should look most carefully at this very fruitful field for accomplishing cost reductions and service improvements.

In line haul operations, too, there are opportunities for increased efficiencies and savings. The cost of maintaining a

V 39 I 93 MAY 13 74 XUM

line to 60 mile per hour standards, for example, is far greater than cost of maintaining it to 30 mile per hour standards. In many markets, there is no real need for two railroads to expend the capital and maintenance dollars necessary to have two high speed lines. One such line, built and maintained on a shared cost basis, would supply both with the capacity they need at substantial cost savings. Where closely parallel lines exist (as they do, for instance, between Buffalo and Cleveland) two carriers might well share both, maintaining one to high standards for passenger and fast manifest trains, and the other at a lower standard for lower speed mineral trains or local freights. These are possibilities which should be considered by the Association as it makes its selection of facilities for the restructured regional rail system.

It must be realized that the practical time constraints on major modernization and consolidation of facilities are great enough that little of the planned consolidation will be realized on the Corporation's start-up date. An interim coordination plan must be developed by the Association to guide the Corporation's operation until the capital improvement program can be completed.

Capital costs. While cost savings can undoubtedly be generated by consolidating and improving rail facilities, this will require considerable time and substantial capital outlay. Furthermore, the condition of the physical plants now operated by the railroads in reorganization—even without taking into account the need for constructing the connections which consolidation would require—will necessitate huge expenditures just to return them to the state at which normal maintenance can be resumed. The Penn Central Trustees estimate that $600 million will be needed over a period of 6 to 8 years to restore their facilities on the 15,000 mile "core" system which they consider essential if the Penn Central is to render essential services in the region. While this is not a subject addressed in the DOT Report, the capitalization of the Corporation, and the sources of funds to rehabilitate much of the region's rail system, is a major task which the Association must face.

Development of the Interstate Network

DOT developed its recommended locations for interstate—that is, long-haul—rail services on the basis of an examination of traffic flow and line density data. Those corridors selected for interstate service, then, are simply those which were used the most heavily by the railroads in 1972. The DOT Report contains several examples of how individual rail lines within these interstate corridors might be selected, but it does not attempt to describe the entire interstate rail system for the region.

In DOT's view, existing mainline track in the region is largely under-utilized. It believes that major efficiencies can be accomplished by consolidating parallel routes and eliminating duplicative trackage from the mainline system, by downgrading some mainlines, and by the implementation of joint operating agreements.

These conclusions, in turn, are based upon a single major assumption; that is, that 30 million gross ton miles per track mile per year is a reasonable route density which can be achieved on a single track mainline with centralized traffic control.

Rail system capacity. In support of its conclusions concerning rail line capacities, the DOT Report presents theoretical engineering capacities for single and double track mainlines with automatic block signals or centralized traffic control. In our view, however, the capacity of a rail line is not readily subject to generalization. Numerous factors affect the practical capacity of a given section of track, and this is true whether or not a signal system is present. Capacity depends on grades, curves, clearances, track conditions, location and length of sidings, local switching performed, the requirement to slow down through certain populated areas, and the mix of trains operating at different speeds. Additional considerations include the need to make allowances for equipment breakdowns, delays, and necessary out-of-service periods for maintenance activities, particularly those involving the use of on-track maintenance equipment.

It must be realized, in evaluating DOT's goal of 30 million gross tons, that line capacity is more dependent upon the number of trains operated over a segment than on the accumulated gross tonnage on the line. Congestion, a limiting factor of capacity, occurs as a result of the number of trains and the mix of train speeds rather than the gross weights of the trains.

The Northeast Corridor between Washington and New York provides an example of a line in the region with a high density of trains. Despite the number of trains, the Corridor does not have a single segment which exceeds DOT's goal of 30 million gross ton miles per track mile per year, because the Corridor is multiple-track in the higher density sections. Segments of the Corridor have a broad mix of trains operating at different speeds. These include 100 mile per hour Metroliners, 80 mile per hour conventional passenger trains, commuter trains which make frequent stops, 60 mile per hour manifest freight trains, 40 mile per hour mineral trains, and local trains. We doubt that anyone is satisfied with the resulting quality of service, and certainly neither Penn Central nor Amtrak is pleased about the cost of operations in the Corridor.

The rail system capacity assumed by DOT is, of course, entirely theoretical, representing the engineering or design capacity. To achieve capacities approach those suggested by DOT would require, to say the least, a highly disciplined operation. Individual priority could not easily be given to any particular class of train; operating trains at different speeds, with the associated overtaking and passing problems, and operating trains having different schedules of stops, would be difficult if not impossible.

We recommend that the Association determine the actual practical operating capacities of lines in the region early in the planning process, and not rely upon theoretical engineering or design capacities.

Competitive service. In connection with its consideration of the interstate rail network, the DOT Report takes up the question whether particular rail routes have sufficient traffic to justify the retention or establishment of competitive rail services. In making the determination whether a particular market or transportation corridor can support more than one rail carrier, DOT established a threshold of at least eight trains per day moving at least 200 miles. The eight train figure was selected without any apparent analysis, simply on the basis of the assumption that one train in each direction twice a day for any one railroad would be sufficient to provide an acceptable level of service. Thus, where two railroads are operating in the same market, the total number of trains per day would be eight. Our discussion of the DOT method for determining whether there was enough traffic to permit operation of eight trains per day and of the 200 mile distance threshold are discussed later in this subsection.

The volume of traffic which flows between any two zones depends, obviously, upon the delineation of the zones themselves. Other analyses contained in the DOT Report, particularly that of local rail services, were performed without regard to zone boundaries. The recommendations concerning interstate rail corridors in which competition is warranted, however, are very heavily dependent upon zone definitions.

The zones do not reflect the best demarkation of concentrated traffic generating areas for analyzing interstate rail service. Since traffic flows from adjacent zones were not aggregated to evaluate the flow from a general area, and since some zones, particularly in the New England States, were quite small in size, the Office recommends that the Association evaluate various redefinitions and aggregations of zones in analyzing long-haul rail service needs.

Train size. As noted, DOT's determination of whether there should be competitive rail service in particular traffic corridors was based on its conclusion that a minimum of eight trains per day in a corridor would be necessary to support competitive service. Inasmuch as data were not readily available concerning the number of train movements, it was necessary to devise a means of proceeding from the available carload data to a determination of the number of trains moving between particular points. This, in turn, necessitated the determination of what an average or ideal train size would be.

An average train size of 30 loaded cars was used in the DOT Report in analyzing existing interstate traffic patterns. This figure was developed by adjusting the 1972 eastern district average of 38 cars per train to offset the effect of longer unit trains.

Two points deserve consideration in evaluating the 30 car average. First, DOT provided no justification for eliminating the longer unit trains and retaining the shorter, local service trains in deriving the adjusted average. Second, since the 38 loaded car average includes all types of trains, using it may result in an understatement of the average through road train size.

DOT defined an "efficient sized" train as 30 loaded cars for manufactured and processed commodities and as 75 loaded cars for bulk commodities. Because this definition may be significantly below the actual number of cars in a through train, the number of cars required to meet the eight daily trainload threshold for competitive service may in turn be understated.

Although it does not play a role in the analysis performed in the DOT Report, we think it advisable to say at least a few words about the concept of frequent, short trains as opposed to the operation of fewer and longer trains. The DOT Report describes an "efficient sized" trains as having only 30 loaded cars, but it should be emphasized that there is sharp division of opinion in the railroad industry as to whether this in fact is so. The benefits attributed to the operation of short trains include improved service, greater reliability of service, more level demands upon yard facilities, reduced train delay, and higher utilization of capital equipment resluting in higher productivity.

On the other hand, the use of short, frequent trains requires increased manpower to provide crews for the greater number of trains. In many instances, individual railroads have determined that the increased labor costs outweigh the benefits of short, frequent trains. What is in fact an efficient sized train is a dispute which can only be resolved by considering specific factors involved in particular situations.

The 200 mile distance threshold. In addition to the eight trains per day requirement, the other principal criterion applied by DOT in recommending whether competitive rail service should be provided was that the traffic generated must move at least 200 miles. In determining to use a distance threshold to aid in making the competitive service decision, the DOT reasoned that over distances where motor carrier service was truly competitive, or had the competitive advantage, there was less need for intramodal rail competition than over longer distances where intermodal competition was less effective. The source of the 200 mile threshold was the 1972 National Transportation Report which compared rail and truck costs for various lengths of haul. DOT found the rail-truck economic breakeven point—that is, the point at which the competitive advantages between rail and truck transportation on a average haul shifts—to be 200 miles.

From our review of the data in the 1972 National Transportation Report, we conclude that the rail-truck breakeven distance would more nearly approximate 150 miles. Further, a 10 percent reduction in rail costs, which might be possible with restructuring, could result in a breakeven point near 100 miles. The Association should re-evaluate the 200-mile criteria to ascertain which is the more realistic figure on which to base a planning decision.

Mainline selection. One aspect of the DOT Report's consideration of the definition of an interstate rail system upon which we feel required to touch briefly is its classification of a section of track as "mainline" only if it is equipped with automatic signals. We believe that all lines should be evaluated by the Association as potential parts of the interstate rail system, whether signalled or not. It is possible that unsignalled routes may prove to have more favorable grades, curves, or clearances, or heavier capacity bridges, and that potential routes may be found which would present viable economic operating alternatives to existing signalled lines.

Other factors affecting the zone approach. One of the deficiencies in the zone approach adopted by DOT is the fact that it takes into account only the movements of traffic from and to the points at which they were originated, terminated, or billed. In actual fact, much of the heaviest rail movement is between rail yards which are often located at some distance from actual origin and termination points. Properly located modern yards assemble large volumes of traffic coming from all directions, performing classification in low cost or less populated areas and permitting trains to run through the more heavily populated urban districts.

Modern railroading practice provides the opportunity for preblocking, straight setoffs and pickups in yards, consolidation of traffic from or to several origins or terminals, and the ability to operate trains straight through to connecting lines. The data used by DOT in its analysis fails to reflect the heavy movement between major yards. This is reflected in the fact, for example, that the DOT Report finds as potentially excess sections of the principal Penn Central line which connects its modern yards at Indianapolis and Elkhart, Indiana. The DOT Report shows the basic interstate traffic flow from between the Northeast and St. Louis as moving in a straight line. In point of fact, the traffic over the Penn Central, the major carrier in this market, moves generally from St. Louis to the railroad's Big Four Yard at Indianapolis (built in 1960) then over the Indianapolis-Crestline-Cleveland, Ohio route and proceeds east over the favorably graded "water-level" route of the old New York Central Railroad. However, a large volume moves from the Big Four Yard north to Penn Central's Robert R. Young Yard at Elkhart, Indiana (built in 1958). Important connecting lines between these essential yards and junction points are listed as potentially excess in the DOT Report.

Development of the Local Service Network

The objective of DOT's study of local rail service was to exclude nonviable branch lines from the basic structure of the new rail system. In this section of the report we discuss the methodology on which the local service decisions were based.

Carload volume. The DOT Report implies that volume of traffic generated on a branch line is the key determinant in deciding which branch lines to include or exclude from the rail network. The "DOT Upper Criteria" applied to branch lines was based on loaded cars, without regard to their loaded weights or commodities.

The weakness of a carload volume base can be highlighted by considering two lines of similar length generating like numbers of carloads. If one line has a higher loading per car, or traffic with higher rates per mile, it will be the more profitable. However, both were treated equally by the carload-based "DOT Upper Criteria." Conceivably, the carload-based criteria could allow lines with low loading or low rates to qualify for service, and exclude lines which would generate more profit with fewer cars but higher loading or higher rates.

The DOT criteria applied to local service lines were based on a study by R. L. Banks Associates, "Development and Evaluation of an Economic Abstraction of Light Density Rail Line Operations" (Banks Report). This report developed a formula for estimating the profitability of hypothetical branch lines. Revenue per carload was developed from the statistics of Class I railroads while the costs included the operating characteristics of both the Class I railroads in the east and Class II railroads encompassing the entire United States. Because of the lack of specific data relating to the operations, costs, and revenues of specific branch lines, certain assumptions and estimations had to be included in developing the formula. These are specified in the Banks Report, along with cautions that the results "cannot be fully endorsed as buttressed on sound statistical theory" and "the purpose of the study, therefore, neither is nor could be to provide precise and final standards superior to the (ICC) 34-car rule."

Nevertheless, the DOT Report established the Banks formula as the standard for measuring branch line profitability, and for determining the traffic volume necessary for breakeven operation. The statistical uncertainty in the traffic volume measurement was addressed by establishing an upper and lower carload criteria. There is a 90 percent probability that the actual breakeven point occurs between these two criteria.

By recommending direct rail service only for those lines exceeding the "Upper Criteria," DOT required at least a 90

V 39 I 93 MAY 13 74 XUM

percent probability of profitability before recommending local rail service. For example, a 10-mile branch line in the region would require approximately 734 carloads per year to be recommended for service, although there is at least a 90 percent chance that the actual break-even figure is below 734 carloads, possibly even as low as the 400 carload range.

Because of the difficulty in developing a formula applicable to all situations, and public demands for particularized treatment of specific situations, the Office recommends that the Association evaluate local rail service on an individual basis.

75 carload threshold. Although stations generating less than 75 carloads per year were excluded from specific consideration in the local service analyses (see our discussion above under "Methodologies"), the 75 carload threshold was overshadowed by the application of the "DOT Upper Criteria." As a result of applying the DOT "Upper Criteria," direct local rail service was not recommended for any station generating less than approximately 255 carloads annually.

While stations not meeting the "DOT Upper Criteria" were not recommended to receive direct local rail service, it was DOT's intent that these stations would continue to receive direct rail service if they were located on a viable line.

Service. Other factors not considered by DOT in developing its local rail service recommendations were the effects car shortages and poor service have had on traffic volumes. Because of car shortages, many shippers who wished to ship a greater number of cars by rail were unable to do so. Because of poor service, many shippers who would have preferred to ship by rail turned to other transport modes. As a result, the traffic volume for these shippers was artificially low, which, in some cases, excluded stations from being recommended for direct local rail service. The Association should take into consideration service and car availability when applying historical carload generation figures to specific situations.

Additional required criteria. Factors not considered by DOT, but which must be evaluated before a final decision can be rendered on the viability of a branch line, include:

1. Current physical condition of the fixed plant
2. Expense required to raise the track standards to an acceptable level
3. Annual maintenance cost
4. Commodities shipped
5. Annual tonnage and carloads handled by origination and termination points.
6. Annual tonnage and carloads handled on-line or interline.
7. Cost of entire through movement of branch traffic
8. Revenue derived
9. Impact on revenues and cost if short line railroads are formed.

A railroad's base cost information can be derived using the Commission's Rail Form A on an individual basis. This will provide unit costs for the through train movement of the branch line traffic and for local or way trains, which then can be adjusted for specific traffic characteristics.

Cost and revenue comparisons that should be made are:

1. Pickup and delivery of motor carrier vs. local or way rail operations—as a portion of the entire movement
2. Over the road trucks vs. through train operation
3. Feasibility of shippers engaging in private carriage

An evaluation should also be made of the capability of trucks to haul traffic generated by the branch line as well as ascertaining the location of all Trailer on Flat Car (TOFC) loading and unloading facilities in relation to location of industries not on viable lines.

It is our opinion that this type of information is a prerequisite for a proper evaluation of the branch line problem and for determining the alternatives available to both railroads and shippers.

Potential effect of new short lines. An implied concept of the DOT Report is that any branch line not included in the Final System Plan will either have its traffic handled by another mode of transportation or the affected industry will relocate. However, the government sponsored acquisition loan proposal created by Section 403(a) of the Act might induce shippers (through a local or regional authority) to purchase the trackage of nonviable lines and form their own short line railroads. The shipper would thus become a carrier and be entitled to a percentage division of the through revenue on the entire movement. The effect of this division of revenue on the total revenue accruing to the carrier presently serving the branch would have to be determined, as would the cost of the transportation services that still would have to be performed by the line-haul carrier.

This concept needs to be explored by the Association in developing its financial plans for the Corporation.

Intermodal breakeven analysis. Comparisons used by DOT to illustrate the short haul advantages of motor carriers over rail service were premised on the following:

The estimated rail resource consumption was based on the service involved in switching loaded freight cars at a shipper's siding, moving the loaded cars to a yard, switching them into a line-haul train, and delivering empty cars to the shipper's siding.

The estimated motor carrier resource consumption was based on placement of empty trailers at the shipper's location, pickup and movement of the loaded trailers to the railroad yard, placement of the load on railroad cars, and switching those cars into a line-haul train.

Thus, motor carrier cost is simply the substitution of TOFC service for freight cars. Since transportation characteristics are not the same for all types of cars, use of TOFC would affect the overall costs to the railroad.

The services described as being performed by a motor carrier resemble what is commonly referred to as drayage—the spotting or picking up of a trailer at the shipper's or consignee's place of business and delivering it to the railroad's loading facilities. It is usually based on a contract charge per trailer or per hundredweight and includes charges for origin and destination points contiguous to the railroad facility. Outside of this area, at some mileage breakpoint, a motor carrier charge would be asesssed for substituted service.

Rail costs and rates of the TOFC Plan under which the traffic would move would be affected by such items as who supplies the trailers and flat cars and who provides pickup and delivery of trailers.

DOT assumed that TOFC ramps or crane facilities were located near the branch lines at the gathering yards. The Association must evaluate this assumption since the location of yards retained in the Final System Plan will dictate the availability of intermodel facilities.

PASSENGER SERVICE

General

The DOT Report devoted scant attention to passenger service. It simply listed present intercity and commuter routes and their patronages and made the limited recommendation that the Association should devote special attention to passenger service. The Act, however, devotes considerable attention to passenger service. Goals of the Final System Plan include the efficient movement of passengers, coordination with Amtrak, and identification of corridors in which high-speed passenger service would return substantial public benefits.

In several instances DOT's recommendations, based on freight service considerations, would significantly affect Amtrak's existing intercity routes and existing commuter service. Portions of commuter and intercity passenger routes were designated as potentially excess, and segments of Amtrak's intercity routes were recommended for downgrading. For example:

Chicago-Miami and Chicago-Tampa/St. Petersburg. The Report recommends as potentially excess two segments of the present Amtrak line between Indianapolis, Indiana, and Louisville, Kentucky. This is the only direct route over which Amtrak can operate its Chicago-Florida trains and serve both Indianapolis and Louisville. Also, Amtrak is in the process of establishing an auto-ferry service in connection with its basic passenger operations, which will have its northern terminal in the Indianapolis area. There is no suitable alternative route.

Chicago-Cincinnati. The Report recommends as potentially excess the Amtrak route between Kankakee, Illinois, and Indianapolis. Amtrak is now detouring over a reasonable alternative route by way of Logansport, Indiana, due to the condtion of the track between Kankakee and Indianapolis. The DOT Report recommends the Chesapeake and Ohio route between Cincinnati and Chicago as the primary route to be considered. Recognizing Indianapolis as an important traffic center, it suggests the Association may choose the Penn Central line which serves Indianapolis direct. The Association should give consideration to Amtrak's view that the Kankakee-Indianapolis route is the better one from a marketing standpoint.

Washington-Montreal. The Report designates as potentially excess the Central of Vermont portion of this route between Bethel and Essex Junction, Vermont. There is no alternative route which would allow Amtrak to serve Montreal via Penn Station, New York.

In addition to resolving these situations, the Association must ascertain the projected future needs for passenger and commuter service in its planning function. The Office recommends that the Association: (1) identify potentially beneficial high-speed passenger corridors; (2) project future passenger and commuter service needs; and (3) consider the retention of alternate lines for passenger service.

The Northeast Corridor

The Act requires the Final System Plan to provide for the establishment of improved, high-speed rail passenger service between Washington, New York, and Boston, consonant with the recommendations of the Secretary of Transportation in his report of September 1971 entitled "Recommendations for Northeast Corridor Transportation." That report, it should be noted, deals only with intercity passenger service, and does not include consideration of either commuter or freight movements on the corridor. These are factors which the Association must take into account.

The rail facilities in the corridor have been developed over the years to provide freight and suburban passenger service in addition to intercity passenger transportation. While none of these services is a necessary adjunct to the others, and each could be operated independently, there are significant cost savings and operating economies available from sharing the facilities. However, with increased volume and speed, interference has developed in performing freight and passenger services.

We have commented earlier on the already congested traffic conditions in the corridor, in which the problems presented by the sheer volume of traffic are aggravated by the train mix—roughly one-third each long-haul passenger, commuter, and freight, as measured in train-miles. In response to the sharply increasing passenger demand which it has recently experienced, and in expectation of increased population in the corridor (46 million in 1975, 52 million in 1985, and almost 60 million in 1995) Amtrak has recently placed equipment orders which would, it anticipates, allow it to double Metroliner service between Washington and New York within the next 16 months. It plans to go to 15 minutes scheduling of service between Philadelphia and New York City by mid-1976. Thus, it is reasonable to expect that passenger service in the Corridor will increase, and that speed requirements for Amtrak trains will continue to rise. Consequently, the compatibility of freight and passenger operations will be steadily diminished.

A goal which the Association should seek to achieve in selecting facilities for the regional rail system is the removal from the Northeast passenger corridor of as much freight traffic as possible. Clearly, all freight movements cannot be eliminated, for the corridor provides direct service to one of the most highly developed industrial and commercial areas of the nation. In 1971, Penn Central originated or terminated about 74,800 loaded cars for freight customers located on the southern half of the corridor between Washington and New York. While it would no doubt be possible to serve some of these customers from other nearby rail lines, many of them can only be served from the same tracks that are used for heavy passenger movements. The Association should undertake an analysis of how best to minimize interference with passenger trains without destroying the plant values of the customers.

If the amount of freight traffic on the Northeast corridor is to be significantly reduced, other routes for handling through shipments will have to be found, as will means for routing originating and terminating traffic away from the corridor mainline at a point as close as possible to the corridor customer's location. Some traffic would be susceptible to routing away from the corridor completely. Cars moving to many points in the South, for example, could be routed to connections with one of the several railroads serving Cincinnati, Ohio, or to the Norfolk & Western Railroad at Hagerstown, Maryland. For other traffic, alternative freight routes that closely parallel the corridor are available, provided that the necessary connections are made and the track conditions improved.

In conjunction with its consideration of how to improve rail service in the Northeast corridor, the Association should evaluate among others, the following possibilities for developing and improving alternate freight transportation routes:

Improvement of the present Baltimore & Ohio-Reading-Central Railroad of New Jersey route between Washington and New York; the construction of connections between these railroads and major yards and industrial centers on the corridor; and the construction of a connection between the B&O and the Penn Central at Perryville, Maryland.

Increased use of the Boston & Maine-Delaware & Hudson-Lehigh Valley-Reading-Baltimore & Ohio route between Boston and Washington.

Continuing the Norfolk and Cape Charles, Virginia-to-Wilmington, Delaware route which provides ample clearances for high and wide shipments which cannot move through the tunnels at Baltimore and Washington.

The establishment of a coordinated freight route around Baltimore for the use of all railroads.

Use of the Poughkeepsie Bridge-Lehigh and Hudson River route, utilizing also the so-called Trenton cut-off of the Penn Central, for traffic moving from and to New England.

Improvement of the Camden-to-South Amboy, New Jersey line and connecting Lehigh Valley and Jersey Central lines to provide an alternate route to the south and west from the Newark-Jersey City area.

ECONOMIC IMPLICATIONS

Principal economic implications of the DOT Report are: (1) substantial cost-economies by rail carriers in the Midwest and Northeast Region of the United States can be achieved by consolidating freight operations along high density routes, and (2) the burden of financing unprofitable rail lines should be shifted from the railroads and shippers in high traffic routes to local users of rail service or to the general public. DOT's proposals therefore raise fundamental issues of economic efficiency and income distribution which need to be analyzed in more detail before designing the Preliminary and Final System Plans.

This section describes how abandonment of branch lines will affect the location of economic activity and indicates how proper planning and analysis during the restructuring process will assist policy makers in applying subsidies to achieve increased efficiency in the transportation industry and social equity for persons affected by the restructuring process.

The DOT Report proposed that existing rail lines be designated potentially excess if the costs which could be avoided by not operating the branch are greater than revenues generated. Other users of the railroad or railroad stockholders are subsidizing traffic along these routes. The Report assumes that operation of branch lines having operating deficits will be continued only if higher freight rates are charged to local shippers or if a local service continuation subsidy is provided.

The direct impact of the DOT's proposal will be an increase in the cost of doing business at locations along deficit branch lines. Higher freight rates on potentially excess branch lines will have to be absorbed by local manufacturers and their employees or passed on to consumers, depending upon the demand characteristics for locally produced final products. The demand elasticity for a product depends upon the degree of competition in the industry and substitutability of similar products produced elsewhere. In agricultural areas, farmers may absorb the higher freight rates, capitalized value of farm land may decline,

V 39 I 93 MAY 13 74 XUM

and prices of farm products may increase. Alternatively, if taxes are imposed to finance rail service continuation subsidies, the general public will share the burden otherwise borne by specific users of the service. This tax, in effect, becomes a manner of transferring income from a non-benefiting group to the residents in the area being benefited by the branch line.

Indirectly, freight rates on the restructured rail system can be reduced, railroad stockholders profits increased, and/or service improved by the amount of the cross-subsidy formerly required to keep deficit branch lines in service. Shippers, their consumers, communities having rail service under the restructured system, and the carriers will therefore benefit and attract additional economic activity.

If the criterion for financing a deficit branch line is economic efficiency, operating deficits should be financed by means of rate increases. Only the most efficient shippers and industries located along affected lines will survive. Others will be forced to relocate toward lower cost areas. The loss of businesses not able to pay higher rates or relocate must be weighed against the present cost of diverting railroad capital and labor from more efficient uses elsewhere to operations over the unprofitable branch line. Consumers will pay higher prices for products originating in such areas, but will pay lower prices for goods produced at locations along the restructured system. Alternatively, carriers, shippers, and industries along the restructured system will receive the benefits.

If the criterion is social equity, rail service continuation subsidies should be financed out of general public revenues. The availability of subsidies will discourage the attrition of population and employment along the deficit branch lines by reducing the cost of distance from these locations to the interstate mainlines. The size of these subsidies should reflect the importance attached to preventing social dislocation. Such subsidies may also help achieve environmental objectives, or protect fossil fuel sources as required by the Act.

In some cases, the increase in efficiency gained by relocation to other areas along the restructured network may be large enough to permit adequate compensation of those affected. In such situations, it may be in the public interest to provide relocation and retraining grants to affected parties rather than to provide rail service subsidies. Or, the social equity achieved in providing subsidies may be at an enormous loss of efficiency because the same subsidy might well have yielded greater benefits if used for some other purpose. Therefore, the equity criteria applied must be capable of quantifying both the costs of social dislocation and the costs of achieving specific environmental, energy, competitive, and other policy goals.

DOT used an efficiency criteria (volume of freight traffic) in determining potentially excess rail lines. In order to review the equity issues involved in rail abandonment, the Office is developing an economic profile of all areas in the region affected by potential rail abandonment based on industry Standard Industrial Classification codes.

These data, together with information received at the public hearings, will make it possible to carry out a more thorough review of the economic impacts of rail abandonment on local communities. A particular community's contribution to regional economic activity and the need of specific local industries for rail service can be ascertained from these profile data. The impact of rail service discontinuance on local employment and earnings can be estimated and compared with costs of providing continued rail service.

Rail abandonment and resulting changes in transportation costs are by no means the only economic factors influencing the location of economic activity. Population shifts, changes in consumer preference, changes in technological production processes, and development of new energy sources also influence the growth or decline of economic activity at particular locations. The process of change in the economic well-being of communities is a dynamic and fluid process and the analysis of rail abandonment must clearly take this into account. DOT's local rail service recommendations, which are based on past levels of economic activity, need to be reassessed, accounting for projected future trends in communities where rail abandonment is proposed.

Projections of economic activity for areas of the Midwest and Northeast United States have been prepared by the U.S. Department of Commerce from available Federal data sources. These area projections, which reflect needs for transport facilities in the various communities of the region, have been matched with the local service recommendations presented in the DOT Report to determine the relationship between potentially excess lines and projected growth in local population and economic activity. The analysis indicates that a large share of potentially excess track is found in areas having the highest projected growth in population and earnings up to 1980.

Many of these areas are those in which population is dense and there is substantial terminal track mileage, much of which may in fact be duplicative and thus subject to elimination with little impact upon individual rail service users. In addition, however, there are cases where all rail service available to communities with high growth rate potential is shown as potentially excess in the DOT Report.

The ability of local communities to deal with the rail service changes depends upon an assessment of each community's future growth potential. Some communities will be more capable of adjusting to changes in levels of rail service than others, and the use of rail service continuation subsidies should take this into account. The Office will include these considerations in the economic profile data base as part of its assistance to the states and local and regional transportation agencies.

COMPETITION AND COORDINATION

Competition

As reflected primarily in the anti-trust laws, the encouragement of effective competition is such a well established national objective that there appears to be no reason to discuss the underlying economic theories. It is sufficient to note that competition provides the optimal form of self-regulation, and serves as a spur to promote reasonable prices and responsible services

The conclusions of the DOT Report concerning the routes which should be served by one or more competing railroads have been considered earlier in this report. In our analysis of those conclusions, we addressed—and in some instances took issue with—the criteria which were developed by DOT to provide statistical standards for determining what rail operations might be expected to sustain competitive services and permit the competing carriers to turn a profit.

We think it is safe to assume that, by any criterion, the major markets in the region can sustain competing rail operations, provided that the facilities utilized by the competitive carriers are maintained to something approaching comparable standards. At the same time, there will no doubt be situations, even where traffic density is heavy, in which cost and other considerations will militate against the success of any attempt to promote or retain viable competitive services.

Our purpose here is not to attempt the establishment of a quantitative test for determining where competing rail services can be profitable, but to consider how different actions which the Association might take in developing the system plan could affect the ability of profitable carriers now competing for traffic in the region to remain viable, and in otherwise promoting and preserving competitive rail services.

Intramodal rail competition now exists for much of the traffic in the region. In large part it is provided by railroads which are not in reorganization competing among themselves or with the bankrupts. However, substantial areas exist in which service is provided only by railroads in reorganization. Much of Pennsylvania, New York, and southern New England is in this category, including the important transportation corridors between New York City and Buffalo and between Boston and Philadelphia.

At this stage in the planning process it is too early to know which of the bankrupt railroads will be directed by their reorganization courts to be reorganized under the Act. Thus, the rail properties that will become available to the Association for mandatory transfer to the Corporation can only be the subject of speculation.

Were all the bankrupt railroads to seek reorganization under the Act, the Association could direct that all of their properties be operated by the Corporation. The result would be a monolithic single-carrier system in a substantial portion of the region, and rail competition for traffic in that area would be eliminated. For traffic moving between the far Northeast and other portions of the region, there would still be possibilities for competition with the profitable railroads over portions of the total distance. However, the connecting railroads would have lost their independent access to major eastern markets and would be limited to interchange with the Corporation, which itself would be able to offer single-line service to and from many of the points on their lines.

As we interpret the Act, the Association has many options open to it in directing and recommending the transfer of rail properties within the region. The Act does not provide for the creation of two competing systems, but there appears to be no reason why the Association could not direct that certain rail properties be transferred to the Corporation upon the condition that they be reconveyed to another company to be operated independently. The opportunity for the Association to recommend transfer of properties of the bankrupt carriers to profitable railroads, and of profitable railroads' property to the Corporation, are specifically recognized in the Act.

The opportunity afforded by the Act is unique. It invites the development of solutions for the current railroad problem which are not constrained by historical patterns of ownership or even by the present fact of bankruptcy. The Association, in seeking the optimal solution, should be concerned not only with devising means for promoting and retaining competition, but also with assuring that the Final System Plan take into account the operations of the railroads which are not in reorganization. These carriers should not be deprived of an opportunity to compete effectively with the Corporation.

In developing the plan for restructuring rail services in the region, we recommend that the Association investigate and assess a number of alternatives. Without intending to imply this Office's specific endorsement of any one of them, several alternative approaches presented during the course of the hearings are broadly cataloged below:

One group of proposals centered around a splitting up the present Penn Central properties. They included the suggestion that the bankrupt properties be divided into eastern and western sectors, with the eastern sector having a monopoly of rail transportation in that area. It has been suggested that the viable lines of the western sector could be retained as a separate competitive system or as a segment of one of the profitable railroads, or that they could be divided for incorporation into more than one profitable railroad.

A second suggestion was a two-system Northeast with the division of Penn Central into its premerger component parts, or in some other manner, and assimilation of the viable parts by Chessie System and the Norfolk & Western.

A third approach called for development of a separate competitive system in the eastern sector, made up of the properties of the Lehigh Valley, Reading, Jersey Central, and Lehigh and Hudson River Railroads—a system operating in the East and connecting with the profitable lines in the western sector.

The foregoing suggestions are directed primarily toward the retention of competition on east-west routes. In our discussion in the preceding section, we mentioned a number of rail lines which could be combined to provide a competitive north-south route parallel to the Northeast passenger corridor. Another north-south route which we believe should be examined with care by the Association is the line of the Detroit, Toledo and Ironton Railroad, which is an effective competitor in the Detroit–Cincinnati market, but much of which is listed as potentially excess in the DOT Report.

Coordination

DOT proposed in the Report that rail facilities be operated on a coordinated basis both as a means of interjecting competitive services into particular markets, and as a means of improving capital productivity. We concur fully in that recommendation.

While some parties have pointed to the problems that would have to be faced in implementing any requirement that facilities be shared, we cannot accept the argument that such difficulties would be insurmountable. Joint use of facilities is a common practice today in the railroad industry, being seen for the most part in the granting of trackage rights. These agreements have been made purely voluntarily, and also to meet requirements imposed by the Commission as conditions to approving mergers and other transactions involving common control. It is worth noting that the Commission has long had the power, under section 1(15)(c) of the Interstate Commerce Act, to require joint use of terminals and mainline tracks for a reasonable distance beyond terminals, to meet emergency situations. Subject to proper regulatory control, there is no reason why such arrangements cannot be successful and mutually beneficial.

Joint use is not the only means of achieving coordinated rail service. Jointly-owned terminal and switching companies and even jointly-owned line-haul railroads, are common in the industry, and there may well be rail facilities which the Association should direct or recommend be jointly acquired by two or more carriers as part of the Final System Plan. Should it decide to follow this course, the Association should give consideration to establishing methods for assuring that all parties are treated fairly with respect to cost, and that the day-to-day operations are conducted on a completely impartial basis.

There now exist many agreements for joint operation and joint use of facilities between profitable railroads in the region and the railroads in reorganization. The Association should consider how best to make use of those agreements as properties of the bankrupt carriers are selected for inclusion in the Final System Plan.

ADDITIONAL CONSIDERATIONS

While the DOT Report addressed financial viability for the restructured rail system in the region, other factors must be considered by the Association in developing the Preliminary and Final System Plans.

The Department of Defense has highlighted the national security transportation requirements in the region. The transportation of fossil fuel resources must be addressed, as must the efficient use of scarce energy resources among the transportation modes. Concerns of the environmental effects of rail diversions to motor carriers were expressed by the Environmental Protection Agency, and must be dealt with, along with other environmental considerations. These are discussed in greater greater detail in this section.

NATIONAL SECURITY REQUIREMENTS

There are over 300 military installations in the region, some with unusual transportation requirements. The Department of Defense ships ammunition, explosives, and extremely heavy and large size items, many of which are difficult, if not impossible, to move other than by rail. Defense installations range from active facilities to bases which are inactive and currently have no rail transport requirements. However, external factors over which the Department of Defense has no control can change the situation drastically on short notice. Base reactivations with attending personnel and supply movements in an emergency may well tax even existing rail lines beyond their capacity. Any restructuring plan which does not take into account such emergencies could be detrimental to national security requirements.

The DOT Report did not include consideration of military requirements, with the result that lines indicated as potentially excess would preclude service to and from 20 installations if the lines were abandoned. Also several other installations met minimum traffic requirements for continued local service, but were not so indicated.

It is important that the Department of Defense prepare and maintain a comprehensive survey of its needs. Throughout planning for restructuring there must be a two-way flow of information between that Department and the Association.

Energy Resources

The Act specifies that "existing railroad trackage in areas in which fossil fuel natural resources are located" should be preserved. Nine states in the region have reserves of coal, or oil, or

V 39 I 93
MAY 13 74
XUM

both. The DOT Report did not address this goal, but did acknowledge its existence.

Five zones (Numbers 75 and 78 in Pennsylvania, 194 in Virginia, and 195 and 197 in West Virginia) in major coal producing areas were not analyzed by DOT because of their complexity. The particular importance of the region's coal reserves and production makes it imperative that the restructuring process take them into account. The same goal prescribes that the Final System Plan be designed to provide that transportation modes be used "which require the smallest amount of scarce energy resources and which can most efficiently transport energy resources."

The planning process must evaluate locations and capacities of pipelines, waterways, railroads, and highways in the region, balancing available rail facilities against other modes to determine the intermodal mix and competitive structure that best meets these goals. Electrification of rail lines provides a potential for fuel conservation and could serve to enhance environmental quality. It should also be considered by the Association in developing the system plans.

Environment

While DOT does not pretend to consider all the goals specified for development of the Final System Plan, its approach appears incompatible with a concern for the environment. Adoption of the DOT methodology would cause large scale rail abandonments and most probably divert traffic to less energy-efficient modes. Because of the difference in capacity—carload vis-a-vis truckload—the number of trucks on the highways would have to increase significantly to handle this added traffic. A conservative estimate puts this traffic at 2 million truck loads if all the traffic originating on lines DOT labeled potentially excess were to move by truck. This possibility would cause problems for the states in meeting federal ambient air quality standards and would in some instances increase highway noise to unacceptable levels.

Use of a less energy-efficient mode would also cause greater use of scarce fuels, contrary to a national policy of fuel conservation, and possibly result in the need for extending or enlarging highways, affecting public land use. Battelle Institute has concluded in a well-known study that the transportation of goods and materials by rail results in substantially lower adverse environmental impacts. The bases for this finding are that exhaust emissions per net ton mile of freight moved are 3.76 for truck and 1.03 for railroad and that the railroads are more efficient users of land, occupying about 7 percent as much land as highway rights-of-way.

As a nation, we have become significantly more sensitive in recent years to the exploitation of our natural resources. Decisions which will most surely affect their use must be carefully scrutinized in terms of the overall impact on the level and quality of human life.

FUTURE DIRECTIONS

The Office's primary responsibility in the rail restructuring process is to assure that the Preliminary and Final System Plans prepared by the Association are responsive to the needs of the public. As we have detailed previously, the volume of public submissions greatly exceeded our most optimistic estimates and a major task has been organizing this material so that it is accessible.

As this report is issued, a major activity of the Office is the study and evaluation of the transcripts and exhibits from the public hearings and statements submitted independently. As these documents are analyzed and summarized, supplemental interim reports will be issued to the Association.

It is expected that the Office's communications with persons and states will increase. Contacts have been established throughout the region, and public hearings and less formal meetings are being scheduled during the summer months. The Office has become a focal point for public inquiries and comments. This is being encouraged, and Office personnel spend considerable time meeting with individuals and representatives of the public who are anxious to protect or promote their particular interests.

PROPOSED STUDIES

The Office will not depend entirely on what has been submitted, but will undertake independent studies in order that it may proceed on an informed basis to evaluate the extent to which the statutory goals might be achieved in any proposal. These studies and investigations will allow the Office to make independent evaluations of the elements of the Association's Preliminary and Final System Plans and to assist states and transportation authorities in determining the suitability of particular lines for subsidy.

On the latter point, the Office published on February 25, 1974, a notice of proposed rulemaking and order in Ex Parte No. 293 (Sub-No. 2), *Standards for Determining Rail Service Continuation Subsidies*. Public comments are due on or before May 3, and the Act calls for publication of the standards by July 1, 1974.

Areas the Office has under consideration for study include:

Existing and Future Rail Service Needs.—The demand for rail passenger and freight service in the region, in terms of traffic currently moving by rail and traffic which could move by rail, with projections of rail service demand to 1980.

Energy Consumption and Energy Access.—Relative fuel efficiencies of alternative transportation modes for various types of service (line-haul, pickup and delivery, and low density local service). Evaluation of energy-efficiencies of alternative modes and means of meeting transportation needs in energy producing areas.

Socio-Economic Impact.—Determination of extent of community reliance on rail service for local employment base, basic utility and emergency services, and economic development.

Environmental Considerations.—Evaluation of the air quality and noise effects of alternative transportation modes. Impact of alternative levels of rail service on community land use patterns.

Cost Analyses.—Determinations of the cost relationships of substituted motor carrier and rail services, and of the costs associated with the operations of branch lines and local service facilities.

Operational Feasibility.—Evaluation of alternative regional mainline networks in terms of operations, and economic comparisons of alternative networks. Assessments of capacity of yards and mainline routes. Determination of critical considerations in achieving coordinated service.

PUBLIC PARTICIPATION

Valuable sources of information for designing a rail system consonant with the goals set out in the Act are to be found at the local and state level. Every state in the region was represented at the public hearings, and several thoughtful state presentations have been received by the Office and passed on to the Association. The initiative for planning is with the states, many of which have already begun to compile necessary data and have issued initial studies. The Association is urged to use the talents and resources available at the state level for material on which to design the Preliminary and Final System Plans. In particular, every possible consideration should be given to the decisions of state and local governmental agencies and planning bodies which have developed rail transportation plans setting priorities for the retention of marginally profitable lines providing predominantly local service.

The Act is unique in many respects, one of which is the provision for public participation in the planning process. Contributions have come from a variety of sources, each emphasizing one or more of the statutory goals. Much of the information contained in these submissions will be useful in designing the restructured railroad plant. We are convinced that despite our best efforts to publicize the Act and its ramifications, there are still many who are unaware that a major restructuring of the region's rail network is underway.

Our evaluations, supported by the public sentiment, lead us to conclude that the many economic, environmental, and social goals specified by the Act can best be achieved through consideration of the broad range of local community needs and interests raised by state and regional transportation authorities and concerned individuals. We intend to continue our efforts to stimulate involvement by the public in the planning process. It is important that the Association assure the public that it is giving careful consideration to the hearing record and all submissions. For our part, the Office continues to stand ready to assist the public and the Association in accomplishing the considerable task set out in the Act.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice 506]

ASSIGNMENT OF HEARINGS

MAY 7, 1974.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC-115841 Sub 460, Colonial Refrigerated Transportation, Inc., now assigned June 13, 1974, at Columbus, Ohio is cancelled and the application is dismissed.

MC-111231 Sub 183, Jones Truck Lines, Inc., now assigned June 12, 1974, at Kansas City, Mo., is postponed indefinitely.

MC 128383 Sub 48, Pinto Trucking Service, Inc., now being assigned hearing June 3, 1974 (2 days), in Room 609, Federal Office Bldg., 911 Walnut St., Kansas City, Mo.

MC-C-8254, Hutt Transportation Co., and Cape Air Freight, Inc.,—Investigation of Operations and Revocation of Certificates, & MC-136724 Sub 1, Hutt Transportation Co., Common Carrier Application, now assigned June 3, 1974, will be held in Room 235 Federal Bldg., 85 Marconi Boulevard, Columbus, Ohio.

MC-113666 Sub 81, Freeport Transport, Inc., now assigned June 5, 1974, will be held in Room 235 Federal Bldg., Marconi Boulevard, Columbus, Ohio.

MC-127527 Sub 16, Carl W. Reagan, DBA Southeast Trucking Co., now assigned June 10, 1974, will be held in Room 235, Federal Bldg., 85 Marconi Boulevard, Columbus, Ohio.

MC-119777 Sub 277, Ligon Specialized Hauler, Inc., now assigned June 11, 1974, will be held in Room 235 Federal Bldg., 85 Marconi Boulevard, Columbus, Ohio.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.74-10990 Filed 5-10-74;8:45 am]

[Notice 77]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before June 3, 1974. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-75101. By order of May 7, 1974, the Motor Carrier Board approved the transfer to Muir Trucking Service, Inc., Ivanhoe, Calif., of the operating rights in Permit No. MC-126310 issued March 1, 1965 to L. E. Muir, doing business as L. E. Muir Trucking Service, Ivanhoe, Calif., authorizing the transportation of iron and steel pipe from water terminals in the San Francisco and Oakland, Calif. Commercial Zones to a plantsite at or near Hillmald, Calif. Ann M. Pougiales, 100 Bush St., San Francisco, Calif. 94104, attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS

Property-Elimination of Gateway Letter Notices

MAY 8, 1974.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065(a)), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before May 23, 1974. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC-730 (Sub-No. E1), filed May 1, 1974. Applicant: PACIFIC INTER-MOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Oil grease, paper, roofing, metal and clay products, and materials, equipment, and supplies* used or useful in the production and packing of *metal and clay products and building stone, structural steel, and heavy machinery and equipment*, between points in that part of West Virginia bounded by a line beginning at Kenova, W. Va., and extending along U.S. Highway 60 to Charleston, thence along U.S. Highway 119 to the West Virginia-Pennsylvania State line, thence along the West Virginia-Pennsylvania State line to U.S. Highway 30, thence along U.S. Highway 30 to West Virginia Highway 2, thence along West Virginia Highway 2 to West Virginia Secondary Highway 3, thence along West Virginia Secondary Highway 3 to West Virginia Highway 66, thence along West Virginia Highway 66 to U.S. Highway 30 to the West Virginia-Ohio State line, and thence along the West Virginia-Ohio State line to points of beginning, including points on the indicated portions of U.S. Highways 60 and 119, but not on the indicated portions of the other highways specified, and points in Ashtabula Lake, Geauga, Trumbull, Mahoning, Belmont, Wayne, Medina, Lorain, Ottawa, Lucas, Portage, Carroll, Jefferson, Harrison, Summit, Cuyahoga, Erie, Huron, Sandusky, and a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals and acids* (except chemicals for human consumption, silicate of soda, petroleum products, liquid glue, and formaldehyde), in bulk, in tank vehicles from points in Washington and Oregon to points in Arizona. The purpose of this filing is to eliminate the gateway of points in California.

No. MC-730 (Sub-No. E2), filed May 1, 1974. Applicant: PACIFIC INTER-MOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, and *acids*, in bulk, in tank vehicles, from Henderson, Nev., to points in Texas. The purpose of this filing is to eliminate the gateway of points in Utah.

No. MC-730 (Sub-No. E3), filed May 1, 1974. Applicant: PACIFIC INTER-MOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, and *acids*, in bulk, in tank vehicles, from points in Texas to points in Nevada. The purpose of this filing is to eliminate the gateway of points in Utah.

No. MC-65941 (Sub-No. E8), filed April 21, 1974. Applicant: TOWER LINES, INC., P.O. Box 6010, Wheeling, W. Va. 26003. Applicant's representative: George V. Thieroff (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Oil grease, paper, roofing, metal and clay products, and materials, equipment, and supplies* used or useful in the production and packing of *metal and clay products and building stone, structural steel, and heavy machinery and equipment*, between points in that part of West Virginia bounded by a line beginning at Kenova, W. Dakota, South Dakota, and Nebraska, restricted to the transportation of shipments moving from, to, or between glassware manufacturing plants, or warehouses or other facilities of food packing and processing plants. The purpose of this filing is to eliminate the gateway of Streator, Ill.

No. MC–117119 (Sub-No. E3), filed April 30, 1974. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Arkansas 72728. Applicant's representative: L. M. McLean (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Athens, Ala., and Bells, Humboldt, and Jackson, Tenn., to points in Colorado. The purpose of this filing is to eliminate the gateway of Springdale, Ark.

No. MC–117119 (Sub-No. E5), filed April 30, 1974. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Arkansas 72728. Applicant's representative: L. M. McLean (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except dairy products, and commodities in bulk, in tank vehicles) in vehicles equipped with mechanical refrigeration, from Athens, Ala., and Bells, Humboldt, and Jackson, Tenn., to points in Idaho, Montana, Utah and Wyoming. The purpose of this filing is to eliminate the gateway of Springdale, Ark.

No. MC–117119 (Sub-No. E7), filed April 30, 1974. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Arkansas 72728. Applicant's representative: L. M. McLean (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products*, (except commodities in bulk, in tank vehicles), in vehicles equipped with mechanical refrigeration, from Athens, Ala., and Bells, Humboldt, and Jackson, Tenn., to points in Idaho, Wyoming, Oregon, Utah, and Washington. The purpose of this filing is to eliminate the gateway of California, Mo.

No. MC–124211 (Sub-No. E8), filed April 29, 1974. Applicant: HILT TRUCK LINE, INC., P.O. Box 988 D.T.S., Omaha, Nebraska 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Empty cardboard and fiberboard boxes*, from points in Pennsylvania to Sioux City, Iowa and to points in Nebraska, California, and points in that part of Texas on and west of U.S. Highway 83 and on north of U.S. Highway 90. The purpose of this filing is to eliminate the gateway of the plant site and warehouse facilities of Dorsey Laboratories, division of Wander Co., in Lancaster County, Nebr.

No. MC–124211 (Sub-No. E37), filed April 29, 1974. Applicant: HILT TRUCK LINES, INC., P.O. Box 988 D.T.S., Omaha, Nebraska 68101. Applicant's representative: Thomas L. Hilt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting:

(a) *Canned goods* and *food products* (except frozen foodstuffs, commodities in bulk and meat, meat products and meat byproducts, dairy products, and articles distributed by meat packinghouses, as described in sections A, B and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766), from Chicago, Ill., to points in Arizona, California, New Mexico, and Utah.

(b) *Canned goods*, (1) from points in Iowa, and points in that part of Illinois on and north of a line beginning at the Illinois-Indiana State line, thence over U.S. Highway 125 to Beardstown, Ill., thence over U.S. Highway 67 to junction of U.S. Highway 24, thence over U.S. Highway 24 to the Illinois-Missouri State line near Quincy, Ill., to points in Arizona, California, Nevada, New Mexico, and Utah; and (2) from points in Illinois south of a line beginning at the Illinois-Indiana State line, thence over U.S. Highway 36 to Springfield, Ill., thence over Illinois Highway 125 to Beardstown, Ill., thence over U.S. Highway 67 to junction of U.S. Highway 24, thence over U.S. Highway 24 to the Illinois-Missouri State line near Quincy, Ill., to points in California, Nevada, Utah, and points in that part of Arizona on, north and west of a line beginning at the Arizona-Nevada State line, thence over U.S. Highway 160 to junction U.S. Highway 89, thence south over U.S. Highway 89 to Flagstaff, Ariz., thence over Interstate Highway 17 and Arizona Highway 79 to Phoenix, Ariz., thence west over U.S. Highway 80 to the Arizona-California State line near Yuma, Ariz. The purpose of this filing in (a) and (b) above is to eliminate the gateway of Grand Island, Nebr.

No. MC–128383 (Sub-No. E26), filed April 26, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between Greater Buffalo International Airport, Erie County, N.Y., and Washington National Airport, Gravelly Point, Va., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Jamestown Municipal Airport, Chautauqua County, N.Y.

No. MC–128383 (Sub-No. E27), filed April 26, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between Greater Buffalo International Airport, Erie County, N.Y., and La Guardia Airport, New York, N.Y., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Chemung County Airport, Chemung County, N.Y.

No. MC–128383 (Sub-No. E30), filed April 26, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between Washington National Airport, Gravelly Point, Va., and Clarence E. Hancock Airport, Onondaga County, N.Y., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Chemung County Airport, Chemung County, N.Y.

No. MC–128383 (Sub-No. E31), filed April 26, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between Rochester–Monroe County Airport, Monroe County, N.Y., and Dulles International Airport, Fairfax and Loudoun Counties, Va., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Chemung County Airport, Chemung County, N.Y.

No. MC–128383 (Sub-No. E38), filed May 1, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between Bradley International Airport, Hartford County, Conn., and Dulles International Airport, Fairfax and Loudon Counties, Va., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Tweed-New Haven Airport, New Haven, Conn.

No. MC–128383 (Sub-No. E52), filed May 1, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between John F. Kennedy International Airport, New York, N.Y., and Logan International Airport, Boston, Mass., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Tweed-New Haven Airport, New Haven County, Conn.

No. MC–128383 (Sub-No. E53), filed May 1, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between Philadelphia International Airport, Philadelphia, Pa., and Logan International Airport, Boston, Mass., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Tweed-New Haven Airport, New Haven County, Conn.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

SPECIAL FEDERAL PROGRAMS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

1974 Summer Program for Economically Disadvantaged Youth

No. 93—Pt. II——1

V 39 I 93
MAY 13 74
XUM

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 97—SPECIAL FEDERAL PROGRAMS AND RESPONSIBILITIES UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Subpart A—1974 Summer Program for Economically Disadvantaged Youth

Pursuant to section 602(a) of the Comprehensive Employment and Training Act of 1973 (Public Law 93–203, 87 Stat. 839), which authorizes the Secretary of Labor to prescribe such rules, regulations, guidelines and other published interpretations as he deems necessary to carry out the provisions of this Act, the following regulations are promulgated to facilitate the implementation at the earliest possible date of the 1974 summer program for economically disadvantaged youth, funded under Title III, section 304(a), of the Act.

These regulations shall become effective June 12, 1974.

As these regulations relate to public property, loans, benefits or contracts, they have been excepted from the application of the notice and comments provisions of the Administrative Procedure Act, 5 U.S.C. 553(a)(2). The policy of the Department of Labor as stated in 29 CFR 2.7 is not to use this exception as a basis for not giving opportunity for notice and comment. In this case, in order to effect promptly the purposes of a summer program during 1974 under the Comprehensive Employment and Training Act, it is contrary to the public interest to delay the issuance of these regulations to the extent necessary for the preparation, receipt and evaluation of the comments. Accordingly, they are not issued for comments prior to publication in their final form.

Nevertheless, although these regulations are being published in final form and are made effective June 12, 1974, it is the policy of the Department of Labor to solicit and consider comments on its regulations. Accordingly, comments will be received, just as though this document were a proposal, until June 30, 1974, after which the comments received will be evaluated and, if warranted, the regulations will be appropriately amended. Meanwhile, however, in the interest of expediting the program, these regulations shall remain in force until amended.

Interested persons are invited to submit comments, data or arguments to: Assistant Secretary for Manpower, United States Department of Labor, 6th and D Streets, N.W., Washington, D.C. 20213. Attention: Pierce A. Quinlan, Associate Manpower Administrator for the Office of Manpower Development Programs.

The new Part 97, Subpart A, which shall become effective June 12, 1974, reads as follows:

Sec.
97.1 Scope and purpose.
97.2 Definitions.
97.3 Allocation of funds.
97.4 Eligibility for funds.
97.5 Notification of intent.
97.6 Application for grants; standards for reviewing grant applications.
97.7 Application approval and disapproval.
97.8 Use of alternative sponsors and services by the Secretary.
97.9 Content and description of grant application.
97.10 Modification of the grant agreement; modification of the program plan.
97.11 Basic responsibilities of sponsors.
97.12 Eligibility for participation.
97.13 Types of manpower services available in the summer program for economically disadvantaged youth.
97.14 Participant benefits.
97.15 Sponsor review.
97.16 Non-Federal status of participants.
97.17 Worksite standards; safety and health requirements for participants.
97.18 Training for lower wage industries and relocation of industries.
97.19 Sponsor contracts and subgrants.
97.20 Cooperative relationships between sponsors and other manpower agencies.
97.21 Reporting requirements.
97.22 Terminal date for 1974 summer program.

AUTHORITY: Pub. L. 93–203, Sec. 602(a), 87 Stat. 839, unless otherwise noted.

§ 97.1 Scope and purpose.

(a) This Subpart A contains the policies, rules, and regulations of the Department in implementing and administering the 1974 summer programs for economically disadvantaged youth funded under Title III, section 304(a), of the Comprehensive Employment and Training Act (hereinafter referred to as the Act).

(b) Programs funded under this Subpart A shall be designed by summer sponsors, defined in § 97.4, to provide summer employment and other activities and services authorized under Title I of the Act.

(c) Subpart A should be read in conjunction with Parts 94 through 98 of this subtitle. These parts, in total, comprise the regulations promulgated by the Secretary pursuant to the authority in the Act. The provisions of Part 95, however, only apply to this Subpart A as indicated in specific sections of those regulations. The administrative provisions of Part 98 shall apply to this Subpart A.

§ 97.2 Definitions.

Definitions for abbreviations and major terms used in this Subpart A may be found in Part 94 of this title. In addition:

(a) The term "EEA" means the Emergency Employment Act of 1971, as amended;

(b) The term "EOA" means the Economic Opportunity Act of 1964, as amended; and

(c) The term "Indian or native American organization" includes Indian tribes, bands, and groups, and native American groups.

§ 97.3 Allocation of funds.

(a) The funds available under this Subpart A shall be allocated to summer sponsors, defined in § 97.4, based upon the criteria set forth in paragraphs (b), (c), and (d) of this section.

(b) Allocations of funds available for summer sponsors who are prospective or actual prime sponsors under Title I of the Act shall be based on the following formula:

(1) Fifty percent of such funds shall be allocated so that each sponsor receives the same percentage of the 1974 summer funds available under this Subpart A, as it received as a percentage of the funds available for the EOA and EEA summer program in 1973;

(2) Thirty-seven and one-half percent of the funds shall be allocated based on the ratio of the number of unemployed persons in the sponsor's area in 1973 to the total number of unemployed persons in the United States in that year; and

(3) Twelve and one-half percent of the funds shall be allocated based on the ratio of the number of adults in low income families in the summer sponsor's area in 1969 to the total number of adults in low income families in the United States for that year; and

(4) No prime sponsor area shall be allocated less than 90 percent of the funds allocated to the area under the EOA and EEA summer program of 1973.

(c) (1) The total allocation to Indian and native American sponsors of programs funded under this Subpart shall be equal to the same percentage of the funds available for Indian and native American sponsors under the EOA and EEA summer program in 1973.

(2) The allocation to each eligible Indian or native American organization shall be based upon the amount of funds each Indian or native American organization received under the EOA and EEA summer program in 1973. Specifically, each Indian or native American organization shall receive the same percentage of the funds available for each organization under this Subpart A as it received as a percentage of the funds available for all Indian and native American organizations under EOA and EEA summer programs in 1973.

(d) The allocation of funds to Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands shall be based upon the criteria set forth in paragraph (c) of this section.

§ 97.4 Eligibility for funds.

Funds under this Subpart A shall be allocated by the Secretary to summer sponsors who may be:

(a) Prospective or actual prime sponsors under Title I of the Act; or

(b) Indian tribes, bands, groups, or other Indian organizations and native American organizations which received funds under the EOA and EEA summer program in 1973.

§ 97.5 Notification of intent.

An eligible summer sponsor desiring financial assistance for a program under this Subpart A shall, for the purpose of providing its notification of intent submit to the appropriate ARDM (A listing of the ARDM's and the States within each Region is contained in the FEDERAL REGISTER, Volume 39, No. 16, Part IV of January 23, 1974), the Preapplication for Federal Assistance Part I, prescribed by OMB Circular A–102. To facilitate the earliest implementation of the summer youth program, an eligible summer sponsor should file a Preapplication for Federal Assistance not later than May 31, 1974; however, a Preapplication for Federal Assistance shall not be submitted any later than June 12, 1974, unless the ARDM, for good cause, permits an extension of time.

§ 97.6 Application for grants and standards for reviewing grant applications.

(a) A program shall be undertaken under this Subpart A, upon execution of an agreement between a summer sponsor and the ARDM. Upon receipt of a Preapplication for Federal Assistance, the ARDM shall send a grant application package to each eligible summer sponsor. The grant application shall be submitted to the ARDM not later than June 15, 1974, unless the ARDM, for good cause, permits an extension of time.

(b) Each grant application shall be reviewed by the appropriate ARDM using the standards described in § 95.17 of this subtitle.

§ 97.7 Application approval and disapproval.

Each grant application shall be approved or disapproved under the provisions and conditions described in § 95.18 of this subtitle.

§ 97.8 Use of alternative sponsors and services by the Secretary.

If a grant application is not filed, or is denied, or terminated, the Secretary may make provision for the use of an alternative sponsor, or provide services himself, as described in § 95.20 of this subtitle.

§ 97.9 Content and description of grant application.

(a) The content of an application for programs funded under this Subpart A shall be identical to the content of an application for Title I programs, as set forth in § 95.14(b) of this subtitle, except that:

(1) The Program Narrative Description for programs under this Subpart A shall be in accordance with the requirements of paragraph (b) of this section, rather than in accordance with the requirements of § 95.14(b)(2)(i) of this subtitle.

(2) The Program Transition Schedule, set forth in § 95.14(b)(2)(ii) of this subtitle shall be deleted; and

(3) The Public Service Employment Occupational Summary shall be prepared as provided in paragraph (c) of this section, rather than as set forth in § 95.14(b)(2)(iv) of this subtitle.

(b) The Program Narrative Description shall consist of:

(1) A policy statement on the purpose of the program funded under this Subpart A;

(2) A statement of the goals to be accomplished;

(3) A description of the number and characteristics of the participants to be served by (i) sex and (ii) age: 14 to 15, 16 to 17, 18 to 22;

(4) A description of each program activity and service;

(5) A description of the methods to be used to recruit, select, and determine the eligibility of participants;

(6) A description of the geographical area to be served; and

(7) The Public Service Employment Program description, as applicable, and described in § 95.14(b)(2)(i)(F) of this subtitle.

(c) The Public Service Employment Occupational Summary forms shall be submitted separately for on-the-job training, for work experience, and for public service employment, as appropriate, and shall be prepared as described in § 95.14(b)(2)(iv) of this subtitle except that for on-the-job training and for work experience activities the comparison of wages shall not be included.

§ 97.10 Modification of the grant agreement; modification of the program plan.

(a) A summer sponsor desiring a modification to an existing grant agreement shall follow the procedure described in § 95.21 of this subtitle.

(b) A summer sponsor desiring a major modification as defined in § 95.22(b) of this subtitle shall submit a revised project operating plan and a narrative explanation of the proposed changes to the ARDM. The ARDM shall notify the sponsor of final approval or tentative disapproval within 10 days of receipt of the proposed modification. An appeal of such determination may be obtained through the procedures set out in Part 98 of this subtitle.

(c) A summer sponsor shall follow the procedure described in § 95.22(c) of this subtitle in making a minor modification to programs funded under this Subpart A. However, a sponsor shall show such modifications on the end of summer progress report.

(d) An ARDM may require a modification as described in § 95.22(d) of this subtitle.

§ 97.11 Basic responsibilities of sponsors.

A sponsor of a program funded under this Subpart A shall be responsible for the compliances and provisions described in § 95.31 of this subtitle.

§ 97.12 Eligibility for participation.

Each participant in a program funded under this Subpart A shall be at time of enrollment:

(a) Economically disadvantaged, as defined in § 94.4; and

(b) A youth, 14 years of age through 22 years of age.

§ 97.13 Types of manpower services available in the summer program for economically disadvantaged youth.

(a) A program funded under this Subpart A may include any activity or service specified in § 95.33 of this subtitle.

(b) The requirements for Work Experience activities, as described in § 95.33(d)(3)(ii) of this subtitle, are amended for programs funded under this Subpart A to read as provided in paragraph (c) of this section.

(c) *Work experience.* This program activity is to be designed to enhance the future employability of youth or to increase the potential of youth in obtaining a planned occupational goal.

(1) Work Experience activities for youth include part-time work for students attending school; short-term employment for out-of-school youth adjusting to a work setting and in transition from school to a job setting; short-term employment for recent graduates; and short-term or part-time employment for veterans, institutional residents and inmates under special work release agreements. In addition, it may include short-term employment while a training or job opportunity is being developed. Work Experience activities in the private for-profit sector shall be prohibited.

(2) Program outcomes for work experience participants include (i) return to school; (ii) enrollment in post secondary education; (iii) enlistment in the military services; (iv) enrollment in a manpower training activity; and (v) placement in subsidized or unsubsidized employment.

§ 97.14 Participant benefits.

(a) Participants in classroom training in programs funded under this Subpart A shall receive allowances and other benefits as described in § 95.33(d)(1)(iii) of this subtitle.

(b) Participants in on-the-job training in programs funded under this Subpart A shall receive wages and other benefits as described in § 95.33(d)(2)(iv) of this subtitle.

(c) Participants in transitional public service employment activities in programs funded under this Subpart A shall receive wages and benefits as described in § 95.33(d)(3)(iii) of this subtitle.

(d) Each participant in a work experience activity shall receive wages at a rate of pay commensurate with such factors as the types of work performed, the geographical region of the program, and the skill proficiency of the participant, provided that no participant's hourly rate of pay shall be less of whichever is the highest of the minimum wage prescribed for similar employment by State or local law or an hourly wage of $2.00 an hour. However, wages in the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands shall be consistent with applicable provisions of the Fair Labor Standards Act of 1938, as amended.

(e) Participants in work experience activities shall be provided workmen's compensation and, as appropriate, other manpower services.

(f) Participants in work experience activities at Federal worksites shall be

V 39 I 93 MAY 13 74 XUM

provided coverage by the Federal Employees Compensation Act.

§ 97.15 Sponsor review.

Each sponsor of a program funded under this Subpart A shall establish a procedure as described in § 95.37 of this subtitle for resolving any issue arising between it and a participant in a program funded under this Subpart A.

§ 97.16 Non-Federal status for participants.

Participants in a program funded under this Subpart A shall not be deemed Federal employees as provided for in § 95.38 of this subtitle.

§ 97.17 Worksite standards; safety and health requirements for participants.

(a) The placement of participants on a Federal worksite for work experience activities does not constitute Federal employment, except for purposes of the Federal Employees Compensation Act and the Federal Tort Claims Act.

(b) No participant under 18 years of age will be employed in any occupation which the Secretary has found, pursuant to his authority under the Fair Labor Standards Act, to be particularly hazardous for persons between 16 and 18 years of age (see subpart E of Part 570, of this title).

(c) Participants who are 14 and 15 years of age will participate only in accordance with the limitations imposed by Sections 31–35 of Subpart C of Part 570, of this title.

(d) Participants shall be provided safe and healthful working conditions as described by the provisions of § 95.38 of this subtitle.

(e) No participant shall be compensated for more than 40 hours per week.

§ 97.18 Training for lower wage industries and relocation of industries.

No participant may be enrolled in any activity or service provided by a program funded under this Subpart A in any lower wage industry job as described by the provisions of § 95.40 of this subtitle.

§ 97.19 Sponsor contracts and subgrants.

A sponsor of a program funded under this Subpart A may enter into contracts or subgrants under the provisions described in § 95.41 of this subtitle.

§ 97.20 Cooperative relationships between sponsors and other manpower agencies.

Each sponsor shall, to the extent feasible, establish cooperative relationships or linkages with other manpower and manpower-related agencies as described in § 95.42 of this subtitle.

§ 97.21 Reporting requirements.

(a) Each summer sponsor shall submit two reports to the ARDM: an End-of-Summer Progress Report, and a Summary of Client Characteristics Report.

(b) The End-of-Summer Progress Report (The Quarterly Progress Report Form generally used by a sponsor of a comprehensive manpower program, but labelled by the project sponsor as End-of-Summer Progress Report) will be used to summarize the accomplishments of the program. It constitutes the summer sponsor's statement of accomplishments and costs incurred and contains a certification of the correctness of the items reported. The End-of-Summer Report will be submitted not later than 30 days after the termination of the program, but in no case later than October 15, 1974.

(c) The Summary of Client Characteristics Report shall contain aggregate characteristics data on all participants in programs funded under this Subpart A. (This report is the Quarterly Summary of Client Characteristics Report regularly submitted by a sponsor of a Title I funded program, but labelled specifically for the Summer Program for Economically Disadvantaged Youth.) The summary is to be submitted to the ARDM with the End-of-Summer Progress Report appropriately marked, "Summer Program for Economically Disadvantaged Youth." The information for age characteristics on line 04 of the Summary of Client Characteristics Report shall be broken out on the back of the report by the following age groups:

(1) 14–15 years;
(2) 16–17 years; and
(3) 18–21 years.

§ 97.22 Terminal date for 1974 summer program.

No program under this Subpart A shall continue beyond October 1, 1974.

Signed at Washington, D.C., this 7th day of May, 1974.

PETER J. BRENNAN,
Secretary of Labor.

PART III

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Low Rent Public Housing

■

SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING

No. 93—Pt. III——1

V 39 I 93 MAY 13 74 XUM

Title 24—Housing and Urban Development

CHAPTER VIII—LOW RENT PUBLIC HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-74-247]

PART 1274—SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING

Notice was given on January 22, 1974 at 39 FR 2550 that the Department of Housing and Urban Development was proposing to amend Title 24 of the Code of Federal Regulations by adding a new Part 1274 to Chapter VIII.

The purpose of Part 1274 is to set forth the essential elements of the Section 23 Housing Assistance Payments Program—Existing Housing including, among other things, the roles and responsibilities of the Department, the local housing authority (LHA), the owner, and the eligible low-income family; the steps in applying for the Section 23 Existing Housing Program; the basis for determining the amount of housing assistance payments; and the prescribed form of contracts and other documents.

The Department has received more than 170 responses to the January 22, 1974 publication. All of these comments were seriously considered and many changes have been incorporated in these regulations as a result. The principal changes are set forth below.

The subject of the greatest number of comments was the priority to be given to applications limiting assistance to 20 percent of the units in a multifamily structure or complex. Accordingly, the changes with respect to this subject are discussed first. The remaining principal changes are discussed generally in the order in which they appear in the regulations.

1. § 1274.103(k)(2), which sets forth the priority for LHA applications limiting assistance to 20 percent of the units in a single multifamily structure or complex of five or more units has been modified so that applications for programs (a) solely for the elderly, or handicapped or (b) of 25 or fewer units shall be considered without regard to the priority. Also, the procedures relating to the application of the 20 percent priority in the selection of applications have been set forth in a new § 1274.203(b).

2. The revised regulations now provide, pursuant to a new § 1274.103(b)(2) and a new section 1.3(c) of Part I of the Annual Contributions Contract (ACC), Appendix IV, for the establishment of an account to which may be credited amounts determined by HUD to be necessary to assure that the low-rent character of the project will be maintained. Amounts may be paid out of this account, as approved by HUD, during the term of the ACC for increases reflected in the annual estimates of required annual contributions as approved by HUD.

3. The provisions permitting the continuation of housing assistance payments with respect to a unit vacated by an eligible family in violation of its lease, § 1274.103(c) and section 1.2(b) of the Housing Assistance Payments Contract (Contract), Appendix IX, have been modified to require that the owner, in order to receive such payments must, among other things, take all feasible action to fill the vacancy immediately upon learning of it.

4. § 1274.103(g) respecting responsibilities of the owner, has been modified so that an owner may contract with the LHA for the management, maintenance or operation of units leased or to be leased by eligible families, for a prescribed fee provided that: (1) it is determined by the HUD field office director that such services are not otherwise available in the locality and (2) such contract shall not shift to the LHA any of the owner's responsibilities or obligations.

5. Section 1274.103(h), respecting the responsibilities of the LHA, has been modified to require (rather than merely permit) the LHA to provide advice and guidance to eligible families in finding suitable housing, including families experiencing discrimination. The modified provision requires that such advice and guidance be provided in a manner affirmatively to further the policies of the applicable Civil Rights legislation and Executive Orders.

6. The procedures with respect to the payment by the LHA of security deposits on behalf of eligible families, as set forth in § 1274.103(j), have been clarified and a prescribed form of Security Deposit Agreement, Appendix XI, has been provided which sets forth, among other things, the terms of and procedures for repayment to the LHA.

7. The provisions respecting relocation have been modified so that, pursuant to § 1274.103(l) and Section 1.7b of the Contract, the owner of a unit occupied by other than the eligible family will not be required to undertake liability for and provide for the funding of all relocation costs if other commitments, satisfactory to HUD, have been made for the funding of such costs.

8. Pursuant to § 1274.104 and Part I of the ACC, as modified, in the event an LHA, which has an ACC for existing units under these regulations, is approved for additional units, such additional units will be incorporated into a revised Part I of the ACC. This revised Part I will cover the LHA's entire existing housing program under these regulations and will be for a term of four years from the new date of execution.

9. A new § 1272.105 and a new § 1.7 of Part I of the ACC have been added which set forth the procedures for the submission by the LHA to HUD of the prescribed forms of (1) an Initial Estimate of Required Annual Contributions (Preliminary Costs), and (2) Annual Estimates of Required Annual Contributions. These forms cover the estimated amounts for the costs of non-expendable equipment, administration, security and utility deposits and housing assistance payments.

10. A new § 1274.201(b) has been added to provide for a preapplication conference between the LHA and HUD so that HUD may assist the LHA in the preparation of its application.

11. § 1274.204(b), which sets forth the requirements relating to the expeditious leasing of units under the program, has been modified so that the failure of the LHA to demonstrate a good faith effort to adhere to it leasing schedule will be considered a basis for reduction of units by HUD.

12. The procedures for certification of family eligibility and LHA approval of leases and units have been clarified in new §§ 1274.205 (e), (f) and (g) and in a new form of Certificate of Family Participation and Lease Approval, Appendix V. The new three-part form includes: Part I, Certificate of Family Participation, which replaces the Certificate of Family Eligibility and revises, among other things, the effective period of the Certificate to 60 days from the date of issuance; Part II, Request for Lease Approval, which replaces the Owner's Offer to Lease Dwelling Unit and which is signed by the family and the owner; and Part III, the Authority Determination, in which the LHA indicates whether the proposed lease and unit are approved or disapproved and, if disapproved, whether the owner and the family may resubmit the Request to the LHA after the specified defects are corrected.

13. In accordance with the requirements of the Lead Based Paint Poisoning Prevention Act (as amended), 42 U.S.C. 4801, a new § 1274.205(e)(4)(iii) requires that each participating low-income family be given, at the time it is given its Certificate of Family Participation and Lease Approval form, information concerning the hazards of lead based paint poisoning.

14. The provisions regarding LHA inspection of units have been clarified so that: (1) pursuant to § 1274.205(g)(3), the LHA must maintain an inspection report for each inspection or reinspection of each unit prior to lease approval and (2) pursuant to § 1274.206, the LHA must inspect units under lease whenever the LHA has information, as a result of family complaints or otherwise, to the effect that the unit is not being maintained in accordance with the Contract. These inspections are required in addition to the periodic inspections.

15. The provisions respecting the contents of the owner-family lease have been modified so that pursuant to a new § 1274.205(g)(5)(iii), certain specified types of lease clauses are prohibited and pursuant to Section 1.6 of the Contract and a revised form of Lease Provision Required for Participation in the Housing Assistance Payments Program, Appendix VI: (1) certain required lease provisions have been modified or deleted in the interest of simplification and clarity and (2) the lease must specify all services and maintenance to be provided by the owner. The latter must include the items contained in the Guide for Lease Provisions for Maintenance and Security Services form, Attachment to Appendix VI, except where modifications are approved by the LHA for items which are not customarily supplied to tenants of this type of housing in the locality.

16. A new § 1274.205(g)(1) provides that LHAs shall not approve owners or managers who are listed as being disapproved for participation in HUD programs.

17. § 1274.205(1) and sections 1.5 and 1.6 (required lease provisions) of the Contract which relate to eviction, have been modified so that: (1) The owner may not evict the family unless the owner complies with the requirements of local law, the lease and the Contract eviction provision; (2) the owner must notify the family (copy to LHA) of the proposed eviction, stating the grounds and advising the family that it has 10 days (from receipt of notice) to respond to the owner and/or present objections to the LHA (in writing or in person); (3) the LHA shall authorize the eviction unless the grounds are insufficient under the lease; and (4) the LHA shall notify the owner and the family of its determination within 20 days of the date notice is received by the family.

18. A new § 1274.207 provides for HUD review of LHA operations when 30 percent of the units under Part I of the ACC have been leased.

19. The Housing Assistance Payments Contract has been simplified, modified and reorganized so that, among other things: (1) the Contract is divided into two parts; (2) the Contract will terminate pursuant to a revised Section 1.4, upon expiration or termination of the lease; and (3) LHA determinations concerning default by the owner (§ 2.5) and assignments of the Contract (§ 2.10) no longer require HUD approval.

20. The requirements and procedures respecting Equal Opportunity have been clarified and strengthened so that, among other things: (1) The responsibilities of the LHA with respect to its HUD-approved Affirmative Fair Housing Marketing Plan have been clarified in a new § 1274.205(d); (2) the LHA is required to advise minority families that they are free to seek housing in nonminority areas pursuant to a new § 1274.205(f)(1); and (3) the owner and the LHA are required to cooperate in compliance reviews and complaint investigations undertaken by the Government pursuant to Section 2.11 of the ACC and Section 2.2 of the Contract.

21. The numbering scheme of the regulations has been modified slightly in order to conform, to the extent possible, referencing in these regulations to that utilized in the corresponding HUD Section 23 Existing Housing Handbook. Under the revised numbering, the initial section in Subpart A is designated § 1272.101. and the initial section in Subpart B is designated as 1274.201. These references correspond to Handbook paragraphs 1-1 and 2-1, respectively.

The Assistant Secretary for Housing Production and Mortgage Credit—FHA Commissioner has determined that the public interest would best be served by making these regulations effective immediately to avoid unnecessary delay in its implementation. Therefore, the Assistant Secretary finds that good cause exists for making these regulations effective on May 13, 1974.

Accordingly, Title 24 is amended as follows:

A new Part 1274, entitled "Section 23 Housing Assistance Payments Program—Existing Housing," is added to Chapter VIII to read as set forth hereinafter.

Subpart A—Applicability, Scope, and Basic Policies

Sec.

1274.101 Applicability and scope.
1274.102 Definitions.
1274.103 Basic policies.
1274.104 Separate project requirements.
1274.105 Submission of estimates of required annual contributions.

Subpart B—Project Development and Operation

1274.201 Preapplication.
1274.202 LHA submission of application.
1274.203 HUD review and approval of application.
1274.204 Annual contributions contract (ACC).
1274.205 Leasing from owners.
1274.206 Periodic inspection.
1274.207 HUD review of LHA program activities.
1274.208 LHA reporting requirements. [Reserved]

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); sec. 10(b) of the U. S. Housing Act of 1937 (42 U.S.C. 1410(b)); sec. 23 of the U.S. Housing Act of 1937 (42 U.S.C. 1421(b)).

Subpart A—Applicability, Scope, and Basic Policies

§ 1274.101 Applicability and scope.

(a) The policies and procedures contained herein are applicable to the making of housing assistance payments on behalf of eligible low-income families leasing privately owned, existing, decent, safe, and sanitary housing pursuant to the provisions of section 23 of the U.S. Housing Act of 1937.

(b) For purposes of this part, "existing housing" means housing whose original construction and/or rehabilitation was completed without the execution of any contract between a Local Housing Authority (LHA) and an owner for the subsequent leasing or the making of housing assistance payments for occupancy by eligible low-income families. "Existing housing" may include housing which requires minor repairs, improvements or rehabilitation to put it into decent, safe, and sanitary condition, provided that such work is performed prior to the execution of a Housing Assistance Payments Contract and without execution of any contract as described above.

(c) The policies and procedures contained herein shall apply to all section 23 projects for existing housing placed under Annual Contributions Contract after the effective date of this Part. With respect to projects placed under Annual Contributions Contracts prior to the effective date of this part, these policies and procedures may be applied if the LHA and owners of units under lease agree to do so.

(d) This part (1) covers policies and procedures relating to the roles and responsibilities of HUD, the LHA, and the owner and the application and leasing processes and (2) contains contracts, leases, and other documents.

§ 1274.102 Definitions.

(a) *Decent, safe, and sanitary housing.* For the purposes of this program, housing is considered to be decent, safe, and sanitary if a certificate of occupancy or other similar certification, if required by law, has been issued by the authorized governmental official, and if the following minimum standards are met:

(1) The housing has been determined by the LHA to be decent, safe, and sanitary within the meaning of the U.S. Housing Act based upon all pertinent factors, including, but not limited to, the following:

(i) The condition of the exterior and interior of the structure and the housing unit;

(ii) Adequacy and operating condition of sanitary facilities, which must be private, and adequacy of solid and liquid waste disposal facilities;

(iii) Adequacy and operating condition of kitchen facilities, which must (a) contain a range and refrigerator (except in localities where it is normal practice that tenants provide these items), a sink, space for storage of food and for storage of utensils and dishes, and (b) be private except where authorized as congregate housing meeting HUD requirements for such housing;

(iv) Adequacy and operating condition of heating, lighting and ventilating equipment and/or facilities;

(v) Size, number of rooms, and furnishability to accommodate adequately the size and type of family to be housed.

(2) The owner shall provide either (i) a certification from the authorized local government official or a qualified laboratory that exposed interior and exterior surfaces are free of lead based paint hazards, or (ii) a certification by the owner that those surfaces have been adequately treated or covered, all in accordance with

V 39 1933
MAY 13 74
XUM

the applicable HUD regulations issued pursuant to the Lead Based Paint Poisoning Prevention Act, 42 U.S.C. 4801.

(3) The site shall not be subject to serious, adverse environmental conditions, natural or manmade, such as instability, flooding, septic tank backups, sewage hazards, or mudslides; abnormal air pollution, smoke or dust; excessive noise, vibration or vehicular traffic; rodent or vermin infestation; or fire hazards. The neighborhood shall not be seriously detrimental to family life, and substandard dwellings or other undesirable elements should not predominate unless there is actively in progress a concerted program to upgrade the neighborhood.

(b) *Fair market rent and gross rent.* Fair market rent is the gross rent (including utilities, ranges and refrigerators, and all maintenance and management services) for dwelling units of varying size (number of bedrooms), which, as determined at least annually by HUD, would be required to be paid in each housing market area in order to obtain privately owned, existing, decent, safe, and sanitary housing of modest (nonluxury) nature. Gross rent includes all utilities (except telephone) whether or not paid directly to the utility company by the family.

(c) *Gross family contribution.* The portion of the rent to owner payable by a family plus the utility allowance established by the LHA for any utilities (except telephone) payable directly by the family. In no event shall the gross family contribution exceed one-fourth of the family's adjusted income as defined by HUD.

(d) *Utility allowance.* An amount, determined by the LHA and approved by HUD as an allowance for the cost of tenant-purchased utilities, which is deducted from the fair market rent for purposes of determining the rent to owner and is included in the gross family contribution.

(e) *Annual contributions contract (ACC).* A written agreement between HUD and an LHA to provide annual contributions to the LHA for participation in the Housing Assistance Payments Program. (See Appendix IV.)

(f) *Housing assistance payments contract ("Contract").* A written Contract between an LHA and an owner for the purpose of providing housing assistance payments on behalf of eligible families. (See Appendix IX.)

(g) *Eligible families.* Those families determined by the LHA to meet the requirements for admission into housing assisted hereunder. Families shall not be eligible for housing assistance payments when the LHA determines that 25 percent of adjusted family income (as defined by HUD) equals or exceeds the gross rent for the unit leased. The ineligibility of such families for housing assistance payments shall not affect the family's other rights under its lease.

(h) *Certificate of family participation.* The certificate issued by an LHA to an applicant family declaring it to be eligible and stating the terms and conditions of such eligibility. (See Appendix V.)

(i) *Lease.* An LHA-approved written agreement between a private owner and an eligible family for the leasing of an existing, decent, safe, and sanitary dwelling unit. The lease shall contain the required provisions specified in the Contract.

§ 1274.103 Basic policies.

(a) *"Finders-keepers" policy.* Eligible families shall be responsible for finding decent, safe, and sanitary units on the private market so as to maximize choice. LHAs may provide assistance in finding units to those families who, for age, handicap, discrimination, or other reasons, are unable to locate suitable units. An LHA may provide housing assistance payments to an eligible family already leasing decent, safe, and sanitary housing, provided it has been issued a Certificate of Family Participation in accordance with the policies and procedures of the LHA and a completed Request for Lease Approval (Part II of Appendix V) has been submitted to the LHA.

(b) *Annual contributions.* (1) The maximum annual contribution that may be contracted for in the Annual Contributions Contract for a project shall be: (1) The total of the applicable fair market rents for all the units in the project plus (2) an allowance for the cost of administration. The allowance for the preliminary costs of administration and an amount for security and utility deposits (see § 1274.103(j)) shall be payable out of this total.

(2) A project account, which shall at no time exceed an amount equal to 10 percent of the maximum annual contribution, may be established and maintained out of amounts by which the maximum annual contributions for any years are not otherwise payable in such years. This account shall be established and maintained by the LHA or by HUD, as determined by HUD, as a specifically identified and segregated account, and payment shall be made therefrom, as approved by HUD, only for the following purposes:

(i) increases in housing assistance payments;

(ii) increases in the allowance for LHA administrative expenses;

(iii) increases in fund requirements for security and utility deposits; and

(iv) other expenditures specifically authorized or approved by the Secretary.

Any balance in this account after payment of the last annual contribution for the project shall be paid to HUD.

(c) *Housing assistance payments.* (1) The housing assistance payments will pay the owner the difference between the rent chargeable by the owner and that portion of said rent payable by the family.

(2) Housing assistance payments shall be paid to owners only for those units under lease by eligible families. If a family vacates its unit in violation of the provisions of its lease, the owner may continue to receive housing assistance payments with respect to such unit in accordance with the terms of the Contract, not beyond the term of the lease, but only if the owner (i) immediately upon learning of the vacancy, has taken all feasible action to fill it, including, but not limited to, contacting families on his waiting list, requesting the LHA to refer eligible families, and advertising the availability of the unit, (ii) has promptly (within 30 days of the date the family vacated the unit) notified the LHA of the vacancy and the reasons for the vacancy, and (iii) has not rejected, except for good cause acceptable to the LHA, any substitute family provided by the LHA.

(d) *Eligible agencies.* (1) All legally constituted LHAs created pursuant to State housing authorities laws are eligible to participate in this program. In addition, under the terms of the U.S. Housing Act, a "public housing agency" may include any State, county, municipality or other governmental entity or public body which is authorized by State law to engage in the development or administration of low-income housing or slum clearance and may, therefore, be eligible to participate in this program. The abbreviations "LHA" or "LHAs" as used herein include any governmental entity or public body as described in this paragraph.

(2) LHAs may, by agreement, cooperate with each other in carrying out their respective functions, and State laws typically provide that a locality which has no LHA can invite another LHA within the State to function within its borders.

(3) In addition to the few States that have created statewide LHAs many more have State departments or agencies authorized to administer housing and urban development legislation which qualifies them as public housing agencies under the U.S. Housing Act and authorizes them to carry out this function or to act through LHAs or other entities.

(e) *Local governing body approval.* HUD cannot approve an application for a Section 23 program unless the governing body of the locality in which the units are to be assisted has, by resolution, approved the application of the provisions of Section 23 to such locality. Once such a resolution has been enacted, it may satisfy this approval requirement for all subsequent Section 23 projects. The terms of the resolution as enacted must be examined by the LHA and HUD to determine whether it contains any restrictive language (e.g., limits the number of dwelling units or limits the program to locations which would have the effect of denying equal housing opportunities) which would require that a new resolution be passed to enable HUD to approve the proposed program.

(f) *Types of housing.* (1) Any type of existing housing which is in or may be put into decent, safe, and sanitary condition may be utilized. Such housing may include detached or semidetached dwellings, row-houses, mobile homes, or units in walk-up apartment buildings. Units in high-rise elevator buildings may not be used for families with children

unless HUD, in approving an LHA application, determines that there is no practical alternative. Congregate or single-room occupancy (SRO) housing may be used for occupancy by elderly, handicapped, or displaced families and individuals. (See the appropriate HUD requirements for guidelines and standards applicable to congregate and SRO housing.)

(2) Existing FHA insured, FmHA insured or direct loan, and VA guaranteed properties may also be utilized; however, the aggregate number of units in any Section 221(d)(3) below market interest rate (BMIR), Section 202, or Section 236 project that can be made available to families assisted through the rent supplement and/or Section 23 programs will be limited to 40 percent of the total unless written approval of HUD is obtained covering specific projects, on an exception basis, which involve: (i) the need to provide housing to persons displaced by urban renewal or other governmental action, or by natural events such as fire or flood, or (ii) vacancies of extended duration which are needed for immediate occupancy by the local authority. The housing assistance payment shall be the amount by which the rent paid by the eligible family is less than the basic or fully subsidized rent for the unit involved. In no event may a dwelling unit or the occupants thereof receive both rent supplement and Section 23 housing assistance.

(g) *Responsibilities of the owner.* The owner shall be responsible for the management, maintenance and operation of the dwelling unit. These responsibilities shall include, but not be limited to, the payment of utilities (unless paid directly by the family), insurance and taxes; performance of all ordinary and extraordinary maintenance; performance of all management functions including the selection of families (with the exception of determination and verification of eligibility for the particular dwelling unit involved, which shall be the function of the LHA); collection of rents; risk of loss from vacancies and nonpayment of rent by tenant families; preparation and furnishing of information required by the LHA under the Contract; and compliance with equal opportunity requirements. The LHA shall not provide management, maintenance or operation services except where it is determined by the HUD field office director that such services are not otherwise available in the locality. An owner may contract with the LHA for the management, maintenance, or operation of units leased or to be leased by eligible families under a contract, for a prescribed fee, provided that such contract shall not shift to the LHA any of the owner's responsibilities or obligations. Any such contract shall be approved by HUD.

(h) *Responsibilities of the LHA.* The LHA shall be responsible for review of applications submitted by families to determine eligibility for assistance; determination of amounts of housing assistance payments; issuance of Certificates of Family Participation to eligible families; prompt notification of families determined ineligible; approval of Requests for Lease Approval; execution of Housing Assistance Payments Contracts; making housing assistance payments on behalf of eligible families; reexamination of family eligibility as prescribed by HUD regulations; inspections prior to leasing and at least annually to determine that the units are maintained in decent, safe, and sanitary condition (failure to do so shall constitute a Substantial Default by the LHA under the Annual Contributions Contract); authorization of eviction; and compliance with equal opportunity requirements. The LHA shall provide advice and guidance to eligible families in finding suitable housing, including advice and guidance to families experiencing discrimination, in a manner affirmatively to further the policies of Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, and Executive Order 11063.

(i) *Responsibilities of the family.* A family receiving housing assistance under this program shall be responsible for fulfilling all its obligations under both its lease with the owner and the Certificate of Family Participation issued to it by the LHA.

(j) *Security and utility deposits.* Generally, families shall be expected to obtain the funds to pay security deposits (not to exceed one month's total rent to owner) and/or utility deposits, if required, from their own and/or other private or public sources. In hardship cases where families are unable to obtain funds to pay the required amounts, the LHA may pay on behalf of the families the necessary deposits (except telephone). In order to be eligible for such assistance by an LHA, families shall be required to pay, as a first installment towards repayment of the funds advanced by the LHA an amount at least equal to the lesser of: one-twelfth of the total required security and/or utility deposits, or one month's gross family contribution (see § 1274.102(c)). The LHA will then pay the full amounts required to owners and/or utility companies. The amounts advanced by the LHA from its funds shall be recovered from the families by the LHA generally over a one-year period. Recovery shall be accomplished by adding to the family's monthly rent payment to owner an appropriate additional amount specified in the Security Deposit Agreement, shown as Appendix XI, which shall be remitted to the LHA with the owner's monthly request for housing assistance payments on the prescribed forms. Failure on the part of the family to pay such amounts shall not affect the amount of housing assistance payments otherwise payable. The amounts remitted to the LHA may be retained by the LHA in a separate fund, in accordance with appropriate HUD accounting procedures, for future payments of security and/or utility deposits as needed, or otherwise applied in accordance with those procedures.

(k) *Limitation on number of units in single structure.* (1) Section 23(c) of the U.S. Housing Act provides that no more than ten percent of the units in any single structure shall be assisted unless the LHA, because of the limited number of units in the structure or for any other reason, determines that such limit should not be applied. Where the LHA determines that the ten percent limitation should not be applied, a record of its determination shall be maintained in the LHA's permanent file, and the LHA shall notify HUD of its action.

(2) However, in approving applications for assistance HUD will give priority to those applications which would provide for housing assistance for 20 percent or less of the units in a single multifamily structure or complex of five or more dwelling units. However, applications for (i) programs solely for the elderly or handicapped or (ii) programs of 25 or fewer units shall be considered for approval without regard to such priority.

(l) *Relocation requirements.* No LHA shall approve a lease for any unit which is occupied unless (1) the occupant will continue to reside in the same unit under the LHA's Section 23 existing housing program or (2) the owner voluntarily undertakes liability for and provides for the funding of all relocation costs (see Section 1.7 of the Contract) or (3) other commitments, satisfactory to HUD, have been made for the funding of such costs.

(m) *Equal opportunity requirements.* Participation in the Section 23 Housing Assistance Payments Program—Existing Housing requires compliance by all participants with (1) Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, and Executive Order 11063, and (2) all rules, regulations, and requirements issued pursuant thereto.

§ 1274.104 Separate project requirements.

All of the existing housing units administered by an LHA under the Housing Assistance Payments Program shall constitute a single project and be assigned a single project number. In the event that an LHA applies for additional existing housing units, the units, if approved, shall be incorporated into a revised Part I of the ACC which shall cover the LHA's entire Housing Assistance Payments Program for existing housing. The revised Part I shall be for a term of four years from the date of execution of the revised ACC Part I. The maximum annual contribution for the revised project shall be the sum of (a) the maximum annual contribution for the project prior to the revision plus (b) the amount approved for the additional units which shall be computed on the basis of the current fair market rents.

§ 1274.105 Submission of estimates of required annual contributions.

(a) *Initial submission.* An allowance may be provided for preliminary costs incurred by the LHA prior to the beginning of the first fiscal year. When the Annual Contributions Contract is

V 39 I 93 MAY 13 74 XUM

executed, the LHA shall submit an Initial Estimate of Required Annual Contributions (Preliminary Costs) and an Annual Estimate of Required Annual Contributions on the prescribed forms. These forms cover the estimated amounts for the costs of nonexpendable equipment, administration, security and utility deposits, and housing assistance payments.

(b) *Subsequent fiscal year submissions.* Not earlier than 150 and not later than 90 days prior to the beginning of each subsequent fiscal year, the LHA shall submit an Annual Estimate of Required Annual Contributions, with supporting documentation for any requested changes in the amount of housing assistance payments or the allowance for the cost of administration.

(c) *Revisions of estimates.* Any of the above Estimates may be revised to reflect changes in circumstances and available data.

(d) *HUD approval.* All Estimates of Required Annual Contributions and any revisions thereto submitted by the LHA shall be subject to HUD approval.

Subpart B—Project Development and Operation

§ 1274.201 Preapplication.

(a) *Determination of need and survey of market.* The LHA shall determine whether there is a need for housing assistance for low-income families within its operating jurisdiction. If it determines there is such a need the LHA shall survey the housing market of the locality to determine whether there is a sufficient supply of units suitable for use in this program to meet all or part of this need. In determining the adequacy of the housing supply, the LHA shall estimate realistically the number and size (number of bedrooms) of units that may be available, the condition of such units, and the rents at which the units may be leased.

(b) *Preapplication conference.* A preapplication conference with the appropriate HUD field office staff, in person or by telephone, is strongly recommended to assure that an approvable application will be submitted by the LHA. The LHA should be prepared to provide evidence that there is a sufficient supply of existing housing units which may be utilized in the program proposed by the LHA in terms of size (number of units), type (elderly or non-elderly), and bedroom distribution. The LHA should also indicate whether it intends to limit assistance to 20 percent or less of the units in a structure or complex of five or more units in accordance with § 1274.103(k)(2), and if so, that there is owner interest in such a program.

§ 1274.202 LHA submission of application.

(a) *Submission of application.* (1) An application for a Section 23 existing housing program to be submitted by the LHA to the HUD field office shall be in a form prescribed by HUD and shall:

(i) Describe the results of the LHA's survey of the housing market in terms of the number, size (number of bedrooms), condition, structure type, and rents of units which may be available;

(ii) Document the need for housing assistance in terms of family incomes, housing conditions, and rent to income ratios;

(iii) Indicate the number of units, by unit size (number of bedrooms), which are to be leased by eligible families, including a separate indication of the number of units to be leased by elderly families;

(iv) Include an estimate of the cost of administration attributable to the proposed program, and provide a basis for such estimate;

(v) Provide estimates of the average gross family contribution to be paid by families (not to exceed 25 percent of estimated adjusted family income as defined by HUD) and of utility allowances for tenant purchased utilities;

(vi) Indicate whether or not the LHA intends to meet the unit limitation described in § 1274.103(k)(2) and provide an indication of owner interest;

(vii) Indicate whether the LHA has adopted and implemented an approved tenant selection and assignment plan in compliance with Title VI of the Civil Rights Act of 1964.

(2) The LHA shall submit an Affirmative Fair Housing Marketing Plan with regard to invitations of applications for and issuance of Certificates of Family Participation.

(3) HUD regulation, Project Selection Criteria (24 CFR 200.700), is not applicable; however, see § 1274.102(a)(3) for required site and neighborhood standards.

(4) Advice and assistance in the preparation of the application are available from the local HUD field office.

(b) *Income limits and rent schedules.* (1) LHAs not having previously approved income limits and rent schedules shall submit income limits and rent schedules, in accordance with applicable HUD requirements, for approval with their applications.

(2) It is the incomes from families to be housed under the proposed Housing Assistance Payments Program, not the income limits, that is more significant in enabling HUD to determine assistance requirements and the approvability of a particular application. The LHA shall, therefore, provide accurate estimates of anticipated family income and the amount (including utilities) to be paid from the incomes of families expected to be assisted. In making these estimates, the LHA should utilize such information as incomes, after deductions and exemptions, of families on updated, current waiting lists and rents being paid by tenants in other leased and non-leased units operated by the LHA, as well as incomes of families expected to be housed under the income limits established for this program.

§ 1274.203 HUD review and approval of application.

(a) *Review of application.* The HUD field office shall review the application to determine that: There is need for assistance for the number of units applied for; the estimates of the cost of administration and utility allowance are realistic and allowable by HUD; the anticipated average gross family contribution is realistic; there is no practical alternative to utilization of units in high-rise elevator buildings for families with children, if applicable; and the LHA is in compliance with all Equal Opportunity requirements. If deemed appropriate, HUD shall make adjustments in size of program, bedroom distribution, the allowance for the cost of administration, or family contributions. Such adjustments shall be accepted by the LHA in order to receive application approval. Where the LHA is found to be in noncompliance with any Equal Opportunity requirements, appropriate action to effectuate compliance shall be taken.

(b) *Selection of applications for approval.* At least every two months, each HUD office will establish a list of all applications found approvable prior to the date the office has set for establishing such list. The applications will be ranked in accordance with criteria (other than the priority to be given to applications meeting the 20 percent limitation described in § 1274.103(k)(2)) established by the office. Applications shall be selected for approval in sequence from the top of the list. When an application is reached which is neither for the elderly (or handicapped) nor for 25 or fewer units and which does meet the 20 percent limitation, the next application which does meet the 20 percent limitation, if any, shall be selected ahead of such application; but no application for an elderly (or handicapped) project or for a project of 25 or fewer units shall be denied approval by reason of selection of the application meeting the 20 percent limitation.

(c) *Approval or disapproval of application.* (1) Upon completion of its review, HUD shall notify the LHA by letter that its application: is approved; is approvable but insufficient contract authority precludes authorization of an ACC; can be approved if the LHA adopts, within 30 days, the changes required by HUD; or is disapproved. If the application is disapproved, the letter shall indicate in detail the reasons for disapproval.

(2) If the application is approved, the letter shall authorize the LHA to execute the ACC, or the revised Part I of the ACC, transmitted with the letter. The letter shall also contain the HUD-established fair market rents, by units size, for the appropriate housing market area. The LHA shall be advised that these rents represent the maximum gross rents that can be approved for individual units. The LHA shall also be advised that if all or part of the cost for utilities is to be assumed by a family, the rent to owner shall not exceed the fair market rent less an allowance for family-paid utilities (excluding telephone). The letter shall also contain a leasing schedule in accordance with § 1274.204(b).

§ 1274.204 Annual contributions contract (ACC).

(a) *Approval and term of ACC.* Following HUD field office approval of an application, an ACC in the form prescribed in Appendix IV shall be prepared and processed and be transmitted by the field office to the LHA for execution and return to the field office with appropriate documents. The annual contributions period shall be for four years as provided in Appendix IV. A longer period may be permitted at the discretion of the Secretary.

(b) *Expeditious leasing.* The ACC shall include a provision relating to expeditious leasing of units under the program. HUD will provide, in its transmittal of the ACC to the LHA, target dates by calendar quarter endings, which will specify the number of units that are expected to be leased during each quarter. These target dates wil be established so as to implement HUD policy that all units in a Section 23 existing housing program of 100 units or more must be leased by eligible families within 12 months after execution of the ACC. In the case of smaller programs, a shorter time period may be established by HUD. Failure of the LHA to demonstrate a good faith effort to adhere to this schedule will be considered a basis for reduction by HUD of the number of units and amount of HUD's annual contributions commitment.

§ 1274.205 Leasing from owners.

(a) *Public notice to low-income families.* (1) After receiving HUD approval of its application, the LHA shall make known to the public, through publication in a newspaper of general circulation as through minority media and other suitable means, the availability of housing assistance for low-income families and shall invite such families to apply for Certificates of Family Participation. Such notice shall be made in accordance with Affirmative Fair Housing Marketing Regulations, including advertising guidelines for fair housing requiring the use of the equal housing opportunity logotype, statement, and slogan. The LHA shall send to the Equal Opportunity office in the appropriate HUD field office a statement of the methods used and a copy of the published notice(s).

(2) Families who are already on public housing waiting lists shall be notified that they must apply specifically for assistance under this program, if they wish to be considered for it. Any such family who applies for this program shall not lose its place on the public housing waiting list until it has been housed.

(b) *Public notice to owners.* The LHA shall, through publication in a newspaper of general circulation as well as through minority media, invite private owners to make dwelling units available for leasing by eligible families. Such notice shall be made in accordance with Affirmative Fair Housing Marketing Regulations, including advertising guidelines for fair housing requiring the use of the equal housing opportunity logotype, statement and slogan. The LHA shall also (1) develop working relationships with local landlords and real estate broker associations, (2) publicize the program in such ways as to reach a maximum number of landlords and real estate brokers, (3) establish contact with civic, charitable, or neighborhood organizations which have an interest in housing for low-income families, and (4) explain fully the provisions of the program, including equal opportunity requirements, to real estate, landlord, and other groups whose members may be dealing with eligible families. The LHA shall send to the Equal Opportunity office in the appropriate HUD field office a statement of the methods used and a copy of the published notice(s).

(c) *Listing of units.* Owners interested in making their units available for use by low-income families should notify the LHA which shall establish and maintain a listing of such units, accompanied by appropriate information relating to rent, type of unit (single family housing, apartment, etc.), number of bedrooms, location, etc. Such list shall be publicly posted and otherwise made available for use by eligible families, provided that: the list is open to any private owner who wishes his rental units to be included unless the owner has been disapproved by HUD for participation in HUD programs; notice of the existence of the list and the manner in which units may be included on it is publicized by the LHA; the list is used by the LHA in such a way as to ensure that eligible families are neither directed or encouraged to rent, nor discouraged from renting, from any individual; the list contains a statement that eligible families are free to choose housing units not listed; the LHA makes efforts to develop a listing of units which will be consistent with the objectives of its HUD-approved affirmative marketing plan (see § 1274.205(d) below); and owners of listed units provide the LHA with a written assurance that their units will be made available without discrimination on the basis of race, color, creed, sex, religion, or national origin.

(d) Compliance with affirmative fair housing marketing plan. In publicizing the availability of housing assistance to low-income families and inviting owners to participate and list their units with the LHA, the LHA shall comply with its HUD-approved Affirmative Fair Housing Marketing Plan in terms of outreach to families not otherwise expected to apply for assistance and encouraging the participation of owners in non-minority concentrated areas.

(e) *Determination of family eligibility for participation.* (1) In general, low-income families should contact the LHA concerning participation in the program. If an owner is the initial point of contact, he shall refer the family to the LHA. However, regardless of whether the initial contact is with the owner or the LHA, the LHA shall be solely responsible for determining eligibility.

(2) In selecting families for participation in this program, the LHA shall comply with its HUD-approved Affirmative Fair Housing Marketing Plan and its applicable regulations establishing admission policies, including policies, if any, carrying out its responsibility for rehousing displaced families.

(3) If the applicant is determined to be eligible and is selected for participation, he shall be given a Certificate of Family Participation and Lease Approval (see Appendix V), including Part I, Certificate of Family Participation, signed by the family and the LHA.

(4) At the same time, the family shall be given the following:

(i) Copies of Lease Provisions Required for Participation in the Housing Assistance Payments Program and Guide for Lease Provisions for Maintenance and Security Services (see Appendix VI);

(ii) A copy of the form of Housing Assistance Payments Contract (see Appendix IX); and

(iii) A copy of the booklet, *Watch Out for Lead Paint Poisoning* issued by the U.S. Department of Health, Education, and Welfare and identified as DHEW Publication No. (HSM) 73-5101;

(5) The Certificate of Family Participation shall expire at the end of 60 days unless the family notifies the LHA of the unit it wishes to lease within that time period by submitting a Request for Lease Approval, Part II of Appendix V (see paragraph (f) of this section). Expiration of the Certificate shall not preclude the LHA from extending the Certificate upon its submission by the family.

(6) The LHA shall maintain a system to assure that it will be able to honor all outstanding Certificates of Family Participation within its ACC authorization.

(7) LHA records on applicant and certified families shall be maintained so as to provide HUD with racial and ethnic data.

(f) *Submission of request for lease approval.* (1) Holders of Certificates of Family Participation shall be responsible for finding suitable units. The LHA may, however, undertake to find suitable units for families requiring special assistance, such as the elderly or handicapped or families experiencing discrimination. An LHA shall advise eligible families that they are free to seek units in all areas of the LHA's jurisdiction. In particular, it shall be made clear to minority families that they are free to seek housing in nonminority areas.

(2) When a family has found a unit it wishes to lease, it shall submit to the LHA a request for Lease Approval, signed by the owner of the unit and the family, and a proposed lease. The lease shall contain all required provisions shown in Appendix VI and shall be complete except for execution and the portion of monthly lease rental which the family shall be obligated to pay to the owner.

(g) *LHA approval of lease.* (1) *Ineligible owners.* LHAs shall not approve owners or managers who are listed by HUD as being disapproved for participation in HUD programs.

V 39 I 93 MAY 13 74 XUM

(2) *Amount of rent.* In no case shall the LHA approve a rent which is higher than the applicable HUD-established fair market rent (less the HUD-approved allowance for utilities to be paid directly by the family). It should be recognized that owners may anticipate receiving rents equal to the HUD-established fair market rents, even though the reasonable rents for their units may be less. Accordingly, an LHA shall not approve leases for units with rents that exceed rents for similar units after taking into consideration differences in location, facilities and services, and the amount required for satisfactory maintenance.

(3) *Inspection of unit.* (i) Before approving a lease, the LHA shall make appropriate inquiries to ascertain that all certifications required by law have been issued and are currently valid. In addition, the LHA shall inspect the unit, or cause it to be inspected, for compliance with all other requirements of § 1274.102(a). An inspection report shall be maintained by the LHA for each unit inspected specifying whether required certifications, if any, have been issued and the results of the inspection.

(ii) If there are defects or deficiencies which must be corrected in order for the unit to be decent, safe, and sanitary, the owner shall be advised by the LHA of the work required to be done. Before a Housing Assistance Payments Contract can be executed, the unit must be inspected to ascertain that the necessary work has been performed and that the unit is decent, safe, and sanitary. A report detailing the results of this second inspection shall be maintained by the LHA with its original report on the unit.

(4) *Relocation certification.* The LHA shall review the relocation certification made by the owner and the facts stated therein and determine to its satisfaction that the unit, if not vacant, will be vacated as a result of one of the three categories of reasons specified.

(5) *Lease requirements*—(i) *Term of lease.* The term of lease shall be for not less than one year and shall generally be for not more than one year, but may contain a provision permitting termination upon 30 days advance written notice by either party. The specified lease term, including specified renewal options, if any, shall in no case exceed three years or the term of the ACC pertaining to the lease, whichever is shorter.

(ii) *Required provisions.* The lease shall contain the required provisions specified in section 1.6 of the Housing Assistance Payments Contract. (See also Appendix VI.)

(iii) *Prohibited provisions.* Lease clauses which fall within the classifications listed below shall not be included in any owner-family leases.

(A) *Confession of judgment.* Constitutes prior consent by tenant to any lawsuit the landlord may bring against him in connection with the lease and to a judgment in favor of the landlord.

(B) *Distraint for rent or other charges.* Agreement by tenant that landlord is authorized to take property of the tenant and hold it as a pledge until the tenant performs the obligation which the landlord has determined the tenant has failed to perform.

(C) *Exculpatory clauses.* Agreement by tenant not to hold the landlord or landlord's agents liable for any acts or omissions whether intentional or negligent on the part of the landlord or the landlord's authorized representatives or agents.

(D) *Waiver of legal notice by tenant prior to actions for eviction or money judgments.* Agreement by tenant that the landlord may institute suit without any notice to the tenant that the suit has been filed, thus preventing the tenant from defending against the lawsuit.

(E) *Waiver of legal proceedings.* These clauses authorize the landlord to act to evict the tenant or hold or sell the tenant's possessions whenever the landlord determines that a breach or default has occurred, without notice to the tenant or any determination by a court of the rights and liabilities of the parties.

(F) *Waiver of jury trial.* These clauses authorize the landlord's lawyer to appear in court for the tenant and waive the right to a trial by jury.

(G) *Waiver of right to appeal judicial error in legal proceedings.* These clauses authorize the landlord's lawyer to waive the right to appeal for judicial error in any suit or the right to file a suit in equity to prevent the execution of a judgment.

(H) *Tenant chargeable with costs of legal actions regardless of outcome.* These clauses provide that the tenant agrees to pay attorney's fees or other legal costs whenever the landlord decides to take action against the tenant even though the court determines that the tenant prevails in the action. This does not mean that the tenant as a party to a lawsuit may not be obligated to pay attorney's fees or other costs if he loses the suit.

(6) *Approval of lease and execution of related documents.* If a unit which an eligible family wishes to lease is determined by the LHA to be in decent, safe, and sanitary condition, the proposed rent to owner is approvable, and the proposed lease complies with program requirements, the LHA shall return a copy of Part III of Appendix V, Authority Determination, to the owner and the family indicating approval of the lease. Attached to the form shall be (i) a copy of the proposed lease, with the portion of the monthly lease rental which the family shall be obligated to pay the owner entered onto the lease, (ii) unsigned copies of the Housing Assistance Payments Contract, and (iii) if applicable, copies of the Security Deposit Agreement, signed by the LHA. The lease shall be executed by the owner and the family and a copy of the executed lease returned to the LHA. Two copies of the Contract shall be signed by the owner, and returned to the LHA. The LHA shall execute both copies of the Contract and shall return one executed copy to the owner. The Security Deposit Agreement, if any, shall be executed by the owner and the family and an executed copy returned to the LHA.

(7) *Disapproval of lease.* If the LHA has determined that the lease cannot be approved for any reason, including the condition of the unit, it shall so notify the owner and the family using Part III of Appendix V. A copy of this notification shall be maintained in LHA files together with the original Request for Lease Approval and the inspection report relating to the unit.

(h) *Continued family participation.* A family must continue to occupy its approved unit to remain eligible for participation in the Housing Assistance Payments Program except under the following conditions. If a family (1) wishes to vacate its unit at the end of the lease term (or prior thereto but in accordance with the provisions of the lease), or (2) is required to move for reasons other than violation of the lease on the part of the family (as determined by the LHA), the family shall be given a new Certificate of Family Participation providing for housing assistance payments for occupancy of another approvable unit, if:

(i) The family provides reasonable notice (at least 30 days) to the LHA of its intention to vacate;

(ii) The LHA determines that the family is in compliance with the provisions of the lease, including provisions requiring notice to the owner, if applicable;

(iii) The LHA determines that the family continues to be eligible for such assistance;

(iv) The LHA determines that the family is meeting its obligations for repayment of security deposits, if any; and

(v) The LHA has sufficient funds under its Annual Contributions Contract.

(i) *Eviction.* The owner shall not evict any family unless the owner complies with the requirements of local law, if any, and of this paragraph. The owner shall give the family a written notice of the proposed eviction, stating the grounds and advising the family that it has 10 days (or such greater number, if any, that may be required by local law) within which to respond to the owner. The owner must obtain the LHA's authorization for an eviction; accordingly, a copy of the notice shall be furnished simultaneously to the LHA, and the notice shall also state that the Family may, within the same time period, present its objections to the LHA in writing or in person. The LHA shall forthwith examine the grounds for eviction and shall authorize the eviction unless it finds the grounds to be insufficient under the lease. The LHA shall notify the owner and the family of its determination within 20 days of the date of receipt of the notice by the family, whether or not the family has presented objections to the LHA.

(j) *Inapplicability of low-rent public housing model lease and grievance procedures.* Model lease and grievance procedures established by HUD for LHA-owned low-rent public housing are not applicable to the Section 23 Housing Assistance Payments Program.

§ 1274.206 Periodic inspection.

In order to ensure that housing under lease remains in decent, safe, and sanitary condition for the duration of the Contract and the lease, the LHA shall make periodic inspections, not less than annually, to ascertain that the owner has adequately maintained the unit as required by the Contract. In addition, the LHA shall inspect the unit whenever it has information, as a result of family complaints or otherwise, to the effect that the unit is not being maintained in accordance with the Contract. In those instances where the LHA determines that the unit is not being maintained satisfactorily, the LHA shall try to resolve the problem with the owner. If the LHA is unsuccessful, it shall (a) abate payment of housing assistance until such time as the unit is brought into decent, safe, and sanitary condition, and/or (b) give the owner a 30-day notice of termination in accordance with the provisions of the Contract. The family shall be furnished a copy of the notice to the owner regarding abatement or termination, together with information regarding continued assistance. The LHA shall keep in its files copies of all inspection reports and records of actions taken pursuant to this Section.

§ 1274.207 HUD review of LHA program activities.

When 30 percent of the units under Part I of the ACC have been leased, but not later than 90 days after execution of the Part I, HUD will review the LHA's operations for compliance with the provisions of this part. Subsequent reviews will be scheduled as necessary. If additional units are added to the ACC, HUD will review the LHA's operations for compliance when 30 percent of the additional units have been leased, but not later than 90 days after execution of the revised Part I of the ACC.

§ 1274.208 LHA reporting requirements. [Reserved]

NOTE: Appendices I, II, and III, which relate to internal HUD processing procedures, are not included herein, but do appear in the HUD Existing Housing Handbook.

APPENDIX IV

ANNUAL CONTRIBUTIONS CONTRACT

This Annual Contributions Contract (ACC) is entered into as of the ____ day of _____, 19____, by and between the United States of America (herein called the "Government"), pursuant to the United States Housing Act of 1937 (42 U.S.C. 1401, et seq., which Act as amended to the date of this ACC is herein called the "Act") and the Department of Housing and Urban Development Act (42 U.S.C. 3521), and _____ (herein called the "Local Authority"), which is organized and existing under the laws of the State of _____ and is a "public housing agency" as defined in the Act. In consideration of the mutual covenants hereinafter set forth, the parties hereto agree as follows:

0.1 *Project or Projects.* The Local Authority is undertaking to provide decent, safe, and sanitary housing for families of low income (further defined as "Family" or "Families" in Section 2.2) in privately owned accommodations pursuant to Section 23 of the Act by means of Housing Assistance Payments Contracts ("Contracts") with the persons or entities having the legal right to lease or sublease such housing ("Owners"). Such undertaking may involve an agreement for the use of housing to be constructed ("New Construction"), an agreement for the use of existing housing to be substantially rehabilitated ("Substantial Rehabilitation"), or the use of existing housing without substantial rehabilitation ("Existing Housing"). In each instance, the type of housing and the number and sizes of dwelling units with respect to which a certain maximum Annual Contributions commitment is made shall constitute a Project hereunder and shall be identified by a stated Project number.

0.2 *Part I and Part II of this Annual Contributions Contract.* (a) Certain provisions of this ACC, principally those which are specifically applicable to a designated Project, are contained in Part I. Separate forms of Part I are used for different types of Projects (i.e., New Construction, Substantial Rehabilitation, and Existing Housing). A separate Part I, on the applicable form thereof, has been executed with respect to each Project hereunder, and each such Part I, so executed, constitutes a part of this ACC.

(b) The remaining provisions of this ACC, which are applicable to all Projects hereunder, are contained in Part II, which, although not separately executed, constitutes a part of this ACC.

0.3 *Fiscal Year.* Except for the first Fiscal Year of each Project, there shall be one Fiscal Year for all Projects hereunder. Such established Fiscal Year shall be the 12-month period ending _____ of each calendar year. The first Fiscal Year for each Project shall be as provided in the Part I applicable to such Project.

Local Authority, by:

_____

The Government, by:

_____

PART I—EXISTING HOUSING PROJECT NO. ____

1.1. *The Project.* It is contemplated that the Local Authority will enter into Housing Assistance Payments Contracts ("Contracts") with respect to the following numbers and sizes of dwelling units:

Size of Unit	*Number of Units*

The Local Authority shall, to the maximum extent feasible, enter into Contracts in accordance with the numbers and sizes of units specified, but the Local Authority shall not enter into Contracts or take other actions which will result in a claim for a total Annual Contribution in respect to the Project in excess of the maximum amount stated in Section 1.3(a).

1.2. *Authorization of Actions by Local Authority.* (a) In order to carry out the Project, the Local Authority is authorized to (i) enter into Contracts, (ii) make Housing Assistance Payments on behalf of Families, and (iii) take all other necessary actions, all in accordance with the forms, conditions, and requirements prescribed or approved by the Government; Provided, however, that neither the Local Authority nor the Government shall assume any obligation beyond that provided in Housing Assistance Payments Contracts in the form approved by the Government.

(b) The term of each Contract shall be coterminous with the term of the Lease between the Owner and the Family, which term shall be for not less than one year (subject to earlier termination in accordance with its provisions) and shall generally be for not more than one year; Provided, however, that the specified Lease term, including specified renewal options, if any, shall in no event exceed three years or the term of this Annual Contributions Contract, whichever is shorter.

1.3 *Annual Contributions.* (a) Notwithstanding any other provisions of this ACC (other than paragraph (c) of this Section) or any provisions of any other contract between the Government and the Local Authority, the Government shall not be obligated to make any Annual Contributions or any other payment in respect to the Project in excess of $_____; Provided, however, that this amount shall be reduced commensurate with any reduction in the number of units pursuant to Section 1.8 of this ACC.

(b) Subject to the maximum dollar limitation in paragraph (a) of this Section, the Government shall pay Annual Contributions to the Local Authority in respect to the Project in an amount equal to the sum of the following:

(1) The amount of housing assistance payments payable during the Fiscal Year (see Section 1.4) by the Local Authority pursuant to Contracts, as authorized in Section 1.2.

(2) The allowance, in the amount approved by the Government, for security and utility deposits.

(3) The allowance, in the amount approved by the Government, for preliminary costs of administration.

(4) The allowance, in the amount approved by the Government, for the regular costs of administration.

(c) Subject to the maximum amount stated in paragraph (a) of this Section, the Annual Contribution for any Fiscal Year may include such amount as the Government may determine to be necessary to assure that the low-rent character of the Project will be maintained, which amount shall be credited to an account maintained by the Local Authority or the Government as determined by the Government. To the extent funds are available in said account, the Annual Contribution for any Fiscal Year may exceed the maximum amount stated in paragraph (a) of this Section by such amount, if any, as may be required for increases reflected in the estimates of required annual contributions applicable to such Fiscal Year, as approved by the Government in accordance with Section 1.7 below. Any amount remaining in said account after payment of the last Annual Contribution with respect to the Project shall be applied by the Government as a receipt in accordance with Section 18 of the Act.

(d) The Government will make periodic payments on account of the Annual Contributions upon requisition therefor by the Local Authority in the form prescribed by the Government. Each requisition shall include certifications by the Local Authority that housing assistance payments have been or will be made only with respect to units which:

(1) are under lease by Families at the time such housing assistance payments are made except as otherwise provided in the Contracts; and

(2) the Local Authority has inspected or caused to be inspected pursuant to Section 2.7 of Part II of this ACC, within one year prior to the making of such housing assistance payments.

(e) Following the end of each Fiscal Year, the Local Authority shall promptly pay to the Government, unless other disposition is approved by the Government, the amount, if any, by which the total amount of periodic payments during the Fiscal Year exceeds the total amount of the Annual Contribution

V 39 1933
MAY 13 74
XUM

payable for such Fiscal Year in accordance with this Section.

1.4. *Fiscal Year.* The Fiscal Year for the Project shall be the Fiscal Year established by Section 0.3 of this ACC; Provided, however, that the first Fiscal Year for the Project shall be the period beginning with the Date of Execution and ending on the last day of said established Fiscal Year which is not less than 12 months after the Date of Execution. If the first Fiscal Year exceeds 12 months, the maximum Annual Contribution in Section 1.3(a) may be adjusted by the addition of the pro rata amount applicable to the period of operation in excess of 12 months.

1.5. *Term of This ACC.* The term of this ACC with respect to the Project shall be four years beginning with the Date of Execution; Provided, however, that this ACC shall continue in effect for one additional year with respect to Housing Assistance Payments Contracts entered into at any time during the four year period.

1.6. *Federal and Local Government Approvals.* (a) The making of this ACC and the undertaking by the Government of the Annual Contributions as herein provided has been duly approved on List No. ____ for Annual Contributions Contracts.

(b) The governing body of the locality in which the dwelling units are to be located has approved the application of Section 23 of the Act to the locality, by resolution or ordinance duly adopted on ----------, 19----.

1.7. *Estimate of Required Annual Contributions.* (a) At or about the date of execution of this ACC, the Local Authority shall submit an Initial Estimate of Required Annual Contributions (Preliminary Costs) and an Annual Estimate of Required Annual Contributions. These forms cover the estimated amounts for the costs of nonexpendable equipment, administration, security and utility deposits, and housing assistance payments.

(b) Not earlier than 150 and not later than 90 days prior to the beginning of each subsequent Fiscal Year, the Local Authority shall submit an Annual Estimate of Required Annual Contributions with supporting documentation for any requested changes in the amount of housing assistance payments or the allowance for the cost of administration.

(c) Any of the above Estimates may be revised to reflect changes in circumstances and available data.

(d) All Estimates of Required Annual Contributions and any revisions thereto submitted by the Local Authority shall be subject to Government approval.

1.8. *Expeditious Carrying Out of Project.* The Local Authority shall proceed expeditiously with the housing of Families through the use of housing assistance payments. If the Local Authority fails to proceed expeditiously, the Government, by notice to the Local Authority, may reduce the Project to the number and sizes of dwelling units under Contracts with Owners as of the date of the receipt of such notice by the Local Authority, with a corresponding reduction in the maximum amount of Annual Contributions specified in Section 1.3(a).

1.9. *Date of Execution.* The Date of Execution of this ACC with respect to this Project ("Date of Execution") is ----------.

1.10. *Prior ACCs Superseded.* This Part I supersedes prior ACC Parts I, if any.

Local Authority, by:

The Government, by:

PART II—TERMS AND CONDITIONS BETWEEN LOCAL AUTHORITY AND THE UNITED STATES OF AMERICA

2.1. *Low-Income Housing Use.* The Local Authority shall use the Annual Contributions solely for the purpose of providing decent, safe, and sanitary dwellings for families of low income, hereinafter further defined as "Families."

2.2. *Definitions*—(a) *Families; Elderly Families; and Displaced Families.* (1) The term "Families" means families of low income and includes Families consisting of a single person in the case of Elderly Families and Displaced Families, and includes the remaining member of a tenant Family.

(2) The term "Elderly Families" means Families whose heads (or their spouses), or whose sole members, have attained the age at which an individual may elect to receive an old-age benefit under Title II of the Social Security Act (42 U.S.C. 301, et seq.); or are under a disability as defined in section 223 of that Act; or are handicapped within the meaning of Section 202 (12 U.S.C. 1701q) of the Housing Act of 1959, as amended.

(3) The term "Displaced Families" means Families displaced by urban renewal or other governmental action, or Families whose present or former dwellings are situated in areas as determined by the Government to have been affected by a natural disaster, and which have been extensively damaged or destroyed as the result of such disaster.

(b) *Project Receipts and Project Expenditures.* (1) "Project Receipts" with respect to each Project shall mean the Annual Contributions payable hereunder and all other receipts, if any, accruing to the Local Authority from, out of, or in connection with such Project.

(2) "Project Expenditures" with respect to each Project shall mean all costs allowable under Section 1.3, Part I of this ACC with respect to such Project.

(c) *Substantial Default.* For the purpose of this ACC a Substantial Default is defined to be the occurrence of any of the following events:

(1) If the Local Authority defaults in the observance or performance of the provisions of Section 2.7; or

(2) If (a) the Local Authority violates or fails to comply with any provisions of the Housing Assistance Payments Contract or fails to perform any of its obligations under such Contract, or (b) such Contract at any time is held to be void, voidable, or ultra vires, or the power or right of the Local Authority to enter into such Contract is drawn into question in any legal proceeding, or (c) the Local Authority asserts or claims that such Contract is not binding upon it for any reason, or otherwise asserts or demonstrates that it does not intend to fulfill its obligations under such Contract; or

(3) If the Local Authority fails or refuses to honor any duly issued Certificate of Family Participation in accordance with its terms; or

(4) If the Local Authority fails to comply with the requirements of Sections 2.8, 2.9, 2.10, or 2.11; or

(5) If there is any default by the Local Authority in the performance or observance of any term, covenant, or condition of this ACC other than the defaults enumerated in subsections (1) through (4) of this paragraph (c) and if such default has not been remedied within a reasonable time, not to exceed thirty days, after the Government has notified the Local Authority thereof.

2.3. *Maximum Income Limits and Rents.* (a) Subject to the approval of the Government, the Local Authority shall fix income limits for eligibility and rents after taking into consideration:

(1) The Family size, composition, age, physical handicaps, and other factors which might affect the rent-paying ability of the family, and

(2) The economic factors which affect the financial stability and solvency of the Projects.

(b) Income limits shall restrict eligibility to Families (as defined in Section 2.2) and shall assure the financial solvency of the Projects. Income limits and rents as fixed by the Local Authority shall meet the requirements of applicable local law.

(c) The Local Authority shall submit to the Government for its approval a schedule or schedules of income limits and rents, together with such supporting data and documents as the Government may require.

(d) The Local Authority may at any time review and revise such schedules, and shall review and revise such schedules if the Government determines that changed conditions in the locality make such revisions necessary in achieving the purposes of the Act.

2.4. *Admission Policies.* (a) The Local Authority shall duly adopt and promulgate, by publication or posting in a conspicuous place for examination by prospective tenants, regulations establishing its policies for the issuance of Certificates of Family Participation. Such regulations must be reasonable and give full consideration to its public responsibility for rehousing Displaced Families, to the applicant's status as a serviceman or veteran or relationship to a serviceman or veteran or to a disabled serviceman or veteran and to the applicant's age or disability, housing conditions, urgency of housing need, and source of income, and shall accord to Families consisting of two or more persons such priority over Families consisting of single persons as the Local Authority determines to be necessary to avoid undue hardship.

(b) The Local Authority shall promptly notify any applicant determined to be ineligible for housing assistance payments of the basis for such determination and provide the applicant upon request, within a reasonable time after the determination is made, with an opportunity for an informal hearing on such determination. Any applicant determined to be eligible for housing assistance payments shall be given a Certificate of Family Participation or shall be notified of the date when such Certificate will be issued, insofar as such date can be reasonably determined.

2.5. *Continued Eligibility.* (a) The Local Authority shall periodically reexamine the incomes of Families for whom housing assistance payments are being made; Provided, however, that the length of time between the issuance of a Certificate of Family Participation to a Family subject to yearly reexamination and the first reexamination of such Family may be extended by not more than six months if necessary to fit a reexamination schedule established by the Local Authority.

(b) If, upon such reexamination, it is found that Family income or composition has changed, the portion of rent payable by the Family and the amount of housing assistance payment shall be adjusted accordingly.

(c) If, upon such reexamination, it is found that the income of a Family increased beyond the approved income limits for the Project, housing assistance payments for such Family shall terminate.

2.6. *Applications and Certifications.* (a) Prior to the issuance of a Certificate of Family Participation to each Family and thereafter on the date established by the Local Authority for each reexamination of the status of such Family, the Local Authority shall obtain a written application, signed by a responsible member of such Family, which application shall set forth all data and information necessary to enable the Local Authority to determine whether the Family meets the conditions of eligibility for housing assistance payments.

(b) The Local Authority shall establish policies governing the nature and extent of investigations to be made of applicants' and tenants' statements relating to their eligibility.

(c) A duly authorized official of the Local Authority shall, at times prescribed by the Government, make written certifications to the Government that each Certificate of Family Participation issued during the period covered by the certification was issued in accordance with its duly adopted regulations and approved income limits.

2.7. *Maintenance and Inspections.* (a) The Local Authority shall require as a condition for the making of housing assistance payments, that the Owner at all times maintain the Project in decent, safe, and sanitary condition.

(b) The Local Authority shall inspect or cause to be inspected dwelling units prior to commencement of occupancy by Families, and of grounds, facilities, and areas for their benefit and use, and shall make or cause to be made subsequent inspections at least annually, adequate to assure that decent, safe, and sanitary housing accommodations are being provided.

2.8. *Nondiscrimination in Housing.* (a) The Local Authority shall comply with all requirements imposed by Title VI of the Civil Rights Act of 1964, Public Law 88-352, 78 Stat. 241; the regulations of the Department of Housing and Urban Development issued thereunder, 24 CFR, Subtitle A, Part 1, Section 1.1, et seq.; the requirements of said Department pursuant to said regulations; and Executive Order 11063 to the end that, in accordance with that Act and the regulations and requirements of said Department thereunder, and said Executive Order, no person in the United States shall, on the ground of race, color, creed, religion, or national origin, be excluded from participation in, or be denied the benefits of, the Housing Assistance Payments Program or be otherwise subjected to discrimination. The Local Authority shall, by contractual requirement, covenant, or other binding commitment, assure the same compliance on the part of any subgrantee, contractor, subcontractor, transferee, successor in interest, or other participant in the program or activity, such commitment to include the following clause:

"This provision is included pursuant to the regulations of the Department of Housing and Urban Development, 24 CFR, Subtitle A, Part 1, Section 1.1, et seq.; issued under Title VI of the said Civil Rights Act of 1964, and the requirements of said Department pursuant to said regulations; and the obligation of the [contractor or other] to comply therewith inures to the benefit of the United States, the said Department, and the Local Authority any of which shall be entitled to invoke any remedies available by law to redress any breach thereof or to compel compliance therewith by the [contractor or other.]"

(b) The Local Authority shall incorporate or cause to be incorporated into all Housing Assistance Payments Contracts a provision requiring compliance with all requirements imposed by Title VIII of the Civil Rights Act of 1968, Public Law 90-284, 82 Stat. 73, and any rules and regulations issued pursuant thereto.

(c) The Local Authority shall not, on account of creed or sex, discriminate in the sale, leasing, rental, or other disposition of housing or related facilities (including land) included in any Project or in the use or occupancy thereof, nor deny to any family the opportunity to apply for such housing, nor deny to any eligible applicant the opportunity to lease or rent any dwelling in any such housing suitable to its needs. No person shall *automatically* be excluded from participation in or be denied the benefits of the Housing Assistance Payments Program because of membership in a class such as unmarried mothers, recipients of public assistance, etc.

2.9. *Equal Employment Opportunity.* The Local Authority shall not discriminate against any employee or applicant for employment because of race, color, creed, religion, sex, or national origin. The Local Authority shall take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to race, color, creed, religion, sex, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

2.10. *Employment of Project Area Residents and Contractors.* The Local Authority shall comply and shall require each of its contractors and subcontractors employed in the performance of this ACC to comply with Section 3 of the Housing and Urban Development Act of 1968 (12 U.S.C. 1701u) and the regulations and requirements of the Government thereunder, requiring that to the greatest extent feasible opportunities for training and employment be given lower income residents of the Project area and that contracts for work in connection with the Project be awarded to business concerns which are located in or owned in substantial part by persons residing in the area of the Project.

2.11. *Cooperation In Equal Opportunity Compliance Reviews.* The Local Authority shall cooperate with the Government in the conducting of compliance reviews and complaint investigations pursuant to applicable civil rights statutes, Executive Orders, and rules and regulations pursuant thereto.

2.12. *Insurance and Fidelity Bond Coverage.* (a) For purposes of protection against hazards arising out of or in connection with the administrative activities of the Local Authority in carrying out the Project, the Local Authority shall carry adequate (1) comprehensive general liability insurance, (2) workmen's compensation coverage (Statutory or voluntary), and (3) automobile liability insurance against property damage and bodily injury (owned and non-owned).

(b) The Local Authority shall obtain or provide for the obtaining of adequate fidelity bond coverage of its officers, agents, or employees handling cash or authorized to sign checks or certify vouchers.

(c) Each insurance policy or bond shall be written to become effective at the time the Local Authority becomes subject to the risk or hazard covered thereby, and shall be continued in full force and effect for such period as the Local Authority is subject to such risk or hadard. Such insurance and bonds shall (1) be payable in such manner, (2) be in such form, and (3) be for such amounts, all as may be determined by the Local Authority and approved by the Government, and shall be obtained from financially sound and responsible insurance companies.

(d) In connection with each policy, including renewals, for comprehensive general liability insurance the Local Authority shall give full opportunity for open and competitive bidding. The Local Authority shall give such publicity to advertisements for bids as will assure adequate competition and shall afford an opportunity to bid to all insurers who have indicated in writing to the Local Authority their desire to submit a bid and who are licensed to do business in the State. Such insurance shall be awarded to the lowest responsible bidder. The lowest bid shall be determined upon the basis of net cost to the Local Authority. Net cost, for the purposes of this subsection (d), shall mean the gross deposit premium, plus the cost of insurance against the hazards, if any, of assessments, less any anticipated dividend based on the dividend payment and assessment record of the insurer for the previous ten years. Nothing in this subsection (d) shall have the effect of requiring the Local Authority to purchase insurance from any insurer not licensed to do business in the State or to purchase insurance which involves any hazard of assessment unless insurance against such hazard is available.

(e) The Local Authority shall require that each liability insurance policy prohibit the insurer from defending any tort claim on the ground of immunity of the Local Authority from suit.

(f) The Local Authority shall submit certified duplicate copies of all insurance policies and bonds to the Government not less than forty-five days before the effective date thereof for review to determine compliance with this ACC. Unless disapproved by the Government within thirty days of the date submitted, the policies and bonds submitted shall be considered as approved by the Government.

(g) If the Local Authority shall fail at any time to obtain and maintain insurance as required by subsections (a), (b), (c), and (d) of this Sec. 2.12, the Government may obtain such insurance on behalf of the Local Authority and the Local Authority shall promptly reimburse the Government for the cost thereof together with interest at the then going Federal rate as determined pursuant to Section 2(10) of the Act.

2.13. *Books of Account and Records; Reports; Audits.* (a) The Local Authority shall maintain complete and accurate books of account and records, as may be prescribed from time to time by the Government, in connection with the Projects, including records which permit a speedy and effective audit, and will among other things fully disclose the amount and the disposition by the Local Authority of the Annual Contributions and other Project Receipts, if any.

(b) The books of account and records of the Local Authority shall be maintained for each Project as separate and distinct from all other Projects and undertakings of the Local Authority, except as authorized or approved by the Government.

(c) The Local Authority shall furnish the Government such financial, operating, and statistical reports, records, statements, and documents at such times, in such form, and accompanied by such supporting data, all as may reasonably be required from time to time by the Government.

(d) The Government and the Comptroller General of the United States, or his duly authorized representatives, shall have full and free access to the Projects and to all the books, documents, papers, and records of the Local Authority that are pertinent to its operations with respect to financial assistance under the Act, including the right to audit, and to make excerpts and transcripts from such books and records.

(e) The Local Authority shall incorporate or cause to be incorporated in all Contracts the following clause:

V 39 1933 MAY 13 74 XUM

LHA and Government Access to Premises and Owner's Records

The Owner shall permit the LHA and the Government or any of their duly authorized representatives, to have access to the premises and, for the purpose of audit and examination, to have access to any books, documents, papers and records of the Owner that are pertinent to compliance with this Contract, including the verification of information pertinent to the monthly requests to the LHA for housing assistance payments.

(f) The Local Authority shall not charge as a Project Expenditure the cost or expense of any audit with respect to any Project for any Fiscal Year unless (1) the Government has approved such audit, or (2) such audit is required by law, or (3) the Government has failed to furnish the Local Authority with a report of its fiscal audit of the Local Authority's books of account for such Fiscal Year within six months after the end thereof and, subsequent to a notice by the Local Authority of such failure, the Government has failed to submit its report of such audit within three months after receipt of such notice.

2.14. *General Depositary Agreement and General Fund.* (a) Promptly after the execution of this ACC, the Local Authority shall enter into, and thereafter maintain, one or more agreements, which are herein collectively called the "General Depositary Agreement," in form prescribed by the Government, with one or more banks (each of which shall be, and continue to be, a member of the Federal Deposit Insurance Corporation) selected as depositary by the Local Authority. Immediately upon the execution of any General Depositary Agreement, the Local Authority shall furnish to the Government such executed or conformed copies thereof as the Government may require. No such General Depositary Agreement shall be terminated except after thirty days notice to the Government.

(b) All monies received by or held for account of the Local Authority in connection with the Projects shall constitute the General Fund.

(c) The Local Authority shall, except as otherwise provided in this ACC, deposit promptly with such bank or banks, under the terms of the General Depositary Agreement, all monies constituting the General Fund.

(d) The Local Authority may withdraw monies from the General Fund only for (1) the payment of Project Expenditures, and (2) other purposes specifically approved by the Government. No withdrawals shall be made except in accordance with a voucher or vouchers then on file in the office of the Local Authority stating in proper detail the purpose for which such withdrawal is made.

(e) If the Local Authority (1) in the determination of the Government, is in Substantial Default, or (2) makes or has made any fraudulent or willful misrepresentation of any material fact in any of the documents or data submitted to the Government pursuant to this ACC or in any document or data submitted to the Government as a basis for this ACC or as an inducement to the Government to enter into this ACC, the Government shall have the right to require any bank or other depositary which holds any monies of the General Fund, to refuse to permit any withdrawals of such monies; Provided, however, that upon the curing of such Default the Government shall promptly rescind such requirement.

2.15. *Pooling of Funds under Special Conditions and Revolving Fund.* (a) The Local Authority may deposit under the terms of the General Depositary Agreement monies received or held by the Local Authority in connection with any other housing project developed or operated by the Local Authority pursuant to the provisions of any contract for annual contributions, administration, or lease between the Local Authority and the Government.

(b) The Local Authority may also deposit under the terms of the General Depositary Agreement amounts necessary for current expenditures of any other project or enterprise of the Local Authority, including any project or enterprise in which the Government has no financial interest: Provided, however, that such deposits shall be lumpsum transfers from the depositaries of such other projects or enterprises, and shall in no event be deposits of the direct revenues or receipts of such other projects or enterprises.

(c) If the Local Authority operates other projects or enterprises in which the Government has no financial interest it may, from time to time, withdraw such amounts as the Government may approve from monies on deposit under the General Depositary Agreement for deposit in and disbursement from a revolving fund provided for the payment of items chargeable in part to the Projects and in part to other projects or enterprises of the Local Authority; Provided, however, that all deposits in such revolving fund shall be lump sum transfers from the depositaries of the related projects or enterprises and shall in no event be deposits of the direct revenues or receipts.

(d) The Local Authority may establish petty cash or change funds in reasonable amounts, from monies on deposit under the General Depositary Agreement.

(e) In no event shall the Local Authority withdraw from any of the funds or accounts authorized under this Section 2.15 amounts for the Projects or for any other project or enterprise in excess of the amount then on deposit in respect thereto.

2.16 *Assignment of Interest in Project to Government; Continuance of Annual Contributions.* Upon the occurence of a Substantial Default (as herein defined) with respect to any Project the Local Authority shall, if the Government so requires, assign to the Government all of its rights and interests in and to the Project, or such part thereof as the Government may specify, and the Government shall continue to pay Annual Contributions with respect to dwelling units covered by Housing Assistance Payments Contracts in accordance with the terms of this ACC until reassigned to the Local Authority. After the Government shall be satisfied that all defaults with respect to the Project have been cured and that the Project will thereafter be operated in accordance with the terms of this ACC, the Government shall reassign to the Local Authority all of the rights and interests of the Government in and to the Project as such rights and interests exist at the time of such reassignment.

2.17 *Remedies not Exclusive and Non-Waivers of Remedies.* Any remedy provided for herein shall not be exclusive or preclude the Owner, LHA and/or the Government from exercising any other remedy available under this ACC or under any provisions of law, nor shall any action taken in the exercise of any remedy be deemed a waiver of any other rights or remedies available to such parties. Failure on the part of any such party to exercise any right or remedy shall not constitute a waiver of that or any other right or remedy, nor operate to deprive the party of the right thereafter to take any remedial action for the same or any subsequent default.

2.18. *Interest of Members, Officers, or Employees of Local Authority, Members of Local Governing Body, or Other Public Officials.*

(a) Neither the Local Authority nor any of its contractors or their subcontractors shall enter into any contract, subcontract, or arrangement, in connection with any project, in which any member, officer, or employee of the Local Authority, or any member of the governing body of the locality in which the Project is situated, or any member of the governing body of the locality in which the Authority was activated, or any other public official of such locality or localities who exercises any responsibilities or functions with respect to the Project during his tenure or for one year thereafter has any interest, direct or indirect. If any such present or former member, officer, or employee of the Local Authority, or any such governing body member or such other public official of such locality or localities involuntarily acquires or had acquired prior to the beginning of his tenure any such interest, and if such interest is immediately disclosed to the Local Authority and such disclosure is entered upon the minutes of the Local Authority, the Local Authority, with the prior approval of the Government may waive the prohibition contained in this subsection; Provided, however, that any such present member, officer, or employee of the Local Authority shall not participate in any action by the Local Authority relating to such contract, subcontract, or arrangement.

(b) The Local Authority shall insert in all contracts entered into in connection with any Project or any property included or planned to be included in any Project, and shall require its contractors to insert in each of its subcontracts, the following provisions:

No member, officer, or employee of the Local Authority, no member of the governing body of the locality in which the Project is situated, no member of the governing body of the locality in which the Local Authority was activated, and no other public official of such locality or localities who exercises any functions or responsibilities with respect to the Project, during his tenure or for one year thereafter, shall have any interest, direct or indirect, in this contract or the proceeds thereof.

(c) The provisions of the foregoing subsections (a) and (b) of this Section 2.18 shall not be applicable to the General Depositary Agreement, or utility service the rates for which are fixed or controlled by a governmental agency.

2.19. *Interest of Member of or Delegate to Congress.* No member of or delegate to the Congress of the United States of America or resident Commissioner shall be admitted to any share or part of this ACC or to any benefits which may arise therefrom.

PART I—CERTIFICATE OF FAMILY PARTICIPATION

APPENDIX V—CERTIFICATE OF FAMILY PARTICIPATION AND LEASE APPROVAL

1. *Certification.* The undersigned Authority hereby certifies that the Family headed by _____ is authorized to participate in the Section 23 Housing Assistance Payments Program of this Authority. Under this program, the Authority makes housing assistance payments on behalf of participating families toward their rents for decent, safe, and sanitary dwelling units.

2. *Dwelling Unit.* If the Family finds a dwelling unit suitable to its needs, containing at least _____[1] bedrooms, and in decent, safe, and sanitary condition, it should submit to the Authority for approval Part II of this form. Request for Lease Approval, together with a proposed lease. Prior to approval of the proposed lease, the Authority will inspect the unit or cause it to be inspected.

3. *Rent.* The monthly rental provided in the lease must be determined by the Authority to be reasonable, but this rent plus the Authority allowance for any utilities payable directly by the Family shall in no case exceed $_____.[2] Under the rules and regulations of the Housing Assistance Payments Program, the Family will be obligated to pay $_____ toward the monthly lease rental; provided that this amount will be reduced by the Authority-determined allowance for any utilities to be paid directly by the Family, and such reduced amount will be specified in the lease. The amount of the Family's payment is subject to change by reason of changes in the income or composition of the Family. Pursuant to a Housing Assistance Payments Contract with an owner, the Authority will pay to the owner on behalf of the Family an amount equal to the difference between the monthly rental amount owed by the Family to the owner and the total monthly rent which the owner is entitled to receive under the lease.

4. *Authority Approval of Lease.* The Authority will notify the owner and the Family whether or not the proposed lease is approvable within _____ working days from receipt of a Request for Lease Approval. The Authority, upon issuing this Certificate, anticipates that if a lease meeting the requirements of this program is submitted for approval, the Authority will have funds available for a Housing Assistance Payments Contract with the owner; however, the Authority is under no obligation to the Family, to any owner or to any other person to approve any submitted lease, nor does the Authority incur any liability by reason of issuing this Certificate. Approval of any lease will be at the Authority's sole discretion and subject to availability of funds.

5. *Conditions.* The Family agrees to perform all its obligations under the Housing Assistance Payments Program, including the obligations to (a) provide such income information and records as may be required in the administration of the program, (b) permit inspections of its dwelling unit at reasonable times after reasonable advance notice, and (c) give at least 30 days notice to the Authority of the Family's intention to vacate the unit.

6. *Equal Housing Opportunity.* If the Family has reason to believe that, in its search for suitable housing, it has been discriminated against on the basis of race, color, creed, sex, religion, or national origin, it may file a complaint with the HUD Regional Office. Fair Housing Complaint Forms (form HUD 903) are available from this Authority.

7. *Expiration Date.* A request for Lease Approval may be submitted to this Authority no later than _____ (60 days from the date of this Certificate). If a Request is not submitted by such date, this Certificate shall expire unless extended by the Authority in writing.

_____ _____
(Date) (Name of Local Housing Authority)

By: _____
(Signature and Title)

_____ _____
(Date) (Signature of Family Representative)

_____
(Present Address)

[1] Enter the unit size, by number of bedrooms, for which the Family is eligible pursuant to the occupancy standards of the Authority.

[2] Enter the applicable fair market rent for the unit size specified in item 2.

PART II—REQUEST FOR LEASE APPROVAL

1. *Request.* The undersigned Owner and Family hereby request the _____ (Name of Local Housing Authority) to approve the attached lease for the dwelling unit located at _____ (street address and apartment number, if any) for a period of ____ months, beginning _____, 19____. The unit, consisting of ____ bedrooms, is to be leased at $_____ per month. This rent includes maintenance and other services as provided in the lease and the following utilities and appliances: (Check where applicable)

____ heat ____ electricity ____ gas ____ water ____ sewer ____ refrigerator ____ range ____ other (specify)

2. *Certification.* The Owner, by executing this Request, certifies that:

a. The most recent rent charged for the above dwelling unit was $____ per month. The reasons for the difference, if any, between this amount and the proposed rent are:

b. The specified dwelling unit is currently:
☐ Vacant and has been since before the date of this Request.
☐ Occupied by the undersigned Family.
☐ Occupied by other than the undersigned Family but the unit will be vacated prior to occupancy by the Family as a result of (1) voluntary decision of occupant, or (2) action by Owner for cause, or (3) other reasons clearly unrelated to the proposed leasing to the Family.

c. This unit is made available, managed, and operated regardless of race, color, religion, creed, sex, or national origin.

3. *Security and Utility Deposits.* The Family ☐ will ☐ will not require Authority assistance to pay security and/or utility deposits. The amount of Owner's required security deposit (not to exceed one month's rent) is $_____. The amounts of the required utility deposits are:

Deposit to _____ $_____
(Insert name of utility company)
Deposit to _____ $_____
(Insert name of utility company)

4. *Authority Determination.* The Owner and the Family understand that the Authority will notify them as to whether or not the proposed lease is approvable within the time period specified in paragraph 4 of the Certificate of Family Participation.

PART III—AUTHORITY DETERMINATION

(To be sent to the Owner and Family)

(Check applicable box.)

☐ 1. *Approval.* This Authority hereby approves the proposed lease between _____ (Family) and _____ (Owner) for the dwelling unit located at _____ (street address and apartment number, if any) Returned herewith are (a) the proposed lease completed by the Authority with respect to the portion of the monthly lease rental which the Family shall be obligated to pay to the Owner, and (b) two copies of a Housing Assistance Payments Contract completed by this Authority except for execution. The lease shall be executed by the Family and the Owner and a copy returned to the Authority. The Owner shall sign both copies of the Contract and return them to the Authority. The Authority will execute the Contract by the first day of occupancy specified in the lease and will immediately return an executed copy to the Owner.

Attached is a Security Deposit Agreement, signed by this Authority, which shall be signed by the Owner and the Family and a signed copy returned to this Authority.

☐ Yes ☐ No

☐ 2. *Disapproval.* The proposed lease and/or the dwelling unit are/is disapproved for the following reasons:

☐ 3. *Resubmission.* If the conditions in item 2 above are remedied, and a Request for Lease Approval is resubmitted by the Owner and the Family to the Authority by _____ (date), the lease will be approved by the Authority if it determines that the conditions have been remedied to its satisfaction. (The Certificate of Family Participation issued to the Family shall not expire before said date.)

APPENDIX VI—LEASE PROVISIONS REQUIRED FOR PARTICIPATION IN THE HOUSING ASSISTANCE PAYMENTS PROGRAM

"ADDENDUM TO LEASE

(Section 23 Housing Assistance Payments Program)

"The following additional Lease provisions are incorporated in full in the Lease between _____ (Lessor) and _____ (Lessee) for the following dwelling unit: _____. In case of any conflict between these and any other provisions of the Lease, these provisions shall prevail.

"a. Of the total rent ($_____ per month), $_____ shall be payable by the Housing Authority (LHA) as housing assistance payments on behalf of the Lessee and $_____ shall be payable by the Lessee. These amounts shall be subject to change by reason of changes in the family income or composition, as determined by the LHA, effective as of the date stated in a notification of such change by the LHA to the Lessee and Lessor.

"b. The Lessor shall provide the following services (including security) and maintenance:

[Here specify all services to be provided by the Lessor, which shall include all services customarily supplied to tenants of this type of housing in the locality. In preparing this list, the provisions contained in form HUD-52505A, Guide for Lease Provisions for Maintenance and Security Services, shall be included except to the extent modifications are approved by the LHA.]

"c. The Lessor shall not evict the Lessee unless the Lessor complies with the requirements of local law, if any, and of this provision. The Lessor shall give the Lessee a written notice of the proposed eviction, stating the grounds and advising the Lessee that he has 10 days (or such greater number, if any, that may be required by local law) within which to respond to the Lessor. Because the Lessor must obtain the LHA's authorization for an eviction, a copy of the notice shall be furnished simultaneously to the LHA, and the notice shall also state that the Lessee may, within the same time period, present his objections to the LHA in writing or in person. The LHA shall forthwith examine the grounds for eviction and shall authorize the eviction unless it finds the grounds to be insufficient under the Lease. The LHA shall

V 39 1933 MAY 13 74 XUM

notify the Lessor and the Lessee of its determination within 20 days of the date of receipt of the notice by the Lessee whether or not the Lessee has presented objections to the LHA.

"d. The Lessor shall not discriminate against the Lessee in the provision of services, or in any other manner, on the grounds of race, color, creed, religion, sex, or national origin.

"e. This Lease has been signed by the parties on the condition that the LHA will promptly execute a Housing Assistance Payments Contract with the Lessor. Accordingly, this Lease shall not become effective unless the LHA has executed such Contract by the first day of occupancy specified in the Lease.

"Lessor _____ Lessee _____
Date _____

GUIDE FOR LEASE PROVISIONS FOR MAINTENANCE AND SECURITY SERVICES

The following provisions shall be included by an owner among lease provisions regarding maintenance and security services for units to be leased to families participating in a Section 23 Housing Assistance Payments Program. Subject to the approval of the LHA, items which are not customarily provided for this type of housing in the locality may be excluded.

The Lessor shall provide the following services (including security) and maintenance:

a. Custodial services (including, but not limited to, cleaning of hallways, garbage storage areas, and all common areas, and provision of an adequate supply of trash and garbage storage equipment, and/or adequate trash and garbage disposal);

b. Grounds maintenance (including, but not limited to, exterior custodial services and maintenance of lawns and outdoor plantings, including lawn cutting and reseeding);

c. Prompt response to Lessee service calls (including, but not limited to, calls with respect to refrigerators, ranges, plumbing, heating, electrical and hot water fixtures and systems, and broken, stuck, or damaged doors, screens or windows);

d. Repainting and redecorating dwelling space and non-dwelling space surfaces on the following basis: [to be specified in the lease];

e. Prompt replacement of light bulbs and other lighting equipment in common (including outdoor) areas;

f. Exterminating services on a regularly scheduled basis, as follows: [to be specified in lease];

g. Where applicable, removal of snow and ice from walkways, exterior stairs, and parking areas on a timely basis;

h. Repair of walkways and parking lot surfaces;

i. Where applicable, repair of garbage disposals, dishwashers, air conditioners, and laundry equipment;

j. Where applicable, regular maintenance and prompt repair of elevators, incinerators, compactors, and laundry equipment and facilities;

k. Security services and equipment [to be specified in the lease].

NOTE: Appendices VII and VIII, which relate to internal HUD processing procedures, are not included herein, but do appear in the HUD Existing Housing Handbook.

APPENDIX IX—HOUSING ASSISTANCE PAYMENTS CONTRACT

This Housing Assistance Payments Contract ("Contract") is made and entered into on this _____ day of _____, 19____, by and between _____; the person or entity having the legal right to lease the unit (hereinafter called the "Owner"), and _____ ("LHA"), a public body, corporate and politic, organized and existing under and by virtue of the laws of the State of _____

The Owner and the LHA agree as follows:

PART I

1.1. *Purpose of contract.* a. The LHA hereby agrees to make housing assistance payments on behalf of (*name of family*) ("Family") for the following described dwelling unit _____ ("assisted unit"), to enable the Family to lease decent, safe, and sanitary housing pursuant to Section 23 of the United States Housing Act of 1937.

b. The assisted unit is to be leased by the Owner to the Family for use and occupancy by the Family solely as a private dwelling.

1.2. *Housing assistance payments.* a. The LHA has determined that the Family can afford to pay $_____ per month toward the rent chargeable by the Owner. The LHA will pay on behalf of the Family a housing assistance payment in the amount of $_____ which represents the difference between the rent chargeable by the Owner and that portion of said rent payable by the Family. The amount of housing assistance payment and the amount of rent payable by the Family shall be subject to change by reason of changes in the Family income or composition, as determined by the LHA, effective as of the date stated in a notification of such change by the LHA to the Family and Owner. However, any increase in the amount payable by the Family shall be offset by a corresponding decrease in the amount of housing assistance payment; and any decrease in the amount payable by the Family shall be offset by a corresponding increase in the amount of housing assistance payment, but not in excess of the amount available with respect to this assisted unit out of the aggregate amount pledged in the Annual Contributions Contract (ACC) for all dwelling units under the ACC (see Section 2.3(b)).

b. Housing assistance payments shall be made by the LHA to the Owner, under the terms and conditions of this Contract, only for the period during which the assisted unit is leased by the Family under the lease for the dwelling unit approved by the LHA ("Lease"). Should the Family vacate its unit in violation of the provisions of its Lease, the Owner may continue to receive housing assistance payments in accordance with the terms of the Contract, not beyond the term of the Lease, but only if the Owner (1) immediately upon leasing of the vacancy, has taken all feasible action to fill it, including, but not limited to, contacting families on his waiting list, requesting the LHA to refer eligible families, and advertising the availability of the unit; (2) has promptly (within 30 days of the date the Family vacated the unit) notified the LHA of the vacancy; and (3) has not rejected, except for good cause acceptable to the LHA, any substitute family provided by the LHA.

c. Neither the LHA nor the United States of America, (hereinafter referred to as the "Government") has assumed any obligation whatsoever for the amount of rent payable by the Family or the satisfaction of any claim by the Owner against the Family. The financial obligation of the LHA is limited to making housing assistance payments on behalf of the Family in accordance with this Contract.

d. (1) The Owner shall submit a monthly request to the LHA for the housing assistance payment. Upon the determination of the LHA that the amount of the request is correct and that the Owner is in compliance with the provisions of this Contract, the LHA shall pay to the Owner the amount requested.

(2) If the Owner receives any excessive payment, the LHA, in addition to any other rights to recovery, may deduct the amount from any subsequent payment or payments.

(3) The Owner's monthly requests for housing assistance payments shall be made subject to penalty under 18 U.S.C. 1001, which provides, among other things, that whoever knowingly and willfully makes or uses a document or writing containing any false, fictitious, or fraudulent statement or entry, in any matter within the jurisdiction of any department or agency of the United States shall be fined not more than $10,000 or imprisoned for not more than five years or both.

1.3. *Maintenance, operation and inspection.* a. The term "Premises", as used in this Contract, means the dwelling unit leased by the Family and areas, facilities and grounds which are for its benefit or use.

b. The Owner agrees (1) to maintain and operate the Premises so as to provide decent, safe, and sanitary housing, and (2) to provide all maintenance and services as contained in the Lease. If, at any time during the term of this Contract, the Owner fails to comply with the obligation in (1), housing assistance payments on behalf of the Family shall be wholly abated and if the Owner fails to comply with the obligation in (2), housing assistance payments on behalf of the Family shall be abated in whole or in part. Any abatement under this paragraph b shall be effective upon written notification to the Owner, and shall continue until such time as the obligation is complied with. The LHA shall promptly notify the Family of any such abatement.

c. The LHA will inspect, or cause to be inspected, at least annually, the Premises to determine that they are in decent, safe, and sanitary condition.

1.4. *Term of contract.* The term of this Contract shall be _____. The Contract shall terminate upon expiration or termination of the Lease and shall be subject to termination in accordance with the provisions of Section 2.5 of this Contract.

1.5. *Eviction.* The Owner shall not evict the Family unless the Owner complies with the requirements of local law, if any, and of this Section. The Owner shall give the Family a written notice of the proposed eviction, stating the grounds and advising the Family that it has 10 days (or such greater number, if any, that may be required by local law) within which to respond to the Owner. The Owner must obtain the LHA's authorization for an eviction; accordingly, a copy of the notice shall be furnished simultaneously to the LHA, and the notice shall also state that the Family may, within the same time period, present its objections to the LHA in writing or in person. The LHA shall forthwith examine the grounds for eviction and shall authorize the eviction unless it finds the grounds to be insufficient under the Lease. The LHA shall notify the Owner and the Family of its determination within 20 days of the date of receipt of the notice by the Family, whether or not the Family has presented objections to the LHA.

1.6. *Owner-family lease.* The Lease between the Owner (Lessor) and the Family (Lessee) shall contain the following provisions:

"ADDENDUM TO LEASE

"The following additional Lease provisions are incorporated in full in the Lease between _____ (Lessor) and _____ (Lessee) for the following dwelling unit: _____. In case of any conflict between these and any other provisions of the Lease, these provisions shall prevail.

"a. Of the total rent ($_____ per month), $_____ shall be payable by the Housing Authority (LHA) as housing assistance payments on behalf of the Lessee and $_____ shall be payable by the Lessee. These amounts shall be subject to change by reason of changes in the family income or composition, as determined by the LHA, effective as of the date stated in a notification of such change by the LHA to the Lessee and Lessor.

"b. The Lessor shall provide the following services (including security) and maintenance:

[Here specify all services to be provided by the Lessor, which shall include all services customarily supplied to tenants of this type of housing in the locality. In preparing this list, provisions contained in form HUD-52505A, Guide for Lease Provisions for Maintenance and Security Services, shall be included except to the extent modifications are approved by the LHA.]

"c. The Lessor shall not evict the Lessee unless the Lessor complies with the requirements of local law, if any, and of this provision. The Lessor shall give the Lessee a written notice of the proposed eviction, stating the grounds and advising the Lessee that he has 10 days (or such greater number, if any, that may be required by local law) within which to respond to the Lessor. Because the Lessor must obtain the LHA's authorization for an eviction, a copy of the notice shall be furnished simultaneously to the LHA, and the notice shall also state that the Lessee may, within the same time period, present his objections to the LHA in writing or in person. The LHA shall forthwith examine the grounds for eviction and shall authorize the eviction unless it finds the grounds to be insufficient under the Lease. The LHA shall notify the Lessor and the Lessee of its determination within 20 days of the date of receipt of the notice by the Lessee whether or not the Lessee has presented objections to the LHA.

"d. The Lessor shall not discriminate against the Lessee in the provision of services, or in any other manner, on the grounds of race, color, creed, religion, sex, or national origin.

"e. This Lease has been signed by the parties on the condition that the LHA will promptly execute a Housing Assistance Payments Contract with the Lessor. Accordingly, this Lease shall not become effective unless the LHA has executed such Contract by the first day of occupancy specified in the Lease.

"Lessor _____ Lessee _____
By _____ Date _____"
Date _____

1.7. *Relocation certification.* a. The Owner hereby certifies that the dwelling unit was vacant on the date that he executed the Request for Lease Approval with the Family. If the unit was not vacant on that date, the Owner hereby certifies that it was or will be vacated (check applicable box):

☐ as a result of voluntary decision of occupant,
☐ as a result of action by Owner for cause, or
☐ for reasons clearly unrelated to leasing of the unit by the Family under the Housing Assistance Payments Program, and the Owner further certifies that the specific circumstances were as follows:

_____

This certification is made subject to penalty under 18 U.S.C. 1001, which provides, among other things, that whoever knowingly or willfully makes or uses a document or writing containing any false, fictitious, or fraudulent statement or entry, in any matter within the jurisdiction of any department or agency of the United States, shall be fined not more than $10,000 or imprisoned for not more than five years, or both.

b. The Government has determined that satisfactory commitments have been made for the funding of relocation costs pursuant to the Uniform Relocation Assistance Real Property Acquisition Policies Act of 1970, as follows:

c. If paragraph b is inapplicable, the Owner agrees to hold harmless and to indemnify the LHA for any cost incurred under said Act in connection with vacation of said units, and the Owner further agrees that the LHA shall have the right to be reimbursed for any such costs by withholding from housing assistance payments payable to the Owner.

1.8. *Entire Agreement.* This Contract, including Part II hereof, contains the entire agreement between the parties hereto, and neither party is bound by any representations or agreements of any kind except as contained herein. No changes in this Contract shall be made except in writing signed by both the Owner and the LHA.

1.9. *Legal interest.* The Owner warrants that he has the legal right to execute this Contract and to lease the dwelling unit covered by this Contract.

Local Housing Authority

Owner: ___
By: _____

SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM EXISTING HOUSING

HOUSING ASSISTANCE PAYMENTS CONTRACT—PART II

2.1 *Nondiscrimination in housing.* a. Neither the Owner nor the LHA shall, in the selection or approval of Families, in the provision of services, or in any other manner, discriminate against any person on the grounds of race, color, creed, religion, sex, or national origin. No person shall be *automatically* excluded from participation in or be denied the benefits of the Housing Assistance Payments Program because of membership in a class such as unmarried mothers, recipients of public assistance, etc.

b. The Owner shall comply with all requirements imposed by Title VIII of the Civil Rights Act of 1968, Public Law 90-284, 82 Stat. 73 and any rules and regulations pursuant thereto.

c. The Owner shall comply with all requirements imposed by Title VI of the Civil Rights Act of 1964, Public Law 88-352, 78 Stat. 241; the regulations of the Department of Housing and Urban Development issued thereunder, 24 CFR, Subtitle A, Part 1, Section 1.1, et seq.; the requirements of said Department pursuant to said regulations; and Executive Order 11063 to the end that, in accordance with that Act, the regulations and requirements of said Department thereunder, and said Executive Order, no person in the United States shall, on the ground of race, color, creed, religion or national origin, be excluded from participation in, or be denied the benefits of, the Housing Assistance Payments Program, or be otherwise subjected to discrimination. This provision is included pursuant to the regulations of the Department of Housing and Urban Development, 24 CFR, Subtitle A, Part 1, Section 1.1, et seq.; issued under Title VI of the said Civil Rights Act of 1964, and the requirements of said Department pursuant to said regulations; and the obligation of the Owner to comply therewith inures to benefit of the Government, the said Department, and the LHA any of which shall be entitled to invoke any remedies available by law to redress any breach thereof or to compel compliance therewith by the Owner.

2.2. *Cooperation in equal opportunity compliance reviews.* The LHA and the Owner shall cooperate with the Government in the conducting of compliance reviews and complaint investigations pursuant to all applicable civil rights statutes, Executive Orders, and rules and regulations pursuant thereto.

2.3. *Annual Contributions Contract*

a. The LHA has entered into an Annual Contributions Contract dated _____, with the Government, with respect to Project No. _____ ("ACC"), under which the Government will provide financial assistance to the LHA pursuant to Section 23 of the United States Housing Act of 1937, for the purpose of making housing assistance payments, which ACC shall be provided by the LHA to the Owner upon request.

b. The LHA hereby pledges such annual contributions payable under Section 1.3(b) (1) of Part I of the ACC to the payment of housing assistance payments pursuant to this and other Housing Assistance Payments Contracts entered into as a part of said Project.

2.4. *LHA and government access to premises and owner's records.* The Owner shall permit the LHA and the Government, or any of their duly authorized representatives, to have access to the Premises and, for the purpose of audit and examination, to have access to any books, documents, papers and records of the Owner that are pertinent to compliance with this Contract, including the verification of information pertinent to the monthly requests to the LHA for housing assistance payments.

2.5. *Default by the owner.* a. A Default by the Owner under this Contract shall result if:

(1) the Owner has violated or failed to comply with any provisions of this Contract or of the Owner-Family Lease; or

(2) the Owner has failed to perform any of its obligations under this Contract or under the Owner-Family Lease; or

(3) the Owner has asserted or demonstrated an intention not to perform some or all of his obligations under this Contract or under the Owner-Family Lease.

b. Upon the determination by the LHA that a Default has occurred, the LHA may notify the Owner that the LHA is terminating the Contract effective 30 days from the date of notice, unless within that period the Owner cures any non-compliance, or initiates a course of corrective action which will cure the non-compliance within such minimum additional time as may be necessary and agreed to by the LHA. If the LHA so notifies the Owner, it shall also send a copy of such notice to the Family, together with information regarding continued assistance.

2.6. *Remedies not exclusive and non-waiver of remedies.* Any remedy provided for herein shall not be exclusive or preclude any party from exercising any other remedy available under this Contract or under any provisions of law, nor shall any action taken in the exercise of any remedy be deemed a waiver of any other rights or remedies available to the parties. Failure on the part of any party to exercise any right or remedy shall not constitute a waiver of that or any other right or remedy, nor operate to deprive any party of the right thereafter to take any remedial action for the same or any subsequent default.

2.7. *Disputes.* a. Except as otherwise provided herein, any dispute concerning a question of fact arising under this Contract which is not disposed of by agreement of the LHA and Owner may be submitted by either party to the U.S. Department of Housing and Urban Development field office director who shall make a decision and shall mail or

V 39 1933
MAY 13 74
XUM

otherwise furnish a written copy thereof to the Owner and the LHA.

b. The decision of the field office director shall be final and conclusive unless, within 30 days from the date of receipt of such copy, either party mails or otherwise furnishes to the field office director a written appeal addressed to the Secretary of Housing and Urban Development. The decision of the Secretary or his duly authorized representative for the determination of such appeals shall be final and conclusive, unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence. In connection with any appeal proceeding under this Section, the appellant shall be afforded an opportunity to be heard and to offer evidence in support of his appeal. Pending final decision of a dispute hereunder, both parties shall proceed diligently with the performance of the Contract and in accordance with the decision of the field office director.

d. This Section does not preclude consideration of questions of law in connection with decisions rendered under paragraphs a and b of this Section; Provided, however, that nothing herein shall be construed as making final the decision of any administrative official, representative, or board on a question of law.

2.8. *Interest of members, officers, or employees of LHA, members of local governing body, or other public officials.* No member, officer, or employee of the LHA, no member of the governing body of the locality (city and county) in which the Premises are situated, no member of the governing body of the locality in which the LHA was activated, and no other public official of such locality or localities who exercises any functions or responsibilities with respect to the Premises, during his tenure or for one year thereafter, shall have any interest, direct or indirect, in this Contract or in any proceeds or benefits arising from it.

2.9. *Interest of member of or delegate to Congress.* No member of or delegate to the Congress of the United States of America or resident commissioner shall be admitted to any share or part of this Contract or to any benefits which may arise therefrom.

2.10. *Nonassignability.* a. The Owner agrees that he has not made, and will not make any sale, assignment, or conveyance or transfer in any other form, of this Contract, or any of his interest therein, except with the prior consent of the LHA. The assignment by the Owner of the Contract to a limited partnership of which the Owner is the general partner shall not be considered an assignment herein.

b. For the purpose of this Section, a transfer of stock in the Owner in whole or in part by a party holding ten percent or more of the stock of said Owner, or a transfer by more than one stockholder or the Owner of ten percent or more of the stock of said Owner or any other similarly significant change in the ownership of such stock or in the relative distribution thereof in or with respect to the parties in control of the Owner or the degree thereof, by any other method or means, whether by increased capitalization, merger with another corporation, corporate or other amendments, issuance of new or additional stock or classification of stock or otherwise, shall be deemed an assignment, conveyance, or transfer with respect to this Contract. The Owner agrees to notify the LHA promptly of any such proposed action and to request the written consent of the LHA in regard thereto. The Owner and the party signing this Contract on behalf of said Owner, represent that they have the authority of all of the existing stockholders of the Owner to agree to this paragraph on behalf of said stockholders and to bind them with respect thereto.

NOTE: Appendix X is not included herein but does appear in the HUD Existing Housing Handbook.

APPENDIX XI—SECURITY DEPOSIT AGREEMENT

1. The _____ Housing Authority agrees to pay on behalf of the family headed by _____, herein referred to as the Family, the following amounts as security deposits in connection with the leasing by said Family of a dwelling unit from _____:

(Name of Lessor)

Deposit to Lessor	$_____
Deposit to _____[1]	$_____
Deposit to _____[2]	$_____
Total amount of deposits	$_____

[1] Insert name of each utility company to which deposit is paid.

2. On or before the effective date of the lease to be entered into between the Family and the Lessor, the Family agrees to pay $_____[3] to the Housing Authority as a first installment toward repayment of the total amount for security and/or utility deposits stated in item 1 above, leaving a balance of $_____.

3. The Family agrees to repay the stated balance by paying monthly installments of $_____[4] to the Lessor acting on behalf of the Housing Authority. These payments shall begin on the first day of the second month of the lease, and they shall be in addition to the Family's regular monthly rental payments to the Lessor.

4. The Lessor agrees to collect from the Family the monthly amounts specified in item 3 above and remit them to the Housing Authority, with the understanding, however, that failure on the part of the Family to pay such amounts shall not affect the Lessor's rights to housing assistance payments otherwise payable to him by the Housing Authority.

(Signature of LHA Representative)	(Date)
(Signature of the Family Head)	(Date)
(Signature of the Lessor Representative)	(Date)

Effective date. These regulations shall be effective on May 13, 1974.

SHELDON B. LUBAR,
Assistant Secretary for Housing Production and Mortgage Credit—FHA Commissioner.

[FR Doc.74-10876 Filed 5-10-74;8:45 am]

[3] Insert an amount equal to the lesser of (a) one-twelfth of the Total Amount of Deposits stated in Item 1 above or (b) one month's gross family contribution.

[4] Insert monthly amount to be paid by the Family, generally in the amount of one-eleventh of the balance due. However, this amount may subsequently be adjusted by the Housing Authority by reason of changes in income or rent-paying ability of the Family by amendment of this Agreement.

INTERIM REGULATIONS

The following regulations are promulgated as interim regulations by the Environmental Protection Agency. These regulations set forth the procedures for providing grants to approved designated planning agency(ies) for the development and operation of a continuing planning process intrinsic to the development of an approvable areawide waste treatment management plan and provide criteria for the designation of management agencies to carry out the plan. The regulations also specify the supporting data needed in a grant application as well as to the content and output of the areawide plan to be developed. Due to the fact that area and agency designations are in the process of being approved and grant applications from the approved designated agencies are imminent, these regulations are hereby adopted as interim. Interested parties and government agencies are encouraged to submit written comments, suggestions or objections to the Director, Grants Administration Division, Environmental Protection Agency, Washington, D.C. 20460. All comments, suggestions or objections received on or before June 27, 1974 will be considered.

The purpose of section 208 of the Federal Water Pollution Control Act Amendments of 1972 (the Act) is to encourage and facilitate the development and implementation of areawide waste treatment management plans at the local level in designated areas, and by the State outside such areas. Regulations for area and agency designations (40 CFR Part 126) were promulgated on September 14, 1973, in accordance with section 208(a) of the Act.

Section 208 establishes a mechanism for intensive water quality/waste control planning and management. Through the Federal assistance provisions, funds are provided to assist local areas in addressing in a sophisticated manner difficult urban/industrial and nonpoint source water quality problems that cannot be solved through the application of statutory base level effluent limitations.

Under the interim regulations and in accordance with sections 208(f)(1) of the Act, funds will be provided to designated local planning agencies for a period of up to 24 months to develop an initial plan for a designated area with concurrent further development of the planning process. For obligations made during FY 1974 and FY 1975, the Federal share shall be 100 percent of the eligible costs of the project.

Planning grants under section 208 of the Act will not be awarded to States for 208 planning in nondesignated areas. Funds provided under section 106 of the Act, however, may be used for this purpose.

The regulations also provide for the involvement of the States in the grant application process and in the development and review of the 208 plan. It was felt that to have a useful areawide waste treatment management plan, the local planning effort should be closely coordinated with the overall State planning effort.

In addition, the interim regulations require that the planning agency make provisions for an Areawide Planning Advisory Committee which must include representatives of the State and public and may include representatives of the U.S. Departments of Agriculture, Army and the Interior and such other Federal and local agencies as may be appropriate.

With respect to the facilities planning conducted during the development of an areawide waste treatment management plan, the regulations provide that generally such planning for construction anticipated within the five year period following approval of the plan must be accomplished within the scope of the 208 planning process and within the scope of the 208 grant assistance provided that detailed engineering shall be required only to the extent deemed necessary by the EPA Regional Administrator. However, where facilities planning has been initiated and is substantially underway at the time of award of a 208 grant, such planning may be continued and incorporated in the areawide waste treatment management planning process and plan. Where the Regional Administrator determines that Step 1 construction grant assistance should be utilized for facilities planning activities during the 208 planning process he may award Step 1 grant assistance for such facilities planning, provided that such planning does not duplicate any work funded by the 208 grant. The designated planning agency must be afforded opportunity to comment prior to award of any Step 2 or Step 3 construction grant assistance within the designated 208 area during the 208 planning process. Upon approval of the 208 plan, no construction grant assistance may be awarded within the 208 area until the project has been brought into conformity with such plan.

Effective date: May 13, 1974.

JOHN QUARLES,
Acting Administrator.

MAY 7, 1974.

Subpart F—Grants to Designated Areawide Waste Treatment Management Planning Agencies; Grant Applications; Grants; Plan Content and Approval

AUTHORITY: Sec. 208, Federal Water Pollution Control Act Amendments of 1972.

Subpart F—Grants to Designated Areawide Waste Treatment Management Planning Agencies; Grant Applications; Grants; Plan Content and Approval

§ 35.1050 Purpose.

The purpose of section 208 of the Federal Water Pollution Control Act Amendments of 1972 is to encourage and facilitate the development and implementation of areawide waste treatment management plans at the local level. This subpart supplements the EPA general grant regulations and procedures (Part 30 of this chapter) and establishes and codifies policies and procedures for grants to an approved planning agency, upon approval of applications, for the development and operation of a continuing planning process required for the development of an approvable areawide waste treatment management plan.

§ 35.1051 Authority.

These provisions for grants to support the development and operation of an areawide waste treatment management planning process are issued under section 208 of the Federal Water Pollution Control Act Amendments of 1972.

§ 35.1052 Allocations and allotments.

(a) Upon approval of a planning area and agency designation pursuant to Part 126 of this chapter, there will be reserved, for subsequent issuance to the Regional Administrator, an amount of contract authority estimated to cover the reasonable cost of the continuing planning process for a designated area.

(b) Upon completion of review and negotiation of a grant application for the continuing planning process for a designated area, and at such time as the Regional Administrator is prepared to make a grant award, the Regional Administrator shall request an Advice of Allowance authorizing the obligation of contract authority to cover the amount of the negotiated grant agreement. In no case will a grant agreement be executed before an Advice of Allowance is issued.

§ 35.1053 Eligibility.

An applicant agency must be the agency designated by the Governor or appropriate local officials in conformance with §§ 126.11 or 126.16 of this chapter and approved by the Administrator as the official areawide waste treatment management planning agency for the area and must agree to develop a plan and a continuing planning process meeting the requirements of this subpart for the entire designated area.

§ 35.1054 Applications.

§ 35.1054–1 Preapplication Requirements.

Any agency applying for an areawide waste treatment management planning grant shall:

(a) Comply with all applicable requirements of Office of Management and Budget (OMB) Circular No. A–95.

(b) In the case of an area designated by the Governor(s), the application and supporting data shall be submitted to the State agency(ies) designated by the Governor(s) as having review jurisdiction over the planning area. In addition, in such cases in interstate planning areas, the applicant shall submit the application to the Governor of the State wherein the greatest portion of the population within the planning area resides.

(c) In the case of an area designated by the chief elected officials, the application shall be submitted directly to the appropriate Regional Administrator of EPA and the appropriate Governor(s) shall be notified of the submission.

§ 35.1054–2 Application Requirement.

Applications to EPA shall be made in triplicate on such forms as the Administrator may prescribe and shall include the following substantiating data:

(a) In the case of an area designated by the Governor(s), a statement of certification or refusal of certification submitted by the chief official(s) of the reviewing agency(ies) designated by the Governor(s) of the State(s) wherein the area is located. Each certification, or refusal thereof, shall include a statement that the State has reviewed the application and finds: (1) That the proposed work complies or does not comply with all State requirements, including any applicable 303(e) plan(s) prepared under 40 CFR Part 131; (2) that the proposed planning work program is or is not adequate and necessary to accomplish the development of a plan under Section 208; (3) that, insofar as is known, the planning will or will not duplicate any work which has been done or is being done to meet the facilities planning requirements of §§ 35.917–35.917–9; and (4) that the State either certifies or does not certify that the grant application should be approved by EPA.

(b) Evidence that all requirements of OMB Circular No. A–95 have been met.

(c) A statement by the applicant that the proposed activity is consistent with and will be in coordination with other environmental plans (which include land use plans) and has been coordinated with related planning and development that is being done under other Federal assistance programs and any State and local programs which affect the designated area.

(d) A statement by the applicant that provisions have been, or will be, made for an Areawide Planning Advisory Committee which must include repersentatives of the State and public and may include representatives of the U.S. Departments of Agriculture, Army and the Interior and such other Federal and local agencies as may be appropriate in the opinion of EPA, the State(s) and the applicant agency.

(e) A statement by the applicant that the planning process will become financially self-sustaining and provide for annual update of the plan once the initial plan is developed and approved.

(f) A work plan which contains the following:

(1) Description of the objectives and scope of the waste treatment management planning process;

(2) Description of all work performed to date which will be used in the plan development;

(3) Description of the proposed planning process which will be utilized to (i) identify and evaluate feasible measures to control point and nonpoint pollution sources, which measures may take into account all source location and review measures necessary to meet State implementation plan requirements in the area, (ii) select an integrated areawide plan to control these sources, and (iii) establish an areawide management program (including financing) for plan implementation;

(4) Description of any necessary action in the planning to be taken by agencies other than the applicant and procedures to be used in coordination of such activities. (Documentation of the acceptance by the affected responsible agency of such required work or action shall be included and presented with the work plan.);

(5) Detailed schedule showing required interrelationships of work to be accomplished and anticipated dates of completion;

(6) Detailed cost and resource budget, including work to be done under contract or by interagency agreement;

(7) Proposed disbursement schedule with specific progress milestones related to disbursements;

(8) Description of how compatibility with applicable plans prepared or in preparation under sections 209 and 303 (e) will be attained; and

(9) Description of the procedures to be followed in assuring adequate public participation during the plan development, review and adoption in accordance with Part 105 of this chapter.

(g) A statement that the planning process will develop systems for prevention of degradation of surface and ground water quality in the area in accordance with the requirements of the Act and with the applicable Federal/State water quality standards.

§ 35.1055 Revision or amendment of application.

If, in the judgment of the applicant or the EPA Regional Administrator, substantial changes have occurred which warrant revision or amendment, the application shall be revised or amended and submitted for review in the same manner as specified for the original application.

§ 35.1056 Review, certification and approval of grant application.

§ 35.1056–1 State review and certification of applications from areas designated by the Governor(s).

(a) *Intrastate planning areas.* The State reviewing agency designated by the Governor shall, within 45 days after receipt of the application, review the application and either certify or refuse to certify the application and proposed work program as set forth in § 35.1054–2(a). Upon certification or refusal thereof, the reviewing agency will either, at the applicant's direction, return the application to the applicant for forwarding of two copies to the appropriate EPA Regional Administrator, together with all certifications, or forward two copies of the application and certifications or refusals thereof to the appropriate EPA Regional Administrator. If the application is not certified, the reviewing agency shall notify both the appropriate EPA Regional Administrator and the applicant as to the specific reasons for noncertification and specify the changes which are needed for State certification of the application.

(b) *Interstate planning areas.* The applicant shall submit its application to the reviewing agency designated by the Governor of the State wherein the greatest portion of the population resides. This reviewing agency shall, within 15 days of receipt of the application, forward copies of the application to the agency designated by the Governor(s) of each other State having jurisdiction within the planning area, and shall serve as coordinator for the bi- or multi-State re-

V 39 93 MAY 13 74 XUM

view. Each State shall review the application and within 45 days provide the State coordinating the review with its certification or refusal thereof as set forth in § 35.1054–2(a). The coordinating State shall within 15 days forward two copies of the application, supporting documents and all State certifications or refusals thereof to the applicant for forwarding to the appropriate EPA Regional Administrator. In the event that one or more States does not certify the application, each State refusing certification shall specify its reasons in writing and advise the applicant through the coordinating State, of the specific changes needed to gain its certification. The coordinating State, in turn, shall forward such notice(s) of non-certification to the applicant and the appropriate EPA Regional Administrator. At the request of all of the States involved and with the approval of the appropriate Regional Administrator(s), an existing, recognized, interstate agency may act in the coordinating role on behalf of those States.

§ 35.1056–2 State comments on applications from areas designated by local officials.

In all cases concerning applications in areas designated by locally elected officials, the State shall review and comment upon the application as provided for by OMB Circular A–95.

§ 35.1056–3 EPA review and approval.

(a) EPA shall not accept for review for the purpose of making a grant any incomplete application or an application unaccompanied by all State certifications or refusals thereof which have been submitted.

(b) The Regional Administrator shall review the application and supporting documentation to determine its compliance with the applicable requirements of the Act and this subpart, the suitability of the proposed programs to successfully meet the required outputs of section 208 of the Act and this subpart and the costs of the proposed program.

(c) Generally within 45 days after receiving the application the Regional Administrator shall:

(1) Award a grant to the applicant in the amount that he finds meets the requirements of § 35.1057.

(2) Notify the applicant that the grant application is deficient in one or more respects and specify in which ways the application must be modified to receive EPA approval. Copies of such notifications will be forwarded to all concerned States at the time the applicant is notified of EPA action.

§ 35.1057 Amount of grant.

For grants awarded during the fiscal years ending on June 30, 1974, and June 30, 1975, the rate of Federal assistance furnished to a grantee shall be 100 per centum of the EPA approved eligible and reasonable costs of developing or modifying an initial areawide waste treatment management plan meeting the requirements of this subpart and operating an approved planning process.

§ 35.1058 Period of grant.

Federal assistance shall be for a budget period beginning the date of execution of the grant agreement and ending the date which the plan is approved by the appropriate Regional Administrator or within 24 months, whichever period is less.

§ 35.1059 Payments.

§ 35.1059–1 Establishment of initial fund.

Payment will be made in advance to the grantee by the establishment and at least quarterly replenishment of a fund that shall be based on a negotiated amount set forth in the grant agreement and which should not exceed 10 percent of the grant amount, unless a larger initial percentage is necessary for the accomplishment of the grant objectives.

§ 35.1059–2 Request for replenishment of funds.

Requests for replenishment of funds shall be made by the grantee on such form as prescribed by the Administrator. Each request for replenishment of funds shall include a statement on the status of the project related to the approved milestones set forth in the grant application. If the project is behind schedule, the statement should identify the specific tasks that have been delayed and give the reasons for the delay.

§ 35.1059–3 Federal retention of grant funds.

In accordance with the provisions of § 30.602–1 of this chapter, an amount not to exceed 10 percent of the grant award amount may be withheld for noncompliance with a program objective, grant condition or reporting requirement.

§ 35.1060 Reports.

Within 30 days following the end of each 6 month period after the effective date of the grant, the grantee agency shall prepare and submit for review by EPA a semi-annual report of progress and expenditures as compared to the scheduling of approved milestones in the work plan. Lack of scheduled progress and other problems shall be fully explained.

§ 35.1061 Suspension and termination of grant.

In accordance with the provisions of §§ 30.902 and 30.903 of this Chapter, the Regional Administrator may suspend or terminate any grant awarded pursuant to this Subpart.

§ 35.1062 Allowable costs.

In general, eligible and ineligible costs shall be determined in accordance with § 30.701 of this Chapter and by demonstration that the type and degree of work is necessary for successful completion of the project, and that the costs are reasonable with respect to the product or service to be obtained. While costs incurred as a result of following an approved work program would generally be allowable, provided that they are not prohibited elsewhere by Federal, State or local law, regulations or rule, the costs incurred by activity related to the following shall be ineligible:

(a) All costs incurred in development of a grant application for an areawide waste treatment management planning grant.

(b) All costs incurred in sewer evaluation surveys as required under § 35.927–2.

(c) All costs incurred in detailed sewer system mapping and surveys therefor.

(d) All costs related to sewage collection systems at less than the trunk line level.

(e) All costs related to obtaining or providing information for sewer systems other than the costs of determining the following items in sufficient detail to make informed judgments on the cost effectiveness of available alternatives: tributary or service areas, routes, sizes, capacities and flows, critical control elevations required to show ability to serve tributary areas, lengths, staging, major impediments to construction, and costs of construction and operation. Data concerning lift stations shall be limited to location, size, energy requirements and capital and operating costs. (Costs of gathering and analyzing information required for economic, environmental and social evaluations shall be eligible.)

(f) All costs related to obtaining or providing treatment works other than the costs of determining the following items in sufficient detail to make informed judgments on the cost effectiveness of available alternatives: Location, site plot plan which shows adequacy of the site including provision for expansion, process flow diagram, identification of unit process, type, number and size of major units, capacities and flows, anticipated effect of treatment, staging and capital and operating costs and energy requirements. (Costs of gathering and analyzing information required for economic, environmental and social evaluations shall be eligible.)

(g) All costs of special studies for the specific benefit of individual, industrial or commercial establishments.

(h) All costs of activities which are primarily of a research nature.

§ 35.1063 Submission of the plan.

§ 35.1063–1 Plans for intrastate areas.

No later than two years after the planning process is in operation, as evidenced by award of a grant, three copies of a plan and local governmental recommendations thereon, in accordance with § 35.1064–1, shall be submitted to the Regional Administrator through the State reviewing agency along with certification of approval by the Governor of the State wherein the area is located. The certification document shall include certification that the State has reviewed the plan and:

(a) Has found the plan to be in conformance with the provisions of the State basin plan(s) and the State Program prepared under section 106, and that the plan will be accepted as a detailed portion of the State plans when approved by EPA;

(b) Has found the plan to be internally consistent with the water quality control needs of the area;

(c) Has found the plan consistent with all State and local legislation, regulations or other requirements or plans regarding land use and protection of the environment;

(d) Has found that the plan provides adequate basis for selection and designation of management agencies to be designated under section 208(c) of the Act; and

(e) Has approved the plan. If disapproval is necessary, that is if no certification of approval can be issued by the Governor due to failure of the grantee to comply with one or more of these provisions, the Governor shall notify the Regional Administrator and the grantee in writing that the plan is deficient, and specify in which ways the plan must be modified to receive State certification of approval.

§ 35.1063–2 Plans for interstate areas.

No later than two years after the planning process is in operation, three copies of the plan and local governmental recommendations thereon and one additional copy of the plan and recommendations for each concerned State shall be submitted to the reviewing agency designated by the Governor of the State wherein the greatest portion of population within the planning area resides. That agency shall act as the coordinating agency and shall forward one copy of the plan to the reviewing agency designated by the Governor of each other State wherein a portion of the planning area is located. Each State shall review the plan and shall, on behalf of that State, furnish the coordinating agency with certifications as set forth in § 35.1063–1. The coordinating State agency shall forward copies of each certification to the grantee agency and shall, at that time, forward two copies of the certifications and the plan and local governmental recommendations thereon to the appropriate EPA Regional Administrator. At the request of all the States involved, and with the approval of the Regional Administrators, an existing, recognized, interstate agency may act in the coordinating role on behalf of those States.

§ 35.1064 Areawide waste treatment management planning: Content and outputs.

The purpose of areawide planning activities is the development of a coordinated, viable, management system capable of organizing, directing, implementing and maintaining an effective program of pollution abatement and preservation of existing high quality water in areas having substantial water quality control problems.

§ 35.1064–1 Content of areawide waste treatment management plan.

Each agency receiving assistance under a grant for areawide waste treatment management planning shall develop and submit to the Regional Administrator an areawide waste treatment management plan consistent with this Subpart and the applicable requirements of §§ 35.917 to 35.917–9. The plan shall include:

(a) An identification of the anticipated municipal and industrial treatment works construction necessary to meet the requirements of Title II of the Act within the designated planning area over a twenty year period;

(b) Those portions of facilities planning in compliance with § 35.917–1(a)–(i) the costs of which are allowable under § 35.1062 for those facilities for which Step 2 or Step 3 grant assistance is expected to be awarded during the five-year period following the section 208 plan approval.

(c) The identification of required urban storm water runoff control systems;

(d) The establishment of construction priorities for treatment works for the five-year period following the year of plan approval and a proposed schedule of completion of major treatment works over the twenty-year period following submission of the plan;

(e) The establishment of a regulatory program to:

(1) Provide that waste treatment management shall be on an areawide basis and provide identification and evaluation of and control or treatment for all point and non-point sources of pollution, including inplace or accumulated pollution sources, as shall be required under guidelines published by the Administrator pursuant to sections 208 and 304(e) of the Act. (Special regulatory consideration, including land use controls, is required for sources further specified under paragraphs (g) through (l) of this section);

(2) Regulate the location, modification, and construction of any facilities within such area which may result in any discharge in such area including, as appropriate, regulation of any future increase in waste loads and sources; and

(3) Assure that any industrial or commercial wastes discharged into any publicly owned treatment works in such area must meet applicable pretreatment requirements established in the plan.

(f) The identification of those agencies necessary to (1) construct, operate, and maintain all facilities required by the plan, and (2) otherwise carry out the plan;

(g) A process to (1) identify, if appropriate, agriculturally and silviculturally related non-point sources of pollution, including runoff from manure disposal areas, and from land used for livestock and crop production, and (2) set forth procedures and methods (including land use requirements) to control to the extent feasible such sources:

(h) A process to (1) identify, if appropriate, mine-related sources of pollution including new, current, and abandoned surface and underground mine runoff, and (2) set forth procedures and methods (including land use requirements) to control to the extent feasible such sources;

(i) A process to (1) identify construction activity related sources of pollution, and (2) set forth procedures and methods (including land use requirements) to control to the extent feasible such sources;

(j) A process to (1) identify, if appropriate, salt water intrusion into rivers, lakes and estuaries resulting from reduction of fresh water flow from any cause, including irrigation, obstruction, ground water extraction, and diversion, and (2) set forth procedures and methods to control such intrusion to the extent feasible where such procedures and methods are otherwise a part of the waste treatment management plan;

(k) A process to control the disposition of all residual waste generated in such area or imported into such area which could affect either surface or ground water quality;

(l) A process to control the disposal of pollutants on land or in subsurface excavations within such area to protect ground and surface water quality;

(m) The identification of all major alternative measures, including enforcement acitvities, financing, land use and other development controls and regulatory actions, administrative and management authorities and practices necessary to carry out each of the alternatives, and selection of the recommended system;

(n) The period of time necessary to carry out the plan and major alternatives, the costs of carrying out the plan and major alternatives within such time, and economic, social, and environmental impacts of carrying out the plan and major alternatives within such time;

(o) Certification of the consistency of the plan with plans prepared or in preparation under sections 209 and 303 of the Act. (Any 201 plan developed in the area or any application for a Step 1 grant for such plan received prior to the approval of the 208 plan shall require review and comments by the designated 208 agency which shall be transmitted to the State agency processing the Title II grant applications. After the section 208 plan has been approved, all 201 plans for the area that may previously have been developed shall be brought into conformance with the 208 plan.)

(p) Certification and description of public participation, in the planning process and adoption of the plan, in accordance with Part 105 of this Chapter; and

(q) Recommendations by governing bodies of local governments having responsibility for, or which would be directly affected by, implementation of the plan and having jurisdiction in the planning area as to State certification and EPA approval of the plan. In the event that a local unit of government fails to provide a recommendation within 30 days of receiving such a request from the planning agency, it shall be considered that the plan has been favorably recommended by that unit of local government.

V 39 I 93
MAY 13 74
XUM

§ 35.1064–2 Revisions of plans.

If, in the judgment of the Regional Administrator, State Governor(s) or applicant, substantial changes have occurred which warrant revision or amendment of the approved plan, the plan shall be revised or amended and submitted for review in the same manner specified in this Subpart for the original plan.

§ 35.1065 Authority of States for nonpoint source planning in designated areas.

Whenever the Governor of any State determines (and notifies the Regional Administrator) that consistency with a Statewide regulatory program under section 303 so requires, the requirements of § 35.1064–1(g) through (l) shall be developed and submitted by the Governor to the Regional Administrator for application to all regions within such State. All requirements of such State programs shall be incorporated into each affected areawide plan. The plan shall set forth such additional local actions and programs as may be necessary for implementation of the plan developed by the State.

§ 35.1066 Designation of management agencies.

§ 35.1066–1 Intrastate planning areas.

The Governor of the State in consultation with the designated planning agency, affected local governments and following the public partication requirements set forth under Part 105 of this chapter, at the time the plan is submitted to the Administrator shall designate one or more waste treatment management agencies (which may be an existing or newly created local, regional or State agency or political subdivision) for the designated area. Such agency or agencies shall, individually or in aggregate, have adequate authority to meet the requirements to carry out the provisions of section 208(c)(2) of the Act.

§ 35.1066–2 Interstate planning areas.

The Governors of the States wherein the planning area is located shall either mutually designate one or more waste treatment management agencies as set forth in § 35.1066–1 or shall, after agreement among the Governors and the appropriate EPA Regional Administrators, individually designate one or more waste treatment management agencies within each State pursuant to the requirements of § 35.1066–1.

§ 35.1067 EPA review of plan and designation of management agencies.

§ 35.1067–1 Submittal of certified plan and designation of proposed management agency(ies).

The Regional Administrator shall not receive for the purpose of review and approval either proposed designations of management agency(ies) in the absence of a plan certified by the appropriate Governor(s) or a plan certified by the appropriate Governor(s) in the absence of proposed designations of management agency(ies).

§ 35.1067–2 Dual approval required.

The appropriate Regional Administrator shall neither approve a certified plan unless concurrently approving all designated management agencies, nor approve the designation of management agencies unless concurrently approving a certified plan.

§ 35.1067–3 Review and approval of plan.

The Regional Administrator's approval of the plan will be based upon the State(s) certification of approval and EPA's review of the submission for conformance with provisions of section 201 and 208 of the Act and the requirements of this Part and other applicable regulations. Within 120 days after receiving the submittal, the Regional Administrator shall:

(a) Notify the State(s) and the grantee of approval of the plan; or

(b) Notify the State(s) and the grantee that the submittal is deficient in one or more respects and specify the ways in which the submittal must be modified to receive EPA approval; or

(c) Notify the grantee and the State(s) that the designation of waste treatment management agencies cannot be approved, thereby delaying further consideration of the plan until such time as deficiencies in such designations are rectified.

§ 35.1067–4 Review and approval of waste treatment management agencies.

The Regional Administrator's approval will be based upon the requirements set forth in section 208(c)(2) of the Act. Within 120 days after receiving the submittal of the designations the Regional Administrator shall:

(a) Notify the Governor(s) and grantee of approval of the designations; or

(b) Notify the Governor(s) and grantee that the designation submittal is deficient in one or more respects and specify the ways in which the submittal must be modified to receive EPA approval; or

(c) Notify the Governor(s) and grantee that the plan cannot be approved until modified, thereby delaying further consideration of the designations until such time deficiencies in the plan are corrected.

§ 35.1068 Disputes.

Final determinations by the Regional Administrator concerning applicant ineligibility and final determinations by the Regional Administrator concerning disputes arising under a grant pursuant to this Subpart shall be final and conclusive unless appealed by the applicant or grantee within 30 days from the date of receipt of such final determination in accordance with the "Disputes" article of the General Grant Conditions (Article 7 of Appendix A to this Subchapter).

§ 35.1070 Annual Update of Plan. [Reserved]

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4292

National Defense Transportation Day and National Transportation Week, 1974

By the President of the United States of America

A Proclamation

The phenomenal growth of America in just two hundred short years has been directly related to the growth of our national system of transportation. Today we have the largest and most diverse transportation system in the world, and the men and women who make that system work contribute nearly twenty percent to our Nation's gross national product.

As our society continues to grow, we must ensure that the effectiveness of our transportation system keeps pace with the changing demands placed on it. Both the Federal Government and the private sector have a role to play in ensuring that effectiveness.

During the recent energy crisis, we became more aware than ever of the central, critical role our transportation system plays in meeting our social and economic needs through the efficient movement of people and goods. The quality of our life and the health of our economy require that our transportation system remain robust.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do hereby designate Friday, May 17, 1974, as National Defense Transportation Day, and the week beginning May 12, 1974, as National Transportation Week.

I urge the participation of Governors and other elected officials as well as the people of America to join with the Department of Transportation in observing this week as further proof of our efforts to give the Nation balanced and energy-efficient transportation.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of May, in the year of our Lord nineteen hundred seventy-four, and of the Independence of the United States of America the one-hundred ninety-eighth.

Richard Nixon

V 39 I 94 MAY 14 74 XUM

PROCLAMATION 4293

Legal Rights for Retarded Citizens Week, 1974

By the President of the United States of America

A Proclamation

America's more than six million mentally retarded citizens face many hardships in their daily lives. Too frequently, they are even denied basic legal rights without having the means or the knowledge to protect themselves.

Retarded children, for instance, are too often deprived of the opportunities open to other children, and many mentally retarded adults are denied a free choice of a place to live.

Too many of the mentally retarded who, with proper training and encouragement, could lead healthy, productive lives in the outside world are needlessly institutionalized. Many are the victims of direct and indirect discrimination in their everyday lives.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States, do hereby proclaim the week beginning May 12, 1974 as "Legal Rights for Retarded Citizens Week", and call upon all Americans to make an added effort to accord full legal rights and individual respect and dignity to all retarded Americans not only this week, but every week of the year.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of May, in the year of our Lord nineteen hundred seventy-four, and of the Independence of the United States of America the one hundred ninety-eighth.

Richard Nixon

V 39 I 94 MAY 14 74 XUM

MEMORANDUM OF APRIL 23, 1974

[Presidential Determination No. 74–17]

Emergency Security Assistance for Israel

Memorandum for The Secretary of State and The Secretary of Defense

THE WHITE HOUSE,
Washington, D.C., April 23, 1974.

By virtue of the authority vested in me by Public Law 93–199, the Emergency Security Assistance Act of 1973 (hereinafter "the Act"), and by Public Law 93–240, the Foreign Assistance and Related Programs Appropriation Act, 1974 (hereinafter "the Appropriation Act"), I hereby:

A. Determine (1) that it is important to our national interest that Israel receive assistance under the Act exceeding $1,500,000,000 and (2) that obligations in excess of $1,700,000,000 of the funds appropriated by the first paragraph in Title IV of the Appropriation Act will be in the national interest;

B. Release Israel from its contractual liability to the extent of $1,000,000,000 to pay for defense articles and defense services purchased under the Foreign Military Sales Act (82 Stat. 1320, Public Law 90–629), as amended, during the period beginning October 6, 1973, and ending March 31, 1974; and

C. Determine that foreign military sales credits extended to Israel under the Act shall be in amounts not to exceed $1,200,000,000 (less amounts necessary for payment by the United States of its share of expenses of United Nations activities in the Middle East as authorized by law) repayable as to principal over a period of twenty years following a two year grace period after initial disbursement and at a rate of interest of three percent per annum, with all other terms and conditions to be in accordance with those applicable to credits extended for foreign countries under the above-cited Foreign Military Sales Act, as amended.

This memorandum shall be published in the FEDERAL REGISTER.

Richard Nixon

[FR Doc.74–11183 Filed 5–10–74;2:53 pm]

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

PART 68—REGULATIONS AND STANDARDS FOR INSPECTION AND CERTIFICATION OF CERTAIN AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

Fees and Charges for Certain Federal Inspection Services

Statement of considerations. The Agricultural Marketing Act of 1946 provides for the collection of fees equal as nearly as may be the cost of the inspection services rendered under its provisions. This amendment adjusts the hourly rate for services charged by the hour under § 68.42a from $11.20 to $12.20 per hour, and makes corresponding changes in fees and charges for the inspection for quality on dry beans, dry peas, lentils, hay, straw, and hops. The fees for these quality inspections are based on an average unit of time for each service, and the increase corresponds to the increase in hourly charge. The changes are necessary due to increased costs for rent, postage, communications, travel, and salaries for Federal employees.

Pursuant to sections 203 and 205 of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1622, 1624), the provisions of 7 CFR 68.42a prescribing fees in connection with the inspection of agricultural commodities administratively assigned to the Grain Division are hereby amended as follows:

§ 68.42a Fees and charges for certain Federal inspection services.

The following fees and charges apply to the Federal inspection services specified below:

Service	Fee or charge
Appeal inspection:	
(a) Basis original sample	(1)
(b) Basis new sample	(1)
Bean, lentil, and pea inspection (including chick peas, cowpeas, split peas, and similar commodities):	
(a) Lot inspection:	
(1) Field run (quality and dockage analysis)—per lot	$7.80
(2) Other than field run (grade, class, and quality)—per lot (In addition to the fee for analysis or grading in (1) and (2) above, a fee for sampling, checkweighing, and checkloading, if any, will be assessed at the prescribed rate.)	5.85
(b) Sample inspection:	
(1) Field run (quality and dockage analysis)—per lot	7.80
(2) Other than field run (grade, class, and quality)—per sample	5.85
Checkloading—per man-hour	[2] 12.20
Checkweighing—per man-hour	[2] 12.20
Condition examination—per man-hour	[2] 12.20
Demonstration grading—per request	[4] 190.00
Extra copies of certificates—per copy	1.00
Grade factor analysis (as defined in any official U.S. Standards) per factor	3.90
Hay and straw inspection:	
(a) Lot inspection:	
(1) For sampling and grading—per man-hour	12.20
(b) Sample inspection:	
(1) Grade only—per sample	7.80
(2) Factor analysis — per man-hour	12.20
Hop inspection:	
(a) Lot inspection:	
(1) For seed, leaf, and stem content—per lot	9.20
(2) Aphid infestation — per lot (In addition to the fee for analysis in (1) and (2) above, a charge for sampling, if any, will be assessed at the prescribed rate.)	12.20
(b) Sample inspection:	
(1) For seed, leaf, and stem content—per sample	9.20
(2) Aphid infestation — per sample	12.20
Laboratory report	1.00
Laboratory testing:	
(a) In addition to the charges, if any, for sampling or other requested service, a fee will be assessed for each laboratory analysis or test as follows:	
(1) Acetyl value	5.00
(2) Acidity—Greek	1.70
(3) Acid value—oil	2.35
(4) Aflatoxin	15.00
(5) Appearance, flavor, and odor of oils	1.10

(93) Specific baking volume—prepared mix	3.05
(94) Specific gravity—oils	2.95
(95) Spreadfactor—cookies	5.00
(96) Test weight per bushel—other than grain	1.20
(97) Unsaponifiable matter	5.80
(98) Urease activity	2.25
(99) Viscosity—flour	5.00
(100) Viscosity — Gardner-Holdt	1.50
(101) Water soluble protein	2.50
(102) Xanthydrol test for rodent urine	2.50
(If a requested analysis or test is on the basis of a specified moisture content, a charge for an oven moisture test will also be made.)	
Lentil inspection: (See Bean inspection.)	
Minimum fee for services covered by hourly rate—a minimum fee for 2 hrs. per man, per service request, will be assessed at the applicable hour rate.	
New inspection—fees and charges to be based on services requested.	
Pea inspection: (See Bean inspection.)	
Sampling per man-hour	[1] 12.20
Special inspection service per man-hour	[2] 12.20
Split pea inspection: (See Bean inspection.)	
Standby time per man-hour	12.20
Straw inspection: (See Hay inspection.)	

The need for increases in the fees for services and the amount thereof are dependent upon facts within the knowledge of the Agricultural Marketing Service. Therefore, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public rulemaking procedures on the amendments are impractical and unnecessary.

(Sec. 203, 205, 60 Stat. 1087, 1090, as amended (7 U.S.C. 1622, 1624))

This amendment shall become effective on July 1, 1974.

Done at Washington, D.C., on May 8, 1974.

E. L. PETERSON,
Administrator,
Agricultural Marketing Service.

[FR Doc.74-11092 Filed 5-13-74;8:45 am]

[1] The applicable grading or laboratory analysis or testing charge. Minimum fee, if any, $12.20.

[2] Applicable sampling charge, if any, plus applicable grading, or laboratory analysis or testing fee.

[3] Only one fee will be charged for these services whether performing singly or concurrently. (But see minimum fee requirement.)

[4] Plus all travel costs associated with the performance of the demonstration grading service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Expenses and Rate of Assessment

This document authorizes expenses of $273,470 of the Valencia Orange Administrative Committee, under Marketing Order No. 908, for the 1973–74 fiscal year and fixes a rate of assessment of $0.014 per carton of Valencia oranges handled in such period to be paid to the Committee by each first handler as his pro rata share of such expenses.

On April 26, 1974, notice of proposed rulemaking was published in the FEDERAL REGISTER (39 FR 14723) regarding proposed expenses and the related rate of assessment for the period November 1, 1973, through October 31, 1974, pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The notice provided that all written data, views, or arguments in connection with the proposals be submitted by May 6, 1974. None were received. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Valencia Orange Administrative Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 908.213 Expenses and rate of assessment.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Valencia Orange Administrative Committee during the period November 1, 1973, through October 31, 1974, will amount to $273,470.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each handler in accordance with § 908.41, is fixed at $0.014 per carton of Valencia oranges.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) the relevant provisions of said marketing agreement and this part require that the rate of assessment herein fixed shall be applicable to all assessable oranges handled during the aforesaid period, (2) shipments of Valencia oranges are currently in progress, and (3) such period began on November 1, 1973, and said rate of assessment will automatically apply to all such oranges beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended: 7 U.S.C. 601–674)

Dated: May 9, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.74-11091 Filed 5-13-74;8:45 am]

[Valencia Orange Reg. 463, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period May 3–9, 1974. The quantity that may be shipped is increased due to improved market conditions for California-Arizona Valencia oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and marketing Order No. 908.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674) and upon the basis of the recommendation and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Valencia Orange Regulation 463 (39 F.R. 15278). The marketing picture now indicates that there is a greater demand for Valencia oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Valencia oranges to fill the current demand thereby making a greater quantity of Valencia oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Valencia oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b) (1) (i), (ii), and (iii) of § 908.763 (Valencia Orange Regulation 463 (39 FR 15278) are hereby amended to read as follows:

"(i) District 1: 283,000 cartons;
"(ii) District 2: 246,000 cartons;
"(iii) District 3: 196,000 cartons."

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674))

Dated: May 8, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.74-11046 Filed 5-13-74;8:45 am]

[Lemon Reg. 637, Amdt. 1]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation increases the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period May 5–11, 1974. The quantity that may be shipped is increased due to improved market conditions for California-Arizona lemons. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of lemons available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Lemon Regulation 637 (39 FR 15403). The marketing picture now indicates that there is a greater demand for lemons than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of lemons to fill the current market demand thereby making a greater quantity of lemons available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of lemons grown in California and Arizona.

(b) *Order, as amended.* Paragraph (b) (1) of § 910.937 (Lemon Regulation 637) (39 FR 15403) is hereby amended to read as follows: "The quantity of lemons grown in California and Arizona which may be handled during the period May 5, 1974, through May 11, 1974, is hereby fixed at 265,000 cartons."

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Dated: May 8, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.74-11044 Filed 5-13-74;8:45 am]

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 74-394]

PART 523—MEMBERS OF BANKS

Amendment To Increase the Maturity of Bankers' Acceptances

MAY 8, 1974.

The Federal Home Loan Bank Board considers it advisable to amend §523.10 of the regulations for the Federal Home Loan Bank System (12 CFR 523.10) in order to increase the period to maturity permitted for bankers' acceptances used to meet the overall liquidity requirement for member institutions under § 523.11 (12 CFR 523.11). The period to maturity of bankers' acceptances eligible for short-term liquidity is unchanged. This action is taken due to recent amendments by the Board of Governors of the Federal Reserve System in part authorizing the Federal Reserve Bank of New York to buy and sell certain bankers' acceptances with maturities of up to 9 months. Accordingly, the Board hereby amends paragraphs (g) (5) (iii) and (h) (4) of said § 523.10 to read as set forth below, effective May 14, 1974.

Paragraph (g) (5) (iii) of § 523.10 is amended to increase the period to maturity of bankers' acceptances for overall liquidity purposes from 6 to 9 months and paragraph (h) (4) of § 523.10 is amended to indicate that the period to maturity of acceptances eligible for short-term liquidity remains not more than 6 months.

Since the above amendment relieves restriction, the Board hereby finds that notice and public procedure with respect to said amendment are unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); and since publication of said amendment for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date of said amendment would in the opinion of the Board be unnecessary for the same reason, the Board hereby provides that said amendment shall become effective as hereinbefore set forth.

1. In §523.10, paragraphs (g) (5) (iii) and (h) (4) are revised to read as follows:

§ 523.10 Definitions.

* * * * * * *

(g) * * *

(5) * * *

(iii) The remaining periods to maturity of such acceptances are not more than 9 months; and

* * * * * * *

(h) * * *

(4) Bankers' acceptances specified in subparagraph (5) of paragraph (g) of this section having a remaining period to maturity of not more than 6 months.

(Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended, sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1425a, 1437. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48, comp., p. 1071).

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, JR.,
Assistant Secretary.

[FR Doc.74-11088 Filed 5-13-74;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 74-NW-9-AD; Amdt. 39-1845]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707/720 Series Airplanes

Amendment 39-1753 (FR Doc. 73-25927), AD-73-25-2, requires inspection of the series yaw damper rudder power control units for evidence of internal leakage and replacement or rework, as necessary, on Boeing Model 707/720 Series Aircraft. After issuing Amendment 39-1753, there have been numerous re-

V 39 I 94 MAY 14 74 XUM

ports of excessive non-recoverable internal leakage in other components of the auxiliary hydraulic system. This internal leakage has been due to power control unit (PCU) transfer valves, rudder pressure regulators, bypass and relief valves, and to the tab lock stop piston in the PCU. This type of leakage decreases hydraulic power available to the rudder power control unit thereby reducing its output force and rate capability and may result in inadequate directional control for asymmetrical flight conditions. The Administrator has determined that an unsafe condition may still exist. Therefore, the AD is being superseded by a new AD that requires the inspection and rework or replacement, as necessary, of the auxiliary hydraulic system.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days after the date of publication in the FEDERAL REGISTER.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of the Federal Aviation regulations is amended by superseding Amendment 39–1753 (38 FR 33764) with the following new airworthiness directive:

BOEING: Applies to all Model 707 and 720 airplanes having 6,000 hrs., or more, time in service, certificated in all categories.

Compliance is required as indicated, unless already accomplished.

To prevent excessive non-recoverable internal hydraulic leakage in the auxiliary hydraulic system and the possible loss of aircraft direction control at critical air speeds, accomplish the following:

PART I

(a) Part I of this AD applies to airplanes which will be used for flight crew training.

(b) Prior to further flight for crew training, and thereafter at intervals not to exceed 2,000 hours time in service from the last inspection, the airplane auxiliary hydraulic system must be inspected and replaced or reworked, as necessary, in accordance with the following:

(1) Inspect for evidence of internal leakage per the information contained in Boeing Alert Service Bulletin 3154 dated April 12, 1974, or later FAA approved revisions of Boeing Alert Service Bulletin 3154 or by an equivalent method approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

(2) Airplanes with an auxiliary hydraulic system having internal leakage equal to or greater than 1.0 GPM but less than 3.0 GPM may not be used in training or revenue service but may only be flown in accordance with FAR 21.197 to a maintenance base for replacement or rework, as necessary, of the defective auxiliary hydraulic system components.

(3) Airplanes with an auxiliary hydraulic system having 3.0 GPM, or more, internal leakage must have the defective auxiliary hydraulic system components replaced or overhauled, as necessary, prior to further flight.

PART II

(a) Part II of this AD applies to airplanes which have not been inspected and reworked, as necessary, in accordance with Amendment 39–1753 (FR Doc. 73–25927), AD–73–25–2.

(b) Within 300 hours time in service after the effective date of this AD, and thereafter at intervals not to exceed 2,000 hours time in service from the last inspection, accomplish the following:

(1) Inspect for evidence of internal leakage and replace or rework, as necessary, per the information contained in Boeing Alert Service Bulletin 3154 dated April 12, 1974, or later FAA approved revisions of Boeing Alert Service Bulletin 3154 or by an equivalent method approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

(2) Airplanes with an auxiliary hydraulic system having internal leakage equal to or greater than 1.0 GPM but less than 3.0 GPM may not be used in revenue service but may only be flown in accordance with FAR 21.197 to a maintenance base for replacement or rework, as necessary, of the defective auxiliary hydraulic system components.

(3) Airplanes with an auxiliary hydraulic system having 3.0 GPM, or more, internal leakage must have the defective auxiliary hydraulic system components replaced or overhauled, as necessary, prior to further flight.

For the purpose of complying with the repetitive periodic inspection requirement of this AD, the 2,000 hours time in service may be adjusted by submitting substantiating technical data through the FAA assigned maintenance inspector for the approval of the Chief, Engineering and Manufacturing Branch, Flight Standards Division, FAA, Northwest Region.

This Amendment becomes effective May 14, 1974.

The manufacturer's specifications and procedures identified and described in this Directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this Directive who have not already received these documents from the manufacturer, may obtain copies upon request to The Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at FAA Northwest Region, 9010 East Marginal Way, Seattle, Washington 98108.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, (49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c))))

Issued in Seattle, Washington on May 6, 1974.

C. B. WALK, JR.,
Director, Northwest Region.

NOTE: The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.74–11034 Filed 5–13–74;8:45 am]

[Docket No. 13699; Amdt. 39–1846]

PART 39—AIRWORTHINESS DIRECTIVES

Mitsubishi Model MU–2B Airplanes

Pursuant to the authority delegated to me by the Administrator an airworthiness directive (AD) was adopted on April 19, 1974, and made effective immediately upon receipt of the airmail letter AD as to all known United States operators of Mitsubishi Heavy Industries, Ltd., Model MU–2B and MU–2B –10, –15, –20, –25, –30, and –35 airplanes because of reported failures of flap flexible shaft inner cables that could render the flap system inoperative on Mitsubishi Model MU–2B airplanes. The AD requires inspections of the flap cables before further flight, periodic inspections thereafter, and replacement of shafts as necessary.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the AD effective immediately as to all known U.S. operators of Mitsubishi Model MU–2B and MU–2B –10, –15, –20, –25, –30, and –35 airplanes by airmail letter dated April 19, 1974. These conditions still exist and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), the AD is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c); Department of Transportation Act (49 U.S.C. 1655(c))

MITSUBISHI HEAVY INDUSTRIES, LTD. Applies to Mitsubishi Models MU–2B, MU–2B–10, MU–2Z–15, MU–2B–20, MU–2B–25, MU–2B–30, and MU–2B–35 airplanes.

Compliance required as indicated, except that the airplane may be flown in accordance with § 21.197 to a base where the inspection, replacement, or modification can be accomplished.

To prevent failure of the flap flexible shaft inner cable (P/N RY25–1 or 080227–OC–97.50) and resulting jammed outboard auxiliary actuator that could render the flap system inoperative, accomplish the following:

(a) Before further flight and thereafter at intervals not to exceed 50 hours' time in service since the last inspection, inspect the RH and LH flap flexible shafts (P/N RY25–1 or 080227–OC–97.50) for frictional noise by listening for intermittent squeak while operating the flaps in both directions through their full travel, in quite surroundings.

(b) If frictional noise is heard during an inspection required by paragraph (a) of this AD, before further flight remove the clamp at W.S. 2590, if installed, and replace the affected shaft with a serviceable shaft, P/N RY25–1 or 080227–OC–9750, installed so as to establish that no bend radius throughout the shaft between W.S. 2370 and W.S. 2910 is less than 8.7 inches (220 millimeters).

(c) If no frictional noise is heard during an inspection required by paragraph (a) of this AD, before further flight, unless already accomplished:

(1) Remove the clamp at W.S. 2590, if installed;

(2) Loosen the clamp at W.S. 2910;

(3) Flex the shaft to establish that no bend radius throughout the shaft between W.S. 2370 and W.S. 2910 is less than 8.7 inches (220 millimeters); and

(4) Tighten the clamp at W.S. 2910.

NOTE: Mitsubishi MU–2 Service Bulletin No. 162, dated February 15, 1974, refers to this subject.

This amendment is effective May 14, 1974 as to all persons except those persons to whom it was made effective upon receipt of the airmail letter dated April 19, 1974, that contained this amendment.

Issued in Washington, D.C., on May 7, 1974.

C. R. MELUGIN, JR.,
Acting Director,
Flight Standards Service.

[FR Doc.74–11033 Filed 5–13–74;8:45 am]

[Airspace Docket No. 74–EA–2]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Transition Area

On page 6123 of the FEDERAL REGISTER for February 19, 1974, the Federal Aviation Administration published a proposed rule which would alter the Saranac Lake, N.Y., Transition Area (39 FR 587).

Interested parties were given 30 days after publication in which to submit written data or views. The only objection received concerned a confliction of a portion of the airspace with an Air Force training route. A small change in one set of coordinates will meet that objection and still meet the terminal area airspace needs. Further, since the change is of a minor amount, notice and public procedure thereon are unnecessary.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 G.m.t. July 18, 1974, except as follows:

1. Delete coordinates "44°40'00" N., 74°15'00" W." and insert in lieu thereof "44°38'00" N., 74°12'00" W.".

(Sec. 307(a), Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655 (c))

Issued in Jamaica, N.Y., on April 29, 1974.

JAMES BISPO,
Deputy Director, Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to delete the description of the Saranac Lake, N.Y. 700-foot floor transition area and by substituting the following in lieu thereof:

SARANAC LAKE, N.Y.

That airspace extending upward from 700 feet above the surface beginning at lat. 44°38'00" N., long. 74°12'00" W.; to lat. 44°40'00" N., long. 73°55'00" W.; to lat. 44°21'00" N., long. 73°50'00" W.; to lat. 44°08'00" N., long. 74°27'00" W.; to lat. 44°21'00" N., long. 74°38'00" W.; to point of beginning.

[FR Doc.74–11036 Filed 5–13–74;8:45 am]

[Airspace Docket No. 74–EA–24]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Transition Area

The Federal Aviation Administration is amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the description of the Birch Hollow, Va., Transition Area (39 FR 455).

The present description is based upon the Herndon, Va. VORTAC which is being relocated. To retain the same airspace, coordinates are being substituted for the name of the relocated VORTAC.

Since this change is editorial in nature, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In view of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective May 14, 1974, as follows:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations so as to alter the description of the Birch Hollow, Va. 700-foot floor transition area by deleting the phrase, "between the Martinsburg, W. Va., and Herndon, Va. VORTACs." and by substituting therefore, "between the Martinsburg, W. Va., VORTAC and Lat. 39°01'10" N., Long. 77°27'42" W.".

(Sec. 307(a), Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Jamaica, N.Y., on April 25, 1974.

JAMES BISPO,
Deputy Director, Eastern Region.

[FR Doc.74–11035 Filed 5–13–74;8:45 am]

[Airspace Docket No. 74–NE–12]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Control Zone and 700-Foot Transition Area

The name of the Presque Isle Municipal Airport, Presque Isle, Maine has been officially changed to Northern Maine Regional Airport. The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to reflect this name change in the description of Presque Isle, Maine, Control Zone (39 FR 419) and 700-foot Transition Area (39 FR 572).

Since this amendment is editorial in nature and no substantial change in the regulation is effected, notice and public procedure thereon are unnecessary, and good cause exists for making this amendment effective on less than 30 days notice.

In view of the foregoing, the Federal Aviation Administration having completed a review of the airspace requirements in the Presque Isle, Maine, Control Zone and 700-foot Transition Area, amends Part 71 of the Federal Aviation Regulations, effective May 14, 1974, as follows:

1. Amend § 71.171 of the Federal Aviation Regulations by amending the existing description of the Presque Isle, Maine, Control Zone by deleting the words, "Presque Isle, Maine, Municipal Airport," and inserting the words, "Northern Maine Regional Airport" in lieu thereof.

2. Amend § 71.181 of the Federal Aviation Regulations by amending the existing description of the Presque Isle, Maine, 700-foot Transition Area by deleting the words, "Presque Isle, Maine, Municipal Airport," and inserting the words, "Northern Maine Regional Airport" in lieu thereof.

(Sec. 307(a), Federal Aviation Act of 1958 (U.S.C. 1348(a)); section 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Burlington, Massachusetts, on April 30, 1974.

FERRIS J. HOWLAND,
Director, New England Region.

PART 740—RELOCATION ASSISTANCE

Rental Replacement Housing Payments

The Federal Highway Administration hereby revises § 740.77(d) of Part 740 to change and simplify the rules governing the disbursement of rental replacement housing payments. This change reflects the procedure adopted by the Federal interagency committee which is charged with developing procedures for the uniform implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646, 84 Stat. 1894, (42 U.S.C. 4601 et seq.).

This change becomes effective not later than August 12, 1974. A State may adopt this change earlier if it so desires.

In consideration of the foregoing § 740.77(d) of 23 CFR Part 740 is revised to read as follows:

V 39 I 94 MAY 14 74 XUM

§ 740.77 **Rental Replacement Housing Payments to tenant-occupant for not less than 90 days who rents.**

• • • • • •

(d) Disbursement of rental replacement housing payments. The amount of the rental payment, determined as shown above, shall be paid in a lump sum, unless the displaced person who is entitled to the payment requests that it be paid in installments.

Effective date: May 3, 1974.

NORBERT T. TIEMANN,
Federal Highway Administrator.

CHAPTER I—VETERANS ADMINISTRATION

PART 3—ADJUDICATION

Subpart A—Pension, Compensation and Dependency and Indemnity Compensation

SEVERANCE OF SERVICE CONNECTION

On page 11202 of the FEDERAL REGISTER of March 26, 1974, there was published notice of proposed regulatory change in 38 CFR 3.105 to decentralize to field stations full authority to effect severance of service connection. Also minor editorial changes not affecting benefits were made in §§ 3.105 and 3.106. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

Pursuant to such notice, written comments were received from two service organizations. These comments concurred in the proposed change. The proposed amendments to the regulations are adopted without change as set forth below.

Effective date. Section 3.105(d) is effective May 7, 1974.

Approved: May 7, 1974.

By direction of the Administrator.

[SEAL] RICHARD L. ROUDEBUSH,
Deputy Administrator.

1. In § 3.105, paragraphs (d), (e) and (f) are amended to read as follows:

§ 3.105 **Revision of decisions.**

• • • • • •

(d) *Severance of service connection.* Subject to the limitations contained in §§ 3.114 and 3.957, service connection will be severed only where evidence establishes that it is clearly and unmistakably erroneous (the burden of proof being upon the Government). (Where service connection is severed because of a change in or interpretation of a law or Veterans Administration issue, the provisions of § 3.114 are for application.) A change in diagnosis may be accepted as a basis for severance action if the examining physician or physicians or other proper medical authority certifies that, in the light of all accumulated evidence, the diagnosis on which service connection was predicated is clearly erroneous. This certification must be accompanied by a summary of the facts, findings, and reasons supporting the conclusion. When severance of service connection is considered warranted, a rating proposing severance will be prepared setting forth all material facts and reasons. The claimant will be notified at his or her latest address of record of the contemplated action and furnished detailed reasons therefor and will be given 60 days for the presentation of additional evidence to show that service connection should be maintained. If additional evidence is not received within that period, rating action will be taken and the award will be discontinued effective the last day of the month in which the 60-day period expired. (38 U.S.C. 3012(b)(6).).

(e) *Reduction in evaluation; compensation.* Where the reduction in evaluation of a service-connected disability or employability status is considered warranted and the lower evaluation would result in a reduction or discontinuance of compensation payments currently being made, rating action will be taken. The reduction will be made effective the last day of the month in which a 60-day period from date of notice to the payee expires. The veteran will be notified at his or her latest address of record of the action taken and furnished detailed reasons therefor, and will be given 60 days for the presentation of additional evidence. (38 U.S.C. 3012(b)(6)).

(f) *Reduction in evaluation; pension.* Where a reduction in evaluation is considered warranted because of a change in non-service-connected disability or employability and the lower evaluation would result in a reduction or discontinuance of pension payments currently being made, the award will be reduced or discontinued effective the last day of the month in which reduction or discontinuance of the award is approved. The veteran will be notified at his or her latest address of record of the action taken and furnished detailed reasons therefor, and the conditions under which his claim may be reopened. (38 U.S.C. 3012(b)(5)).

2. In § 3.106, paragraph (a) is amended to read as follows:

§ 3.106 **Renouncement.**

(a) Any person entitled to pension, compensation, or dependency and indemnity compensation under any of the laws administered by the Veterans Administration may renounce his or her right to that benefit but may not renounce less than all of the component items which together comprise the total amount of the benefit to which the person is entitled nor any fixed monetary amounts less than the full amount of entitlement. The renouncement will be in writing over the person's signature. Upon receipt of such renouncement in the Veterans Administration, payment of such benefits and the right thereto will be terminated, and such person will be denied any and all rights thereto from such filing. (38 U.S.C. 3106(a)).

PART 3—ADJUDICATION

Subpart A—Pension, Compensation and Dependency and Indemnity Compensation

EFFECTIVE DATES OF AWARDS; CLARIFICATION

On page 11442 of the FEDERAL REGISTER of March 28, 1974, there was published a notice of proposed regulatory development to amend § 3.401(b) to clarify certain provisions relating to effective dates of awards of increased benefits on account of dependents. In addition minor editorial changes were made in §§ 3.400 (w) and 3.401(c) and the note following § 3.401(d). Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

No written comments have been received and the proposed regulations are hereby adopted without change and are set forth below.

Effective date. Section 3.401(b) is effective May 7, 1974.

Approved: May 7, 1974.

By direction of the Administrator.

[SEAL] RICHARD L. ROUDEBUSH,
Deputy Administrator.

§ 3.400 [Amended]

1. In § 3.400, the heading of paragraph (w) is amended to read as follows:

(w) *Termination of remarriage of widow (widower) (38 U.S.C. 3010 (a), (k); 38 U.S.C. 103(d)(2) and 3010(1), effective January 1, 1971; § 3.55).*

2. In § 3.401, paragraphs (b) and (c) and the Note following paragraph (d)(1) are amended to read as follows:

§ 3.401 **Veterans.**

• • • • • •

(b) *Dependent, additional compensation or pension for.* Latest of the following dates:

(1) Date of claim. This term means the following, listed in their order of applicability:

(i) Date of veteran's marriage, or birth of his or her child, or, adoption of a child, if the evidence of the event is received within 1 year of the event; otherwise,

(ii) Date notice is received of the dependent's existence, if evidence is received within 1 year of the Veterans Administration request.

(2) Date dependency arises.

(3) Effective date of the qualifying disability rating provided evidence of dependency is received within 1 year of notification of such rating action. (38 U.S.C. 3010(f))

(4) Date of commencement of veteran's award. (38 U.S.C. 3010 (f), (n)) (Other increases, see § 3.400(o). For school attendance see § 3.667.)

(c) *Divorce of veteran and wife (husband).* See § 3.501(d).

(d) • • •

NOTE.—If apportionment under §§ 3.452(c) and 3.454 is in order or payment under § 3.850(a), Personal Funds of Patients account will not be set up but difference withheld for dependents.

• • • • • •

[FR Doc.74-11117 Filed 5-13-74;8:45 am]

PART 17—MEDICAL

Limitations on Use of Public or Private Hospitals

On page 5211 of the FEDERAL REGISTER of February 11, 1974, there was published a notice of proposed regulatory development to amend § 17.50c to implement section 601(4)(C), title 38, United States Code, as amended by section 101(a), Pub. L. 93-82 (87 Stat. 179) pertaining to utilization of public and private hospitals for treatment of a service-connected disability or disability for which discharged. The proposed amendment provided that public and private hospitals be utilized for the care of certain eligible veterans for treatment of nonemergent conditions when Veterans Administration facilities are not feasibly available. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation.

Two letters were received. One was a request for clarification. The other correspondent considered the criteria for using community resources overly restrictive and expressed a hope that the criteria be considerably softened, or even left to the discretion of the local Veterans Administration facility director. However, the limitations contain the same language as before except that it eliminated the requirement that admission to and continuation of hospitalization in a private or public hospital must be conditions upon the existence of emergency circumstances. We believe that the continued limitations are not overly restrictive and therefore adopt the proposed regulation without change as set forth below.

Effective date. This VA regulation is effective September 1, 1973.

Approved: May 7, 1974.

By direction of the Administrator.

[SEAL] R. L. ROUDEBUSH,
Deputy Administrator.

Section 17.50c is revised to read as follows:

§ 17.50c **Limitations on use of public or private hospitals.**

The admission of any patient to a private or public hospital at Veterans Administration expense will only be authorized if a Veterans Administration hospital or other Federal facility to which the patient would otherwise be eligible for admission is not feasibly available. A Veterans Administration facility may be considered as not feasibly available when the urgency of the applicant's medical condition, the relative distance of the travel involved, or the nature of the treatment required makes it necessary or economically advisable to use public or private facilities. In those instances where care in public or private hospitals at Veterans Administration expense is authorized because a Veterans Administration or other Federal facility was not feasibly available, as defined in this section, the authorization will be continued after admission only for the period of time required to stabilize or improve the patient's condition to the extent that further care is no longer required to satisfy the purpose for which it was initiated.

Title 41—Public Contracts and Property Management

CHAPTER 5A—FEDERAL SUPPLY SERVICE

PART 5A-9—PATENTS, DATA, AND COPYRIGHTS

PART 5A-54—PATENTS AND COPYRIGHTS

Transfer of Regulations

This change to the General Services Administration Procurement Regulations adds Part 5A-9, Patents, data, and copyrights, to implement recently published Part 1-9 of Chapter 1, transfers instructions from Part 5A-54 to Part 5A-9, and updates related internal GSA instructions.

1. Chapter 5A is amended to add new Part 5A-9 as follows:

Subpart 5A-9.1—Patents

Sec.
5A-9.100 Scope of subpart.
5A-9.150 Patent indemnification of Government by contractor.
5A-9.151 Other patent matters.
5A-9.152 Notice and assistance regarding patent infringement.

Subpart 5A-9.50—Copyrights

5A-9.501 General.
5A-9.502 Use and publication by the Government of copyrighted material.
5A-9.503 Contracts for use of copyrightable material.
5A-9.504 Copyright clause.

AUTHORITY: Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486cc).

Subpart 5A-9.1—Patents

§ 5A-9.100 **Scope of subpart.**

(a) This subpart prescribes policies and procedures to be followed on patents and related matters; prescribes contract clauses to be used; and provides for assistance in developing clauses when it is not feasible to use prescribed clauses.

(b) Patents are granted for any new and useful process, machine, manufacture or composition of matter, or any new and useful improvement thereof, (see 35 U.S.C. 101), and any new, original, and ornamental design for an article of manufacture. (See 35 U.S.C. 171.) Infringement consists of the unauthorized making, using, or selling of any patented invention. (See 35 U.S.C. 271.)

(c) The contracting officer shall observe the following, with respect to patents, in connection with contracting:

(1) Protection of the Government against patent risks in contracts.

(2) The policies and procedures in 1-9.4 in connection with contracts for experimental, developmental or research work.

(3) Assuring that the Government does not make royalty payments where the Government has acquired a royalty-free license or other patent rights which make such payments unnecessary.

§ 5A-9.150 **Patent indemnification of Government by contractor.**

To protect the Government from patent risks, each contract for supplies and services (other than research and development contracts) in an amount in excess of $5,000 shall contain the clause prescribed in this § 5A-9.150. (For Research and Development Contract clauses see § 1-9.107.)

PATENT INDEMNITY

If the amount of this contract for supplies or services is in excess of $5,000, the Contractor shall indemnify the Government and its officers, agents, and employees against liability, including costs, for infringement of any United States letters patent (except letters patent issued upon an application which is now or may hereafter be kept secret or otherwise withheld from issue by order of the Government) arising out of the performance under this contract, or out of the use or disposal by or for the account of the Government of such supplies or services. The foregoing indemnity shall not apply unless the Contractor shall have been informed as soon as practicable by the Government of the suit or action alleging such infringement, and shall have been given such opportunity as is afforded by applicable laws, rules, or regulations to participate in the defense thereof; and further, such indemnity shall not apply if: (a) the infringement results from compliance with specific written instructions of the Contracting Officer directing a change in the supplies to be delivered or services to be performed, or in the materials or equipment to be used, or directing a manner of performance of the contract not normally used by the Contractor; or (b) the infringement results from the addition to, or change in, the supplies furnished or services performed, which addition or change was made subsequent to delivery or performance by the Contractor; or (c) the claimed infringement is settled without the consent of the Contractor, unless required by final decree of a court of competent jurisdiction.

V 39 I 94 MAY 14 74 XUM

§ 5A–9.151 **Other patent matters.**

Any other matters which arise in connection with patents involved in research or development contracts shall be referred to the General or Regional Counsel for advice. Complete information shall accompany such referrals.

§ 5A–9.152 **Notice and assistance regarding patent infringement.**

Each contract in an amount in excess of $10,000 shall contain a clause to ensure that the Government will be notified of claims of infringement asserted against a contractor and any of his subcontractors in connection with the performance of Government contracts, and that the Government may obtain necessary assistance from a contractor in the event of patent infringement litigation. The contract clause required is set forth in § 1–7.103–4 and as article 13 of Standard Form 32, General Provisions (Supply Contract).

Subpart 5A–9.50—Copyrights

§ 5A–9.501 **General.**

A copyright is the exclusive right to the publication, production, or sale of the rights to a literary, dramatic, musical, or artistic work, or to the use of a manufacturing or merchandising label, granted by law for a definite period of years to an author, composer, artist, distributor, etc.

§ 5A–9.502 **Use and publication by the Government of copyrighted material.**

It is the general policy of the Government that copyrighted matter will not knowingly be incorporated in publications prepared by or for the Government except with the written consent of the copyright owner.

§ 5A–9.503 **Contracts for use of copyrightable material.**

In any contract under which material subject to copyright is to be furnished, the Government should receive at least a royalty-free, nonexclusive, and irrevocable license with respect to such material first produced or composed under the contract. Except in those instances where it is desirable that copyrightable material produced under contract for the Government shall either be placed in the public domain or a copyright established in the name of the author and assigned to the Government, and except in connection with contracts for motion pictures or the production of motion pictures and affiliated activities (e.g., preparation of scripts, translations, adaptations, etc.), it shall be the policy to acquire only such license right in any copyrightable material leaving the contractor free to take out a copyright in his own name, if he so desires. In the event the contractor should incorporate copyrighted or copyrightable material already owned by the contractor or others, in the material furnished to the Government, the license should contain a provision whereby the Government is also granted a royalty-free license with respect to the material if the contractor may grant such a license without becoming liable to pay compensation because of the grant. The foregoing generally applies whether the material subject to copyright is the main item of a contract or is only incidental.

§ 5A–9.504 **Copyright clause.**

Whenever an occasion arises which requires the use of such a clause, request shall be made of appropriate legal counsel for the drafting of a suitable clause. Complete information should accompany the request.

2. Part 5A–54 is deleted.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. These regulations are effective on April 17, 1974.

M. J. TIMBERS,
Commissioner, FSS.

[FR Doc.74–11060 Filed 5–13–74;8:45 am]

CHAPTER 5B—PUBLIC BUILDINGS SERVICE, GENERAL SERVICES ADMINISTRATION

PART 5B–12—LABOR

PART 5B–16—PROCUREMENT FORMS

Award and Reporting of Contracts and Equal Employment Opportunity Program

This amendment of the General Services Administration Procurement Regulations (1) adds procedures applicable to the award and reporting of contracts subject to the Walsh-Healey Public Contracts Act and (2) adds updated procedures for carrying out the General Services Administration Equal Employment Opportunity Program. The amendment provides that the GSA Office of Civil Rights is responsible for the GSA Equal Employment Opportunity Program, and indicates the duties and responsibilities of various officials and organizational units associated with the program. In addition, the amendment implements the requirements of the Secretary of Labor (41 CFR Part 60–3) pertaining to employee testing and other selection procedures. Part 5B–12 is amended by the addition of new Subparts 5B–12.6 and 5B–12.8 as follows:

Subpart 5B–12.6—Walsh-Healey Public Contracts Act

Sec.
5B–12.604 Responsibilities of contracting officers.

Subpart 5B–12.8—Equal Opportunity in Employment

5B–12.800 Scope of subpart.
5B–12.803 Basic requirements.
5B–12.803–2 Equal Opportunity clause.
5B–12.803–3 Federally assisted construction contracts.
5B–12.803–9 Notice to bidders regarding preaward equal opportunity compliance reviews.
5B–12.803–50 Equal opportunity representation.
5B–12.804 Exemptions.
5B–12.804–1 General.
5B–12.804–2 Specific contracts.
5B–12.804–3 Facilities not connected with contracts.
5B–12.805 Administration.
5B–12.805–1 Duties of agencies.
5B–12.805–4 Reports and other required information.
5B–12.805–5 Compliance reviews.
5B–12.805–6 Complaints.
5B–12.805–9 Sanctions and penalties.
5B–12.805–50 Ability to comply with the Equal Opportunity clause.
5B–12.805–51 Equal opportunity considerations.
5B–12.805–52 Identification of subcontractors.
5B–12.805–53 Compliance agency.
5B–12.805–54 Furnishing information to contractors.
5B–12.807 Hearings.
5B–12.807–1 General.
5B–12.807–2 Informal hearings.
5B–12.807–3 Formal hearings.
5B–12.810 Affirmative action compliance programs.
5B–12.812 Rulings and interpretations.
5B–12.850 Validation of employment tests.
5B–12.850–1 General.
5B–12.850–2 Evidence of validity.
5B–12.850–3 Minimum standards for validation.
5B–12.850–4 Employment agencies and State employment services.
5B–12.850–5 Use of validity studies.
5B–12.850–6 Assumptions of validity.
5B–12.850–7 Continued use of tests.
5B–12.850–8 Other selection techniques.
5B–12.850–9 Compliance reviews.

AUTHORITY: Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).

Subpart 5B–12.6—Walsh-Healey Public Contracts Act

§ 5B–12.604 **Responsibilities of contracting officers.**

(a) *Notification to contractors.* Contracting officers shall furnish contractors with copies of Department of Labor W H Publication 1313, Notice of Employees Working on Government Contracts (illustrated at § 5B–16.954–1313) when awarding a contract subject to the Walsh-Healey Public Contracts Act. In addition, Form PC–16, Minimum Wage Determinations under the Walsh-Healey Public Contracts Act (copies available from Department of Labor) has been prepared by the Department of Labor to enable a contractor to ascertain the minimum wage determinations applicable to a particular contract. The Department of Labor will issue amendments to Form PC–16 as new determinations become effective. Copies of both W H Publication 1313 and PC–16 should be supplied for each of the contractor's establishments performing on contracts subject to the Walsh-Healey Public Contracts Act.

(b) *Reporting contract awards to Department of Labor.* The original and one copy of Standard Form 99, Notice of Award of Contract (illustrated at § 5B–16.901–99), shall be forwarded to the Department of Labor, Employment Standards Administration, Wage and Hour Division, Washington, DC 20210. A copy shall be retained in the procurement file. Detailed instructions for preparing Standard Form 99 are prescribed by the Department of Labor in Circular Letter No. 2–65, dated December 10, 1965.

(c) *Violations and complaints.* Information concerning possible violations of

the representations or stipulations required by the Walsh-Healey Public Contracts Act can originate from complaints of injured parties, from officers or employees of the U.S. Government, or otherwise. Any such complaints coming to the attention of the contracting officer shall be considered, together with any other relevant information that is available, in coordination with the Office of General Counsel. Reports of violations shall be prepared and submitted through the Office of General Counsel to the Department of Labor in accordance with § 1–12.604(e) of this title.

Subpart 5B–12.8—Equal Opportunity in Employment

§ 5B–12.800 **Scope of subpart.**

This subpart implements and supplements Subpart 1–12.8, Equal Opportunity in Employment of Part 1–12 of this title (which implements the rules and regulations of the Secretary of Labor, Part 60–1 of this title); implements the September 17, 1971, Order of the Secretary of Labor (36 FR 19307, October 2, 1971) regarding the validation of employment tests by contractors and subcontractors; and sets forth the GSA Contractor Equal Employment Opportunity Program procedures and requirements regarding Government contracts.

§ 5B–12.803 **Basic requirements.**

§ 5B–12.803–2 **Equal Opportunity clause.**

(a) Executive Order 11246 dated September 24 1965 (30 FR 12319), as amended by Executive Order 11375 dated October 13, 1967 (32 FR 14303), on equal employment opportunity provides for the inclusion of a clause pertaining to equal employment in each Government contract unless the contract is exempt under the rules, regulations, and relevant orders of the Secretary of Labor. The clause prescribed for use is set forth in § 1–12.803–2.

(b) The following contract forms used by GSA contain the Equal Opportunity clause:

(1) Standard Form 2–A, General Provisions, Certification and Instructions, U.S. Government Lease for Real Property (May 1970 edition), as prescribed by § 1–16.601(b).

(2) Standard Form 23–A, General Provisions (Construction Contract) (October 1969 edition), as prescribed by § 1–16.401(h).

(3) Standard Form 32, General Provisions (Supply Contract) (November 1969 edition), as prescribed by § 1–16.101(c).

(4) GSA Form 1714, Equal Opportunity Clause (February 1969 edition). This form (illustrated at § 5B–16.950–1714) is a preprinting of the Equal Opportunity clause which may be incorporated by attachment in invitations for bids and requests for proposals where Standard Forms 23–A or 32 are not used.

(5) Government bills of Lading. Section 1–12.803–7 provides that inclusion of the Equal Opportunity clause in Government bills of lading may be by reference. Comptroller General Decision B–109776 dated November 4, 1968, provides that the incorporation of the Equal Opportunity clause by reference shall be by inclusion of a provision on the Government bill of lading form (see Condition 9 on the back of the form) as follows:

> The nondiscrimination clause contained in section 202 of Executive Order 11246, as amended by Executive Order 11375, relative to equal employment opportunity for all persons without regard to race, color, religion, sex, or national origin, and the implementing rules and regulations prescribed by the Secretary of Labor are incorporated herein.

Government bills of lading forms which contain a Condition 9 based on Executive Orders 10925, 11114, or 11246 may be used until existing stocks are exhausted without modification of the condition.

(6) Commercial bills of lading. The reference to the Equal Opportunity clause prescribed in § 5B–12.803–2(b)(5) for use in standard Government bills of lading shall also be incorporated by attachment or reference in each of the following:

(i) Commercial bills of lading which are to be converted to Government bills of lading; and

(ii) Commercial bills of lading (including GSA Form 1642, Straight Bill of Lading-Domestic) when they cover the transportation of property of the United States Government or when the transportation charges will be paid by the Government, either directly to the carrier or to the contractor when the transportation charges are listed separately on the invoice for the property.

(7) Standard Form 253, General Provisions (Architect-Engineer Contract) (August 1970 edition), contains the Equal Employment Opportunity clause modified to read "Architect-Engineer" wherever the word "Contractor" appears in the clause set forth in § 1–12.803–2.

§ 5B–12.803–3 **Federally assisted construction contracts.**

The Equal Opportunity (Applicant) clause prescribed in § 1–12.803–4 shall be included in each lease agreement whenever the building is to be erected by the bidder subsequent to the execution of such lease.

§ 5B–12.803–9 **Notice to bidders regarding preaward equal opportunity compliance reviews.**

(a) *Nonconstruction contracts.* A notice of preaward equal opportunity compliance review for inclusion in invitations for bids and requests for proposals which may result in an award of a nonconstruction contract of $1 million or more is required by § 1–12.803–9.

(b) *Construction, repair, improvement, and lease contracting.* A notice of preaward equal opportunity compliance review for inclusion in invitations for bids and requests for proposals which may result in an award of a construction, repair, or improvement contract of $100,000 or more, or in an award of a lease contract of $100,000 or more per annum, is required as follows:

PREAWARD EQUAL OPPORTUNITY COMPLIANCE REVIEWS

As a part of the procedure for determining the responsibility of the apparent low bidder or offeror as to his ability to conform with the Equal Opportunity clause, he may be required to visit the office of the Contracting Officer to discuss his Equal Employment Opportunity Program and provide such assurances as the Contracting Officer may require.

§ 5B–12.803–50 **Equal opportunity representation.**

A statement by the bidder or offeror as to whether he has participated in any previous contract or subcontract subject to the Equal Opportunity clause (see § 1–12.805–4(b)) is included in Standard Form 19–B, Representations and Certifications (Construction Contract) (October 1969 edition), and in Standard Form 33, Solicitation, Offer, and Award (November 1969 edition).

§ 5B–12.804 **Exemptions.**

§ 5B–12.804–1 **General.**

Contracts and subcontracts exempt from the requirements of the Equal Opportunity clause are covered in § 1–12.804–1.

§ 5B–12.804–2 **Specific contracts.**

Requests for exemption from use of the Equal Opportunity clause for specific contracts or categories of contracts initiated by service or staff offices shall be submitted with a complete written justification to the Office of Civil Rights.

§ 5B–12.804–3 **Facilities not connected with contracts.**

Requests by GSA contractors and subcontractors for exemption from the Equal Opportunity clause of facilities not involved in the performance of Government contracts shall be submitted with a complete written justification to the GSA contracting officer for consideration and transmittal to the Office of Civil Rights.

§ 5B–12.805 **Administration.**

§ 5B–12.805–1 **Duties of agencies.**

(a) *GSA responsibility.* GSA is primarily responsible for obtaining compliance of contractors and subcontractors (for which it is the compliance agency) with the requirements of the equal opportunity program.

(b) *Designations.* (1) The GSA Contract Compliance Officer is the Director, Office of Civil Rights (hereinafter referred to as the Contract Compliance Officer).

(2) The GSA Deputy Contract Compliance Officer is the Deputy Director, Office of Civil Rights (Compliance) (hereafter referred to as the Deputy Contract Compliance Officer).

(3) GSA Assistant Contract Compliance Officers are the professional staff personnel of the Contract Compliance Staff, Office of Civil Rights (hereafter referred to as Assistant Contract Compliance Officers). Assistant Contract Compliance Officers are located in the Central Office and in each regional office.

V 39 I 94
MAY 14 74
XUM

(c) *Procedures before award of contracts.* The following procedures shall be employed in connection with the award of contracts, except for paragraphs (c)(2)(i), (c)(2)(ii), (c)(2)(iii), (c)(2)(v), (c)(2)(vi), (c)(3)(i), (c)(3)(v), (c)(3)(vi), (c)(4), and (c)(5), the procedures may be waived when the contracting officer determines with the approval of the appropriate Commissioner and the Deputy Director, Office of Civil Rights (Contract Compliance), that the time limitations of a particular procurement will not permit their application, and further, provided that notice of such intention to waive the procedures is furnished at least 48 hours in advance to the Administrator and to the Director of Civil Rights. If the Administrator does not oppose the waiver, the Director of Civil Rights shall forward a copy of the notice to the Director, Office of Federal Contract Compliance (OFCC).

(1) *$10,000 and under.* The contracting officer is not required to obtain equal opportunity representations or certifications of nonsegregated facilities or to evaluate the ability of prospective contractors to comply with the Equal Opportunity clause where contracts are $10,000 and under unless the normal exemption of such contracts from the applicability of the equal opportunity program has been withdrawn by the Director, OFCC. In the event of a withdrawal, a review shall be made as provided in paragraph (c)(2) of this section.

(2) *Over $10,000 but not over $100,000.* The contracting officer, with respect to all nonexempt contracts over $10,000 but not over $100,000, shall determine whether the prospective contractor:

(i) Has executed the required Equal Opportunity representations affirmatively regarding the submission of compliance reports (see § 1–12.805–4(b)(1)) and the development and maintenance of affirmative action programs (see § 5B–12.810(c));

(ii) Has executed the Certification of Nonsegregated Facilities;

(iii) Has been debarred by reason of noncompliance with the Equal Opportunity clause;

(iv) Requires an evaluation of his ability to comply with the Equal Opportunity clause. When such an evaluation is required the appropriate Assistant Contract Compliance Officer shall be requested to obtain an evaluation based on currently available information and to inform the contracting officer of his views regarding the ability of the contractor to comply with the Equal Opportunity clause;

(v) Is able to comply with the provisions of the Equal Opportunity clause based on (i) through (iv) of paragraph (c)(2), above, (where the waiver provision in paragraph (c) has been invoked, the provisions of paragraph (c)(2)(iv) need not be applied); and

(vi) Is a responsible contractor insofar as the equal opportunity program is concerned, based on (i) through (v) of paragraph (c)(2), above. However, if the waiver provision in paragraph (c) has been invoked, the provisions of paragraph (c)(2)(iv) need not be applied.

(3) *Over $100,000.* The contracting officer, with respect to all nonexempt contracts over $100,000, shall:

(i) Follow the procedures prescribed by paragraph (c)(2)(i), (c)(2)(ii), and (c)(2)(iii) of this section;

(ii) Notify the appropriate Assistant Contract Compliance Officer of the following:

(A) The impending award of each nonexempt contract;

(B) Name and address of the prospective prime contractor;

(C) Furnish the date of expiration of bids;

(D) Anticipated time of performance;

(E) Name and address of subcontractors (See § 5B–12.805–52 regarding identification of subcontractors);

(F) Whether the prospective prime contractor has, or has not, had any contracts subject to an Equal Opportunity (or Nondiscrimination) clause and filed all required compliance reports; and

(G) Whether the prospective prime contractor has agreed that representations indicating submission of required compliance reports, signed by proposed subcontractors, will be obtained prior to subcontract awards.

(iii) Request the Assistant Contract Compliance Officer to do the following:

(A) Review the compliance status of the prospective prime contractor and the subcontractors identified pursuant to § 5B–12.805–52 on the basis of information currently available to GSA and compliance agencies. Compliance agencies shall not be requested to conduct special compliance reviews for the purpose of satisfying the review requirement of this paragraph, unless there are specific reasons to believe that the prospective contractor may not be able to comply with the Equal Opportunity clause;

(B) Arrange for preaward conferences, as necessary, and negotiate an agreement with the prospective prime contractor providing for the elimination of deficiencies;

(C) Notify the contracting officer that the prospective prime contractor has, or has not, agreed to take action to correct deficiencies and provide the contracting officer with the text of the agreement, if any, and a list of any unresolved deficiencies;

(D) Inform the contracting officer of his recommendations regarding the ability of the contractor to comply with the Equal Opportunity clause; and

(E) Notify prospective prime contractors of any unresolved deficiencies.

(iv) Direct prospective prime contractors to meet with Assistant Contract Compliance Officers to negotiate agreements providing for the elimination of unresolved deficiencies;

(v) Determine whether a prospective contractor is able to comply with the requirements of the Equal Opportunity clause (where the waiver provision in paragraph (c) has been invoked, the provisions of paragraphs (c)(3)(ii), (c)(3)(iii), and (c)(3)(iv) need not be applied); and

(vi) Determine whether the prospective contractor is a responsible contractor insofar as the equal opportunity program is concerned, and the determination shall include consideration of the findings and determinations of the Assistant Contract Compliance Officer. However, if the waiver provision in paragraph (c) has been invoked, the provisions of paragraph (c)(3)(ii), (c)(3)-(iii), and (c)(3)(iv) need not be applied.

(4) *Construction contracts over $100,000.* (i) In addition to the requirements of paragraph (c)(3), the contracting officer, with respect to all nonexempt construction contracts over $100,000, shall request the Assistant Contract Compliance Officer to arrange for and hold preaward equal employment opportunity conferences with prospective prime contractors and their designated subcontractors. The Assistant Contract Compliance Officer shall schedule the conferences at times and places that will be responsive to the needs of the contracting officer in meeting the schedule requirements of the procurement action. In the event that the Assistant Contract Compliance Officer is unable to schedule the meetings, he will consult with the contracting officer and either reschedule a mutually acceptable new time or designate an alternate from the contract compliance staff or the contracting officer's staff to conduct the meeting. At the time the prime contractor is notified to attend the conference, he shall be instructed to be prepared to submit at the conference the program (including policies and procedures) that he will employ to fulfill his contractual responsibility to achieve equal employment opportunity (based on full and effective utilization of minority manpower) as required by the Equal Opportunity clause in his contract and the contracts of his subcontractors; and appropriate requirements of the invitation for bids pertaining to home town plans, imposed plans, required goals or ranges, and other aspects of the Department of Labor Construction Program.

(ii) The failure of a bidder in connection with home town plans or imposed plans to set forth goals or ranges or to sign the appendix as required by the invitation for bids renders his bid nonresponsive to the terms of the invitation.

(5) *Supply contracts over $1 million.* The contracting officer with respect to supply contracts which may exceed $1 million, shall:

(i) Follow the procedures in § 5B–12.805–1(c)(2)(i), (ii), and (iii);

(ii) Request the Assistant Contract Compliance Officer to provide for preaward compliance reviews as required by §§ 1–12.803–9 and 5B–12.805–5(b);

(iii) After reviewing the recommendations of the Assistant Contract Compliance Officer, determine whether the prospective prime contractor (and his subcontractors subject to the review) are able to comply with the Equal Opportunity clause or carry out an acceptable program for compliance; and

(iv) Determine whether the prospective contractor is a responsible contractor insofar as the equal opportunity program is concerned, and the determination shall include consideration of the findings and determinations of the Assistant Contract Compliance Officer.

(d) *Reports on contractor deficiencies.* Assistant Contract Compliance Officers shall forward reports to the contracting officer and to the Deputy Contract Compliance Officer regarding the actions taken with respect to the deficiences of prospective contractors.

(e) *Written statements.* Where deficiences are found to exist, Assistant Contract Compliance Officers will obtain a written statement from the prospective contractor regarding the actions that will be taken to bring him into compliance.

§ 5B–12.805–4 Reports and other required information.

(a) Each nonexempt contractor and subcontractor shall file, or already have filed prior to award, information reports in accordance with § 1–12.805–4 and the printed instructions (except as provided in paragraph (b) of this § 5B–12.805–4) on Standard Form 100, Equal Employment Opportunity Employer Information Report EEO–1. In addition, such contractors and subcontractors may be required, prior to award, to furnish such other information regarding their equal employment opportunity policies and procedures as may be required by the Contract Compliance Officer (or his deputy or assistants).

(b) If a nonexempt prospective prime contractor or subcontractor has not filed a Standard Form 100 as required, the contracting officer shall supply such contractors with copies of the forms for completion and return to the contracting officer, in addition to complying with the requirements of (a), above. Contractors shall be instructed to submit a copy of the Standard Form 100 directly to the contracting officer, in order to expedite the determinations of their ability to comply with the provisions of the Equal Opportunity clause.

(c) Upon receipt of the Standard Form 100, the contracting officer shall forward it to the appropriate Assistant Contract Compliance Officer for review and recommendations regarding the prospective contractor's ability to comply with the provisions of the Equal Opportunity clause.

(d) The Assistant Contract Compliance Officer may request a contractor or Standard Form 100 for his own files.

(e) The Assistant Contract Compliance Officer may request a contractor or subcontractor to furnish a copy of any Standard Form 100 previously filed by the contractor or subcontractor.

(f) Standard Form 100 shall be submitted to GSA by the contractor within 30 calendar days after the award of the contract, and by each subcontractor subject to the reporting requirement within 30 calendar days after the award of each subcontract, if:

(1) A complete Standard Form 100 has not been submitted within 12 months preceding the date of the contract award (prime or sub); and

(2) The contractor and subcontractors concerned are employers within the definition of "employer" of the instructions to the information report, Standard Form 100.

§ 5B–12.805–5 Compliance reviews.

(a) *Definition.* A compliance review (see § 1–12.805–5) is a review designed to determine whether a prime contractor or subcontractor (also a specified prospective prime or subcontractor) maintains nondiscriminatory hiring and employment practices and is taking affirmative action to ensure that employees are placed, trained, upgraded, promoted, and otherwise treated during employment without regard to race, color, religion, sex, or national origin (see § 5B–12.805–51). Further, it is a review (including a complete listing of positions in order of progression sequence, rates of pay, and the number of incumbents by race and sex) to determine if there is any significant difference between the pattern of employment, utilization, and other opportunities enjoyed by minorities and women and those enjoyed by other members of the workforce. In addition, the review includes an analysis of the recruitment, hiring, placement, training, promotion, demotion, and other practices as appropriate for the purpose of determining if any significant differences disclosed are the result of and/or are being perpetuated by the contractor's employment practices. The review also includes an examination of the contractor's affirmative action program to determine if the contractor has eliminated all practices that create or tend to perpetuate discrepancies between minorities and women and others in the employment, utilization, and other opportunities and has instituted measures to correct employment conditions that are the result of these practices.

(b) *When required.* Compliance reviews are required as follows:

(1) Once each calendar year during the performance of any contract exceeding $100,000 where GSA is the compliance agency;

(2) In accordance with the procedures of the compliance agency where GSA is not the compliance agency;

(3) Within the 12-months period preceding the award of any nonconstruction contract exceeding $1 million, GSA shall conduct the review where it is the compliance agency and shall provide awarding agencies with reports within 30 days. Where GSA is not the compliance agency, the Assistant Contract Compliance Officer shall request the compliance agency to make the review;

(4) When requested by the Assistant Contract Compliance Officer;

(5) Preceding the award of any contract, or the approval of an ysubcontract, when requested by the Director, OFCC (see § 1–12.805–11(a)); and

(6) When otherwise requested by the Director, OFCC.

(c) *Conduct of compliance reviews by GSA.*—(1) *Responsibilities.* Compliance reviews (and follow-ups as appropriate) shall be conducted by the Assistant Contract Compliance Officer pursuant to schedules and priorities established by the Deputy Contract Compliance Officer. Advance arrangements shall be made with the contractor or subcontractor to establish a definite date and time for visiting the facilities involved. GSA Form 1950–B (Form Letter—Equal Employment Opportunity Program Review) (see § 5B–16.950–1950–B), addressed to the contractor, shall be utilized for this purpose. If time is of the essence, advance arrangements may be made by telephone.

(2) *Procedures.* Except as otherwise provided by the rules, regulations, and orders of the Secretary of Labor, compliance reviews shall be conducted, as follows:

(i) GSA Form 1953, Nondiscrimination Survey of Government Contractor (see § 5B–16.950–1953), shall be completed in conducting a compliance review. Copies of GSA Form 1953 shall be furnished to the Assistant Contract Compliance officer, the contracting officer, and the Deputy Contract Compliance Officer. The completion of GSA Form 1953 is considered to be the minimum acceptable standard for conducting the survey and whenever possible shall be supplemented with a narrative report covering items not provided for in the form;

(ii) Where deficiencies are found to exist, reasonable efforts shall be made to secure compliance through conciliation, mediation, and persuasion during the 30-day show cause period prescribed by § 60–2.2 of the rules and regulations of the Secretary of Labor;

(iii) A specific time in which to correct deficiences shall be stipulated;

(iv) The Assistant Contract Compliance Officer conducting the review shall make recommendations to the contractor or subcontractor designated to correct deficiencies in equal opportunity policies and practices. Deficiencies and recommendations for their correction shall be reported on GSA Form 1953 or as attachments thereto. Such recommendations may include, but are not limited to, elimination of segregated facilities, improvement of recruitment techniques, promulgation and dissemination of program policies, preparation of plans to merge functionally related but racially segregated lines of progression and preparation of plans to remedy the effects of all other discriminatory employment policies. Any refusal on the part of a contractor or subcontractor to correct deficiencies shall be fully reported;

(v) Before a contractor or subcontractor having deficiencies can be found to be in compliance, he must make a specific commitment, in writing, to correct such

V 39 I 94
MAY 14 74
XUM

deficiencies within a reasonable period of time and describe the precise action that will be taken;

(vi) Notification of a contractor or subcontractor of his compliance posture shall be made by the Assistant Contract Compliance Officer. The notification shall be given after consideration of all data available, including reports relating to all of the facilities of a contractor or subcontractor (see § 1–12.805–4), and after coordinating with the contracting officer;

(vii) A multifacility contractor or subcontractor may have some facilities where equal opportunity is practiced and other facilities where it is not. When this situation prevails, the contractor or subcontractor shall not be deemed to be in compliance;

(viii) Contractor compliance with the affirmative program requirements of § 1–12.810 shall be ascertained during the review;

(ix) Recommendations for sanctions, where deemed appropriate, shall be made by the Assistant Contract Compliance Officer to the Contract Compliance Officer; and

(x) Schedules of compliance reviews and the compliance review reports shall be furnished to the Director, OFCC, by the Deputy Contract Compliance Officer.

§ 5B–12.805–6 Complaints.

(a) *Initiation.* Complaints received by GSA that pertain to the GSA program under the Equal Opportunity clause shall be referred to the Office of Federal Contract Compliance by the Deputy Director of Civil Rights (Contract Compliance) to be handled and processed in accordance with the Memorandum of Understanding between the Office of Federal Contract Compliance and the Equal Employment Opportunity Commission dated May 20, 1970. When such complaints are referred back to GSA in accordance with the Memorandum of Understanding they shall be handled in accordance with §§ 1–12.805–6 and 1–12.805–7.

(b) *Investigation.* If GSA is the compliance agency, the Contract Compliance Officer (or his deputy) shall have the complaint investigated and a complete case record developed as provided in § 1–12.805–7(b). The investigation shall include, where appropriate, a review of the pertinent personnel practices and policies of the contractor or subcontractor (see § 5B–12.805–51), the circumstances under which the alleged discrimination occurred, and other relevant factors. Within 30 days after the complaint, the case record and summary report shall be submitted to the Contract Compliance Officer with a copy of the Assistant Contract Compliance Officer.

(c) *Evaluation and further action.* The Contract Compliance Officer (or his deputy) shall determine whether there has been any violation of the Equal Opportunity clause. If additional facts are required, further investigation shall be requested.

(d) *Reports to the Director, OFCC.* Within 60 days from the receipt of a complaint, the Contract Compliance Officer (or his deputy) shall forward the case record and summary report to the Director, OFCC, as provided in § 1–12.805–7(d)(1).

(1) If it is determined that no violation has occurred, and the Office of Federal Contract Compliance concurs with the summary report, the persons concerned shall be notified of such findings by the Contract Compliance Officer (or his deputy) and the case shall be closed. If the Director, OFCC, does not concur, the Contract Compliance Officer (or his deputy) shall take such action as the Director may direct.

(2) If it is determined that there has been an apparent violation of the Equal Opportunity clause, the Contract Compliance Officer (or his deputy or assistants) shall attempt to resolve the complaint by informal means. If the complaint cannot be resolved by informal means within 30 days, the firm complained against shall be given a hearing pursuant to § 1–12.807, if requested.

§ 5B–12.805–9 Sanctions and penalties.

(a) Sanctions and penalties shall be employed as provided in § 1–12.805–9. Recommendations for sanctions and penalties shall be proposed by the Deputy Contract Compliance Officer (or an Assistant Contract Compliance Officer or hearing officer through the Deputy Contract Compliance Officer) and submitted to the Contract Compliance Officer for consideration. The Contract Compliance Officer, as appropriate, shall act on the recommendation as follows: (1) Direct that a hearing be held, if requested; (2) accept or reject the recommendation where a hearing has not been requested; and (3) accept or reject the recommendation following a hearing. Where a recommendation is accepted, it shall be forwarded to the Director, OFCC, for approval when required by § 1–12.805–9(a)(2). Referrals to the Department of Justice are subject to the provisions of § 1–12.805–9(d). § 5B–12.805–50 Ability to comply with the Equal Opportunity clause.

(b) Contracting officers are responsible for obtaining required clearances and determining whether a bidder is able to comply with the provisions of the Equal Opportunity clause. Where equal employment opportunity compliance reviews or complaints have been processed pursuant to this Subpart 5B–12.8 regarding any contractor or subcontractor, the contracting officer shall coordinate with the Assistant Contract Compliance Officer before making his determination regarding a prospective contractor's ability to comply with the Equal Opportunity clause.

(c) Where a prospective contractor appears on the list of bidders, as set forth in § 5B–12.805–50(c), contracting officers shall, prior to award, request the Assistant Contract Compliance Officer to review the ability of the bidder to comply with the Equal Opportunity clause.

(d) The Contract Compliance Officer (or his deputy) shall develop and furnish contracting officers, through the respective Assistant Contract Compliance Officers, with a list of firms or individuals who, because of questionable ability to comply with the provisions of the Equal Opportunity clause, require special consideration before contracts are awarded. This list shall be administered by the Contract Compliance Officer (or his deputy) as part of the review list of bidders established pursuant to § 5–1.310–50.

(e) In order to supplement compliance reviews, regional Quality Control Divisions, FSS, will, as requested by the Assistant Contract Compliance Officer, during preaward plant facilities surveys or contract administration visits, review the progress made by the contractor in implementing affirmative action to correct previously reported deficiencies. As a result of plant visits, the quality control representatives will report pertinent information concerning the contractor's equal employment opportunity posture, such as:

(1) Changes observed in employment patterns or practices;

(2) Evidence of segregation of facilities;

(3) Displays of equal employment opportunity notices and posters;

(4) Changes in subcontractors since award of the contract;

(5) Subcontractors meeting the criteria of the rules and regulations of the Secretary of Labor who have not been advised by the contractor of the requirement for filing the Standard Form 100, Employer Information Report, with the Office of Federal Contract Compliance;

(6) Additional information requested by the Assistant Contract Compliance Officer; and

(7) Civil disturbances, strikes, and evidence of minority group dissatisfaction.

§ 5B–12.805–51 Equal opportunity considerations.

(a) *General.* The procedures employed by a contractor in connection with recruitment, hiring, training, job assignment, and promotion are major considerations in determining if discrepancies in employment and utilization of minorities and women are the result of discrimination and the failure to take affirmative action and in determining the contractor's ability to comply with the provisions of the Equal Opportunity clause.

(b) *Recruitment practices.* (1) All applicants for employment, regardless of race, color, religion, sex, or national origin, should receive equal consideration for all available jobs in accordance with equal qualification standards.

(2) Contractor standards for minority group and women applicants should be no more stringent than for others and minority group and women applicants should be considered for all types of jobs.

(3) Applications for employment should be objectively solicited from recruitment sources which reach all members of the community regardless of race, color, religion, sex, or national origin; e.g., advertising as an equal opportunity employer through newspapers and other public news media (see § 1–12.813).

(4) Contractors should take all actions necessary to ensure that no barriers exist in the employment of minority group members and women. Such action should include, where necessary, positive steps to convince minority groups and women in the community that the contractor does provide equal opportunity. In this connection, effective communication with minority group and women's organizations, Fair Employment Committees in the community, and schools and colleges attended by minority group members should be developed.

(5) Contractors should employ procedures for handling of applicants that are compatible with equal employment opportunity. In this regard employee referrals or "walk-ins" require particular attention since these recruitment procedures are most susceptible to discrimination. Employees tend to refer friends from their own racial and ethnic backgrounds and of their own sex and, therefore, if few minority group and women workers are already employed, few minority group and women applicants are likely to be referred. With regard to "walk-ins," the entire recruitment program is strongly dependent upon the attitudes of guards and receptionists and can thus be easily frustrated.

(c) *Hiring and initial placement.* The hiring process involves three distinct operations, namely, completion of formal applications, determination of applicants' qualifications, and a determination whether to hire the applicant. Equal opportunity procedures should reflect the following:

(1) Absence of any qualifications based on race, color, religion, sex, or national origin;

(2) Administration of qualification tests fairly and without regard to race, color, religion, sex, or national origin (see § 5B–12.850);

(3) Absence of special tests for minority groups only, except for special tests designed to facilitate, rather than exclude, employment of members of minority groups; and

(4) Objective qualification standards reasonably related to the skill and promotional requirements of the contractor.

(d) *Other practices.* (1) It is possible for an employer to have a high percentage of minority group and women employees in his total work force but have the greatest number of the group assigned to duties in the lower skills. This situation may be the result of discriminatory placement or promotion policies, segregated lines of progression in the facility, or any collective bargaining arrangements impeding the movement of minority employees (see Standard Form 100 with particular attention to any attachment indicating dual local unions, i.e., two local unions of the same international union listed as bargaining units). Very often where there are dual local unions they are racially and sexually segregated. Experience has demonstrated that where racially and sexually segregated local unions exist, segregated progression lines and a system of racially and sexualy reserved positions also exist.

(2) A contractor shall not be deemed to be in compliance if he maintains facilities having racially and sexually segregated lines of progression, racially and sexualy reserved positions, departments or divisions, separate seniority lists, or racially segregated facilities (see § 1–12.803–10).

(3) Segregation or denial of equal employment opportunity by reason of collective bargaining agreements shall not be deemed to relieve a contractor of his equal opportunity obligations.

(4) Compliance requires that contractors eliminate racially segregated facilities, merge functionally related but racially and sexually segregated lines of progression, reconstitute seniority lists, districts, and lines on a nondiscriminatory basis, provide equal promotion, progression, and transfer opportunities based on nondiscriminatory qualifications alone, even to the extent of renegotiating collective bargaining agreements.

(5) Reviews should include consideration of the contractor's organizational structure, payrolls, wage rates, personnel instructions, procedures and guidelines, promotional lists and rules, job descriptions and methods of job classification, seniority lists, recall lists, and collective bargaining agreements.

(6) Management controls are indicators of the ability to comply. A contractor who was formulated and disseminated a firm policy on equal opportunity throughout his entire organization, designated a responsible official for implementation of the policy, and instituted a system of control and evaluation of the program usually can effect equal employment opportunity. On the other hand, in those instances where there is no such policy and program, no fixed responsibility and no feedback and evaluation, the possibility of coming into compliance is diminished.

(7) When dealing with prospective construction and repair contractors, contracting officers should be aware of local trades and crafts that historically have discriminated and maintained exclusionary policies. In this connection, consideration should be given to having contractors require their subcontractors to do more than obtain written assurances that their sources of recruitment hire on a nondiscriminatory basis. Contractors and subcontractors have found it necessary to locate qualified minority group individuals and refer them to their appropriate sources as apprentices or journeymen. Most construction craft collective bargaining agreements afford the contractor or subcontractor an opportunity to employ individuals for limited periods of time (7 days to 30 days) who are not members of the bargaining unit before offering such individuals for membership. Contractors or subcontractors should be directed to exercise this right where necessary to ensure an integrated work force on GSA construction and repair projects. In addition, the contractor's or subcontractor's equal opportunity programs should include encouragement of local labor organizations to demonstrate evidence of their equal opportunity policy as recited in written assurances.

(8) The provisions of this paragraph (d) are intended to complement the rules, regulations, and orders of the Secretary of Labor as set forth in OFCC Order No. 14 and the Compliance Officer's Manual.

§ 5B–12.805–52 Identification of subcontractors.

Construction contracts. Invitations for bids and requests for proposals for construction shall provide for the listing of subconstractors in accordance with the procedures prescribed by the Commissioner, PBS.

§ 5B–12.805–53 Compliance agency.

The Office of Federal Contract Compliance, Department of Labor, has assigned compliance agency responsibility according to Standard Industrial Classification Codes (SIC). The SIC assignments for GSA are as follows:

SIC Code	Industry
08	Forestry.
24	Lumber and wood products, except furniture.
25	Furniture and fixtures.
26	Paper and allied products.
48	Communications.
49	Electric, gas, and sanitary services.
509	Miscellaneous durable goods.
53	General merchandise stores.
57	Furniture, home furnishings, and equipment stores.
58	Eating and drinking places.
59	Miscellaneous retail.
65	Real estate.
67	Holding and other investment offices.
72	Personal services.
73	Business services.
75	Automobile repair, services, and garages.
76	Miscellaneous repair services.
78	Motion pictures.
79	Amusement and recreation services, except motion pictures.

GSA shall be solely responsible for the facilities assigned. Determination by GSA as to a facility's compliance with the Executive order shall, subject to OFCC approval, apply to all Federal agencies. No contracting agency shall initiate conciliation discussions or resolve deficiencies with any of the facilities assigned to GSA without first notifying the OFCC and without the participation of GSA. Problems related to GSA compliance agency assignments shall be referred to the Deputy Contract Compliance Officer for resolution with OFCC and other agencies, as appropriate.

§ 5B–12.805–54 Furnishing information to contractors.

Contracting officers, when mailing contract documents to contractors that are subject to the Equal Opportunity clause, shall include appropriate information explaining the contract requirements

V 39 94
MAY 14 74
XUM

concerning submission of Employer Information Report forms, notices to labor unions or other organizations of workers, and use of required posters (see § 1–12.805–3). For this purpose, form letters have been developed for use as follows:

(a) GSA Form 1949, Notice to Prospective Bidders—Equal Opportunity Clause, may be used with invitations for Bids on Standard Form 20, Invitation for Bids (Construction Contract), or GSA Form 1467, Invitation, Bid and Award (Contract for Building Services), when bids are estimated to exceed $10,000 (see § 5B–16.950–1949).

(b) GSA Form 1950 (Form Letter—Transmittal of contract award), may be used to transmit contract awards that are subject to the Equal Opportunity clause (see § 5B–16.950–1950).

§ 5B–12.807 Hearings.

§ 5B–12.807–1 General.

Section 1–12.807–1 sets forth the four principal conditions under which a formal hearing shall be afforded to a prime contractor or subcontractor by the Contract Compliance Officer. Generally, informal hearings are convened for the purpose of determining compliance by a prime contractor or subcontractor with the terms of the Equal Opportunity clause.

§ 5B–12.807–2 Informal hearings.

The Contract Compliance Officer has designated Assistant Contract Compliance Officers to conduct informal hearings regarding contractual matters in which they are involved. Informal hearings shall be conducted in accordance with § 1–12.807–2(c).

§ 5B–12.807–3 Formal hearings.

(a) Formal hearings shall be conducted by the Contract Compliance Officer.

(b) Hearings shall be conducted (to the extent consistent with § 1–12.807) in accordance with the rules of the General Services Administration Board of Contract Appeals, as set forth in Subpart 5–60.2. When those rules are employed, pursuant to the provisions of this paragraph (b), references to the Board shall be deemed to be references to the Contract Compliance Officer (or his designee).

(c) Assistant Contract Compliance Officers, contracting officers, and other GSA personnel shall participate as may be appropriate.

§ 5B–12.810 Affirmative action compliance programs.

(a) Assistant Contract Compliance Officers shall determine whether contractors (for which they are cognizant) have established affirmative action compliance programs as required by § 1–12.810. Disagreements between an Assistant Contract Compliance Officer and a contractor shall be referred to the Contract Compliance Officer or his deputy. If the disagreement is not resolved, it is subject to § 1–12.805–10.

(b) The contractor's affirmative action program should be tailored to meet the problems disclosed in compliance reviews. It should contain documentation of the elimination of deficient employment practices and policies and specific steps, including goals and timetables, for the full and effective utilization of minority manpower.

(c) In addition to the representation prescribed by § 1–12.805–4(b)(1), each bidder or prospective prime contractor shall be required to state in his bid, or in writing at the outset of negotiations for the contract, whether he has developed and has on file at each establishment affirmative action programs pursuant to the rules and regulations of the Secretary of Labor. The statement required shall be in the form of a representation by the bidder or offeror substantially as follows:

> The bidder (or offeror) represents that (1) he [ ] has developed and has on file, [ ] has not developed and does not have on file, at each establishment affirmative action programs as required by the rules and regulations of the Secretary of Labor (41 CFR Parts 60–1 and 60–2), or (2) he [ ] has not previously had contracts subject to the written affirmative action program requirement of the rules and regulations of the Secretary of Labor. (The above representation need not be submitted in connection with contracts or subcontracts which are exempt from the clause.)

As provided in § 1–12.805–4(b)(1), where a bidder or offeror fails to execute the representation, the omission shall be considered a minor informality and the bidder or offeror shall be permitted to satisfy the requirement prior to award.

§ 5B–12.812 Rulings and interpretations.

The Contract Compliance Officer (or his deputy) shall advise Assistant Contract Compliance Officers and contracting officers of any rulings and interpretations of the Secretary of Labor or his designee.

§ 5B–12.850 Validation of employment tests.

(a) This section sets forth policies and procedures regarding the validation of employment tests by contractors and subcontractors subject to the provisions of Executive Order 11246, as amended, as required by the September 27, 1971, order of the Secretary of Labor (41 CFR Part 60–3, 36 FR 19307).

(b) The term "test" is defined as any paper-and-pencil or performance measure used as a basis for any employment decision. This definition includes, but is not restricted to, measures of general intelligence, mental ability and learning ability; specific intellectual abilities; mechanical, clerical, and other aptitudes; dexterity and coordination; knowledge and proficiency; occupational and other interests; and attitudes, personality, or temperment. In addition, the term "test" covers all other formal, scored, quantified, or standardized techniques of assessing job suitability; including, i.e., personal history and background requirements which are specifically used as a basis for qualifying or disqualifying applicants or employees; specific educational or work history requirements; scored interviews, biographical information blanks, interviewers' rating scales and scored application forms. The term "test" shall not include other selection techniques discussed in § 5B–12.850–8.

§ 5B–12.850–1 General.

(a) Properly validated and standardized employee selection procedures can significantly contribute to the implementation of nondiscriminatory policies, as required by Executive Order 11246, as amended. Professionally developed tests, when used in conjunction with other tools of personnel assessment and complemented by sound programs of job design, may significantly aid in the development and maintenance of an efficient work force and aid in the utilization and conservation of human resources generally. In many cases, contractors have come to rely almost exclusively on tests as the basis for making the decision to hire, promote, transfer, train, or retain with the result that candidates are selected or rejected on the basis of test scores. Where tests are so used, minority candidates frequently experience disproportionately high rates of rejection by failing to attain score levels that have been established as minimum standards for qualification.

(b) In many instances contractors are using tests as the basis for employment decisions without evidence that they are valid predictors of employee job performance. Where evidence in support of presumed relationships between test performance and job behavior is lacking, the possibility of discrimination in the application of test results must be recognized. A test lacking demonstrated validity, i.e., having no known significant relationship to job behavior, and yielding lower scores for classes protected by Executive Order 11246, as amended, may result in the rejection of many who have necessary qualifications for successful work performance.

(c) This section is designed to serve as a set of standards for contractors and subcontractors subject to Executive Order 11246, as amended, in determining whether their use of tests conforms with the requirements of the Executive order.

§ 5B–12.850–2 Evidence of validity.

(a) Contractors using tests to select from among candidates for hire, transfer, promotion, training, or retention shall have available for inspection evidence that the test is being used in a manner which does not violate § 5B–12.850–9(c).

(b) Where technically feasible, a test should be validated for each minority group with which it is used; that is, any differential rejection rates that may exist, based on a test, must be relevant to performance on the jobs in question.

(c) The term "technically feasible" as used in paragraph (b) of this subsection and elsewhere in this section means having or obtaining a sufficient number of minority individuals to achieve findings of statistical and practical significance, or having the opportunity to obtain unbiased job performance criteria. It is the responsibility of the persons claiming absence of technical feasibility to demonstrate evidence of this absence.

(d) Evidence of a test's validity should consist of empirical data demonstrating that the test is predictive of or significantly correlated with important elements of work behavior which comprise or are relevant to the job or jobs for which candidates are being evaluated.

(e) The presentation of the results of a validation study must include statistical and, where appropriate, graphic representations of the relationships between the test and the criteria, permitting judgments of the test's utility in making predictions of future work behavior.

§ 5B–12.850–3 Minimum standards for validation.

Empirical evidence in support of a test's validity must be based on studies employing generally accepted procedures for determining criterion-related validity, such as those described in "Standards for Educational and Psychological Tests and Manuals," published by the American Psychological Association, 1200 17th Street, NW., Washington, DC 20036. Evidence of content or construct validity, as defined in that publication, may also be appropriate where criterion-related validity is not feasible. Although any appropriate validation strategy may be used to develop such empirical evidence, the following minimum standards, as applicable, must be met in the research approach and in the presentation of results which constitute evidence of validity:

(a) Where a validity study is conducted in which tests are administered to applicants, with criterion data collected later, the sample of subjects must be representative of the normal or typical candidates group for the job or jobs in question. This further assumes that the applicant sample is representative of the minority population available for the job or jobs in question in the local labor market. Where a validity study is conducted in which tests are administered to present employees, the sample must be representative of the minority groups currently included in the applicant population.

(b) Tests must be administered and scored under controlled and standardized conditions, with proper safeguards to protect the security of test scores and to ensure that scores do not enter into any judgments of employee adequacy that are to be used as criterion measures.

(c) The work behaviors or other criteria of employee adequacy which the test is intended to predict or identify must be fully described; and, additionally, in the case of rating techniques, the appraisal forms and instructions to the raters must be included as a part of the validation evidence. Such criteria may include measures other than actual work proficiency, such as training time, supervisory ratings, regularity of attendance, and tenure. Whatever criteria are used they must represent major or critical work behaviors as revealed by careful job analyses.

(d) In view of the possibility of bias inherent in subjective evaluations, supervisory rating techniques should be carefully developed, and the ratings should be closely examined for evidence of bias. In addition, minorities or women might obtain unfairly low performance criterion scores for reasons other than supervisors' prejudice, when, as new employees, they have had less opportunity to learn job skills.

(e) Data must be generated and results separately reported for minority and nonminority groups wherever technically feasible. Where a minority group is sufficiently large to constitute an identifiable factor in the local labor market, but validation data have not been developed and presented separately for that group, evidence of satisfactory validity based on other groups will be regarded as only provisional compliance with this order pending separate validation of the test for the minority group in question. A test which is differentially valid may be used in groups for which it is valid but not for those in which it is not valid. In this regard, where a test is valid for two groups but one group characteristically obtains higher test scores than the other without a corresponding difference in job performance, test results must be applied so as to predict the same probability of job success in both groups.

§ 5B–12.850–4 Employment agencies and State employment services.

Contractors utilizing the services of any private employment agency, State employment agency or any other person, agency, or organization engaged in the selection or evaluation of personnel which makes its selections or evaluations of personnel wholly or partially on the basis of the results of any test shall have available evidence that any test used by such person, agency, or organization is in conformance with the requirements of this section.

§ 5B–12.850–5 Use of validity studies.

In cases where the validity of a test cannot be determined pursuant to § 5B–12.850–3 (e.g., the number of subjects is less than that required for a technically adequate validation study, or an appropriate criterion measure cannot be developed), evidence from validity studies conducted in other organizations, such as that reported in test manuals and professional literature, may be considered acceptable when: (a) The studies pertain to jobs which are comparable (i.e., have basically the same task elements), and (b) there are no major differences in contextual variables or sample composition which are likely to significantly affect validity.

§ 5B–12.850–6 Assumptions of validity.

(a) The general reputation of a test, its author or its publisher, or casual reports of test utility will not be accepted in lieu of evidence of validity. Specifically ruled out are: Assumptions of validity based on test names or descriptive labels; all forms of promotional literature; data bearing on the frequency of a test's usage; testimonial statements of sellers, users, or consultants; and other nonempirical or anecdotal accounts of testing practices or testing outcomes.

(b) Although professional supervision of testing activities may help greatly to ensure technically sound and nondiscriminatory test usage, such involvement alone shall not be regarded as constituting satisfactory evidence of test validity.

§ 5B–12.850–7 Continued use of tests.

(a) A contractor may be permitted to continue the use of a test which is not at the moment fully supported by the required evidence of validity. If, for example, evidence of criterion-related validity in a specific testing is technically feasible and required but not yet obtained, the use of the test may continue providing: (1) The contractor can cite substantial evidence of validity as described in § 5B–12.850–5, and (2) he has in progress validation procedures which are designed to produce, within a reasonable time, the additional data required. It is expected also that the contractor may have to alter or suspend test cutoff scores so that score ranges broad enough to permit the identification of criterion-related validity will be obtained.

(b) Contractors should provide an opportunity for retesting and reconsideration to earlier "failure" candidates who have availed themselves of more training or experience.

§ 5B–12.850–8 Other selection techniques.

Selection techniques other than tests may be improperly used so as to have the effect of discriminating against minority groups or women. Such techniques include, but are not restricted to, unscored or casual interviews, unscored application forms, and unscored personal history and background requirements not used uniformly as a basis for qualifying or disqualifying applicants. Where there are data suggesting employment discrimination, the contractor may be called upon to present evidence concerning the validity of his unscored procedures regardless of whether tests are also used, the evidence of validity being of the same types referrred to in §§ 5B–12.850–2 and 5B–12.850–3. If the contractor is unable or unwilling to perform such validation studies, he has the option of adjusting employment procedures so as to eliminate the conditions suggestive of employment discrimination.

§ 5B–12.850–9 Compliance reviews.

(a) Nothing in this section shall be interpreted as diminishing a contractor's obligation under both Title VII of the Civil Rights Act of 1964 and Executive Order 11246, as amended, to take affirmative action to ensure that applicants or employees are treated without regard to race, color, religion, sex, or national origin.

V 39 94
MAY 14 74
XUM

(b) The principle of disparate or unequal treatment must be distinguished from the concept of test validation. Disparate treatment, for example, occurs where members of a group protected by Executive Order 11246, as amended, have been denied the same opportunities for hire, transfer, or promotion as have been made available to other employees or applicants. Those employees or applicants who can be shown to have been denied equal treatment because of prior discriminatory practices or policies must at least be afforded the same opportunities as had existed for other employees or applicants during the period of discrimination. Thus, no new test or other employee selection standard can be imposed upon an individual or class of individuals protected by Executive Order 11246, as amended, who, but for this prior discrimination, would have been granted the opportunity to qualify under less stringent selection standards previously in force.

(c) A contractor regularly using a test which has adversely affected the opportunities of minority persons or women for hire, transfer, promotion, training, or retention violates Executive Order 11246, as amended, unless he can demonstrate that he has validated the test pursuant to the requirements of this section.

(d) Each contractor shall maintain, and submit upon request, such records and documents relating to the nature and use of tests, the validation of tests, and test results, as may be required under the provisions of this section and under the orders and directives issued by the Office of Federal Contract Compliance.

(e) The use of tests and other selection techniques by contractors as qualification standards for hire, transfer, promotion, training, or retention shall be examined carefully for possible indications of noncompliance with the requirements of Executive Order 11246, as amended.

(f) A determination of noncompliance pursuant to the provisions of this part shall be grounds for the imposition of sanctions under Executive Order 11246, as amended.

Subpart 5B–16.8 consisting of §§ 5B–16.804, 5B–16.851–5B–16.854, 5B–16.856, 5B–16.857 is added to Part 5B–16 as follows:

Subpart 5B–16.8—Miscellaneous Forms

Sec.
5B–16.804 Report on procurement.
5B–16.851 Request for release of classified information to U.S. Industry.
5B–16.852 Security requireents checklist.
5B–16.853 Notice of intention to make service contract.
5B–16.854 Notice of award of contract.
5B–16.856 Department of Labor notice to employees working on Government contracts.
5B–16.857 Equal opportunity in employment.

AUTHORITY: Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)); 41 CFR 5–1.101(c).

Subpart 5B–16.8—Miscellaneous Forms

§ 5B–16.800 Scope of subpart.

This subpart prescribes miscellaneous forms, other than procurement contract forms, for use in connection with the procurement of supplies and services.

§ 5B–16.804 Report on procurement.

(a) The report on procurement required by § 1–16.804 shall be prepared on Standard Form 37, Report on Procurement by Civilian Executive Agencies. Implementing instructions appear in § 5–1.–5001.

§ 5B–16.851 Request for release of classified information to U.S. industry.

(b) GSA Form 1720, Request for Release of Classified Information to U.S. Industry, is prescribed for use in accordance with § 5B–53.204.

§ 5B–16.852 Security requirements checklist.

§ 5B–16.853 Notice of intention to make a service contract.

Standard Form 98, Notice of Intention to Make a Service Contract and Response to Notice, is prescribed for use in accordance with § 5B–12.604 when awarding a contract subject to the Walsh-Healey Public Contracts Act, and in accordance with § 1–12.805 when awarding a contract subject to the Service Contract Act of 1965.

§ 5B–16.854 Notice of award of contract.

§ 5B–16.856 Department of Labor notice to employees working on Government contracts.

Department of Labor W H Publication 1313, Notice of Employees working on Government Contracts, is prescribed for use in accordance with §§ 5B–12.604 and 1–12.905–1.

§ 5B–16.857 Equal opportunity in employment.

GSA Form 1714, Equal Opportunity Clause, is prescribed for use in accordance with § 5B–12.803–2 and is illustrated at § 5B–16.950–1714.

Effective date. These regulations are effective on the date shown below.

Dated: April 29, 1974.

JOHN F. GALUARDI,
Acting Commissioner,
Public Buildings Service.

CHAPTER 60—OFFICE OF FEDERAL CONTRACT COMPLIANCE, EQUAL EMPLOYMENT OPPORTUNITY, DEPARTMENT OF LABOR

PART 60–5—WASHINGTON PLAN

Subpart D—Appendix A

EEO REQUIREMENTS

The appendix attached to the Washington Plan, which was included in invitations or other solicitations for bids on federally-involved construction contracts for projects in the Washington, D.C. standard metropolitan statistical area between June 1, 1970 and the present time, and which is to be included in all such invitations or solicitations for bids up to May 31, 1974, does not include a provision establishing quantified EEO requirements for contractors under covered contracts performed after the latest period for which an acceptable range of minority manpower utilization was provided in the solicitation from which the contracts resulted. In order to correct this omission prior to the expiration of the imposed Washington Plan and to parallel requirements contained in appendices for subsequently imposed construction industry EEO plans and Federal EEO bid conditions incorporating voluntary construction industry EEO plans, it is necessary to amend § 60–5.30 effective immediately. Notice of proposed rule making, opportunity for public participation and delay in the effective date are therefore contrary to the public interest.

Section 60–5.30 is hereby amended by adding new language to the end of paragraph 3 as follows:

§ 60–5.30 Appendix A.

* * * * * *

3. * * *

In the event that under a contract subject to this Appendix any work by a trade covered by this Appendix is performed after May 31, 1974, the determined ranges of minority group employment for the year ending May 31, 1974, shall be applicable to such work.

Effective date. This amendment is effective May 14, 1974.

Signed at Washington, D.C., this 7th day of May 1974.

PETER J. BRENNAN,
Secretary of Labor.

BERNARD E. DELURY,
Assistant Secretary for Employment Standards.

PHILIP J. DAVIS,
Director, Office of Federal Contract Compliance.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[PLO 5421]
[Idaho 7397]

IDAHO

Reservation for Proposed Forest Service Road

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights and to the provisions of existing withdrawals, the following described public lands are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, nor the disposal of materials under the Act of July 31, 1947, as amended, 30 U.S.C. 601–604 (1970), and reserved for the use of the Department of Agriculture for the granting of easements for road rights-of-way as authorized by section 2 of the Act of October 13, 1964, 16 U.S.C. 532, 533 (1970):

KANIKSU NATIONAL FOREST

BOISE MERIDIAN

T. 55 N., R. 5 W.,
Sec. 1, lots 1, 5, 6, 7;
Sec. 12, lot 2, SW¼NE¼, NW¼SE¼, SW¼SW¼;
Sec. 14, E½NE¼, N½SE¼, SW¼NE¼, SE¼NW¼;
Sec. 15, NE¼SE¼.

(A strip of land varying in width from 66 feet to 130 feet, being 33 feet to 80 feet on a side of the centerline of Hoodoo Rd., No. 2550.2, as shown on the right-of-way maps, sheets 4 through 9, dated April 26, 1973, over and across the named subdivisions).

The area described aggregates 36.32 acres, more or less, in Bonner County, Idaho.

2. The withdrawal made by this order shall not preclude agricultural entries or sales, exchanges or leases under applicable public land laws of any legal subdivisions traversed by lands withdrawn by this order: *Provided,* that any such entry, sale, exchange, or lease shall be subject to this order and to any road right-of-way easement over the lands issued by the Department of Agriculture.

JACK O. HORTON,
Assistant Secretary of the Interior.

MAY 8, 1974.

PART 393—PARTS AND ACCESSORIES NECESSARY FOR SAFE OPERATION

Sleeper Berths in Commercial Motor Vehicles

Correction

In FR Doc. 74–9583 appearing at page 14710 in the issue for Friday, April 26, 1974, make the following changes:

1. On page 14712, in the table at the top of the page, the heading of column 4 should read as set forth below:

Height measured from highest point of top of mattress (inches)[1]

2. On page 14712, in footnote 1 under the table, the word "utilities" in the first line should read "utilizes".

V 39 94 MAY 14 74 XUM

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Mining Enforcement and Safety Administration

[30 CFR Part 77]

REFUSE PILES AND WATER AND SILT IMPOUNDMENTS

Objections Filed and Hearing Requested

Pursuant to the authority vested in the Secretary of the Interior under section 101(a) of the Federal Coal Mine Health and Safety Act of 1969, as amended (91 Stat. 173; 30 U.S.C. 811(a)), there was published in the FEDERAL REGISTER for January 16, 1974 (39 FR 2004), a notice proposing that Part 77, Subchapter O, of 30 CFR Chapter I, be amended by adding paragraphs (h) and (i) to § 77.-215 and by adding §§ 77.215–1 through 77.215–4 and new §§ 77.216 through 77.-216–3. The proposed amendments pertain to refuse piles and water and silt impoundments.

Interested persons were afforded a period in excess of 45 days following publication within which to submit to the Administrator, Mining Enforcement and Safety Administration, written comments, suggestions and objections to these proposed standards, stating the grounds therefor, and to request a public hearing on such objections.

Section 101(f) of the Act directs the Secretary to publish in the FEDERAL REGISTER, as soon as practicable after the period for filing such objections has expired, a notice specifying proposed mandatory safety standards to which objections have been filed and a hearing requested.

Notice is hereby given that written objections were timely filed with the Administrator, Mining Enforcement and Safety Administration, stating the grounds for objections and requesting a hearing on the proposed paragraphs (h) and (i) of § 77.215, §§ 77.215–1 through 77.215–4, and §§ 77.216 through 77.216–3, of 30 CFR Part 77.

Pursuant to section 101(g) of the Act, the Secretary will after publication of this notice in the FEDERAL REGISTER, issue notice of the time and place at which a public hearing will be held for the purpose of receiving relevant evidence to the objections received.

C. K. MALLORY,
Deputy Assistant Secretary of the Interior.

MAY 9, 1974.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 52]

FROZEN CONCENTRATED APPLE JUICE

Proposed Grade Standards

A notice of proposed rulemaking to issue new United States Standards for Grades of Frozen Concentrated Apple Juice (7 CFR 52.6321–52.6332) was published in the FEDERAL REGISTER of August 20, 1973 (38 FR 22406); a second notice of proposed rulemaking was published in the FEDERAL REGISTER of January 16, 1974 (39 FR 2006). After consideration of all relevant matters pertaining to the proposals and in view of the changes which have been proposed and the changes made in response to those proposed, the U.S. Department of Agriculture desires consideration by interested parties of this third notice of proposed rulemaking to issue new United States Standards for Grades of Frozen Concentrated Apple Juice.

This new grade standard would be issued under authority of the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090 as amended, 7 U.S.C. 1624), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers, and consumers. Official grading services are also provided under this act upon request and upon payment of a fee to cover the cost of such service.

NOTE: Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable State laws and regulations.

All persons who desire to submit written data, views, or arguments in connection with the proposal should file the same in duplicate not later than June 15, 1974, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250. All written submittals made pursuant to this notice will be available for public review at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Statement of consideration leading to the third proposal.

There is, at present, no United States Standards for Grades of Frozen Concentrated Apple Juice.

The American Frozen Food Institute, representing a large portion of the frozen concentrated apple juice industry, requested that the Department establish U.S. Standards for Grades of Frozen Concentrated Apple Juice.

During 1972, a team established by the Department of Agriculture investigated problems associated with the marketing of apples. The report of the study group indicated that there is a potential for new product development, such as apple concentrate, and a need to improve the quality standards for apple juice.

In response to the industry request and in recognition of the report of the apple marketing team, the Department proposed, on August 20, 1973, to establish United States Standards for Grades of Frozen Concentrated Apple Juice, to facilitate the marketing of this product. A number of comments were filed on this proposal dealing mainly with the relationship between Brix (apple sugar) and the acidity of the apples, also, a request was made to clarify the product description. Changes were made as a result of these comments and a second notice of proposed rulemaking was published on January 16, 1974.

One comment was received on the second notice of proposed rulemaking. This comment requested that the product description (§ 52.6321) be modified to allow apple parts (derived from the preparation of apple products other than apple juice) to be used in the preparation of apple juice excluding liquid obtained by leaching of residual apple material (pomace) with water. The following justification for this change was given:

(1) Juice obtained from apple parts, particularly when it is blended with that from whole apples, is indistinguishable from apple juice made from 100 percent whole apples.

(2) When you press whole apples you are pressing peels and cores as integral parts of the whole apple and therefore the juice from peels and cores alone must be just as wholesome as that of the whole fruit.

(3) Many processors that have either an apple sauce or a sliced apple operation press the peels, cores, and trimmed apple material as they come from the preparation department. Such a procedure should be permitted, particularly in these times of a shortage of foodstuffs, so as not to waste any usable material.

(4) State of Pennsylvania has set up standards for cider and vinegar with the following definition of the raw material to be used; "• • • unfermented juice expressed or squeezed from apples or other fruit or portion of fruit." This wording is permitted because of an investigation of the industry whereby it was found that prompt pressing of peels and cores resulted in a juice that made a satisfactory cider and vinegar.

(5) The quality of apple used for preparing apple sauce and sliced apples is superior to that of apples used for juice. Normally apples that are used for juice are small apples below 2½ inches in diameter which yield less flavorful juice with more astringency and less sugar than juice from larger fruit. Therefore the peels and cores resulting from peeling large apples produce a juice that is of higher quality than that from whole small apples.

(6) The secret of making good quality concentrate is to us quality raw material whether that raw material is small apples or parts of larger apples. To make an arbitrary distinction between whole apples and parts of whole apples is completely unrelated to the standard of quality.

The Department after consideration of the above comments and all other relevant material agrees that the use of sound, fresh, peels, cores and trimmings should be allowed in the manufacture of apple juice.

The proposed standard is as follows:

Subpart—United States Standards for Grades of Frozen Concentrated Apple Juice

PRODUCTS DESCRIPTION AND GRADES

§ 52.6321 Product description.

Frozen concentrated apple juice is prepared from the unfermented, unsweetened, unacidified liquid obtained from the first pressing of properly prepared, sound, clean, mature, fresh apples, and/or parts thereof, excluding liquid obtained by leaching pomace with water. The juice is clarified and concentrated to at least 22.9 degrees Brix. The apple juice concentrate so prepared; with or without the addition of antioxidants and/or vitamins, is packed and frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.6322 Brix requirements.

Brix value of the finished concentrate shall be not less than the following for the respective dilution factor of frozen concentrated apple juice:

Dilution factor:	*Minimum Brix value of concentrate (degrees)*
1 plus 1	22.9
2 plus 1	33.0
3 plus 1	42.2
4 plus 1	50.6
5 plus 1	58.5
6 plus 1	66.3
7 plus 1	73.3

§ 52.6323 Grades.

(a) "U.S. Grade A" or "U.S. Fancy" is the quality of frozen concentrated apple juice which, when reconstituted according to § 52.6325(b), has the following attributes:

(1) good color and clarity;
(2) is practically free from defects;
(3) very good flavor and aroma; and
(4) scores not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U.S. Grade B" or "U.S. Choice" is the quality of frozen concentrated apple juice which, when reconstituted according to § 52.6325(b), has at least the following attributes:

(1) reasonably good color and clarity;
(2) is reasonably free from defects;
(3) good flavor and aroma; and
(4) scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen concentrated apple juice that fails to meet the requirements of U.S. Grade B.

FILL OF CONTAINER

§ 52.6324 Recommended fill of container.

Recommended fill of container is not incorporated in the grades of the finished product since the fill of the container, as such, is not a factor of quality for the purposes of these grades. It is recommended that the container be filled with frozen concentrated apple juice to not less than 90 percent of the capacity of the container.

FACTORS OF QUALITY

§ 52.6325 Ascertaining the grade.

(a) The grade of frozen concentrated apple juice is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors which are scored. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points which may be given such factors are:

Factors	*Points*
Color and clarity	20
Defects	20
Flavor and aroma	60
Total score	100

(b) The scores for the factors of color and clarity, defects, and flavor and aroma are determined immediately after reconstituting according to label directions or other appropriate directions.

§ 52.6326 Ascertaining the rating for the factors which are scored.

The essential variations, within each scorable factor, are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example: "18 to 20 points" means 18, 19, or 20 points).

§ 52.6327 Color and clarity.

(a) (*A*) *Classification.* Frozen concentrated apple juice which has a good color and clarity may be given a score of 18 to 20 points. "Good color and clarity" means that the color is bright and transparent and of a light golden appearance, but not darker than USDA Honey Color Standards "White" designation.

(b) (*B*) *classification.* Frozen concentrated apple juice which has a reasonably good color and clarity may be given a score of 16 or 17 points. "Reasonably good color and clarity" means the color is slightly dull or slightly turbid; may be light golden to light amber in appearance but not darker than USDA Honey Color Standards "Light Amber" designation. Frozen concentrated apple juice that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule).

(c) (*SStd.*) *classification.* Frozen concentrated apple juice that is dull, turbid or otherwise fails the requirements of U.S. Grade B may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.6328 Defects.

(a) *General.* The factor of defects refers to the degree of freedom from sediment or other residues, dark specks, or any other defects which affect the appearance or palatability of the product.

(b) (*A*) *classification.* Frozen concentrated apple juice which is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that the frozen concentrated apple juice after reconstitution may have a slight amount of sediment or residue of an amorphous nature; may have not more than a trace of dark specks or of sediment or residue of a non-amorphous nature, or of any other defects; *Provided*, That all defects present do not more than slightly affect the appearance or palatability of the product.

(c) (*B*) *classification.* Frozen concentrated apple juice which is reasonably free from defects may be given a score of 16 or 17 points. "Reasonably free from defects" means that the frozen concentrated apple juice after reconstitution may have a slight amount of sediment or residue of an amorphous or non-amorphous nature, of dark specks, or of any other defects; *Provided*, That all defects present do not materially affect the

V 39 I 94
MAY 14 74
XUM

appearance or palatability of the product. Frozen concentrated apple juice that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule).

(d) *(SStd.) classification.* Frozen concentrated apple juice which fails to meet the requirements for U.S. Grade B may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.6329 Flavor and aroma.

(a) *General.* The factor of flavor and aroma refers to the degree of excellence and palatability of a distinct apple juice flavor and aroma typical of apple juice that has been properly processed.

(b) *(A) classification.* Frozen concentrated apple juice which has a very good flavor and aroma may be given a score of 54 to 60 points. "Very good flavor and aroma" means that the apple juice has a fine, distinct fruity flavor and bouquet, that is free from astringent flavors, flavors due to overripe apples, oxidation, caramelization, ground or musty flavors or any other undesirable flavors and aromas; and, in addition, shall meet the following requirement:

Brix-Acid Ratio—Minium-21: 1
Maximum-53: 1

(c) *(B) classification.* Frozen concentrated apple juice which has a good flavor and aroma may be given a score of 48 to 53 points. "Good flavor and aroma" means that the frozen concentrated apple juice has a normal flavor and bouquet, may be slightly astringent; or may be slightly affected by overripe apples, carmelization, or ground or musty flavors, but is free from objectionable flavors or objectionable aromas of any kind; and, in addition, meets the following requirement:

Brix-Acid Ratio—Minimum-18:1
Maximum-60:1

Frozen concentrated apple juice that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule).

(d) *(SStd.) classification.* Frozen concentrated apple juice that fails to meet the requirements of U.S. Grade B may be given a score of 0 to 47 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS

§ 52.6330 Explanation of terms.

(a) "Brix" means soluble solids of the concentrated apple juice as measured on the Refractometer, expressed as percent by weight sucrose (degrees Brix) with correction for temperature to the equivalent at 20° C. (68° F.), but without correction for invert sugar or other substances. The Brix of frozen concentrated apple juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as malic acid) per 100 grams of concentrated juice determined by titration with a standard sodium hydroxide solution, using phenolphthalein as an indicator or any other satisfactory indicator and using an acid factor of 0.067.

(c) "Brix-Acid ratio" means the ratio of the Brix of the concentrated juice in degrees Brix to the grams of acid (calculated as malic acid) per 100 grams of concentrated juice.

(d) The USDA Honey Color Standards, referenced in § 52.6327, and information concerning procurement and use is available from:

Chief, Processed Products Standardization and Inspection Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250.

LOT COMPLIANCE

§ 52.6331 Ascertaining the grade of a lot.

The grade of a lot of frozen concentrated apple juice covered by these standards is determined by the procedures set forth in the "Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products" (§§ 52.1 to 52.83).

[7 CFR Part 928]

PAPAYAS GROWN IN HAWAII

Proposed Increase in Expenses

This notice invites comment relative to a proposed increase in the expenses reasonable and likely to be incurred by the Papaya Administrative Committee under Marketing Order 930 during the fiscal year 1974. The proposed increase amounts to $12,000, and the addition of this amount would increase the total of approved expenses to $375,288. The proposed action would not necessitate an increase in the current assessment rate as funds equal to the proposed increase have been allocated to the committee by the counties of Hawaii and Kauai.

Consideration is being given to the following proposal, submitted by the Papaya Administrative Committee, established under the marketing agreement and Order No. 928 (7 CFR Part 928), regulating the handling of papayas grown in Hawaii, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer the provisions thereof:

That the Secretary find paragraph (a) of § 928.203 *Expenses, rate of assessment, and carryover of unexpended funds* (39 FR 5184) be amended as follows:

§ 928.203 Expenses, rate of assessment, and carryover of unexpended funds.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Papaya Administrative Committee during the period January 1, 1974 through December 31, 1974, will amount to $375,288.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposal shall file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than May 25, 1974. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: May 9, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 74–EA–27]

CONTROL ZONE

Proposed Alteration

The Federal Aviation Administration is considering amending § 71.171 of Part 71 of the Federal Aviation Regulations so as to alter the Weyer's Cave, Va., Control Zone (39 FR 436).

The present control zone is a part-time zone of 18 hours and based on the weather observations of Piedmont Airlines. Because of shifting schedules the zone period will vary from time to time. To preclude a need to change by a series of amendments, the description will be altered to permit change by Notice in the Airman's Information Manual.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before June 13, 1974 will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Weyer's Cave, Virginia, proposes the airspace action hereinafter set forth:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations so as to alter the description of the Weyers Cave, Va. Control Zone by deleting the last sentence in the text and by substituting, "This control zone is effective during the specific days and times established in advance by a Notice to Airmen. The effective times will thereafter be published in the Airman's Information Manual."

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on April 24, 1974.

JAMES BISPO,
Deputy Director, Eastern Region.

FEDERAL ENERGY OFFICE

[10 CFR Part 211]

SYNTHETIC NATURAL GAS FEEDSTOCK ALLOCATION

Advance Notice of Proposed Rulemaking; Public Hearing

Notice is hereby given that the Federal Energy Office will receive written comments and hold a public hearing in Washington, D.C. with respect to the allocation of petroleum feedstocks to synthetic natural gas facilities. By amendments to Part 211, issued May 1, 1974, to become effective June 1, 1974, the FEO has made clear its intention to subject Synthetic Natural Gas (SNG) feedstocks to allocation regulations. The purpose of this proceeding is to develop further a record upon which FEO may base its determination as to whether the June 1 amendments to Part 211, or some other treatment under the Mandatory Petroleum Allocation Regulations is appropriate.

The background of this proceeding and some of the issues it raises are as follows:

Available supplies of natural gas have not increased sufficiently during recent years to meet demand. This has resulted in an increased demand for alternate fuels. An alternative which has been developed by many gas distribution and transmission companies is the manufacture of SNG from petroleum products such as propane, butane, natural gas liquids, and naphtha. Currently, there are several SNG plants in various stages of operation, start-up, construction, or planning.

The January 15, 1974 Mandatory Petroleum Allocation Regulations, effective through May 31, 1974, do not provide for allocation of petroleum feedstocks to SNG plants. It is the purpose of the FEO, in promulgating the June 1 amendments to Part 211 and in holding hearings on these amendments, to clarify the status of SNG manufacturing as a use of particular feedstocks and to provide for the allocation of these feedstocks in accordance with appropriate criteria. The proposed criteria are intended to take into account the factors pertaining to the advisability of utilizing significant volumes of petroleum products for the production of SNG.

Among the relevant issues to which the interested parties to this proceeding should address themselves are the following:

(1) The effects of any proposed rule which would allocate SNG feedstocks on the basis of current requirements, without regard for other criteria;

(2) The effects of any proposed rule which would allocate SNG feedstocks on a case-by-case basis, with consideration of the following additional criteria:

(a) The availability, including source, volume, and interchangeability, of alternate SNG feedstocks;

(b) The degree to which an SNG manufacturer has curtailed supplies of natural gas to its interruptible customers;

(c) The existence, character, and effect of Federal or state natural gas curtailment plans and policies affecting the market area served by an SNG manufacturer;

(d) The existence, character, and effect of Federal or state regulatory policies respecting the utilization of SNG as a supplementary source of gas supply;

(e) The availability of alternative sources of natural gas and the extent to which a manufacturer has attempted to use such sources;

(f) The thermal efficiency, taking both distribution and the reformation process into account, of alternate uses of SNG feedstocks;

(g) The economic and technical feasibility of utilization of a particular petroleum product as a SNG feedstock, including both the economic impact on the manufacturer or distributor and the effect on cost of energy to consumers in a particular market area;

(h) The projected market growth of the utility and the projected SNG plant capacity over the period of allocation.

(i) The effect of allocation on demand for scarce petroleum products in a particular market area;

(j) The impact of an allocation decision on market area employment opportunities;

(k) The environmental impact of allocation options within a market area;

(3) The effects of restricting allocation of SNG feedstocks to customers according to established base period volumes with adjustment according to procedures specified in § 211.13, issued May 1, 1974 and effective June 1, 1974; and

(4) Any other factors or issues which are relevant to the proposed regulations for allocation of SNG feedstocks.

The public hearing in this proceeding will be held beginning at 10:00 a.m., on Tuesday, May 28, 1974 and Wednesday, May 29, 1974, at the New Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, to receive comments from interested persons on the matters set forth herein.

Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to the Executive Secretariat of the Federal Energy Office, and must be received before 5:30 p.m., e.d.s.t., Tuesday, May 21, 1974. Such a request may be delivered by hand to Room 3309, New Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:30 a.m. and 5:30 p.m., Monday through Friday, or may be submitted by Telex, 710–822–0155. The request should identify the individual who would testify, describe the interest concerned, state, if appropriate, why the individual is a proper representative of a group or class of persons which has an interest, and provide a telephone number where the individual may be contacted through May 22, 1974.

Each person selected to be heard will be so notified by the Federal Energy Office before 5:30 p.m., e.d.s.t., May 22, 1974.

The Federal Energy Office reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

A Federal Energy Office official will preside at the hearing. It will not be a

V 39 I 94
MAY 14 74
XUM

judicial or evidentiary type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by the Federal Energy Office with respect to the subject matter of the hearing will be based on all information available to the Federal Energy Office. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to the Executive Secretariat before 5:30 p.m., e.d.s.t., May 24, 1974. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The presiding officer will determine whether a question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be made available for inspection at the Public Reference Facility of the Federal Energy Office, Room 3130, New Post Office Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:30 a.m. and 5:30 p.m. Monday through Friday. Anyone may buy a copy of the transcript from the reporter.

This public hearing will be conducted under the authority of section 5 of the Emergency Petroleum Allocation Act of 1973.

The Federal Energy Office is inviting public participation in the form of written submissions as well as oral presentations. All written submissions received by the Federal Energy Office not later than 5:30 p.m., e.d.s.t., Wednesday, May 29, 1974, will be considered by the Federal Energy Office before it makes its determination in this proceeding.

Fifteen copies of all written submissions should be sent to the Federal Energy Office in Washington, D.C. All submissions should be clearly identified on the outside of the envelope and on the documents submitted by the designation "Synthetic Natural Gas Feedstock Allocation Regulations." If submitted by mail they should be addressed to the Federal Energy Office, Executive Secretariat, Box AH, Washington, D.C. 20461. If submitted by hand, they should be delivered to the Federal Energy Office, Executive Secretariat, Room 3309, The New Post Office Building, 12th and Pennsylvania Avenue, Washington, D.C.

Any information or data considered by the person furnishing it to be confidential must be so indicated and submitted in writing, one copy only. The Federal Energy Office reserves the right to determine the confidential status of the information or data and to treat it accordingly.

All comments received by May 29, 1974 and all other relevant information will be considered by the Federal Energy Office before final action is taken on the regulations.

Issued at Washington, D.C., on May 9, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

[FR Doc.74-11040 Filed 5-9-74;11:49 am]

FEDERAL TRADE COMMISSION

[16 CFR Part 3]

RULES OF PRACTICE AND PROCEDURE

Submission of Information

Notice is hereby given that the Federal Trade Commission, pursuant to sections 5, 6, and 9 of the Federal Trade Commission Act, (38 Stat. 719, 721, 722, as amended, (15 U.S.C. 45, 46 and 49) (1970)) (hereinafter, "the Act") and the Administrative Procedure Act, 81 Stat. 54, 80 Stat. 383, (5 U.S.C. 552(a) (1) (E), 553) (1970)) is proposing a new § 3.40 to its rules of practice, 16 CFR 3.40.

The proposed rule would operate to bar the offer or introduction into evidence, as substantiation for an advertising claim, of substantiating materials which were required to be but were not timely submitted in response to Commission process under sections 6 or 9 of the Act calling for such materials. It would be applicable in any instance where the Commission, whether by an order to file a special report under section 6 of the Act, or by a subpoena issued under section 9 of the Act, requires the submission of substantiation for a representation made in advertising.

In 1971 the Commission commenced a major program, generally known as the Advertising Substantiation Program, under which advertisers have been required to submit to the Commission those materials in their possession which substantiate claims made by them in advertising. (See Resolution requiring submission of special reports relating to advertising claims and disclosure thereof by the Commission in connection with a public investigation, 36 FR 12058, amended, 36 FR 14680 (1971).) Orders requiring the submission of substantiation have been issued to dozens of advertisers, and have elicited thousands of pages of materials proffered in substantiation of numerous advertising claims. The analysis of these materials in turn has often required extensive consultation with experts both within any without the Commission in order to assess the adequacy and reasonableness of the material to substantiate the claims. Significant staff resources have been and continue to be devoted to this program.

In 1972, in the case of Pfizer, Inc., 81 F.T.C. 2.3 (1972), the Commission confirmed that it is a violation of section 5 of the Federal Trade Commission Act for an advertiser to make an affirmative representation without having a reasonable basis for making that representation at the time it is disseminated. The Commission's opinion in that case requires that an advertiser have in his possession such a reasonable basis before the representation is first made, and that he actually rely upon that basis in making the representation. Thus, when the Commission requires the submission of substantiating materials, it is seeking the submission of materials which, under Pfizer, are already required to be in the advertiser's possession, and to be relied upon by him, at the time the representation is initially made. While an advertiser may, in responding to a Commission order for substantiation, find it necessary to organize, describe or summarize various materials used by him as a basis for a representation, the basic materials nevertheless are those which should have been available and relied upon by him at the time the advertisement was first disseminated.

Notwithstanding the requirement of Pfizer, however, the Commission has encountered significant difficulties in obtaining timely and complete responses to its orders to submit substantiating materials. For example, companies asked for all tests and specific formulas have refused to submit the information in some cases. Some have submitted only conclusions when all materials relating to a test were ordered to be produced. Information has sometimes been submitted to the Commission long after the due date for the compulsory process return with no adequate reason given for the delay. Materials clearly called for by the specific terms of the orders have been withheld by companies on the ground that it was not sufficiently clear why the Commission was seeking the particular information. The nature and frequency of these past problems indicate that, in addition to the statutory penalties for failure to comply with Commission process, some further incentive is needed to ensure prompt and complete responses and, at the same time, to enable the Commission's administrative adjudications to proceed without awaiting the outcome of possible penalty proceedings in the Federal courts.

Prompt receipt of substantiating materials sought by Commission process is of great practical importance to the Commission. An investigation to determine whether an advertiser lacked a reasonable basis for the claim obviously requires that all of the actual materials in possession of and relied upon by the advertiser be fully evaluated. Without all of those materials, the investigation cannot proceed expeditiously. Therefore, the advertiser, by delay, can actually control the pace of the Commission's investigation of a possible violation of law.

Substantiating materials frequently must be analyzed by independent scientific experts. When there are delays or only partial submissions, the expert analysis either cannot go forward at all or is needlessly protracted, thereby incurring additional expense to the Commission. An incomplete submission not known by the Commission's staff to be incomplete may result in consultations with experts, and the preparation of analyses by the experts, which are then rendered inapplicable by the later submission of additional substantiating materials. The cost of expert consultations and aid are thereby multiplied. Moreover, without a complete submission of the advertiser's substantiating materials, the staff of the Commission cannot promptly and conclusively decide whether to advise the Commission that there is reason to believe that a violation, consisting of the dissemination of a claim in advertising for which the advertiser did not possess and rely upon a reasonable basis, has occurred. The many instances where there has not been timely compliance with compulsory process for substantiation have complicated the Commission's working arrangements with independent experts, led to unnecessary public expense and to delays, and have frustrated in important ways the Commission's attempt to protect the consumer, through efficient use of the Commission's resources, from exposure to unsubstantiated representations in advertising.

The proposed rule is intended to overcome these difficulties. It will enable the staff of the Commission to obtain more complete and timely evaluations of the adequacy of substantiation for a claim, and to determine more confidently whether there is reason to believe that a violation has occurred, on a timetable which is not subject to a substantial degree of control by the advertiser. The rule provides no substantive duty beyond that stated in Pfizer. The rule provides an added incentive to advertisers to make timely and complete response to Commission process calling for substantiation.

The rule prohibits a party which had been required to submit substantiation for a representation contained in an advertisement from introducing, or making an offer of proof with respect to, any materials which were required to be but were not timely submitted in response to the compulsory process. The bar on introduction or offer is for any purpose relating to an allegation that the party lacked a reasonable basis or other adequate substantiation for the representation which was the subject of the compulsory process. The rule would exclude materials only with respect to the issue of lack of reasonable basis or adequate substantiation. If a complaint, in addition to alleging that the representation lacked a reasonable basis or adequate substantiation, also alleged that a representation was false, the exclusionary provisions of the rule would not bar introductions or offers with respect to the allegation of falsity.

It is recognized that present § 3.38 of the Commission's rules of practice, 16 CFR 3.38 (1973), might be available to bar the introduction of evidence called for but not submitted in response to compulsory process, although this section has heretofore been applied with respect to orders issued in the course of adjudication and not investigation. While present § 3.38 is a sound rule of general application, the nature of the Commission's advertising substantiation program requires, and the duties imposed by Pfizer make reasonable, the imposition of a different rule with respect to the consequences of failure to respond fully and promptly to advertising substantiation orders.

By providing greater certainty as to the consequences of failing to comply in full with compulsory process, and by creating greater incentives for timely and complete responses, the proposed rule would significantly reduce the possibility of the Commission investing significant time and effort in an investigation or proceeding only to have the advertiser proffer additional substantiating materials which were called for but were not submitted initially in response to the compulsory process. While the possibility still exists under the proposed rule that untimely proffers will be made, its likelihood is significantly reduced, thereby reducing the probability of commitments of scarce Commission resources which are not fruitful. Because Pfizer requires that an advertiser have substantiating materials in his possession and that he rely upon them in making the claim, the proposed rule is a reasonable solution to the problems which have been encountered.

The rule provides two exceptions to the application of the exclusionary provision. The first exception allows a respondent to introduce materials not timely submitted if he can demonstrate that, despite the exercise of "due diligence," he could not have timely submitted the materials in response to the compulsory process. In such an instance, the advertiser, in order to make out an exception, must also have promptly notified the Commission of the existence of the material immediately upon its discovery.

The second exception does not require a showing of due diligence, and would allow the introduction of materials which so clearly, directly and substantially support the representation at issue that there no longer appears to be a genuine issue of material fact concerning the existence of a reasonable basis for the representation in question, and there is then a substantial question whether the proceeding is any longer in the public interest. While the failure by reason of lack of due diligence to submit materials called for by compulsory process might subject the advertiser to civil or criminal penalties, the existence of material satisfying this exception nevertheless should be within the cognizance of the Administrative Law Judge and the Commission so that a determination can be made whether an administrative proceeding under section 5 should be continued. While this exception deals with a remote contingency, it is deemed appropriate to ensure that the operation of the rule does not result in the conduct of adjudications as to which there is a lack of public interest.

It is proposed to add § 3.40 to Part 3 to read as follows:

§ 3.40 ------

(a) If a person, partnership or corporation, is required through compulsory process under section 6 or 9 of the Act to submit to the Commission all substantiation or documentation in support of an express or implied representation contained in an advertisement, such person, partnership or corporation shall not thereafter be allowed, in any adjudicative proceeding in which it is alleged that the person, partnership or corporation lacked a reasonable basis or other adequate substantiation for the representation, and for any purpose relating to such allegation, to introduce into the record, whether directly or indirectly through references contained in documents or oral testimony, nor to make an offer of proof with respect to, any material of any type whatsoever which was required to be but was not timely submitted in response to said compulsory process.

(b) The Administrative Law Judge shall at any stage exclude all such material, or any reference thereto, unless the person, partnership or corporation demonstrates in a hearing, and the Administrative Law Judge finds, (1) that by the exercise of due diligence the material could not have been timely submitted in response to the compulsory process, and that the Commission was notified of the existence of the material immediately upon its discovery; or, (2) that the material so clearly, directly and substantially supports the representation at issue that there no longer appears to be a genuine issue of material fact concerning the existence of a reasonable basis or other adequate substantiation for the representation and there is a substantial question whether the proceeding is in the public interest. Said findings of the Administrative Law Judge shall be in writing and shall specify with particularity the evidence relied upon. The rules normally governing the admissibility of evidence in Commission proceedings shall in any event be applicable to any material coming within the above exceptions.

Comments on the foregoing proposal may be sent to Secretary, Federal Trade Commission, Pennsylvania Avenue and 6th Street NW., Washington, D.C. 20580 on or before June 28, 1974. All comments will be entered on the public record at the above address and will be available for inspection in Room 130 at the above-mentioned address during normal business hours.

Dated: May 14, 1974.

CHARLES A. TOBIN,
Secretary.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF DEFENSE

Office of the Secretary

ADVISORY GROUP ON ELECTRON DEVICES

Working Group Meetings

The Department of Defense Advisory Group on Electron Devices, Working Groups on Low Power Devices and Microwave Devices, will meet in closed sessions on dates indicated below at 201 Varick Street, New York, New York:

Working Group on Low Power Devices, 16 May 1974.
Working Group on Microwave Devices, 29 May 1974.

The purpose of the DoD Advisory Group on Electron Devices, and various working groups thereof, is to provide the Director of Defense Research and Engineering and the Military Departments with advice and recommendations on the conduct of economical and effective research and development programs in the field of electron devices, e.g., lasers, radar tubes, transistors, infrared sensors, etc. The group is also the vehicle for interservice coordination of planned R&D efforts.

In accordance with Pub. L. 92–463, section 10, paragraph (d), it is hereby determined that the AGED meetings concern matters listed in section 552(b) of title 5 of the United States Code, particularly subparagraph (1) thereof, and that the public interest requires such meetings be closed insofar as the requirements of subsections (a)(1) and (a)(3) of section 10, Pub. L. 92–463 are concerned.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

MAY 10, 1974.

NEVADA

Designation of East Walker River Scenic Area

Pursuant to the authority in 43 CFR Subpart 2070, and the authorization from the Director dated December 4, 1973, I hereby designate the public lands in the following described area as the East Walker River Scenic Area:

MOUNT DIABLO MERIDIAN

T. 7 N., R. 26 E.,
Sec. 25, lots 3, 4, SW¼NE¼;
Sec. 36, N½NE¼.

T. 7 N., R. 27 E.,
Sec. 3, lot 4, SW¼NW¼, NW¼SW¼;
Sec. 4, lots 1, 2, S½NE¼, S½;
Sec. 5, S½SW¼, SE¼;
Sec. 8, SE¼SE¼;
Sec. 7, E½E½;
Sec. 8, N½NE¼, NW¼, W½SW¼;
Sec. 9, NW¼NE¼, N½NW¼;
Sec. 17, W½NW¼, NW¼SW¼;
Sec. 18, lots 2, 3, 4, 5, 7, 8, SE¼NW¼, E½SW¼, SE¼;
Sec. 19, NE¼NE¼;
Sec. 30, lot 4, N½NE¼.

T. 8 N., R. 27 E.,
Sec. 5, SE¼NW¼, NE¼SW¼;
Sec. 6, lot 1;
Sec. 8, NE¼NE¼;
Sec. 9, SW¼NW¼, NE¼SW¼, N½SE¼, SE¼SE¼;
Sec. 15, NE¼NW¼;
Sec. 22, lot 3, N½NE¼;
Sec. 27, lots 3, 4, 5, 6, W½SW¼;
Sec. 28, lots 1, 4, 5, 8;
Sec. 33, lots 1–8 incl.;
Sec. 34, lots 6, 7, W½NW¼.

The area described aggregates 3,712.24 acres of national resource lands located along the East Walker River in Lyon County, Nevada.

The East Walker River Scenic Area is a "Class III Natural Environment Area" under the Bureau of Outdoor Recreation system of classification.

EDWARD F. SPONG,
Acting State Director, Nevada.

[OR 12177]

OREGON

Notice of Proposed Withdrawal and Reservation of Land

MAY 6, 1974.

The Bureau of Land Management, Department of the Interior, has filed an application, Serial Number OR 12177, for the withdrawal of public land described below, from all forms of appropriation under public land laws, including the mining laws (30 U.S.C., Ch. 2), but not from leasing under the mineral leasing laws.

The applicant desires to have the area withdrawn for the purpose of establishing a scenic corridor.

All persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing no later than June 11, 1974, to the undersigned officer of the Bureau of Land Management, Department of the Interior (729 NE. Oregon St.), P.O. Box 2965, Portland, Oregon 97208.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing potential demand for the land and its resources.

After receipt of comments from interested parties, he will prepare a report for consideration by the Secretary of the Interior who will determine whether or not the land will be withdrawn as requested by the Bureau of Land Management.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant it, a public hearing will be held at a convenient time and place which will be announced.

The lands involved in the application are:

WILLAMETTE MERIDIAN

ABERT RIM SCENIC CORRIDOR

T. 36 S., R. 21 E.,
Sec. 3, lots 2 and 3, E½SW¼, W½SE¼, SW¼NE¼, and SE¼NW¼;
Sec. 10, E½ and E½NW¼;
Sec. 11, lot 4;
Sec. 15, E½.

T. 35 S., R. 21 E.,
Sec. 1, lot 1, S½NE¼ and S½;
Sec. 2, lots 1 and 2, SE¼SE¼;
Sec. 11, lots 1, 2, 3, and 4, SE¼, E½SW¼, S½NE¼, and NE¼NE¼;
Sec. 12, NW¼, W½SW¼, NE¼SW¼, and NW¼NE¼;
Sec. 13, W½NW¼;
Sec. 14, N½, N½S½, and S½SW¼;
Sec. 15, lots 1, 2, 3, and 4, SE¼ and SE¼NE¼;
Sec. 22, lots 1 and 2, S½, NE¼, and E½NW¼;
Sec. 23, N½NW¼;
Sec. 27, lots 1, 2, 3, and 4, SW¼, W½SE¼, S½NW¼, and SW¼NE¼;
Sec. 28, E½, SE¼NW¼, and NE¼SW¼;
Sec. 33, E½;
Sec. 34, W½ and W½E½.

T. 34 S., R. 22 E.,
Sec. 6, lots 3, 4, 5, 6, and 7, SE¼NW¼.

T. 34 S., R. 22 E.,
Sec. 6, lots 2 to 8 inclusive, E½SW¼, SE¼NW¼, SW¼NE¼, and NW¼SE¼;
Sec. 7, lots 1, 2, 3, and 4, E½W½;
Sec. 18, lots 1 2, 3, and 4, E½W½, W½SE¼, and SW¼NE¼;
Sec. 19, lots 1, 2, 3, and 4, E½W½ and NW¼NE¼;
Sec. 30, lots 1, 2, 3, and 4, E½W½;
Sec. 31, lots 1, 2, 3, and 4, E½W½.

T. 34 S., R. 21 E.,
Sec. 1, lots 1, 2, and 3;
Sec. 12, lots 1, 2, 3, and 4;
Sec. 13, lots 1, 2, 3, and 4;
Sec. 24, lots 1, 2, 3, and 4;
Sec. 25, lots 1, 2, 3, and 4.

T. 33 S., R. 22 E.,
Sec. 3, lots 2 and 3, W½SE¼, SE¼NW¼, SW¼NE¼, E½SW¼;

Sec. 10, NE¼, SW¼, W½SE¼, and E½NW¼;
Sec. 15, W½W½ and, NW¼NW¼;
Sec. 16, E½, E½W½;
Sec. 20, lot 6, SE¼, SE¼NE¼, and SE¼SW¼;
Sec. 21, NW¼, N½SW¼, SW¼SW¼, W½NE¼, NE¼NE¼;
Sec. 29, W½, W½NE¼, NE¼NE¼;
Sec. 30, lots 1, 2, 3, and 4, SE¼SE¼;
Sec. 31, lots 1, 2, 3, and 4, SE¼, S½NE¼, NE¼NE¼;
Sec. 32, N½NW¼, SW¼NW¼, NW¼SW¼.

The areas described aggregate 12,284 acres, in Lake County, Oregon.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.74–11065 Filed 5–13–74;8:45 am]

[OR 10970]

OREGON

Notice of Proposed Withdrawal and Reservation of Lands

MAY 6, 1974.

The Department of Agriculture, on behalf of the Forest Service, has filed application, OR 10970, for withdrawal of the lands described below, from all forms of appropriation under the mining laws (30 U.S.C., Ch. 2), but not from leasing under the mineral leasing laws, subject to valid existing rights.

The applicant desires the land for the Sparks-Devils Lakes Recreation Area.

All persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing no later than June 11, 1974, to the undersigned officer of the Bureau of Land Management, Department of the Interior (729 NE. Oregon St.), P.O. Box 2965, Portland, Oregon 97208.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate lands needed for purposes more essential than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

He will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency.

The determination by the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The land involved in the application is:

DESCHUTES NATIONAL FOREST

WILLAMETTE MERIDIAN

T. 18 S., R. 8 E., W.M., Oregon,
Sec. 4, E½SE¼;
Sec. 9, NE¼;
Sec. 10, NW¼, SE¼;
Sec. 11, NE¼, N½NW¼, SW¼NW¼, NW¼SW¼, S½S½, NE¼SE¼;
Sec. 12, SW¼SW¼;
Sec. 14;
Sec. 15, E½;
Sec. 22, NE¼NE¼;
Sec. 23, W½.

The area described contains approximately 2,330 acres, in Deschutes County, Oregon.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[Wyoming 45539]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Notice of Pipeline Application

MAY 6, 1974.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Kansas-Nebraska Natural Gas Company, Inc. has applied for a natural gas pipeline right-of-way across the following lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 34 N., R. 95 W.,
Sec. 26, SE¼NW¼, NE¼SW¼ and W½SE¼;
Sec. 35, NW¼NE¼.

The pipeline will convey natural gas from the Texaco Alkali Butte Unit No. 8 well in sec. 26 to existing gathering facilities in sec. 35, all in T. 34 N., R. 95 W.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82001.

PHILIP C. HAMILTON,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.74–11058 Filed 5–13–74;8:45 am]

National Park Service

CHESAPEAKE AND OHIO CANAL NATIONAL HISTORICAL PARK COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held on Saturday, May 25, 1974, at 9 a.m., at the Stephen Mather Training Center, Harpers Ferry, West Virginia.

The Commission was established by Public Law 91–664 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Miss Nancy Long (Chairman), Glen Echo, Maryland
Mrs. Caroline Freeland, Bethesda, Maryland
Hon. Vladimir A. Wahbe, Baltimore, Maryland
Mr. John C. Lewis, Hamilton, Virginia
Mr. Burton C. English, Berkeley Springs, West Virginia
Mr. James G. Banks, Washington, D.C.
Mr. Joseph H. Cole, Washington, D.C.
Mr. Ronald A. Clites, LaVale, Maryland
Mrs. Mary Miltenberger, Cumberland, Maryland
Dr. James H. Gilford, Frederick, Maryland
Mr. Grant Conway, Brookmont, Maryland
Mr. John C. Frye, Gapland, Maryland
Mr. Justice Douglas (Special Consultant)
Mr. Rome F. Schwagel, Keedysville, Maryland
Mr. Donald Frush, Hagerstown, Maryland
Mr. Henry W. Miller, Jr., Paw, Paw, West Virginia

The matters to be discussed at this meeting include:

1. Corps of Engineers Estuary Proposal
2. Riverview Park Development Plan
3. Land Acquisition Report
4. Review of 20th Annual Reunion Hike
5. Historical Studies Report
6. Master Plan
7. Volunteer Activities Report
8. Proposed Meeting with Maryland Bicentennial Commission

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited and it is expected that not more than 30 persons will be able to attend the sessions. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Richard L. Stanton, Associate Director, Cooperative Activities, National Capital Parks, at Area Code 202–426–6715. Minutes of the meeting will be available for public inspection two weeks after the meeting at the Office of National Capital Parks, Room 208, 1100 Ohio Drive, SW., Washington, D.C.

Dated: May 7, 1974.

ROBERT M. LANDAU,
Liaison Officer, Advisory Commissions, National Park Service.

Office of Hearings and Appeals

[Docket No. M 74–108]

FLORENCE MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), the Florence Mining Company has filed a petition to modify the application of 30 CFR 75.1405 to its Florence Nos. 1 and 2 Mines and its Dias

V 39 I 94 MAY 14 74 XUM

Mine located at Armagh, Huff, and Armagh, Pennsylvania, respectively.

30 CFR 75.1405 provides as follows:

All haulage equipment acquired by an operator of a coal mine on or after March 30, 1971, shall be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment. All haulage equipment without automatic couplers in use in a mine on March 30, 1970, shall also be so equipped within 4 years after March 30, 1970.

In support of its petition, Petitioner states the following:

1. Petitioner's mines utilize an all-belt conveyor system to transport coal from the underground working sections to the outside coal handling facilities.

2. Use of the track haulage system is limited to transportation of men, supplies and equipment from the surface to the off-track loading point. Men, supplies and equipment may be transported from that point to the faces in vehicles capable of travelling off-track.

3. Men are usually transported on rail (on track) in self-propelled unit vehicles which are not regularly coupled and uncoupled. Off rail (off-track) personnel may be transported in self-propelled, rubber-tired vehicles or on skids pulled by self-propelled, rubber-tired tractors.

4. Supplies and equipment are normally transported on rail (on track) in "rubber/rail" vehicles, equipped with retractable rubber wheels. These vehicles are pulled on track by steel-tired electrical locomotives. By engaging the rubber wheels, the vehicles are able to operate off rail (off-track) where they are pulled by self-propelled, rubber-tired tractors. All of Petitioner's supply cars which travel off rail (off-track) are "rubber/rail" vehicles.

5. Because of the exclusive use of a belt conveyor system to transport coal, the use of automatic couplers on equipment travelling on or off rail (track) will result in a diminution of safety to the miners in Petitioner's mines.

6. Petitioner's mines are characterized by entries having a relatively tighter and narrower radius of horizontal curve and by bottom grades which are more pronounced and undulating than mines using track haulage to transport coal. The uneven bottom contours, tight horizontal curves and the fixed position of the engaged rubber wheels on rubber/rail cars travelling off-track distort the horizontal and vertical alignment needed for reliable functioning of automatic couplers and cause excessive wear to, and/or jamming of, such couplers.

7. Since coal is not transported on Petitioner's tracks, the tracks and track road beds are not constructed to carry the thirty-five to fifty ton locomotives and the ten to thirty ton coal cars typically found in mines using track haulage to transport coal. In such mines, heavy duty ballasting of the track road bed and track alignment by means of welded plates are designed to accommodate the extremely heavy locomotives and coal cars and contribute substantially to reliable functioning of automatic couplers. The lighter weight track and ballasting, designed to accommodate the relatively lighter rubber/rail supply cars in Petitioner's mines, provide less uniform horizontal and vertical alignment of automatic couplers and cause excessive wear to, and/or jamming of, such couplers.

8. In light of the conditions stated above, use of automatic couplers in Petitioner's mines would present the following hazards to safety:

a. Excessive wear to automatic couplers would result in accidental uncoupling and possible derailment.

b. Automatic couplers which become jammed or accidentally uncoupled would in almost every instance require miners to position themselves between vehicles in order to effect the proper alignment for coupling.

Accordingly, the use of automatic couplers, whether on or off track, in Petitioner's mines would result in a diminution of safety to the miners in such mines.

9. The pin-and-drawbar couplers in use in Petitioner's mines are far less susceptible to excessive wear, jamming or accidental uncoupling from uneven alignment than automatic couplers and can be manipulated with much greater flexibility. These couplers, therefore, guarantee no less than the same measure of protection which would be afforded the miners by the use of automatic couplers at the affected mines.

Petitioner respectfully requests that the Secretary modify the application of section 314(f) by relieving Petitioner of the requirement to install automatic couplers on its equipment.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 13, 1974. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

GILBERT O. LOCKWOOD,
Acting Director,
Office of Hearings and Appeals.

MAY 3, 1974.

[Docket No. M 74-83]

R. AND E. COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), R. and E. Coal Corp. has filed a petition to modify the application of 30 CFR 77.1605(k) to its No. 1 Mine located at Bill Branch, Buchanan County, Virginia.

30 CFR 77.1605(k) provides as follows:

Berms or guards shall be provided on the outer bank of elevated roadways.

The alternate method which Petitioner proposes to establish in lieu of the mandatory standard is as follows:

1. A daily inspection of all coal-hauling vehicles shall be made and any defects detected shall be corrected before the vehicle is put into service. A record of the inspection and repair on each vehicle shall be kept and maintained by a supervisory employee.

2. Roadway surfaces shall be kept free of debris, excessive water and snow and ice, and maintained as free as practicable of small ditches (washboard effects).

3. A traffic system should be put into use for these roads requiring that loaded vehicles have the right-of-way on the high-wall side of roads regardless of their direction of travel.

4. Warning signs shall be posted designating curves, steep grades where trucks should shift to a lower gear, and where roadways are reduced to one-lane traffic. Stop signs shall be posted where one road intersects another, giving main haulage road traffic the right-of-way. Signs should also be posted designating passing points.

5. All equipment operators should be trained in the use of haulage equipment and the safety of vehicles on haulage roads.

6. All haulage vehicles shall have:
(a) Original manufacturers brakes
(b) Engine or Jacobs brakes
(c) Emergency (parking) braking system.

7. Adequate supplies of crushed stone or other suitable materials shall be stored at strategic locations along the haulage roads for use when the road surface becomes slippery.

8. A minimum width of 30 feet shall be provided and maintained, the roads shall be designated as single-lane roads.

9. On roads that afford only one traffic lane, a minimum width of 16 feet shall be maintained, with passing points provided at intervals of not more than 1,000 feet; if visibility is obscured by brush or other materials, passing points shall not be more than 500 feet apart.

10. Where abrupt drop-offs are present along the outer banks, super-elevation shall be provided to cause the vehicles to gravitate toward the high-wall side of the road.

11. All rules of the road (traffic system) shall be posted on the bulletin boards throughout the mine area, and such rules of the road shall be made part of the training and retraining programs.

Petitioner further states that the alternate method outlined above will, at all times, guarantee no less than the same measure of protection afforded the miners at the Petitioner's mine by the mandatory standard.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 13, 1974. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

GILBERT O. LOCKWOOD,
Acting Director,
Office of Hearings and Appeals.

MAY 3, 1974.

[FR Doc.74-11048 Filed 5-13-74;8:45 am]

[Docket No. M 74-111]

R & H MINING, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), R & H Mining, Inc., has filed a petition to modify the application of 30 CFR 75.1405 to its Petersburg Mine located at Petersburg, Indiana.

30 CFR 75.1405 provides as follows:

All haulage equipment acquired by an operator of a coal mine on or after March 30, 1971, shall be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment. All haulage equipment without automatic couplers in use in a mine on March 30, 1970, shall also be so equipped within 4 years after March 30, 1970.

To be read concurrently with § 75.1405 is § 75.1405-1 which provides as follows:

The requirement of § 75.1405 with respect to automatic couplers applies only to track haulage cars which are regularly coupled and uncoupled.

In support of its petition, Petitioner states the following:

(1) The Petersburg Mine of Petitioner has been in operation since the year 1967. Petitioner utilizes in the operation of its mine sixteen (16) haulage cars which are operated in two sets of eight (8) cars coupled together. Each set of eight (8) cars makes ten (10) round trips daily (five days each week) from the coal loading area to the bottom of the shaft for dumping. One set of cars is being dumped as the other set of cars is being loaded.

(2) The haulage cars are only uncoupled at the bottom of the shaft at the time of unloading and remain coupled during the time they are being loaded. The uncoupling is performed only by one experienced individual. This system has been used in the mine since the year 1967 and there have been no injuries. The cars are at complete rest during the uncoupling and unloading. Petitioner has used the same cars during its operation of its mine from 1967 to the present.

(3) Petitioner has attempted to locate and purchase new types of haulage cars and dump cars, equipped with the automatic coupling device, which would comply with the mandatory safety standard, but none are available. Petitioner has contacted custom machine shops to procure cars with automatic couplers but both the cost of manufacturing such cars and the length of wait for delivery of such cars are prohibitive to Petitioner. Petitioner would propose a continuation of its present system which requires a minimum of uncoupling.

(4) Petitioner would propose further training of its present experienced employee handling uncoupling. Petitioner believes that the method used by it in the operation of the mine by means of a minimum of uncoupling (only at unloading) by a single experienced employee charged with that operation only, guarantees no less than the same measure of protection provided by the mandatory safety standard.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 13, 1974. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 401 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

GILBERT O. LOCKWOOD,
Acting Director,
Office of Hearings and Appeals.

MAY 3, 1974.

[FR Doc.74-11051 Filed 5-13-74;8:45 am]

[Docket No. M 74-106]

RUSHTON MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Rushton Mining Company has filed a petition to modify the application of 30 CFR 75.1405 to its Rushton Mine located at Philipsburg, Pennsylvania.

30 CFR 75.1405 provides as follows:

All haulage equipment acquired by an operator of a coal mine on or after March 30, 1971, shall be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment. All haulage equipment without automatic couplers in use in a mine on March 30, 1970, shall also be so equipped within 4 years after March 30, 1970.

In support of its petition, Petitioner asserts that:

1. Petitioner currently utilizes link-and-pin couplers which are supplemented by two safety chains between each car.

2. Petitioner's haulage cars are of the on-track, off-track type capable of running not only on rails but also off rails when certain adjustments are made to the vehicle.

3. These haulage cars are primarily utilized to transport materials throughout the mine and consequently are utilized off-track a greater percentage of the time than on-track.

4. The subject mine has a very steep slope and an extremely uneven bottom which necessitates the use of the link-and-pin couplers for safety purposes.

5. Due to the surface condition of the mine floor the use of automatic couplers off-track would prove to be not only impractical but would result in the diminution of safety to the miners, in that said miners would be required to pass between the cars in order to line up the cars for automatic coupling on impact.

6. Because of the slope in the mine the use of automatic couplers on-track would result in the diminution of safety in that said couplers would lack any secondary system of control as is now provided by safety chains. The automatic couplers would also be more susceptible to disengaging under certain conditions.

7. The haulage cars utilized in the subject mine are neither cars moving primarily along tracks or rails, nor are they coupled and uncoupled on those rails or tracks in the normal course of routine operation.

8. Since an alternative method of achieving the purpose of said safety standard exists at the present time in the subject mine, and will afford the same measure of protection to the miners now afforded by such standard, and since the application of said standard would result in the diminution of safety to the miners, modification of said standard is required.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 13, 1974. Such requests or comments must be filed with the office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

GILBERT O. LOCKWOOD,
Acting Director,
Office of Hearings and Appeals.

CERTAIN EASTERN NATIONAL FOREST LANDS; ADDITION TO NATIONAL WILDERNESS PRESERVATION SYSTEM

Notice of Availability of Final Environmental Statement

Proposals to provide for the addition of certain Eastern National Forest Lands to National Wilderness Preservation System.

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the establishment of the following wilderness area:

Name	*Statement No.*
Southern Presidential-Dry River Wilderness, White Mountain National Forest, N.H.	USDA-FS-FES (Leg.) 74-66.

This environmental statement concerns a proposal to establish the area as a unit of the National Wilderness Preservation System.

The final environmental statement was filed with CEQ on April 25, 1974.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3231
12th St. & Independence Ave., SW.
Washington, D.C. 20250

USDA, Forest Service
1720 Peachtree Road, NW.
Atlanta, Georgia 30309

USDA, Forest Service
633 W. Wisconsin Ave.
Milwaukee, Wisconsin 53203

A limited number of single copies are available upon request to John R. McGuire, Chief, Forest Service, South Agriculture Bldg., 12th St. & Independence Ave. SW., Washington, D.C. 20250.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

R. MAX PETERSON,
Deputy Chief, Forest Service.

DEPARTMENT OF COMMERCE

Office of the Secretary

INDUSTRY ADVISORY COMMITTEES

Change in Name

On March 1, 1974, there was published (39 FR 7975) a notice of establishment concerning 26 Industry Technical Advisory Committees to advise the Secretary of Commerce and the President's Special Representative for Trade Negotiations in connection with the upcoming multilateral trade negotiations.

On April 5, 1974, the charters for these committees were filed in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (Supp. II, 1972)).

As filed, the charters reflected a change in the standard name from that which was published on March 1.

Specifically, each of the committees is now named as follows: "Industry Sector Advisory Committee on (industrial sector) for Multilateral Trade Negotiations", the word "Sector" having been substituted for the word "Technical" as originally announced. The 26 industrial sectors (e.g., Aerospace Equipment) are listed in the March 1 notice.

Dated: May 7, 1974.

HENRY B. TURNER,
Assistant Secretary for Administration.

[FR Doc.74-11062 Filed 5-13-74;8:45 am]

WATCHES AND WATCH MOVEMENTS

Allocation of Duty-Free Quotas; Virgin Islands, Guam, and American Samoa

On December 28, 1973, the Departments of the Interior and Commerce published a Joint Notice announcing the rules to be used by the Departments in the allocation of 1974 calendar year quotas for duty-free entry into the customs territory of the United States of watches and watch movements assembled in the Virgin Islands, Guam, and American Samoa (38 FR 35516). This notice provided that annual quotas for calendar year 1974 would be allocated as soon a spracticable after April 1, 1974 and would be based on the following criteria:

Virgin Islands. (1) The number of units assembled by each producer in the territory and entered by it duty-free into the customs territory of the United States during calendar year 1973; (2) the total dollar amount of wages subject to FICA taxes paid by such producer in the territory during calendar year 1973 to persons whose pay was attirbutable to its Headnote 3(a) watch assembly operations; and (3) the total net dollar amount of income taxes applicable to its calendar year 1973 Headnote 3(a) watch assembly operations.

In making allocations under these criteria, an equal weight of 40% was assigned to production and shipment history and to wages subject to FICA taxes, and a weight of 20% was assigned to the total net dollar amount of income taxes applicable to calendar year 1973 Headnote 3(a) watch assembly operations.

Guam. (1) The number of units assembled by each producer in the territory and entered by it duty-free into the customs territory of the United States during calendar year 1973, and (2) the total dollar amount of wages subject to FICA taxes paid by such producer in the territory during calendar year 1973 to persons whose pay was attributable to its Headnote 3(a) watch assembly operations.

In making allocations under these criteria, equal weight was assigned to production and shipment history and to wages subject to FICA taxes.

American Samoa. No allocation formula is provided for American Samoa as there is only one producer in the territory.

As a temporary measure, pending announcement of final statistics to be issued by the United States Tariff Commission on total apparent United States watch consumption during 1973, and the verification of data submitted in support of individual quota applications by producers located in the Virgin Islands, Guam, and American Samoa, initial 1974 calendar year quotas were allocated to eligible producers that had received duty-free watch quotas for calendar year 1973.

Representatives of the Departments visited each quota holder in the Virgin Islands, Guam, and American Samoa during March and April 1974 to verify the data submitted in support of individual quota applications. The verification indicated that firms had been generally accurate in reporting the number of units which were entered into the customs territory of the United States during calendar year 1973 as well as the amount of wages subject to FICA taxes paid during calendar year 1973 to persons whose pay was attributable to Headnote 3(a) watch assembly operations in the territories. However, a number of errors and discrepancies were found on some of the Virgin Islands applictaions in reporting the amount of income taxes applicable to calendar year 1973 Headnote 3(a) watch assembly operations.

The number of watches and watch movements authorized for shipment on or after January 1, 1974 under initial and supplemental initial quotas previously allocated by the Departments are to be applied against the following allocations which are issued for the full calendar year 1974. Quotas of producers located in the Virgin Islands reflect (1) adjustments made as a result of the verification of the data submitted by individual applicants; (2) adjustments made pursuant to section 7 of the 1974 allocation rules relating to new entrants to whom a quota allocation was made during calendar year 1973 and who did not have a full year's operation as a basis for computation of a quota for calendar year 1974; and (3) reallocation of voluntarily relinquished quota pursuant to section 2 of the 1974 allocation rules.

VIRGIN ISLANDS

Name of firm	*Number of units*
1. Admiral Time Inc.	147,342
2. Antilles Industries, Inc.	347,723
3. Atlantic Time Products Corp.	1,200,217
4. Belair Time Corporation	146,348
5. Belmont Industries	20,139
6. Consolidated Watch Industries Ltd. (formerly Customtime Corporation)	90,000
7. Hampden Watch Co., Inc. (formerly Clinton Watch Company)	125,000
8. Master Time Company, Ltd.	249,614
9. Micro Manufacturing Corporation	125,000
10. Quality Products Company, Inc.	263,490
11. Roza Watch Corporation	289,875
12. Sheffield of St. Croix Inc. (formerly R. W. Summers Time Corporation)	54,354
13. Standard Time Company	319,881
14. Sussex Watch Corporation	112,606
15. TMX, Ltd.	417,197
16. Unitime Corporation	721,008
17. Virgiline Watch Co., Inc.	12,204
18. Watches, Incorporated	232,002

GUAM

Name of firm	*Number of units*
1. Hallmark Watch Factory Inc.	84,100
2. Jun-Lau Watch Corp.	35,821
3. Marco Watch Co., Inc.	165,323
4. Phoenix Industries, Inc.	34,754
5. Stratton Watch Corporation	59,926
6. Westminster Time Corporation	84,076

AMERICAN SAMOA

Name of firm	*Number of units*
1. Pacific Time Corp.	232,000

Assigned quotas for the Virgin Islands and Guam may be adjusted at anytime during this calendar year in the event it becomes apparent that shipments through December 31, 1974 by any firm will be less than 90 percent of the number of units allocated to it.

Dated: May 10, 1974.

SETH M. BODNER,
Deputy Assistant Secretary for Resources and Trade Assistance, Department of Commerce.

FRED RADEWAGEN,
Acting Director, Office of Territorial Affairs, Department of the Interior.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

TOPICAL FLUORIDE PREPARATIONS FOR REDUCING INCIDENCE OF DENTAL CARIES

Notice of Status

From time to time questions have arisen regarding the safety and effectiveness of topical fluoride preparations which have been on the market for a number of years. Certain of these preparations have been offered for use in reducing the incidence of dental caries. None of these preparations has been the subject of an approved new drug application. These preparations have been and continue to be the subject of review by the over-the-counter (OTC) Dentifrice and Dental Care Agents Review Panel and the Dental Drug Products Advisory Committee.

The Dental Drug Products Advisory Committee has completed its review of published and unpublished data and information regarding certain classes of topical fluoride preparations, as submitted to the Food and Drug Administration in response to a notice published in the FEDERAL REGISTER of April 5, 1973 (38 FR 8684), and has recommended that the topical fluoride preparations described below should be made available to the public by professional application or on a prescription basis.

The Commissioner of Food and Drugs, having considered the request of the Dental Drug Products Advisory Committee, has concluded that the following unanimous recommendations of this Committee should be made available to the public:

1. Aqueous solutions of 1 to 2 percent sodium fluoride with a pH of approximately 7.0 are safe and effective in reducing the incidence of dental caries when used according to professionally accepted methods and when applied directly to the teeth by adequately trained personnel. Other substances such as coloring and flavoring agents may be added if they do not alter the safety or effectiveness of the product.

2. Aqueous solutions of acidulated phosphate sodium fluoride with a pH in the range of 3.0 to 4.0, that yield a fluoride ion concentration of approximately 1.2 percent, are safe and effective in reducing the incidence of dental caries when used according to professionally accepted methods and when applied directly to the teeth by adequately trained personnel. Other substances such as coloring and flavoring agents may be added if they do not alter the safety or effectiveness of the product.

3. Gels of acidulated phosphate sodium fluoride with a pH in the range of 4.0 to 4.5, that yield a fluoride ion concentration of approximately 1.2 percent, are safe and effective in reducing the incidence of dental caries when used according to professionally accepted methods and when applied directly to the teeth by adequately trained personnel. Gelling agents and other substances such as coloring and flavoring that may be added must not alter the safety or effectiveness of the product.

4. Freshly prepared aqueous solutions of 8 percent stannous fluoride are safe and effective in reducing the incidence of dental caries when used according to professionally accepted methods and when applied directly to the teeth by adequately trained personnel. Other substances such as coloring and flavoring agents should not be added. Aqueous solutions of stannous fluoride are unstable and must be prepared immediately before use.

5. Aqueous solutions of 0.2 percent sodium fluoride with a pH of approximately 7.0 are safe and effective in reducing the incidence of dental caries when applied to the teeth as a rinse once a week or once every 2 weeks. Other substances such as coloring and flavoring agents may be added if they do not alter the safety and effectiveness of the product.

6. Aqueous solutions of 0.05 percent sodium fluoride with a pH of approximately 7.0 are safe and effective in reducing the incidence of dental caries when applied once daily to the teeth as a rinse. Other substances such as coloring and flavoring agents may be added if they do not alter the safety and effectiveness of the product.

7. Aqueous solutions of acidulated phosphate sodium fluoride with a pH of approximately 4.0, that yield a fluoride ion concentration of approximately 0.02 percent, are safe and effective in reducing the incidence of dental caries when applied once daily to the teeth as a rinse. Other substances such as coloring and flavoring agents may be added if they do not alter the safety and effectiveness of the product.

Old drug monographs will be developed for the preparations described above. Pending the development of these monographs, these preparations will be regarded by the Food and Drug Administration as generally recognized as safe and effective, and not misbranded, if the labeling bears adequate information for safe and effective use of these preparations in reducing the incidence of dental caries when used under professional supervision.

The recommendations of the Dental Drug Products Advisory Committee will be made available to the OTC Dentifrice and Dental Care Agents Review Panel for their consideration as to whether appropriate labeling for the consumer can be developed so that some of these preparations may be available as OTC drugs.

Published data and information regarding the safety and effectiveness of the topical fluoride preparations reviewed by the Dental Drug Products Advisory Committee have been assembled and are on display in the office of the Hearing Clerk, Room 6-86, 5600 Fishers Lane, Rockville, MD 20852, and may be seen during regular working hours, Monday through Friday.

Dated: May 6, 1974.

SAM D. FINE,
Associate Commissioner for Compliance.

Health Services Administration

NATIONAL ADVISORY COUNCIL ON HEALTH MANPOWER SHORTAGE AREAS

Notice of Meeting and Agenda

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), the Administrator, Health Services Administration, announces the meeting date and other required information for the following National Advisory body scheduled to assemble during the month of May 1974:

Committee name	Date, time, place	Type of meeting and/or contact person
National Advisory Council on Health Manpower Shortage Areas.	May 31, 9 a.m., Parklawn Bldg., Conference Room B, 5600 Fishers Lane, Rockville, Md.	Open—Contact Howard Hilton, Parklawn Bldg., Room 6–05, 5600 Fishers Lane, Rockville, Md. Code 301–443–4437.

Purpose: The Council is charged with establishing guidelines and regulations to improve the delivery of health care services; assigning Public Health Service personnel to areas where medical manpower and facilities are inadequate to meet the health needs of persons living in such areas; and on a nationwide basis recommending the criteria and personnel on which selection of areas are based.

Agenda: Agenda items include presentation of program Status Reports; briefing of the Council on the New Options for Billing and Collection; a discussion of designation and approval process required by Pub. L. 92–585; discussion of termination policies and procedures for sites being discontinued; and work group discussion and reports on policy recommendations.

Agenda items are subject to change as priorities dictate.

The meeting is open to the public for observation and participation. Anyone wishing to participate, obtain a roster of members, or other relevant information should contact the person listed above.

Dated: May 8, 1974.

ANDREW J. CARDINAL,
Associate Administrator for Management, Health Services Administration.

Office of Education

NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION

Notice of Public Meeting

Notice is hereby given, pursuant to Federal Advisory Committee Act, Pub. L. 92-463, that the next meeting of the National Advisory Council on Extension and Continuing Education will be held on June 6-7, 1974, at San Clemente, California. The meetings on both days will begin at 9:00 a.m. local time.

The National Advisory Council on Extension and Continuing Education is authorized under Public Law 89-239. The Council is directed to advise the Commissioner of Education in the preparation of general regulations and with respect to policy matters arising in the administration of Title I, and to report annually to the President on the administration and effectiveness of all federally supported extension and continuing education programs, including community service programs.

The meeting of the Council shall be open to the public. The agenda for the meeting will include such topics as: Title I Evaluation; legislative activities for the Council; and future working agenda. All records of Council proceedings are available for public inspection at the office of the Council's Executive Director, located in Suite 710, 1325 G Street, NW., Washington, D.C.

EDWARD A. KIELOCH,
Executive Director.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[FDAA-432-DR; Docket No. NFD 192]

CALIFORNIA

Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11749 of December 10, 1973; and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744), as amended by Public Law 92-209 (85 Stat. 742); notice is hereby given that on May 7, 1974, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of California resulting from severe storms and flooding, beginning about March 29, 1974, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91-606. I therefore declare that such a major disaster exists in the State of California. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11749, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238, to administer the Disaster Relief Act of 1970 (Public Law 91-606, as amended), I hereby appoint Mr. Robert C. Stevens, HUD Region 9, to act as the Federal Coordinating Officer to perform the duties specified by Section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of California to have been adversely affected by this declared major disaster:

The County of:
Mendocino.

This disaster has been designated as FDAA-432-DR.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

Dated: May 7, 1974.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

HAWAII

Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11749 of December 10, 1973; and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744), as amended by Public Law 92-209 (85 Stat. 742); notice is hereby given that on May 7, 1974, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Hawaii resulting from heavy rains and flooding, beginning about April 19, 1974, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91-606. I therefore declare that such a major disaster exists in the State of Hawaii. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11749, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238, to administer the Disaster Relief Act of 1970 (Public Law 91-606, as amended), I hereby appoint Mr. Robert C. Stevens, HUD Region 9, to act as the Federal Coordinating Officer to perform the duties specified by Section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of Hawaii to have been adversely affected by this declared major disaster:

The Counties of:
Honolulu.
Kauai.

CIVIL SERVICE COMMISSION

FEDERAL EMPLOYEES PAY COUNCIL

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 2 p.m. on Wednesday, May 29, 1974, to continue discussions on the fiscal year 1975 comparability adjustment for the statutory pay systems of the Federal Government.

In accordance with the provisions of section 10(d) of the Federal Advisory Committee Act, it was determined by the Director of the Office of Management and Budget and the Chairman of the Civil Service Commission, who serve jointly as the President's Agent for the purposes of the Federal pay comparability process, that this meeting of the Federal Employees Pay Council would not be open to the public.

For the President's Agent.

RICHARD H. HALL,
Advisory Committee Management Officer for the President's Agent.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-32000/58]

NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-37, East Tower, 401 M Street, SW., Washington, D.C. 20460.

On or before July 15, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held for the 60-day period before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received within 60 days, the applicants against who the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 15, 1974.

APPLICATIONS RECEIVED

EPA Reg. No. 1448-28. Buckman Laboratories, Inc., 1256 North McLean Boulevard, Memphis, Tennessee 38108. *BL Busan 72A.* Active Ingredients: 2-(thiocyanomethylthio)benzothiazole 60%. Method of Support: Application proceeds under 2(b) of interim policy.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20029; FCC 74–432]

CONTINENTAL CABLEVISION OF NEW HAMPSHIRE, INC.

Petition for Special Relief; Hearing

In re petition of Continental Cablevision of New Hampshire, Inc., Manchester, New Hampshire, for special relief.

1. On December 19, 1973, Continental Cablevision of New Hampshire, Inc., filed a "Petition for Immediate and Ex Parte Relief" alleging unlawful and unreasonable collusive conduct on the part of United Broadcasting Company, Inc., United Cable Company of New Hampshire, Inc., and New England Telephone and Telegraph Company. Continental requested that a hearing be designated to investigate the conduct of United Cable and N.E. Telco—particularly whether N.E. Telco's treatment of multiple applicants for CATV pole attachments is consistent with announced Bell System policy and this Commission's rulings. Continental's petition was treated as an informal complaint pursuant to the provisions of Section 208 of the Communications Act of 1934, as amended. By a "Notice of Complaint" dated December 20, 1973, the Chief, Domestic Rates Division, Common Carrier Bureau, advised N.E. Telco that further construction would be at its own risk, and directed it either to satisfy the complaint or to advise the Commission of its inability or refusal to do so not later than January 2, 1974. On December 31, 1973, N.E. Telco filed an answer, and United Cable filed comments on January 10, 1974. Continental filed comments regarding N.E. Telco's answer on January 17, 1974. On March 13, 1974, the Commission adopted a "Letter to Thomas W. Scandlyn et al." FCC 74–259, —— FCC 2d ——, in which it found that "the conduct of United Cable and N.E. Telco [summarized in paragraph 2 below] appears to be unduly discriminatory and anti-competitive in nature" and cautioned that "unless the aforementioned conduct is immediately terminated, appropriate action will be taken." Thereafter, additional letter comments were filed by the interested parties as follows: American Telephone and Telegraph Company on March 22; New England Telco on March 22; United Cable on March 25; and Continental Cablevision on March 28.

2. The operative facts are set forth fully in our cited letter. For present purposes, they may be synopsized as follows: both Continental and United Cable are franchised to serve portions of Manchester; however, N.E. Telco will not act on Continental's pole attachment request until it executes a pole attachment agreement, and one condition of the pole attachment agreement is Continental's acceptance of N.E. Telco's recently adopted "first-come, first-served" policy regarding "make ready" costs. Under the "first-come, first-served" principle, the first operator on a pole bears the "make ready" costs for its single attachment, and the second operator bears the "make ready" costs for the second attachment; the result is that the second applicant must pay higher costs than the first applicant. In the meantime, United Cable, allegedly pursuant to appropriate contractual provisions, is proceeding to attach wire and hardware in the portions of the city in which Continental and United Cable are franchised to compete. In the present case, the ability of United Cable to attach wire and hardware to poles not needing "make ready" work, together with the additional cost to be incurred by Continental for its "make ready" work, could have significant impact on the competitive situation between Continental and United Cable in Manchester, and it appears that Continental would suffer discrimination if the "first-come, first-served" doctrine is applied.[1]

3. As indicated, we have already found substantial indication that the conduct of United Cable and N.E. Telco is discriminatory and anti-competitive in nature. The telephone companies and United urge that the Commission has not asserted jurisdiction over pole attachment agreements.[2] However, we do have jurisdiction over cable systems and authorize their carriage of distant television signals, and we have a substantial concern that they operate on a reasonable competitive basis. The situation presented here clearly warrants a hearing to determine whether United is doing so. In the meantime, as pointed out above, further implementation of the existing contract will go far to make impossible any remedial action which the hearing may show to be necessary. We do not believe that we can permit the status quo to be changed pending the hearing, and will therefore require that it be maintained pendente lite. See United States v. Southwestern Cable Co., 392 U.S. 157 (1968).[3] Since this procedure is unusual, however, we will sua sponte expeditiously consider lifting this stay before conclusion of this proceeding. Accordingly, all parties are directed to file comments (including any supporting evidence) whether this stay should be lifted, modified or kept in effect within thirty days of the release date of this Memorandum Opinion and Order.

4. Accordingly, in view of the above, *It is ordered*, That this proceeding is designated for hearing, at a time and place to be specified in a further Order, upon the following issues:

a. To determine the facts and circumstances surrounding the offering by New England Telephone and Telegraph Company of pole attachment contracts for Manchester, New Hampshire, to (a) United Cable Company of New Hampshire, Inc., and (b) Continental Cablevision of New Hamphire, Inc.

b. To determine in light of the evidence adduced pursuant to Issue 1, above, whether the conduct of United Cable Company of New Hampshire, Inc., and New England Telephone and Telegraph Company, Inc., has been unduly discriminatory and anti-competitive in nature with respect to Continental Cablevision of New Hampshire, Inc.'s efforts to obtain a pole attachment agreement to operate at Manchester, New Hampshire.

c. To determine, in light of the conclusion reached regarding Issue 2 above, what further action is required in order to serve the public interest.

It is further ordered, That American Telephone and Telegraph Company; New England Telephone and Telegraph Company; Continental Cablevision of New Hampshire, Inc.; United Cable Company of New Hampshire, Inc.; Chief, Cable Television Bureau; and Chief, Common Carrier Bureau are made parties to this proceeding.

It is further ordered, That United Cable Company of New Hampshire, Inc., has the burden of proceeding with respect to Issue 1(a); that Continental Cablevision of New Hampshire, Inc., has the burden of proceeding with Issue 1 (b); and that Continental Cablevision of New Hampshire, Inc., has the burden of proof with respect to Issues 2 and 3.

It is further ordered, That, pending the outcome of this proceeding, United Cable Company of New Hampshire, Inc., is directed to cease additional construction of its cable television system on New England Telephone and Telegraph Company's telephone poles where access has been obtained by means of the pole attachment contract here in issue in those areas for which Continental Cablevision of New Hampshire, Inc., has also sought a pole attachment contract.

It is further ordered, That, to avail themselves of the opportunity to be heard, the parties herein, pursuant to § 1.221(e) of the Commission's rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating their intention to appear on the date set for the hearing and present evidence on the issues specified in this Order.

It is further ordered, That the ruling as to temporary relief shall be effective on the third day, not counting Saturdays, Sundays, and holidays, after the day of release of this Opinion, provided that the ruling on temporary relief shall not be effective until judicial determination of the motion for stay in the case of any respondent which notifies the Commission within 2 days that it intends to seek judicial review and which seeks judicial review and a judicial stay within 14 days of the day of release of this opinion.

Adopted: April 17, 1974.

Released: May 3, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.74–11087 Filed 5–13–74;8:45 am]

[FCC 74–402]

U.S. CABLEVISION CORP. AND NEW YORK TELEPHONE CO.

Denial of Petition

In the matter of U.S. Cablevision Corporation, Complainant and New York Telephone Company, Defendant.

1. The Commission has before it for consideration a formal complaint filed on April 27, 1972, by the U.S. Cablevision Corporation, complainant, against the New York Telephone Company (hereinafter "NYTelco"), complainant's Motion to Make Answer More Definite and Certain, and NYTelco's Answer and Motion to Dismiss the subject complaint. Complainant is the operator of a cable television system in Hyde Park, New York and successor in interest to U.S. Cablevision Corporation whose corporate name complainant retained (hereinafter all references to "complainant" refer to both the present and prior U.S. Cablevision Corp.). Complainant began subscribing to cable television channel distribution service as offered by NYTelco in its Tariff F.C.C. No. 34 on June 21, 1967. Cable television channel distribution service is a communications service provided by telephone companies whereby cable television channel distribution facilities are constructed and owned by the telephone company but used to serve subscribing cable television operators. This contrasts with cable television channel distribution provided by cable television operators themselves through Pole attachment agreements, i.e. the cable television operator owns the cable television channel distributed facilities but contracts with the telephone company so that it may attach its cables to telephone company poles for distribution purposes. On June 26, 1968 we released our decision in Docket No. 17333, General Telephone Company of California, et al., 13 FCC 2d 448, wherein we decided, among other things, that section 214 of the Communications Act was applicable to the construction and operation of cable television channel distribution facilities by a common carrier.[1]

[1] In this regard, we also note indications that United held its pole attachment contract for some time without taking significant action to assure early construction. This delay necessarily casts an additional pall on the priority asserted for United's contract.

[2] For example, although AT&T cites the Commission's public notice of August 3, 1973, regarding Docket No. 16928 (FCC 73–851, 42 FCC 2d 460), wherein the Commission announced that it had "instructed the staff to draft appropriate documents asserting jurisdiction over pole attachments," it seeks to rebut it by arguing that no such documents have been issued.

[3] See also § 76.7 of the rules, which provides in pertinent part that,

(a) On petition by a cable television system, a franchising authority, an applicant, permittee, or licensee of a television broadcast, translator, or microwave relay station, or by any other interested person, the Commission may waive any provision of the rules relating to cable television systems, impose additional or different requirements, or issue a ruling on a complaint or disputed question.

[1] Section 214(a) of the Communications Act provides, in pertinent part: "No carrier shall undertake the construction of a new line or of an extension of any line, or shall require or operate any line, or extension thereof, or shall engage in transmission over or by means of such additional or extended line, unless and until there shall first have been obtained from the Commission a certificate that the present or future public convenience and necessity require or will require the construction and operation, of such additional or extended line * * *" 47 U.S.C. 214(a).

V 39 I 94 MAY 14 74 XUM

Thereafter, on November 12, 1968, NYTelco filed an application for a Section 214 certificate of public convenience and necessity with respect to the Hyde Park cable television channel distribution facilities.[2] Subsequently, on October 7, 1971, in Docket No. 17441, Better T.V. Inc. of Duchess County, New York, 31 FCC 2d 939, we released our decision which denied NYTelco's section 214 application because we found that in Hyde Park NYTelco had followed an unreasonable course of conduct toward cable television operators who desired to construct their own cable television systems, attempting to either induce independent cable television operators to take unwanted cable television channel distribution service from NYTelco, or to impede their construction of cable television systems until a tariff customer could be obtained and cable television channel distribution facilities constructed. In view of this misconduct by NYTelco we ordered, among other things, that NYTelco cease providing cable television channel distribution service to complainant in Hyde Park and in compliance therewith such service was wholly terminated as of June 28, 1972.

2. Complainant now contends that NYTelco constructed and operated the cable television channel distribution facilities in Hyde Park for five years without ever obtaining from the Commission a Section 214 certificate of public convenience and necessity, that NYTelco was never lawfully authorized to provide cable television channel distribution service to complainant at any time during the five year period and that, therefore, NYTelco's Tariff F.C.C. No. 34 as it relates to Hyde Park was at all times during the five year period improperly on file with the Commission and ineffective since it purported to offer a communications service which NYTelco could not lawfully provide. Accordingly, complainant alleges that NYTelco's collection of monthly and termination charges from complainant as specified in Tariff F.C.C. No. 34 constituted a violation of sections 201(b), 203(c) and 214 of the Communications Act.[3] Therefore, complainant requests, among other things, reimbursement of approximately $195,000 in monthly and termination charges paid from June 21, 1967 to June 28, 1972. Complainant further contends that even if NYTelco was lawfully authorized at all times during the five year period to provide cable television channel distribution service in Hyde Park, it would be inequitable to allow NYTelco to retain the collected tariff charges in view of NYTelco's prior unlawful conduct in Hyde Park and therefore such charges should be reimbursed to complainant. NYTelco alleges in its responsive pleading, among other things, that it was at all times during the five year period in question lawfully authorized to provide cable television channel distribution services in Hyde Park, that the charges collected were lawful charges for a lawful communications service provided to complainant under a lawful tariff, and that if the requested relief were granted it would result in a pure windfall to complainant, allowing complainant to enjoy a valuable communications service at no charge for five years.

3. We shall dismiss in part and otherwise deny this complaint for the reasons that (a) NYTelco was authorized by specific Commission orders to provide cable television channel distribution service in Hyde Park from June 26, 1968 to June 28, 1972 and therefore acted lawfully in collecting charges for such service under its properly filed and then effective tariff; (b) complainant's claim for reimbursement with respect to the one year period when service was provided prior to June 26, 1968 is barred by section 415(b) of the Communications Act and the same is true regarding a substantial portion of the time period following June 26, 1968 and (c) in any event, complainant has failed to allege sufficient facts to show that it is equitably entitled to the requested relief.

4. NYTelco provided complainant cable television channel distribution service in Hyde Park for five years, from June 21, 1967 to June 28, 1972. Contrary to the allegations of complainant, NYTelco was lawfully authorized by our specific orders to provide such service in Hyde Park for four of the five years, i.e., from June 26, 1968, the release date of our General Telephone decision, to June 28, 1972, when service was wholly terminated. In regard to the one year period when service was provided prior to our General Telephone decision, i.e., from June 21, 1967 to June 26, 1968, NYTelco was not authorized to provide service in Hyde Park. Section 214 was enacted and applicable long before NYTelco began construction and operation of the uncertified facilities in Hyde Park in mid-1967 and, therefore, NYTelco was in violation of section 214's provisions the moment it began construction and operation of the uncertified facilities in Hyde Park. Ashtabula Cable T.V., Inc. v. Ashtabula Telephone Company, 18 FCC 2d 193, 194 (1969). Further, as previously noted, NYTelco's application for a Section 214 certificate was expressly denied in our October 7, 1971 Better T.V. decision. Finally, no specific orders were issued by use during the June 21, 1967 to June 26, 1968 period such as would constitute authorization to construct and operate the Hyde Park facilities during such period. On the contrary, we expressly placed carriers on notice as early as March 1967 that any construction without prior approval might be the subject of appropriate action including the issuance of cease and desist orders. 7 FCC 2d 571 and 7 FCC 2d 575. However, this does not mean that complainant is entitled to an order directing NYTelco to reimburse tariff charges collected during the June 21, 1967 to June 26, 1968 period. On the contrary, such an order would be inappropriate because complainant's claim for such reimbursement, even if otherwise valid, is barred by section 415 (b) of the Communications Act since complainant did not file the subject complaint until April 27, 1972.[4] Section 415 also bars complainant's claim for reimbursement of tariff charges collected from June 26, 1968 to or on about May 1, 1971.

5. We believe Section 415(b) is properly applicable in this case. We indicated in Bunker Ramo Corporation v. Western Union Telegraph Company, 31 FCC 2d 449, 454 (1971), that a statute of limitations does not begin to run until discovery of the right or wrong or of the facts on which such knowledge is chargeable by law and that the running of the period of limitations may be suspended or tolled by various causes; for example, although mere ignorance will generally not toll the statute, active fraudulent concealment by a defendant will generally do so. In our opinion, knowledge of the basic facts complainant cites as supporting its claim for reimbursement, namely, that section 214 was applicable to the construction and operation of cable television channel distribution facilities and that NYTelco's construction and operation of such uncertified facilities in Hyde Park from June 21, 1967 to June 26, 1968 and thereafter was in violation of the provisions of section 214, was chargeable by law upon complainant at or near the time it began taking service from NYTelco (mid-1967). As noted earlier, section 214 was enacted long before any of the events we are here concerned with occurred. Even if such knowledge was not chargeable by law upon complainant in mid-1967, as we believe it was, it is obvious that doubts as to the applicability of section 214 to the construction and operation of cable television channel distribution facilities by NYTelco should have been put to rest on June 26, 1968 when we released our General Telephone decision. Notwithstanding our General Telephone decision, complainant waited until April 27, 1972 before filing the subject complaint. In addition, we cannot hold that the statute of limitations was tolled in view of complainant's failure to allege any facts whatsoever indicating that fraud or deceit was practiced by NYTelco upon complainant to prevent complainant from becoming aware of the basic facts upon which its claim for reimbursement is based. In view of the foregoing, it is clear that Section 415(b) is properly applicable in this case and complainant's claim for reimbursement of tariff charges collected from June 21, 1967 to June 26, 1968 (as well as June 26, 1968 to on or about May 1, 1971) is barred.

6. We shall now relate the reasons why NYTelco was authorized to provide service in Hyde Park for four of the five years that service was provided. After our General Telephone decision was released, NYTelco was obligated to take steps to obtain section 214 authorization from the Commission with respect to the cable television channel distribution facilities in Hyde Park in order to continue providing the cable television channel distribution service to complainant in Hyde Park.[5] Our June 26, 1968 General Telephone decision provided that cease and desist orders against continued operation of cable television channel distribution facilities would not be stayed unless common carriers then operating such facilities filed applications for section 214 authorization or filed pleadings containing certain specified information and any other public interest factors which might justify the granting of relief from cease and desist orders. At that time NYTelco was operating such facilities in Hyde Park. On July 5, 1968, FCC 68-715, we temporarily stayed the effectiveness of our General Telephone decision in order to give the carriers time to prepare their objections. On July 26, 1968, 14 FCC 2d 170, after reviewing carrier objections, we stayed pendente lite the effectiveness of that portion of our General Telephone decision pertaining to cease and desist orders but only insofar as cable television channel distribution facilities constructed and in operation on or before June 26, 1968 were concerned. Thus, common carriers providing cable television channel distribution service prior to the June 26, 1968 release date of our decision, such as NYTelco in Hyde Park, could continue providing such service pending appellate review of our General Telephone decision. Subsequently, the courts affirmed that decision and NYTelco, in compliance therewith, duly filed a section 214 application with respect to the cable television channel distribution facilities in Hyde Park.[6] By filing its section 214 application, NYTelco stayed the effect of our cease and desist order with respect to the operation of the Hyde Park facilities pending action upon the application. This also meant that NYTelco was authorized to continue providing cable television channel distribution service to complainant in Hyde Park pending Commission action on its application. We had ample statutory authority under sections 4(i) and 214(a) of the Communications Act to issue our orders allowing common carriers such as NYTelco to provide cable television channel distribution service even though their section 214 applications were not yet filed or if filed, not yet acted upon. Section 4(i) of the Communications Act provides that "* * * The Commission may perform any and all acts, make such rules and regulations, and issue such orders, not inconsistent with this Act, as may be necessary in the execution of its functions." 47 U.S.C. 154(i). Section 214(a) provides in pertinent part that "* * * the Commission may, upon appropriate request being made, authorize temporary or emergency service * * * without regard to the provisions of this section * * *" (our emphasis). 47 U.S.C. 214(a). A reasonable interpretation of the above quoted statutory language is that a common carrier, which may be required to obtain a section 214 certificate in order to construct and provide or continue to provide a particular communications service on a permanent basis, as in the case of NYTelco in Hyde Park, may still be lawfully authorized to provide that particular communications service on a temporary or emergency basis even though the carrier's application for a certificate has not been filed, has not been acted upon, or has even been denied by the Commission. In view of the foregoing, it is clear that NYTelco was authorized by our General Telephone decision and the related orders following that decision to provide cable television channel distribution service to complainant in Hyde Park from June 26, 1968 until such time as action was taken on its Section 214 application.

7. As already noted, our October 7, 1971 Better T.V. decision denied NYTelco's section 214 application and ordered NYTelco to cease providing cable television channel distribution service in Hyde Park. However, in order to avoid an abrupt disruption of cable television service to cable television subscribers in Hyde Park and provide for a transition period during which the subscribers could obtain other cable television service, we permitted NYTelco to continue operation of the cable television channel distribution facilities in Hyde Park for a period of 180 days from the October 7, 1971 release date, until April 10, 1972 (31 FCC 2d 968). On March 30, 1972, we extended this permission for 90 more days to June 28, 1972 (34 FCC 2d 153), by which date the cable television channel distribution service in Hyde Park was wholly terminated. Sections 4(i) and 214(a) of the Communications Act provide ample statutory authority for the issuance of these orders. Thus, even after our denial of NYTelco's section 214 application on October 7, 1971, NYTelco had our express authority to provide cable television channel distribution service to complainant in Hyde Park until such service could be terminated in an orderly manner, i.e., until June 28, 1972.

8. Since, contrary to the allegations of complainant, NYTelco was lawfully authorized to provide cable television channel distribution service in Hyde Park from June 26, 1968 to June 28, 1972, it follows that NYTelco's tariff, effective during such period, was binding on the carrier and its customer alike, and that NYTelco therefore acted lawfully in collecting the charges as specified in its tariff for the provision of service to complainant. Moreover, even if NYTelco was not lawfully authorized to provide the service during the entirety of the aforementioned period, as it was, complainant still would not be entitled to an order directing reimbursement of the collected tariff charges for the greater portion of such period, June 26, 1968 to on or about May 1, 1971, because Section 415(b) of the Communications Act bars complainant's claim. Accordingly, complainant is not entitled to an order directing reimbursement of tariff charges collected from June 26, 1968 to June 28, 1972.

9. Finally, in addition to our above reasons for our conclusion that an order directing reimbursement of collected tariff charges is inappropriate, there is still another reason supporting such conclusion. This relates to complainant's remaining contention that even if NYTelco was lawfully authorized at all times to provide cable television channel distribution service to complainant in Hyde Park it would be inequitable, in view of NYTelco's prior unlawful conduct in Hyde Park, to allow NYTelco to retain the collected charges for the Hyde Park service and so such charges should thus be refunded to complainant. We do not agree. We have already imposed appropriate sanctions against NYTelco for the misconduct we found in Better T.V. Not only did we deny NYTelco's section 214 application for permanent authorization to operate the Hyde Park facilities but we ordered that NYTelco cease and desist from providing cable television channel distribution service in Hyde Park, we denied NYTelco the undepreciated cost of the Hyde Park facilities in its rate base, and we ordered that no sale could be made of the facilities without prior Commission approval. 31 FCC 2d 967, 968. Granting the relief requested by complainant would amount to the imposition of an additional sanction on NYTelco, an action which we do not believe is warranted under the facts and circumstances of this case. Complainant has also failed to allege sufficient facts that would equitably entitle it to a reimbursement of all tariff charges it paid during a five year period during which it was receiving a valuable communications service.

---

[2] F.C.C. Docket No. 18525, File No. P-C-7271.

[3] Section 201(b) provides in pertinent part: "All charges, practices, classifications, and regulations for and in connection with such communication service, shall be just and reasonable, and any such charge, practice, classification, or regulation that is unjust or unreasonable is hereby declared to be unlawful * * *." 47 U.S.C. 201(b).

Section 203(c) provides, in pertinent part: "No carrier, unless otherwise provided by or under authority of this Act, shall engage or participate in such communication unless schedules have been filed and published * * * and no carrier shall (1) charge, demand, collect, or receive a greater or less or different compensation, for such communication, or for any service connected therewith, between the points named in any such schedule than the charges specified in the schedule then in effect * * *" 47 U.S.C. 203(c). Also see n. 1.

[4] Section 415(b) of the Communications Act provides that "All complaints against carriers for the recovery of damages not based on overcharges shall be filed with the Commission within one year from the time the cause of action accrues, and not after * * *" 47 U.S.C. 415(b).

[5] The Bell companies had previously been given notice that they were required to file appropriate tariffs under section 203(a) of the Communications Act before providing any cable television channel distribution service by our April 6, 1966 Letter Order, FCC 66-293. Petitions for Reconsideration of such Letter Order were denied. (4 FCC 2d 257 (1966)). NYTelco complied with this requirement by filing its Tariff FCC No. 34 on September 27, 1966, and by later making timely provision therein for the service provided to complainant in Hyde Park.

V 39 I 94 MAY 14 74 XUM

10. In view of the foregoing, *it is ordered*, That complainant's Motion to Make Answer More Definite and Certain is denied and, *it is further ordered*, That complainant's formal complaint is hereby dismissed in part and otherwise is denied.

Adopted: April 16, 1974.

Released: April 23, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.74-11084 Filed 5-13-74;8:45 am]

[Docket No. 19660, RM-690; FOC 74-401]

INTERNATIONAL RECORD CARRIERS

Scope of Operations; Hearing

In the matter of International Record Carriers' scope of operations in the continental United States including possible revisions to the formula prescribed under section 222 of the Communications Act (38 FR 10934).

1. By Memorandum Opinion and Order released November 26, 1973,[1] the Commission specified the issues for hearing on the request of The Western Union Telegraph Company (WU) for an increase in the prescribed division of charges received by it for the landline handling of outbound and inbound international telegraph message traffic. In order to expedite the hearing, as previously ordered,[2] our November Order also provided for a two-part procedure in the conduct of the hearing: the first to determine the reasonableness of the present division of charges and the revenue requirements of WU in connection therewith; the second, if it were determined that WU was entitled to an increase, to determine whether part or all of the increase should be absorbed by the international record carriers (IRC's) or be reflected in their charges made to the public.

2. The issues upon which the hearing was ordered were:

(a) Whether the current divisions of charges between Western Union and the international record carriers for the landline handling by Western Union within the Continental United States of outbound and inbound international telegraph message traffic is unjust, unreasonable, inequitable, or otherwise not in the public interest.

(b) In connection with (a) above:

(1) What are the revenues, expenses and investment properly attributable to the landline handling by Western Union of international telegraph messages, both currently and for a reasonable future period of at least one year?

(2) On the basis of (b) (1) above, what changes, if any, in the levels and structure of the current divisions of charges are required to meet Western Union's revenue requirements for the period mentioned in (b) (1) above?

(c) What are, or will be, the effects of any increases in the divisions of charges that may be found to be required under (b) (2) above, on the revenue and rates of return of the respondent international carriers, assuming that such increases are absorbed by them?

(d) Whether the effect of any increases on the respondent international carriers is such as to warrant an increase in international public message charges to the public and, if so, the amount or amounts thereof and the effect of such increases on the volume of international message traffic and the revenues resulting therefrom both to Western Union and the respondent international record carriers.

(e) On the basis of findings and conclusions reached on the above issues, what changes, if any, in the current divisions of charges and/or charges to the public, should be prescribed by the Commission which will be just, reasonable and in the public interest?

3. We now have before us numerous pleadings filed by the carriers and the Trial Staff of the Common Carrier Bureau, seeking various forms of relief. In total, some twenty-eight separate pleadings have been filed.[3] Three of these requested extensions of time within which to file pleadings.[4] Of the remainder, six requested specific changes in issues or procedures with regard to the hearing, and the remaining nineteen were responses to the issues raised in these six. Because of this large number of pleadings, we will individually dispose of the initial substantive pleadings of each party and the procedural issues raised in subsequent filings. However, while we will consider and act upon the principal points raised in the many responsive pleadings, we will not attempt to deal with each issue that has been raised.

4. The initial pleading filed in this portion of the proceeding was by WU,[5] which principally contended that the bifurcated hearing procedure would lead to undue delay in the resolution of the issues and unfairly subject WU to additional delays in receiving the increased payments it seeks. Since § 1.106(a) (1) of the Commission's rules[6] proscribes our entertaining a petition to reconsider hearing procedures, this portion of the petition must be dismissed as unauthorized.[7] The separated Trial Staff joins WU's request to modify procedures,[8] and likewise this pleading is dismissed in part as unauthorized.

5. By contrast, three of the international carriers, Western Union International, Inc. (WUI), ITT World Communications Inc. (ITT), and TRT Telecommunications Corp. (TRT)[9] endorse the two-stage hearing as ordered, insisting that the Act (Section 222(e)(3)) gives them the right to a full hearing on the question of payouts to WU, but contending that they should not be required to present their evidence unless and until it is first determined that WU is entitled to an incerase. Since the initial pleadings on this matter are unauthorized, these responsive filings are dismissed as moot. However, in light of our expressed desire to expedite a resolution of this case, we have carefully considered the effect of the hearing procedures and have modified them as provided herein.

6. RCA Global Communications, Inc. (RCA) and ITT request us to change issue (c) as set for hearing.[10] They argue that if WU's showing in support of its claims for additional landline haul charges is to be based upon analysis of WU's financial picture only with respect to landline haul, then the international carriers' financial condition should be examined only as it bears directly on public message services (PMS), rather than overall. WU observes,[11] however, that it will submit overall financial data and requests that the inquiry include consideration of the IRC's overall financial situation.

7. Upon careful consideration, we have concluded that the impact of any increased payouts to WU should be examined for present purposes in the context of the IRC's overall financial picture. To look only to public message services would involve, in all likelihood, extensive delays for the preparation, presentation, and testing of a system of cost allocation. We recognize that the IRC's may wish to argue that their PMS rate of return is well below that of their overall return and that further costs would reduce that return even further. However, we believe it inappropriate to delay granting any necessary increases to WU while such a complex question is litigated. If the IRC's wish to pursue that argument, they may do so in a separate proceeding upon due application for increased PMS rates, should we determine that their overall operating results are such to justify their absorption of any increases granted to WU.

8. We have been requested to add twelve issues to those set for hearing by petition of WUI.[12] Each of these issues was before the Commission prior to release of the November Order and was carefully considered at that time. We are aware that WUI was placed under severe time constraints in developing the list of issues and was unable to submit supporting arguments. However, as stated above, § 1.106 of the rules limits those matters upon which petitions for reconsideration may be entertained, and this petition must be viewed as asking for reconsideration of our previous rejection of these as hearing issues. This pleading is therefore dismissed as unauthorized, as requested by the Trial Staff.[13] Further, we reiterate our desire to narrow the issues of this inquiry to the extent possible in the hope that the hearing can be brief and a decision expedited. Therefore, if we were to consider the WUI pleading on its merits, we would again deny the relief requested.

9. A final issue change, requested by TRT,[14] is the addition of free direct access to non-gateway customers by the IRC's. This question was also among those considered prior to the November Order, and therefore § 1.106 renders the pleading unauthorized. We note as well that this issue was before us earlier in 1973. At that time we suggested that the international carriers could apply for authorization to gain direct access to the hinterland.[15] No such applications have been filed, and this pleading cannot be considered a substitute.

10. In addition to the issue changes requested by the parties in this case, and treated above, a number of the pleadings[16] addressed themselves to the procedural question of whether the Commission or the Review Board was the proper forum to hear this round of pleadings. Both WUI and TRT contend that this proceeding is mixed adjudication and rulemaking rather than pure rulemaking and that § 0.365(b) of the rules[17] requires interlocutory matters in such mixed proceedngs to to be heard by the Review Board. The Trial Staff and WU, on the other hand, allege that this case is entirely rulemaking and that the pleadings are properly addressed to the Commission. The Review Board agreed with WU and the Trial Staff and, by Memorandum Opinion and Order released February 4, 1974,[18] certified all pleadings filed before it to the Commission.[19] We concur with the Review Board's decision and adopt the reasoning expressed in its Order that the Commission is the proper forum to hear interlocutory matters in this proceeding.

11. In addition to those discussed above, we are dismissing two pleadings as unauthorized under § 1.45(a)-(c) of the rules.[20] WUI's Petition to Strike dated December 13, 1973 is only authorized if considered an opposition to other pleadings. However, since the company filed such an opposition the same day, the Petition to Strike is redundant, and the pleading unauthorized. As discussed above, we are granting the relief requested on our own motion. Second, the Reply of WUI dated January 18, 1974 responds to two reply pleadings[21] and is thereby unauthorized. Since the matters raised therein are being acted upon in reference to other pleadings, we believe WUI will not be prejudiced by our failure to consider this pleading.[22]

12. As discussed above, we are dismissing the petitions asking us to reconsider the hearing issues which were before us prior to issuing our November Order. As a result, we need not discuss each issue or the objections raised in the responsive pleadings thereto.[23] We also need not reach the other procedural objections to several initial pleadings that appear in the responsive pleadings.

13. Finally, we have been concerned that the hearing procedure adopted in this case expedite a resolution of the division of tolls question. In ordering the hearing to go forward in two stages, we

---

[1] 43 F.C.C. 2d 1171.

[2] 43 F.C.C. 2d 661 (Oct. 30, 1973).

[3] The Appendix below lists the pleadings now before us.

[4] We granted the motions for extensions of time filed by WUI on January 8 and February 27, 1974 by Order, FCC 74M-39, released January 10, 1974 and Order released March 1, 1974, respectively. The motion filed before the Review Board on December 22, 1973 is granted herein.

[5] Motion to Amend or Delete Issues dated November 30, 1973.

[6] "Petitions requesting reconsideration of a final Commission action will be acted on by the Commission. Petitions requesting reconsideration of a final decision of the Review Board will be acted on by the Board or certified to the Commission (see § 0.361 (b) and (c) of this chapter). Petitions requesting reconsideration of other final actions taken pursuant to delegated authority will be acted on by the designated authority or referred by such authority to the Commission. A petition for reconsideration of an order designating a case for hearing will be entertained if, and insofar as, the petition relates to an adverse ruling with respect to petitioner's participation in the proceeding. Petitions for reconsideration of other interlocutory actions will not be entertained."

[7] Initially, WU also objected to the requirement that it provide projections of revenue requirements for a full year. In its Reply dated December 26, 1973, the company abandons this argument, and we thus consider moot the portions of the following pleadings which debate our forecast requirement: the oppositions to motions to Amend or Delete Issues dated December 13, 1973 filed by WUI, ITT and RCA.

[8] Motion of Trial Staff to Amend Procedures and to Oppose Deletion of Issues dated December 10, 1973.

[9] Oppositions dated December 13, 1973.

[10] Motion for Change of Issues, filed by RCA, dated December 13; Motion to Change Issues, filed by ITT, dated December 5, 1973.

[11] Western Union's Opposition to ITT Worldcom's Motion to Change Issues dated December 14, 1973.

[12] Motion to Amend Issues dated December 14, 1973.

[13] Trial Staff Opposition to WUI Motion to Amend Issues and TRT Petition to Enlarge Issues dated February 14, 1974.

[14] Petition of TRT Telecommunications Corp. to Enlarge Issues dated December 13, 1973.

[15] 40 F.C.C. 2d 1082.

[16] Oppositions of WUI and TRT dated December 13, 1973; Opposition of the Trial Staff dated December 28, 1973; Reply of Western Union dated December 28, 1973; Statement of Trial Staff dated December 27, 1973; Opposition of TRT dated January 8, 1974 and Opposition of WUI dated January 11, 1974. We note that the Motion of Trial Staff to Dismiss dated December 26, 1973 was denied by the Review Board, FCC 74R-31 (1974).

[17] "Original action on interlocutory matters. In adjudicative proceedings conducted by Administrative Law Judges (including mixed adjudicative and rulemaking proceedings), the Review Board shall take original action on the following interlocutory matters and upon any question with respect to such matters which is certified to it by the presiding officer (see § 1.291 of this chapter):

"(1) Petitions to amend, modify, enlarge, or delete issues upon which the hearing was ordered."

[18] FCC 74R-31 (1974).

[19] An exception is the Trial Staff's Motion to Dismiss, supra, note 16, which was denied. We note also that TRT's January 8 Opposition and Reply requested the Review Board, if it did not assert jurisdiction, to certify the pleadings to the Commission rather than dismissing them. This the Board granted sub silentio.

[20] "Except as otherwise provided in this chapter, pleadings in Commission proceedings shall be filed in accordance with the provisions of this section.

(a) Oppositions. Oppositions to any motion, petition, or request may be filed within 10 days after the original pleading is filed.

(b) Replies. The person who filed the original pleading may reply to oppositions within 5 days after the time for filing oppositions has expired. The reply shall be limited to matters raised in the oppositions, and the response to all such matters shall be set forth in a single pleading; separate replies to individual oppositions shall not be filed.

(c) Additional pleadings. Additional pleadings may be filed only if specifically requested or authorized by the Commission."

[21] Reply of Western Union dated December 26, and Statement of Trial Staff dated December 27, 1973, the latter of which in substance is a reply to two oppositions.

[22] WUI in its Reply dated February 28, 1974 contends that the Trial Staff's Opposition dated February 14, 1974 is untimely as it opposes pleadings filed in December before the Review Board and certified to the Commission on February 4. Since the principal argument which the Trial Staff raises, application of Section 1.106 of the Rules to certain pleadings, could only have been raised before the Commission, this pleading is timely and is granted with regard to this issue and dismissed with regard to other issues which could have been raised before the Review Board.

[23] Oppositions by TRT dated December 13, by Trial Staff dated December 28, and by WU dated December 27, 1973; and the Replies of WU dated December 26, 1973, of WUI dated January 18, and of TRT dated January 8, 1974.

V 39 I 94 MAY 14 74 XUM

had hoped to avoid any unnecessary delay which would occur if the question of the absorption or pass through by the IRC's of all or part of any increased landline charges were litigated before a determination had been made that the landline charges were to be increased. We continue to believe this a prudent course, even though we recognize the possibility that a two-stage hearing may, ultimately, lead to greater delay than a unified procedure. However, we are persuaded that the presiding Administrative Law Judge should be given wider scope that has been previously granted him to make the determination whether to proceed in one stage or two. Accordingly, we will modify our previous Order to withdraw the prior inflexible two-stage requirement and in lieu thereof specify that the Judge should exercise his discretion, at an appropriate point in the proceeding, either to consider only the WU claim first, or to simultaneously take evidence upon the effect on the IRC's. We do not think it appropriate now to specify at what point in the proceeding such a determination should be made.

We do retain, however, the requirement that no increased landline haul charges can be collected from the international carriers until the impact of such a requirement has been fully assessed.

14. Accordingly, *it is ordered*, That the procedure for conduct of the hearing in this matter, as specified in 44 F.C.C. 2d 1171 (1973), are modified to the extent provided herein.

15. *It is further ordered*, That the pleadings numbered 1, 3, 5, 6, 9, 10, 12, 14, 18 and 25 in the Appendix below are dismissed;

16. *It is further ordered*, That the pleadings numbered 4, 8, 23 and 24 are denied to the extent provided herein and otherwise are dismissed;

17. *It is further ordered*, That the pleadings numbered 2, 7, 20 and 28 are denied;

18. *It is further ordered*, That the pleadings numbered 11, 16 and 17 are granted;

19. *It is further ordered*, That the pleadings numbered 15, 19 and 26 are granted to the extent provided herein and otherwise are denied; and

20. *It is further ordered*, That pleading numbered 22 is dismissed except insofar as granted by the Review Board.

Adopted: April 16, 1974.

Released: May 3, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[Dockets Nos. 19993; 19994]

GEORGE M. ARROYO AND JOSE A. FIGUEROA, ET AL.

Applications for Construction Permits; Hearing

In re applications of George M. Arroyo and Jose A. Figueroa, d/b as ARROYO AND FIGUEROA ASSOCIATES, Charlotte Amalie, Saint Thomas, Virgin Islands, File No. BPH-8499, Requests: 97.9 megahertz, channel No. 250; 5.78 kW (H&V); 1355 feet, and MILTON ALFRED LINDESAY, Charlotte Amalie, Saint Thomas, Virgin Islands, File No. BPH-8615, Requests 97.9 megahertz; channel No. 250; 10.155 kW(H&V); 1,453 feet, For Construction Permits:

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned applications which are mutually exclusive in that they seek the same channel in the same community.

2. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purposes of comparison, the areas and populations which would receive primary service, together with the availability of other primary aural services (1 mV/m or greater in the case of FM) in such areas will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to either of the applicants.

3. As amended, Arroyo and Figueroa Associates will require $46,186 to construct and operate the proposed facility for a period of one year, without revenue.[1] To meet this requirement, Jose Figueroa plans to loan the partnership $60,000, as needed. However, the loan from Mr. Figueroa does not meet the requirements of section III, page 3, paragraph 4(a) of the application form in that the loan agreement fails to state the rate of interest to be charged. In view of the foregoing, a financial issue has been designated.

4. Milton Alfred Lindesay will require $34,848 to construct and operate the proposed facility for a period of one year, without revenue.[2] To meet this requirement, Lindesay has established the availability of approximately $3,000 in cash, and has stated his intent to apply for a loan. Since no loan agreement has actually been submitted, however, the Commission cannot determine that adequate funds will be available as required. Therefore, a financial issue has been designated against this applicant as well.

5. Milton A. Lindesay has failed to indicate precisely how many members of the general public he interviewed and he has failed to state what method he used to assure that a random sample of the general public would be contacted (see question and answer 13(b) of the Primer, Supra). Accordingly, a suburban issue will be specified.[3]

[1] In itemized form, the applicant will require the following:

Equipment	$14,300
Building	2,500
Miscellaneous	3,586
Working capital requirement	16,800
Legal expenses	9,000
Total	46,186

[2] In itemized form, Mr. Lindesay's costs are as follows:

Down payment on equipment	$6,679
1st-year payments on equipment with interest	8,079
Miscellaneous	1,000
Building	1,000
Working capital requirement	18,090
Total	34,848

[3] *Suburban Broadcasters*, 20 RR 951 (1961).

6. The height and location of Milton Alfred Lindesay's tower has not yet been cleared by the Federal Aviation Administration. Accordingly, an air hazard issue has been included and the Federal Aviation Administration has been made a party to this hearing.

7. Milton A. Lindesay has failed to comply with section 1.580(c) of the Commission's rules in that he has apparently printed local notice of the filing of his application only once. An appropriate issue has been designated.

8. Several informal objections to the grant of a license to Arroyo and Figueroa Associates have been received.[4] Each letter objects to the fact that neither Arroyo nor Figueroa is a resident of Saint Thomas or ever intends to reside there. The letters, however, state no facts upon which to frame an issue. In addition, letters have been received from Milton Alfred Lindesay concerning the Arroyo-Figueroa application. The letters, although rather disjointed and non-specific, appear to state that efforts were made by one Rafi Encarnacion, who represented himself as agent for Mr. Arroyo and Mr. Figueroa, to secure a dropout agreement for a certain consideration. Mr. Lindesay appears to feel that the agent's method of contact was improper. However, the letters lack specificity and fail to state sufficient facts and allegations to warrant an issue. Accordingly, all informal objections will be denied.

9. Except as indicated by the issues specified below, the applicant is qualified to construct and operate as proposed. In view of the foregoing, however, the Commission is unable to make the statutory finding that a grant of the subject application would serve the public interest, convenience, and necessity, and is of the opinion that the application must be designated for hearing in the issues set forth below.

10. Accordingly, *it is ordered*, That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the efforts made by Milton Alfred Lindesay to ascertain the community needs and interests of the area to be served and the means which the applicant proposes to meet these needs and interests.

2. To determine, with respect to the application of Arroyo and Figueroa Associates.

a. The rate of interest to be charged on the prospective $60,000 loan;

b. Whether, in the light of the evidence adduced pursuant to the foregoing issue, the applicant is financially qualified to construct and operate its proposed station.

3. To determine with respect to the application of Milton Alfred Lindesay:

a. The availability of additional funds.

b. Whether, in light of the evidence adduced pursuant to the foregoing issue, the applicant is financially qualified to construct and operate his proposed station.

4. To determine whether the application of Milton Alfred Lindesay is in compliance with section 1.580 of the Commission's rules and regulations, and, if not, the effect thereof upon the applicant's basic or comparative qualifications to be a Commission licensee.

5. To determine whether there is a reasonable possibility that the tower height and location proposed by Milton Alfred Lindesay would constitute a menace to air navigation.

6. To determine which of the proposals would, on a comparative basis, better serve the public interest.

7. To determine, in the light of the evidence adduced pursuant to the foregoing issues which, if either, of the applications should be granted.

11. *It is further ordered*, That the Federal Aviation Administration is made a party to the proceeding.

12. *It is further ordered*, That, the informal objections of Eric E. Dawson et al., are denied, and the informal objections of Milton Alfred Lindesay are denied.

13. *It is further ordered*, That, to avail themselves of the opportunity to be heard, the applicants respondent herein, pursuant to section 1.221(c) of the Commission rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

14. *It is further ordered*, That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

Adopted: April 17, 1974.

Released: April 22, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.74-11085 Filed 5-13-74;8:45 am]

[4] Letters were received from Eric E. Dawson, Elmo D. Roebuck, Pedro Rodriguez, Suarez, Jr., Raymond J. Smith, Mrs. Lorraine Cox, Mrs. Nellie Greer, Ron Overrards, Fred Davis, Richard Thomas, Mrs. Sonia M. Greaux, Mrs. J. A. Ventura and Thomas Gonzales.

FEDERAL ENERGY OFFICE

CONSUMER ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Consumer Advisory Committee will hold a meeting on Tuesday, May 21, 1974 at 8:00 a.m., in Room 3000, Federal Energy Office, 12th and Pennsylvania Avenues, NW., Washington, D.C. The committee was established to advise the Administrator, FEO, on consumer aspects of interests and problems related to the policy and implementation of programs to meet the current energy crisis. The agenda for the meeting is as follows:

1. Crude oil price equalization—Evaluation and other options for consumers
2. Federal evaluation of new automobile gasoline mileages
3. Consumer Energy Act—Natural gas deregulation and FOGCO
4. FEO Conservation and Consumer Education programs
5. FEO's Office of Consumer Affairs—Progress report
6. Subcommittee organizational matters.

The meeting is open to the public; however, space and facilities are limited. Further information concerning the meetings may be obtained from Lee Richardson, Federal Energy Office, Washington, D.C. Telephone: 202-961-8576, 77.

The Chairman of the committee is empowered to conduct the meetings in a fashion that will, in his judgment, facilitate the orderly conduct of business.

Minutes of the meetings will be made available for public inspection at the Federal Energy Office, 12th & Pennsylvania Aves., NW., Washington, D.C.

WILLIAM N. WALKER,
General Counsel.

[FR Doc.74-11041 Filed 5-9-74;11:48 am]

WHOLESALE PETROLEUM ADVISORY GROUP

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act. Pub. L 92-463, 86 Stat. 770) notice is hereby given that the Wholesale Petroleum Advisory Group will meet on Wednesday, May 15, 1974 at 9:30 a.m., in Room #2105 in the Cost of Living Council Auditorium, 2000 "M" Street NW., Washington, D.C. The participants at the meeting will be the members of the Wholesale Petroleum Advisory Group.

The Group was established to advise the Administrator, FEO, with direct and timely access to the technical knowledge possessed by a wide range of highly qualified independent businessmen engaged in the wholesale trade of selling heating oil, residual fuel and gasoline. The agenda for the meeting is as follows:

OLD BUSINESS

1. Price Markups.
   A. Cosignees/Commission Agents.
   B. Margin Increases.
2. No-Lead Gasoline Problems.
3. Normal Business Practices.
   A. Summer Fill.
   B. Credit Arrangements.
4. Two-Tier Pricing System.
   A. Prime Supplier.
5. Allocation Problems.
   A. Product Redistribution from Closed Outlets.

V 39 I 94
MAY 14 74
XUM

NEW BUSINESS

1. Selection Date for Next Meeting.
2. Remarks from the Floor (10 minute rule).

The meeting is open to the public; however, space and facilities are limited.

The Chairman of the Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business.

Further information concerning this meeting may be obtained from Dino G. Pappas, Office of Policy, Planning and Regulation, Federal Energy Office, Washington, D.C. 20461. Area Code 202/961-8324. Minutes of the meeting will be made available for public inspection at the Federal Energy Office, Washington, D.C.

Issued in Washington, D.C., on May , 1974.

WILLIAM N. WALKER,
General Counsel.

[FR Doc.74-11229 Filed 5-13-74;10:08 am]

FEDERAL MARITIME COMMISSION

CERTIFICATES OF FINANCIAL RESPONSIBILITY (OIL POLLUTION)

Notice of Certificates Revoked

Notice of voluntary revocation is hereby given with respect to Certificates of Financial Responsibility (Oil Pollution) which had been issued by the Federal Maritime Commission, covering the below indicated vessels, pursuant to 46 CFR Part 542 and section 311(p)(1) of the Federal Water Pollution Control Act, as amended.

HOUSEHOLD GOODS FORWARDERS ASSOCIATION

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763 (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 3, 1974. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Joseph F. Mullins, Jr., Esquire
Denning & Wohlstetter
1700 K Street NW.
Washington, D.C. 20006

Agreement No. 9510-3, among the members of the Household Goods Forwarders Association of America Rate Agreement, amends Paragraph (1) of the basic agreement to permit the publication of a tariff by the Household Goods Forwarders Association of America applying on through intermodal inland to inland points traffic in the trade covered by the agreement.

By Order of the Federal Maritime Commission.

Dated: May 9, 1974.

FRANCIS C. HURNEY,
Secretary.

[Independent Ocean Freight Forwarder License No. 577]

J. M. SCHIFFINO & CO., INC.

Order of Revocation

By letter of May 3, 1974, the Federal Maritime Commission received notification that J. M. Schiffino & Co., Inc., One Broadway, New York, New York 10004 wishes to voluntarily surrender its Independent Ocean Freight Forwarder License No. 577 for revocation.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised) Section 7.04(f) (dated 9/15/73);

It is ordered, That Independent Ocean Freight Forwarder License No. 577 be returned to the Commission for cancellation.

It is further ordered, That the Independent Ocean Freight Forwarder License of J. M. Schiffino & Co., Inc. be and is hereby revoked effective May 3, 1974.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon J. M. Schiffino & Co., Inc.

AARON W. REESE,
Managing Director.

UNIVERSAL ALCO LTD., ET AL.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before June 3, 1974. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

UNIVERSAL ALCO LTD., TROPICAL SHIPPING & CONSTRUCTION CO., LTD., AND NORWEGIAN CARIBBEAN LINES

Notice of agreement filed by:

Mr. Lebron Shields
Executive Vice President
Universal Alco Limited
750 N.E. 7th Avenue
Port Laudania
Dania, Florida 33004

Agreement No. 10021-2, among Universal Alco Limited, Tropical Shipping & Construction Company, Ltd., and Norwegian Caribbean Lines, modifies the approved basic discussion agreement in the trade between Florida ports and ports in the Bahama Islands by adding a new Item 4 pertaining to the coordination of sailings of the vessels of the parties in the agreement trade, and a new paragraph to provide that equipment demurrage charges and practices agreed to by the parties will be filed with the Commission.

V 39 I 94 MAY 14 74 XUM

By Order of the Federal Maritime Commission.

Dated: May 8, 1974.

FEDERAL POWER COMMISSION

[Docket Nos. RI74-221; RI74-134; RI73-91]

RATE CHANGES; CERTAIN COMPANIES

Hearing, Suspension of Proposed Changes, and Allowing Rate Changes To Become Effective Subject to Refund [1]

MAY 3, 1974.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR Chapter I), and the Commission's Rules of Practice and Procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[1] Does not consolidate for hearing or dispose of the several matters herein.

* Unless otherwise stated, the pressure base is 15.025 lb/in²a.
[1] Contract agreement dated Nov. 27, 1973.
[2] Accepted as of the date set forth in the "Effective date unless suspended" column.
[3] Includes upward Btu adjustment for 1,113 Btu from a base of 1,000 Btu/ft³.
[4] Considered new gas pursuant to opinion No. 639.
[5] For wells completed prior to June 1, 1970.
[6] For wells completed on or after June 1, 1970.
[7] No current deliveries.
[8] For acreage added by supplement No. 8 dated after Oct. 1, 1968, and wells completed prior to June 1, 1970.
[9] Includes a double amount of contractually due tax reimbursement.

The increase proposed by Amoco exceeds the ceiling established in Order No. 435 and is suspended for five months.

Phillips' proposed increase reflects the 2 percent increase in the Wyoming severance tax. Since Phillips' underlying rate is being collected subject to refund, the subject tax increase will be suspended for one day in that same proceeding. After Phillips has recovered tax reimbursement on past production, it shall file a rate decrease reflecting only contractually due tax reimbursement for future production.

The other proposed increases reflect the recent increase in the New Mexico severance tax which is to become effective on July 1, 1974. Southern Union's current base rates exceed the ceiling established in Order No. 435 and are being collected subject to refund. Accordingly, the tax increases are suspended for one day from July 1, 1974, in the existing proceedings.

[Docket No. RI74-219]

GEOLOGICAL EXPLORATION CO.

Notice of Petition for Special Relief

MAY 7, 1974.

Take notice that on April 29, 1974, Geological Exploration Company, (Petitioner), P.O. Box 1644, Longview, Texas 75601, filed a petition for special relief in Docket No. RI74-219, pursuant to Order No. 482, Docket No. R-459, issued June 8, 1973, relating to flaring of natural gas. Petitioner seeks a rate of 65 cents per Mcf for the sale of casinghead gas to Texas Gas Transmission Corporation and Tennessee Gas Transmission Company from the South Hallsville Field, Panola County, Texas. Petitioner states that this gas is now being flared and wasted, and that it needs the proposed rate to justify the expenses to be incurred in such sale.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 31, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-11080 Filed 5-13-74;8:45 am]

[Docket No. RP74-86]

GULF ENERGY AND DEVELOPMENT CORP.

Proposed Change in Rate

MAY 7, 1974.

Take notice that on April 26, 1974, Gulf Energy and Development Corporation (Applicant) tendered for filing a Notice of Change in Rate for the Gathering of Gas for Tennessee Gas Pipeline Company (Tennessee) under Applicant's FPC Gas Rate Schedule No. 1 to 11.17 cents per Mcf to become effective June 11, 1974. The annual increase in revenues which will result amounts to approximately $422,310 based upon the total gas volume gathered during the test period calendar year 1973, as adjusted.

Applicant's gathering facilities are located in Zapata and Starr Counties, Texas. Applicant states that it is classified as a Class C natural gas company by the Commission; that it performs a gathering service for Tennessee under said rate schedule; that it operated for about twelve years under a fixed price contract and accordingly did not seek or obtain an increased rate for such service until it obtained an increase in 1973 in Docket No. RP73-79; that in view of further increased costs and further diminished volumes it must now seek the increase in rate presently proposed. A copy of Applicant's proposal is contained in Applicant's filing which is available for inspection at the offices of the Federal Power Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protests with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 16, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. E-7855]

NEW ENGLAND POWER CO.

Extension of Time and Postponement of Prehearing Conference and Hearing

MAY 7, 1974.

On April 22, 1974, New England Power Company filed a motion for an extension of time for the filing of its rebuttal case and the date for the prehearing conference and hearing fixed by order issued April 10, 1974, in the above-designated matter.

On April 26, 1974, Staff Counsel filed an answer opposing the above motion but recommended a one week extension of the rebuttal date and the prehearing conference and hearing.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Rebuttal Testimony by New England Power Company, May 15, 1974.
Prehearing Conference and Hearing, May 21, 1974 (10 a.m. e.d.t.).

MARY B. KIDD,
Acting Secretary.

[FR Doc.74-11082 Filed 5-13-74;8:45 am]

[Docket No. CI74-572]

SKELLY OIL CO.

Notice of Application

MAY 7, 1974.

Take notice that on April 18, 1974, Skelly Oil Company (Applicant), P.O. Box 1650, Tulsa, Oklahoma 74102, filed in Docket No. CI74-572 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce from Winkler County, Texas, to Transwestern Pipeline Company (Transwestern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant has on file an application in Docket No. CI74-514 for permission and approval to abandon a sale of gas to Texaco, Inc. from its Cambell "A" Well No. 6, Winkler County, Texas. Applicant states in that application and in the instant application that as casinghead gas the production is dedicated to Texaco pursuant to a percentage of the proceeds casinghead gas contract. Applicant further states that the Texas Railroad Commission has reclassified the subject well from an oil well to a gas well in the South Kermit Field and that Texaco has advised Applicant that it is unable to take gas from the Cambell "A" Well No. 6 into its system because of a lack of capacity and inability to handle the higher pressure gas.

Applicant states that it intends to commence the sale of gas on an emergency basis to Transwestern, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for a period of one year from the end of the 60-day emergency period within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant proposes to sell up to 2,000 Mcf of gas per day to Transwestern at 45.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment from a base of 1,000 Btu per cubic foot.

Applicant indicates that in furtherance of such a sale of gas it is installing, at its own expense, approximately one and one-quarter miles of pipeline to connect the subject well to Transwestern's pipeline.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[Docket No. RI74-220]

DINERO OIL CO.

Petition for Special Relief

MAY 7, 1974.

Take notice that on April 24, 1974, Dinero Oil Co. (Petitioner), 600 Southwest Tower, Houston, Texas 77002, filed a petition for special relief in Docket No. RI74-220, pursuant to § 2.76 of the Commission's general policy and interpretations.

Petitioner seeks a price of 50 cents per Mcf for the sale of gas to Tennessee Gas Pipeline Company of America under its FPC Gas Rate Schedule No. 1 from the Chess Todd Lease, Narcisso Tract No. 4, Willacy County, Texas. The petition is based upon proposed reworking operations with respect to a previously aban-

V 39 I 94
MAY 14 74
XUM

doned well on the subject lease, and the installation of compression facilities. Petitioner estimates that the reserves are from 100 to 150 million cubic feet, averaging 300 Mcf per day.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 31, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

MARY B. KIDD,
Acting Secretary.

FEDERAL RESERVE SYSTEM

FLORIDA BANCORP, INC.

Acquisition of Bank

MAY 8, 1974.

Florida Bancorp, Inc., Pompano Beach, Florida, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of Florida Coast Bank of Coral Springs, National Association, Coral Springs, Florida. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than June 4, 1974.

Board of Governors of the Federal Reserve System, May 8, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[FPMR Temp. Reg. F–219]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in an electric rate increase proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Mississippi Public Service Commission in a rate proceeding involving electric service supplied by the Mississippi Power Company (Docket No. U–2783).

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and, further, shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

DWIGHT A. INK,
Acting Administrator of General Services.

OFFICE OF MANAGEMENT AND BUDGET

LIST OF REQUESTS

Clearance of Reports

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 9, 1974 (44 USC 3509). The purpose of publishing this list in the Federal Register is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, (202–395–4529).

PENNSYLVANIA ELECTRIC CO.

Proposed Issue and Sale of First Mortgage Bonds

MAY 3, 1974.

Notice is hereby given that Pennsylvania Electric Company ("Penelec"), 1001 Broad Street, Johnstown, Pennsylvania 15907, an electric utility subsidiary company of General Public Utilities Corporation ("GPU"), a registered holding company, has filed an application and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All inter-

V 39 I 94
MAY 14 74
XUM

ested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Penelec proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, $50,000,000 principal amount of First Mortgage Bonds, ------ percent Series due 2004. The interest rate (which will be a multiple of ⅛ of 1 percent) and the price (which will be not less than 100 percent nor more than 102.75 percent of the principal amount thereof) will be determined by competitive bidding. The bonds will be issued under a Mortgage and Deed of Trust of Penelec to Bankers Trust Company, Trustee, dated as of January 1, 1942, as heretofore amended and supplemented and as to be further amended and supplemented by a Supplemental Indenture to be dated as of June 1, 1974. The term of the issue preclude Penelec from redeeming any bonds prior to June 1, 1979, if such redemption is for the purpose of refunding such bonds with proceeds of funds borrowed at a lower effective interest cost.

The entire proceeds, excluding premium and accrued interest, realized from the sale of the new bonds ($50,000,000) together with the expected cash capital contributions aggregating $30,000,000 from GPU, internally generated cash of approximately $27,000,000 and the proceeds from the sale of additional First Mortgage Bonds, Debentures and Preferred Stock plus, on an interim basis, the proceeds of bank borrowings, will be applied to its construction program, for sinking fund purposes, and to refund at maturity Northern Pennsylvania Power Company First Mortgage Bonds due 1975. The estimated cost of Penelec's 1974 construction program is approximately $160,000,000.

The fees and expenses to be paid by Penelec in connection with the proposed issuance and sale of the Bonds are estimated to total $155,000, including legal fees of $38,000. The fees and expenses of counsel for the underwriters, to be paid by the successful bidders, will be supplied by amendment. It is stated that the Pennsylvania Public Utility Commission has jurisdiction over the proposed issue and sale of bonds by Penelec and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than May 29, 1974, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as amended or as it may be further amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 09/09-0170]

ASSET MANAGEMENT CAPITAL CO.

Application for a License as a Small Business Investment Company

Notice is hereby given concerning the filing of an application with the Small Business Administration (SBA) pursuant to § 107.102 of the regulations governing small business investment companies (SBIC's) (13 CFR § 107.102 (1974)), under the name of Asset Management Capital Co., 1417 Edgewood Drive, Palo Alto, California 94301, for a license to operate in the State of California as an SBIC under the provisions of the Small Business Investment Act of 1958 (Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors and principal stockholders are:

Franklin Pitcher Johnson, Jr., 1411 Edgewood Drive, Palo Alto, California 94301, President, Director, 33⅓ percent.
Catherine H. Johnson, 1411 Edgewood Drive, Palo Alto, California 94301, Secretary, Director, 33⅓ percent.
Brook H. Byers, 707 Continental Circle, Mountain View, California 94040, Vice President, Treasurer, Director.
Jeanne W. Doxsee, 439 Glenwood Avenue, Menlo Park, California 94025, Assistant Secretary.

The company will begin operations with an initial capitalization of $312,000. No concentration in any particular industry is planned. The applicant intends to make investments in small business concerns, with growth potential, located primarily within the State of California.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any interested person may, not later than May 19, 1974, submit to SBA, in writing, relevant comments on the proposed company. Any communication should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Palo Alto, California.

Dated: May 6, 1974.

JAMES THOMAS PHELAN,
Deputy Associate Administrator for Investment.

[Delegation of Authority No. 13-A; Amdt. 1]

DIRECTOR, OFFICE OF MANAGEMENT ASSISTANCE AND 406 PROGRAM MANAGER MASD

Delegation of Authority

Delegation of Authority No. 13-A (37 FR 24716) is hereby amended to delegate to certain positions the authority to extend or modify existing 406 contracts.

Paragraph IC is added to Delegation of Authority No. 13-A and reads as follows:

C. *Director, Office of Management Assistance and 406 Program Manager, MASD.* 1. To extend or modify existing 406 contracts providing financial assistance to public or private organizations to pay technical and management assistance to individuals or enterprises eligible for assistance section 402 of the Economic Opportunity Act of 1964, as amended, with special attention to small business concerns located in urban areas of high concentration of unemployed or low-income individuals or owned by low-income individuals. Such financial assistance may be provided for projects, including without limitation:

a. Planning and research, including feasibility studies and market research;

b. The identification and development of new business opportunities;

c. The furnishing of centralized services with regard to public services and government programs, including programs authorized under section 402 of the Economic Opportunity Act of 1964, as amended;

d. The establishment and strengthening of business service agencies, including trade associations and cooperatives;

e. The encouragement of the placement of subcontracts by major businesses with small business concerns located in urban areas of high concentration of employed or low-income individuals or owned by low-income individuals, including the provision of incentives and assistance to such major businesses so that they will aid in the training and upgrading of potential subcontractors or other small business concerns;

f. The furnishing of business counseling, management training, and legal and other related services, with special emphasis on the development of management training programs using the resources of the business community, including the development of management training opportunities in existing businesses, and with emphasis in all cases upon providing management training of sufficient scope and duration to develop entrepreneurial and managerial self-sufficiency on the part of the individuals served.

VETERANS ADMINISTRATION

ADVISORY COMMITTEE ON CEMETERIES AND MEMORIALS

Notice of Meeting

The Veterans Administration gives notice that a meeting of the Administrator's Advisory Committee on Cemeteries and Memorials, authorized by section 1001, title 38, United States Code, will be held at the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C., on May 22 and 23, 1974, at 9 a.m. The meeting will be held to conduct routine business.

The meeting will be open to the public up to the seating capacity of the conference room which is about 40 persons. Because of the limited seating capacity and the need for building security, it will be necessary for those wishing to attend to contact Ms. Charlotte Withers in the office of the Director, National Cemetery System, Veterans Administration Central Office (phone 202-389-5211) prior to May 22, 1974.

Any interested person may attend, appear before, or file statements with the Committee—which statements, if in written form, may be filed before or after the meeting.

Oral statements and/or reports from the public will be heard only between 3 p.m. and 5 p.m. on May 23, 1974, due to the number of items on the agenda for the meeting.

Dated: May 7, 1974.

By direction of the Administrator.

[SEAL] RICHARD L. ROUDEBUSH,
Deputy Administrator.

(3) Carrying out those functions vested in the Secretary pursuant to section 503 of the Act and Executive Order 11758.

b. The Assistant Secretary for Administration and Management, except as hereinafter provided, is delegated authority and assigned responsibility for carrying out those functions vested in the Secretary pursuant to section 501(b) of the Act, issuing Departmental instructions and monitoring their implementation for meeting the Secretary's responsibilities under section 504 and coordinating all such activities with the Assistant Secretary for Employment Standards.

c. The Solicitor of Labor shall have responsibility for providing advice and assistance to all officers of the Department relating to the delegations of authority referred to above and applicable laws and regulations.

d. Agency Heads of the Department of Labor are responsible for implementing in their respective agencies the provisions related to Federal grants under section 504.

3. Reservations of Authority. The submission of reports and recommendations to the President and the Congress is reserved by the Secretary.

4. *Effective date.* This order is effective on March 12, 1974.

Signed at Washington, D.C., on the 12th day of March, 1974.

PETER J. BRENNAN,
Secretary of Labor.

[Rule 19, Ex Parte No. 241; 14th Rev. Exemption No. 12]

ATLANTIC AND WESTERN RAILWAY, ET AL.

Mandatory Car Service Exemption

It appearing, That the railroads named herein own numerous plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C. R.E.R. No. 391, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation XM, and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Atlantic and Western Railway Reporting marks: ATW
Pickens Railroad Company Reporting marks: PICK
Roscoe, Snyder and Pacific Railway Company Reporting marks: RSP
Wellsville, Addison & Galeton Railroad Corporation Reporting marks: WAG

Effective May 1, 1974, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., May 1, 1974.

INTERSTATE COMMERCE COMMISSION,

[No. 35944]

DRUG AND TOILET PREPARATION TRAFFIC CONFERENCE

Petition for Declaratory Order; Interpretation of Liability Limitation

At a Session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 25th day of April, 1974.

It appearing, That, on January 8, 1974, a petition was filed by the Drug and Toilet Preparation Traffic Conference requesting a declaratory order or interpretation of the liability limitation published in Released Rates Order No. MC-342 on the ground that different interpretations of the liability limitation are being applied by carriers in processing claims for loss and damage;

It further appearing, That the liability limitation reads as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding 50 cents per pound for each article";

It further appearing, That the petition illustrates three different interpretations of the liability limitation utilizing an example of a 1,000 pound shipment of drugs consisting of 20 cases weighing 50 pounds each, with each case containing 10 bottles weighing 5 pounds each. The value of the bottles is $10.00 each. Under the assumption that five bottles were lost, the shipper files a claim for $50.00. Carrier A receives the claim and pays it in full on the theory that the shipment consisted of a single article, drugs, and the liability limitation is "50 cents per pound for each article," thus, 50 cents×1,000 pounds=$500.00 and the claim was for only $50.00. Carrier B construes the words "per article" as meaning per case and calculates the liability limitation as 50 cents×the case weight of 50 pounds=$25.00, and pays accordingly. Carrier C construes "per article" as meaning the smallest unit which can be separately identified, the bottle, and calculates the liability limitation as 50 cents×5 pounds per lost bottle=$12.50, and pays accordingly; and that petitioner contends that the interpretation applied by Carrier A is the correct one;

It further appearing, That the petition discloses a controversy or uncertainty which would warrant the entry of a declaratory order by the Commission;

Wherefore, and for good cause:

It is ordered, That the petition be, and it is hereby, granted to the extent of instituting this proceeding to determine the question presented.

It is further ordered, That any person interested in the matter which is the subject of the petition and who wishes to actively participate in further proceedings herein shall notify this Commission, by filing with the Office of Proceedings, Room 5342, 12th Street and Constitution Avenue, NW., Washington, D.C. 20423, on or before June 7, 1974, an original and one copy of a statement of his intention to participate. Thereafter, this proceeding will be set for handling under the modified procedure. The petition and statements of intention to participate, if any, will be available for public inspection at the offices of the Commission during regular business hours.

A copy of this order will be served upon the petitioner, and notice of the filing of the petition will be given to the general public by depositing a copy of this order in the Office of the Commission's Secretary at Washington, D.C., and by delivering a copy to the Director, Office of the Federal Register, for publication therein.

By the Commission, Division 2.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.74-11121 Filed 5-13-74;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

MAY 9, 1974.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before May 29, 1974.

FSA No. 42832—*Beet or Cane Sugar to St. Charles, Illinois.* Filed by Southwestern Freight Bureau, Agent (No. B-468), for interested rail carriers. Rates on sugar, beet or cane, dry, in carloads, as described in the application; also returned shipments in the reverse direction, from Hereford, Texas, to St. Charles, Illinois.

Grounds for relief—Market competition, rate relationship, returned shipments.

Tariff—Supplement 90 to Southwestern Freight Bureau, Agent, tariff 72-H, I.C.C. No. 4886. Rates are published to become effective on June 5, 1974.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.74-11125 Filed 5-13-74;8:45 am]

[Section 5a Application No. 112]

HIGHWAY CARRIERS TRAFFIC ASSOCIATION

Agreement Approval Application

MAY 2, 1974.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of section 5a of the Interstate Commerce Act.

Filed February 22, 1974 by: Richard W. May, Executive Secretary, Highway Carriers Traffic Association, 1129 Grimmet Drive, Shreveport, LA 71107 (Attorney-in-Fact).

Agreement Involves: Organization and procedures between and among carrier by motor vehicles, members of Highway Carriers Traffic Association, relating to the joint consideration, initiation or establishment of rates, charges, rules, regulations, classifications, and practices, applicable to the transportation of freight from, to, and between all points and places in the United States.

The complete application may be inspected at the Office of the Commission, in Washington, D.C.

Any person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before June 3, 1974. As provided by the general rules of practice of the Commission, persons other than applicants should fully disclose their interest, and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigation and determine the matters involved, without public hearing.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

MAY 9, 1974.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination rules (49 CFR Part 1065(a)), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before May 24, 1974. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successivley filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any must refer to such letter-notices by number.

No. MC-730 (Sub-No. E4), filed May 1, 1974. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, Calif. 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except chemicals for human consumption, silicate of soda, petroleum products, liquid glue, and formaldehyde), in bulk, in tank vehicles, from points in Idaho to points in California. The purpose of this filing is to eliminate the gateway of points in Oregon.

No MC-730 (Sub-No. E6), filed May 1, 1974. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except chemicals for human consumption, silicate of soda, petroleum products, liquid glue, and formaldehyde), in bulk, in tank vehicles, from points in California to points in Idaho. The purpose of this filing is to eliminate the gateway of points in Oregon.

No. MC-730 (Sub-No. E8), filed April 1, 1974. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products,* as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209, in bulk, in tank vehicles, from points in New Mexico to points in California. The purpose of this filing is to eliminate the gateways of Gallup, N. Mex., and Clark County, Nev.

No. MC-730 (Sub-No. E19), filed May 1, 1974. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Liquid chemicals,* and *acids,* in bulk, in tank vehicles, from points in Texas to points in Idaho. The purpose of this filing is to eliminate the gateway of points in Utah.

No. MC-730 (Sub-No. E20), filed May 1, 1974. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., P.O. Box 638, Oakland, CA 94612. Applicant's representative: R. N. Cooledge (same as above). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Liquid chemicals,* in bulk, in tank vehicles, from

V 39 I 94

XUM

points in Texas to points in Oregon (except Portland and North Portland, Oregon). The purpose of this filing is to eliminate the gateways of points in Utah and points in Idaho.

No. MC–2263 (Sub-No. E1), filed April 28, 1974. Applicant: LAUREL TRANSPORT CORPORATION, P.O. Box 438, Rio Grande, N.J. 08242. Applicant's representative: Henry W. Pfeiffer (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, alcoholic beverages, dairy products as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Philadelphia, Pa., on the one hand, and, on the other, Atlantic City, Linwood, Somers Point, Sea Isle City, Strathmere, Ventnor, Margate, and Longport, N.J. The purpose of this filing is to eliminate the gateway of Ocean City, Cape May County, N.J.

No. MC–25798 (Sub-No. E16), filed April 28, 1974. Applicant: CLAY HYDER TRUCKING LINES, INC., P.O. Box 1186, Auburndale, Florida 33823. Applicant's representative: Tony G. Russell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen vegetables*, in containers, from points in that portion of Florida on and east of a line beginning at the Florida-Georgia State line and U.S. Highway 441, thence south along U.S. Highway 441, to Orlando, thence east on Florida Highway 50 to the Atlantic Ocean, to points in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia (except to points in Virginia east of Interstate Highway 95), points in that portion of Tennessee beginning at the Tennessee-Georgia State line and U.S. Highway 411, thence along U.S. Highway 411 to its intersection with U.S. Highway 129, thence north on U.S. Highway 129 to Knoxville, thence north on Interstate Highway 75 to the Tennessee-Kentucky State line, and the District of Columbia. The purpose of this filing is to eliminate the gateway of Hendersonville, N.C.

No. MC–76177 (Sub-No. E8), filed April 24, 1974. Applicant: BAGGETT TRANSPORTATION COMPANY, 2 South 32nd Street, Birmingham, Ala. 35233. Applicant's representative: T. C. Sinclair (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Classes A and B explosives*, and *blasting supplies*, between points in Ohio, on the one hand, and, on the other, points in Arkansas. The purpose of this filing is to eliminate the gateway of the site of the Trojan—U.S. Powder Division of Commercial Solvents Corp., located at or near Wolf Lake (Union County), Ill.

No. MC–76177 (Sub-No. E9), filed April 24, 1974. Applicant: BAGGETT TRANSPORTATION COMPANY, 2 South 32nd Street, Birmingham, Ala. 35233. Applicant's representative: T. C. Sinclair (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Classes A and B explosives*, and *blasting supplies*, between points in Ohio, on the one hand, and, on the other, points in Arizona, New Mexico, and Oklahoma. The purpose of this filing is to eliminate the gateway of Site of the Trojan—U.S. Powder, Division of Commercial Solvents Corp., located at or near Wolf Lake (Union County), Ill.

No. MC–95540 (Sub-No. E23), filed April 14, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Georgia 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meats and frozen meat products* (except commodities in bulk, in tank vehicles), from Dade City, Fla., to points in Arkansas. The purpose of this filing is to eliminate the gateways of Tifton, Ga., and Florence, Ala.

No. MC–95540 (Sub-No. E48), filed April 15, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits and frozen vegetables*, from points in Florida, to points in Idaho. The purpose of this filing is to eliminate the gateway of Tifton, Ga., and points in Tennessee.

No. MC–95540 (Sub-No. E84), filed April 19, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat byproducts*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Jacksonville, Fla., to points in North Carolina on and west of a line beginning at the North Carolina-South Carolina State line, thence along U.S. Highway 221 to its junction with North Carolina Highway 194, thence along North Carolina Highway 194 to its junction with U.S. Highway 19E, thence along U.S. Highway 19E to the North Carolina-Tennessee State line. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC–100666 (Sub-No. E26), filed April 11, 1974. Applicant: Melton Truck Lines, Inc., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Paul L. Caplinger (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products*, from the plant site of Calcasieu Paper Company at or near Elizabeth, La., to points in Arizona, California, Idaho, Montana, Nevada, Oregon, Utah, Washington, Wyoming, points in that part of Arkansas on, north, and west of a line beginning at the junction of the Arkansas-Oklahoma State line and Interstate Highway 40, thence east on Interstate Highway 40, to its junction with Arkansas Highway 23 to the Arkansas-Missouri State line, and Kansas City, Mo. (2) *Paper and paper products* (except those which because of their size or weight require the use of special equipment and commodities in bulk), from the plant site of Calcasieu Paper Company, Inc., at or near Elizabeth, La., to points in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The purpose of this filing is to eliminate the gateways of (1) plant site and storage facilities of the Weyerhaeuser Company located at or near Valliant, Okla., and (2) plant site and storage facilities of Nekoosa-Edwards Paper Company, Inc., at or near Ashdown, Ark. (Little River County).

No. MC–100666 (Sub-No. E39), filed April 18, 1974. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard W. May (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition lumber* from points in Texas (except Pineland and Silsbee and particleboard from Diboll) to points in Kentucky. The purpose of this filing is eliminate the gateway of Irving, Pineland, and Silsbee, Tex.

No. MC–100666 (Sub-No. E48), filed April 21, 1974. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard W. May (same as above). Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Composition lumber*, from points in Texas (except Pineland and Silsbee and particleboard from Diboll) to points in Tennessee. The purpose of this filing is to eliminate the gateway of Irving, Pineland, and Silsbee, Tex.

No. MC–100666 (Sub-No. E50), filed April 22, 1974. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard W. May (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition lumber*, from points in Texas (except Pineland and Silsbee and particleboard from Diboll) to points in Arkansas. The purpose of this filing is to eliminate

the gateway of Irving, Pineland, and Silsbee, Tex.

No. MC–105457 (Sub-No. E5), filed May 1, 1974. Applicant: THURSTON MOTOR LINES, INC., P.O. Box 10638, Charlotte, N.D. 28201. Applicant's representative: John V. Luckadoo (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, household good as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between points in that part of South Carolina within 150 miles of Charlotte, N.C., and west of a line extending from the North Carolina-South Carolina State line along South Carolina Highway 59 to York, thence along U.S. Highway 321 to Chester, thence along U.S. Highway 21 to Columbia, and thence along South Carolina Highway 5 to Ulmers, not including points on the highways specified, on the one hand, and, on the other, those points in that part of Virginia in and east of Grayson, Smyth, and Tazewell Counties, Va. The purpose of this filing is to eliminate the gateways of (1) Charlotte, N.C., (2) Roanoke, N.C., and (3) that part of North Carolina east of U.S. Highway 29 and Winston-Salem, N.C.

No. MC–105457 (Sub-No. E7), filed May 1, 1974. Applicant: THURSTON MOTOR LINES, INC., P.O. Box 10638, Charlotte, N.C. 28201. Applicant's representative: John V. Luckadoo (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, livestock, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between those points in that part of Virginia in and east of Grayson, Smyth, and Tazewell Counties, Va., on the one hand, and, on the other, points in Georgia. The purpose of this filing is to eliminate the gateways of (1) points in South Carolina, (2) Charlotte, N.C., and (3) Roanoke Rapids, N.C.

No. MC–112822 (Sub-No. E20), filed April 28, 1974. Applicant: BRAY LINES, INCORPORATED, P.O. Box 1191, Cushing, Oklahoma 74023. Applicant's representative: Robert A. Stone (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in packages, from Casper, Wyo., to points in Florida. The purpose of this filing is to eliminate the gateway of Wichita, Kans.

No. MC–113362 (Sub-No. E1), filed May 2, 1974. Applicant: ELLSWORTH FREIGHT LINE, INC., 310 East Broadway, Eagles Grove, Iowa 50533. Applicant's representative: Milton D. Adams, Box 562, Austin, Minn. 55912. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prepared frozen foods*, from Albert Lea, Minn., and points in Martin and Fairbault Counties, Minn., and Kossuth County, Iowa, to points in (1) Ohio, Connecticut, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Delaware, Maryland, and West Virginia, and the District of Columbia, (2) that part of Illinois on and south of a line beginning at the Iowa-Illinois State line, thence along U.S. Highway 36 to junction Illinois Highway 54, thence along Illinois Highway 54 to U.S. Highway 24, thence along U.S. Highway 24 to the Illinois-Indiana State line, and (3) that part of Indiana on and south of a line beginning at the Illinois-Indiana State line, thence along U.S. Highway 24 to junction Interstate Highway 69, thence along Interstate Highway 69 to the Indiana-Michigan State line. The purpose of this filing is to eliminate the gateways of Elmore, Minn., and Eagle Grove and Webster City, Iowa.

No. MC–113362 (Sub-No. E2), filed May 2, 1974. Applicant: ELLSWORTH FREIGHT LINES, INC., 310 East Broadway, Eagle Grove, Iowa 50533. Applicant's representative: Milton D. Adams, Box 562, Austin, Minn. 55912. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prepared frozen foods*, from Minneapolis, Minn., to points in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, and West Virginia, and the District of Columbia. The purpose of this filing is to eliminate the gateway of Webster City, Iowa.

No. MC–114019 (Sub-No. E9), filed April 28, 1974. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Illinois 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bottle caps*, from points in Iowa and Wisconsin, to points in Adams County, Pa., restricted to the transportation of shipments moving from, to, or between warehouses, and wholesale, retail, or chain outlets of food business houses, or when moving from, to, or between food processing plants, or warehouses or other facilities of such plants. The purpose of this filing is to eliminate the gateway of Chicago, Ill.

No. MC–117119 (Sub-E4), filed April 30, 1974. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Arkansas 72728. Applicant's representative: L. M. McLean (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *foodstuffs* (except dairy products and commodities in bulk) in vehicles equipped with mechanical refrigeration, from Athens, Ala., and Bells, Humboldt, and Jackson, Tenn., to points in Nevada. The purpose of this filing is to eliminate the gateway of Springdale, Ark.

[Notice No. 78]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before June 3, 1974. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–75112, By order of May 8, 1974, the Motor Carrier Board approved the transfer to Nampa Transport, Inc., Nampa, Idaho, of Certificate of Registration No. MC–121467 (Sub-No. 1) issued July 15, 1965 to Nampa Transfer & Storage, Inc., Nampa, Idaho, evidencing a right to engage in transportation in interstate commerce as described in Permit No. 1568, Second Amended, dated October 29, 1954, issued by the Idaho Public Utilities Commission. Kenneth G. Bergquist, P.O. Box 1775, Boise, Idaho, attorney for applicants.

[Notice No. 64]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 3, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC–67, (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

[Notice No. 65]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 6, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 7, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commisssion, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 19945 (Sub-No. 43 TA) (correction), filed April 15, 1974, published in the FEDERAL REGISTER issue of May 1, 1974, and republished as corrected this issue. Applicant: BEHNKEN TRUCK SERVICE, INC., Route 13, New Athens, Ill. 62264. Applicant's representative: Ernest A. Brooks II, 1301 Ambassador Building, St. Louis, Mo. 63101.

NOTE.—The purpose of this republication is to show the entire Supporting shipper's name, which was omitted in part in the FEDERAL REGISTER. The Supporting shipper's name is *Metal Goods Division of Alcan Aluminum Corporation*, 100 Erie View Plaza, 26th Floor, Cleveland, Ohio 44114, Cliff G. Pearson, General Traffic Manager. The rest of the publication will remain the same.

No. MC 121658 (Sub-No. 5 TA), filed April 26, 1974. Applicant: STEVE D. THOMPSON, P.O. Drawer 149, 1205 Percy Street, Winnsboro, La. 71295. Applicant's representative: Lawrence A. Winkle, 4645 N. Central Expressway, Dallas, Tex. 75205. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), (1) between Jackson, Miss., and Monroe, La., serving all intermediate points: From Jackson, Miss., over U.S. Highway 80 to Monroe, La., and return (also over Interstate Highway 20 for operating convenience only); (2) between Monroe and Sicily Island, La., serving all intermediate points: From Monroe, La., over Louisiana Highway 15 to Sicily Island, La., and return; (3) between Crowville and Winnsboro, La., serving all intermediate points: From Crowville over Louisiana Highway 17 to Winnsboro, La., and return; (4) between Ft. Necessity and Winnsboro, La., serving all intermediate points: From Ft. Necessity over Louisiana Highway 4 to Winnsboro, La., and return; (5) between Ruston, La., and Delta, La., serving all intermediate points: From Ruston over U.S. Highway 80 to Delta, La., and return (also over Interstate Highway 20 for operating convenience only);

(6) Between Tallulah and Vidalia, La., serving all intermediate points: From Tallulah over U.S. Highway 65 to Vidalia, La., and return; (7) between Ferriday and Winnfield, La., serving all intermediate points: From Ferriday over U.S. Highway 84 to Winnfield, La., and return; (8) between Winnfield and Ruston, La., serving all intermediate points: From Winnfield over U.S. Highway 167 to Ruston, La., and return; (9) between Ft. Necessity and Columbia, La., serving all intermediate points: From Ft. Necessity over Louisiana Highway 4 to Columbia, La., and return; (10) between Sicily Island, La., and Jonesville, La., serving all intermediate points: From Sicily Island over Louisiana Highway 8 to junction with Louisiana Highway 124, thence over Louisiana Highway 124 to Jonesville, La., and return; (11) between Sicily Island and Ferriday, La., serving all intermediate points: From Sicily Island over Louisiana Highway 15 to Ferriday, La., and return; (12) between Monroe and Tullos, La., serving all intermediate points: From Monroe over U.S. Highway 165 to Tullos, La., and return; (13) between Harrisonburg and Whitehall, La., serving all intermediate points: From Harrisonburg over Louisiana Highway 8 to Whitehall, La., and return; (14) between Archibald and Rayville, La.: From Archibald over Louisiana Highway 137 to junction with U.S. Highway 80, thence over U.S. Highway 80 to Rayville, La. (also over Interstate Highway 20 for operating convenience only); (15) between Crowville and Delhi, La., serving all intermediate points: From Crowville over Louisiana Highway 17 to Delhi, La., and return;

(16) Between Jackson, Miss., and Ruston, La., serving all intermediate points: From Jackson, Miss., over U.S. Highway 80 (also over Interstate Highway 20 for operating convenience only) to junction with U.S. Highway 65, thence over U.S. Highway 65 to Lake Providence, thence over Louisiana Highway 2 to Bernice, thence over U.S. Highway 167 to Ruston and return; (17) between Monroe and Mer Rouge, La., serving alll intermediate points: From Monroe over U.S. Highway 165 to Mer Rouge and return; (18) between Delhi and Oak Grove, La., serving all intermediate points: From Delhi over Louisiana Highway 17 to Oak Grove, La., and return; (19) between Ruston, La., and Shreveport, La., serving all intermediate points: From Ruston, La., over U.S. Highway 80 and Interstate Highway 20 to Shreveport, La., and return, serving all intermediate points and points within the Shreveport, La., commercial zone; (20) between Bernice, La., and Minden, La., serving all intermediate points: From Bernice, La., over U.S. Highway 167 to Junction City, La., thence over Louisiana Highway 9 to Summerfield, La., thence over Louisiana Highway Alternate 2 to Haynesville, La., thence over U.S. Highway 79 to Minden, La., and return, serving all intermediate points; (21) between Bernice, La., and U.S. Highway 79, serving all intermediate points: From Bernice, La., over Louisiana Highway 2 to junction U.S. Highway 79 and return serving all intermediate points; (22) between Junction of U.S. Highway 167 and Louisiana Highway Alternate 2 and Louisiana Highway 2: From the junction of U.S. Highway 167 and Louisiana Highway Alternate 2 over Louisiana Highway Alternate 2 to Summerfield, La, thence over Louisiana Highway 9 to function Louisiana Highway 2 and return, serving all intermediate points, for 180 days.

NOTE.—Applicant presently conducts operations over routes (1) through (18) under its Sub 3 TA authority. The effect of this application is to add routes (19) through (22) to its existing operations. Applicant intends to interline at all authorized points, including Shreveport and Monroe, La., and Jackson, Miss. SUPPORTING SHIPPERS: There are approximately 93 statements of support attached to the application, which may be examined here at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. SEND PROTESTS TO: District Supervisor William H. Land, Jr., Interstate Commerce Commission, Bureau of Operations, 2519 Federal Office Building, 700 West Capitol, Little Rock, Ark. 72201.

No. MC 126402 (Sub-No. 14 TA), filed April 29, 1974. Applicant: JACK WALKER TRUCKING SERVICE, INC., 844 Loudon Avenue, Lexington, Ky. 40508. Applicant's representative: George M. Catlett, 703-706 McClure Building, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, and *related advertising materials*, and *empty malt beverage containers* on return, from Columbus, Ohio, to Lexington, Ky., for 180 days. SUPPORTING SHIPPER: John W. Maurer, President, Bennie Robinson, Inc., West Third and Hickory Streets, Lexington, Ky. 40508. SEND PROTESTS TO: R. W. Schneiter, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 222 Bakhaus Building, 1500 West Main Street, Lexington, Ky. 40505.

No. MC 135457 (Sub-No. 3 TA), filed April 25, 1974. Applicant: COMMERCIAL CARTAGE CO., 3900 Reavis Barracks Road, St. Louis, Mo. 63125. Applicant's representative: Michael P. Malone (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from Kansas City, Kans., to points in St. Louis, Jefferson and St. Charles Counties, Mo. and St. Louis, Mo., and St. Louis commercial zones as described in Tem 30 of MF-I.C.C. No. W-7, all points within the corporate limits of St. Louis, Mo.; all points in St. Louis, Jefferson and St. Charles Counties, Mo., within a line drawn 0.5 mile south, west and north of the following line: Beginning at the Jefferson Barracks Bridge south on the Mississippi River and extending westerly beginning at Barnhart, Mo. on County Highway M to Junction U.S. Highway 21 thence northwesterly on County Highway MM to Junction U.S. Highway 30; thence northerly on County Highway W to Junction U.S. Higwhay 44; thence northerly on U.S. Highway 109 to Junction County Highway CC to Junotion U.S. Highway 40; thence northwesterly to Junction County Highway K; to Junction U.S. Highway 70; thence easterly U.S. Highway 70 to Junction County Highway C to Mississippi River; thence southerly to point of beginning:

All points within the corporate limits of East St. Louis, Granite City, Madison, Venice, Brooklyn, National City, Fairmont City, Washington Park, and Sauget, Ill.; that part of the village of Cahokia, Ill., bounded by Illinois Highway 3 on the east, First Avenue and Red-House (Cargill) Road on the south and southwest, the east line of the right-of-way of the Alton and Southern Railroad on the west, and the corporate limits of Sauget, Ill., on the northwest and north; that part of Centerville, Ill., bounded by a line beginning at the junction of 26th Street and the corporate limit of East St. Louis, Ill., and extending northeasterly along 26th Street to its junction with Bond Avenue, thence southeasterly along Bond Avenue to its junction with Owen Street, thence southwesterly along Owen Street to its junction with Church Road, thence southeasterly along Church Road to its junction with Illinois Avenue, thence southwesterly along Illinois Avenue to the southwesterly side of the right-of-way of the Illinois Central Railroad Co., thence along the southwesterly side of the right-of-way of the Illinois Central Railroad Co. to the corporate limits of East St. Louis, Ill., thence along the corporate limits of East St. Louis, Ill., to the point of beginning; and that area bounded by a line commencing at the intersection of the right-of-way of the Alton and Southern Railroad and the Madison, Ill., corporate limits near 19th Street, and extending east and south along said right-of-way to its intersection with the right-of-way of Illinois Terminal Railroad Co., thence southwesterly along the Illinois Terminal Railroad Co. right-of-way to its intersection with Illinois Highway 203, thence northwesterly along said highway to its intersection with the Madison, Ill., corporate boundary near McCambridge Avenue, thence northerly along the Madison, Ill., corporate boundary to the point of beginning, for 180 days. SUPPORTING SHIPPERS: J. D. Streett & Company, Inc., 4055 Park Avenue, St. Louis, Mo. 63110; Fisca Oil Co., Inc., 4830 Rainbow Boulevard, Shawnee Mission, Kans.; and Circo III, Inc., P.O. Box 12731, Creve Coeur, Mo. 63141. SEND PROTESTS TO: J. P. Werthmann, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 1465, 210 N. 12th Street, St. Louis, Mo. 63101.

No. MC 138875 (Sub-No. 18 TA) (Correction), filed April 10, 1974, published in the FEDERAL REGISTER issue of April 26, 1974, and republished as corrected this issue. Applicant: SHOEMAKER TRUCKING COMPANY, 8624 Franklin Road, Boise, Idaho 83705. Applicant's representative: Kent B. Power, P.O. Box 7651, Boise, Idaho 83707. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber mill products and composition board*, (1) From Pendleton, Oreg., and points in Oregon within ten miles thereof, points in Baker and Union Counties, Oreg., and points in that part of Oregon on and west of U.S. Highway 97, and points in that part of Washington on and west of U.S. Highway 99, to points in that part of Idaho south of the southern boundary of Idaho County, Idaho with no transportation for compensation on return except as otherwise provided; and (2) from points in Cowlitz, Skamania, Klickitat and Yakima Counties, Wash., and points in Washington on and west of Interstate Highway 5 to points in Baker, Grant, Malheur, Umatilla and Union Counties, Oreg., for 180 days. [No. MC-2880 (Sub-No. 14)]

SOMERSET BUS CO., INC.

Abandonment of Service

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 1, held at its office in Washington, D.C., on the 2nd day of May, 1974.

It appearing, That Somerset Bus Co., Inc., of Mountainside, N.J., holds a certificate of public convenience and necessity in No. MC-2880 (Sub-No. 14), authorizing operation, in interstate or foreign commerce, as a common carrier by motor vehicle, over regular routes, of passengers and their baggage, and express newspapers in the same vehicle with passengers, between Piscataway, N.J., and Elizabeth, N.J., serving all intermediate points; between Plainfield, N.J., and South Plainfield, N.J., serving all intermediate points; and between South Plainfield, N.J., and Carteret, N.J., serving all intermediate points;

It further appearing, That by petition filed January 2, 1974, said carrier requests voluntary revocation of its certificate for the reason that the operations conducted thereunder are no longer profitable;

It further appearing, That the said request for revocation properly may not be given consideration until such time as the affected members of the public have been given notice thereof and an opportunity to express their positions thereon; and good cause appearing therefor:

It is ordered, That within 30 days of the service date of this order, applicant shall submit to this Commission written proof that notice of the proposed discontinuance of service together with a facsimile of this order (a) has been posted for seven consecutive days in any bus presently operated over the routes sought to be abandoned, and (b) has been published for six consecutive days in newspapers of general circulation in Piscataway, Elizabeth, Plainfield, South Plainfield and Carteret, N.J.

It is further ordered, That within 45 days of the service date of this order any person-in-interest may submit to this Commission its written statement, verified under oath, as to why it believes that the above-specified certificate should not be revoked.

It is further ordered, That further consideration of this matter be, and it is hereby, deferred until expiration of the time period for filing of written statements.

It is further ordered, That notice of the request for revocation and of this order be published in the FEDERAL REGISTER.

It is further ordered, That a copy of this order be served upon the New Jersey Department of Transportation.

By the Commission, division 1.

MANDATORY PETROLEUM ALLOCATION AND PRICE REGULATIONS

Revision of Mandatory Crude Oil Allocation Program

V 39 I 94 MAY 14 74 XUM

Title 10—Energy

CHAPTER II—FEDERAL ENERGY OFFICE

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Revision of Mandatory Crude Allocation Program

A notice of proposed rulemaking which contained revisions to the mandatory crude allocation program found in Subpart C of Part 211 was issued on March 5, 1974 (39 FR 8633, March 6, 1974). Comments were invited from interested persons by March 20, 1974, and more than 100 comments were received by FEO. All comments, including late-filed comments where possible, have been read and considered. The amendment published herewith has been modified to take into account many of the suggestions contained in the comments. Some of the modifications are substantive in nature, but all are consistent with the policy objectives set forth in the March 5 notice.

The notice of proposed rulemaking was designed to remove disincentives to the increased production and importation of crude oil which exist under the current crude oil allocation program. The specific disincentives in the existing program concerned allocations between major oil companies, price disincentives associated with the volume of allocated crude oil, and product dislocations.

The revised crude oil program eliminates allocations between the major oil companies by limiting allocations to small and independent refiners.

With respect to price disincentives, a new § 212.94 is added which provides that refiner-sellers will sell their allocated crude oil to refiner-buyers at the refiner-seller's weighted average cost plus a 30 cents per barrel handling charge, a transportation adjustment and a gravity adjustment. FEO has eliminated the price provisions contained in § 212.88 under the existing program which permitted a refiner-seller to pass through to its customers an additional 84 cents per barrel representing an approximation of the average industry profit earned from refining a barrel of oil. Since a refiner-seller is now free to replace any crude oil which is allocated away from the seller without having such replacement crude oil subject to allocation and since there are now increased supplies of crude oil available with the lifting of the embargo, the new § 211.94 adequately compensates refiner-sellers for sales of allocated crude oil.

As noted, the existing crude oil program also created product dislocations. This has meant that crude oil was redirected away from some refiner-sellers capable of producing certain highly refined petroleum products which had the effect of reducing the production of those products. This problem was compounded by the fact that the program discouraged the replacement of the allocated crude oil by such a refiner-seller through tying allocation liability to increased crude oil availa. Under the revised crude oil program, those refiners will now be encouraged to replace the crude oil which they must sell to refiner-buyers. Through replacement, these refiners will be able to produce the needed products.

The amendment also takes into account the February 28, 1974 amendment to the allocation rules then in effect. That amendment provided that all imported crude oil supplies obtained by a refiner in excess of its estimated supplies for February 1–April 30, 1974 would not be subject to allocation.

Major Features of the New Crude Oil Allocation Program

Purchasers limited to small and independent refiners. Under the new crude oil program, small and independent refiners are entitled to receive allocations of crude oil in each allocation quarter. Small and independent refiners are defined as provided in the Emergency Petroleum Allocation Act of 1973 rather than as suggested in the notice of proposed rulemaking.

Petrochemical producers. Petrochemical producers are included within the definition of a refiner, and are thus eligible to receive allocations on the same basis as small and independent refiners. Although petrochemical producers had previously been entitled to receive 100 percent of current requirements (subject to the application of an allocation fraction) under Subpart J of Part 211, that subpart has proven to be deficient in operation and therefore will shortly be the subject of a notice of proposed rulemaking. This revised treatment of petrochemical producers guarantees that these firms will now automatically receive allocations in the same manner as all small and independent refiners. To the extent the operation of the crude allocation program would not serve to maintain petrochemical producers at the same approximate level of priority formerly assigned in Subpart J, the FEO will entertain requests for exceptions.

Fixed purchase opportunity for small and independent refiners. In each allocation quarter (the first of which commences June 1, 1974), each refiner-buyer is eligible to purchase an amount of crude oil equal to one quarter of the crude oil runs to stills of such refiner-buyer in the year 1972 less the volume of crude oil runs to stills of such refiner-buyer for the period February through April, 1974, with certain adjustments. Provision is also made for allocation of crude oil with respect to expanded or new refinery capacity since 1972.

The allocation amount for each refiner-buyer is thus a fixed amount (with adjustments for a national shortfall of crude supplies and supplies in excess of 100% refining capacity). The February through April, 1974 crude oil runs to stills were used as a floor for the fixed allocation amount, in that, in substantially all cases, this period represented a very low level of crude supplies and would indicate the worst case for a refiner-buyer's supply situation.

Fixed Share for allocating refiners. The only refiners required to make allocations of crude oil under the program would be refiners which do not qualify as small or independent refiners. A refiner-seller's allocation obligation would be basically a fixed percentage share of the total amount to be allocated to all refiner-buyers in an allocation quarter. Each refiner-seller's percentage share would be its proportional share of the reported refinery capacity of all refiner-sellers as of January 1, 1973. It is important to note that a refiner-seller's relative share of the total allocation obligation would not increase as the refiner-seller acquires additional crude oil since the percentage share is fixed by reference to an event in the past. This removes an important disincentive to import since, under the current program, until the exemption level is reached, each incremental barrel imported increased a seller's obligation to allocate.

Pricing of allocated crude oil. For sales of allocated crude oil, refiner-sellers may charge the weighted average price of all crude oil delivered to such refiner-seller during the month of the allocation sale, with adjustments for transportation and gravity. The distinctions in the calculation of the weighted average price and gravity adjustments for refiner-sellers in Districts I–IV and in District V have been retained. Refiner-sellers are also permitted to charge a 30 cents per barrel handling fee for allocation sales of crude oil.

Adjustment of 1974 runs. A refiner-buyer's volume of crude oil runs to stills for the period February through April, 1974 excludes the volume of crude oil runs to stills in such period attributable to crude oil purchased by that refiner-buyer in such period under the existing allocation program and the volume of crude oil runs to stills in such period attributable to imports of crude oil in such period in excess of the reported estimate of crude oil imports of that refiner-buyer for such period.

Adjustments for unusual or nonrecurring operating conditions. Upon application by a refiner-buyer prior to May 20, 1974, FEO may adjust a refiner-buyer's reported volume of crude oil runs to stills for the year 1972 to compensate for reductions in volume due to unusual or nonrecurring operating conditions. FEO may at any time, without application by the refiner-buyer concerned, adjust the volume of crude oil runs to stills of a refiner-buyer for the year 1972 or for the period February through April 1974, if the reported runs to stills in such period is inaccurate or not representative of normal operating conditions.

Limit of allocations to 100 percent of capacity. No allocation will be made that will result in crude oil supplies to a refiner-buyer in excess of 100 percent of refinery capacity, with adjustments for processing agreements. Allocations in a subsequent allocation quarter will be reduced by the amount by which an allocation in a previous quarter resulted in supplies in excess of 100 percent of capacity.

Requirement that refiner-buyers process allocated crude oil. Each refiner-buyer is required to process in its refineries, or have processed for its account by another refiner, any crude oil purchased under the allocation program in, or within a reasonable time following, the allocation quarter in which such crude oil was so purchased.

New and Future Refining Capacity

New refining capacity substantially completed by May 1, 1974. The FEO has provided for allocations on a basis equivalent to allocations to 1972 refining capacity, to post-1972 refining capacity, a substantial portion of the construction of which has been completed by May 1, 1973. This new refining capacity is eligible to receive allocations to bring it up to the particular refiner-buyer's 1972 supply to capacity ratio, taking into consideration supplies in excess of 1974 first quarter levels available for such new capacity.

Future refining capacity (After May 1, 1974). FEO is committed to fostering construction of new and expanded refinery capacity. To this end, the revised crude allocation program is designed to assure adequate sources of crude oil for future refinery capacity which is not substantially constructed by May 1, 1974. The revised program establishes a procedure for allocations of crude oil supplies to this type of refinery capacity.

The Emergency Petroleum Allocation Act extends only through February 28, 1975. There is no assurance that allocation auhority either in its present form or as amended will be extended beyond that date. Consequently, FEO expects that firms with expanded refinery capacity will have arranged substantial crude oil supplies aside from amounts to be allocated. However, in furtherance of FEO's desire to expand domestic capacity, particularly among small and independent refiners, provision is made in these regulations for allocation to future new and expanded facilities. FEO will establish an appropriate allocation level, endeavoring to assure supplies adequate for such facilities to operate at the national average supply-to-capacity ratio, but taking into account a series of enumerated factors to insure the viability and operability of any new facilities.

FEO will continue to review the regulations applicable to new and and expanded refinery capacity in light of world crude oil availability and access to world crude oil supplies by persons engaged in constructing new and expanded refinery capacity and is prepared to consider future changes in the rules whenever necessary to assure adequate crude oil supplies for this capacity. FEO is also prepared to review the December 1, 1973 supplier/purchaser relationships established in § 211.63 in connection with this objective.

In addition to assuring available crude oil supplies, FEO is committed to insuring that the allocation program does not unduly interfere with the distribution of products refined in new facilities. In particular, FEO is prepared to consider exceptions from allocation obligations relating to distribution of products refined at new facilities pursuant to long-term support contracts between the new refinery and wholesale purchaser-consumers where the latter participates in the financing of facilities under arrangements for delivery of refined products to wholesale purchaser-consumers for a period of 10 years or more.

Computation of and Adjustments to Allocation Rights of Refiner-Buyers

Prior to May 20, 1974, each refiner-buyer is required to report to FEO, as provided in § 211.66, its volume of crude oil runs to stills for the year 1972 and for the period February through April, 1974, reflecting the required adjustments. The FEO will then compute the quantity of crude oil which each refiner-buyer will be eligible to purchase during an allocation quarter, taking into consideration certain other adjustments.

On a continuing basis, the only adjustment provided for to a buyer's fixed allocation entitlement relates to the requirement that allocations shall not result in supplies in excess of 100% of capacity to any refiner-buyer. (Certain one-time adjustments to the allocation amounts for the quarter commencing June 1, 1974 are discussed below under "Corrections for February–April, 1974 Allocation Period.") The quantity of crude oil that a refiner-buyer is eligible to purchase in an allocation quarter will be reduced by the amount of crude oil available to the refiner-buyer in a prior allocation quarter that resulted in crude oil supplies in excess of 100 percent of such refiner-buyer's refinery capacity, except that such reduction based on crude oil supplies in any prior allocation quarter shall not be for an amount in excess of the volume of crude oil actually purchased by the refiner-buyer in that prior quarter.

Adjustment to Obligations of Refiner-Sellers

The sole adjustment to the obligation of a refiner-seller on a continuing basis in the new program is for unsold amounts in the prior allocation quarter. A similar adjustment together with a one-time adjustment for inaccurate estimates reported in the first crude oil sales period, are discussed below under "Corrections for February–April, 1974 Allocation Period." The continuing adjustment for unsold obligations of refiner-sellers provides for a carryover of unsold amounts for one allocation quarter. For example, if a refiner-seller did not sell all of his fixed percentage share of the total allocation obligation in the allocation quarter commencing June 1, 1974, the unsold amount would remain as its sales obligation in the allocation quarter commencing September 1, 1974, but would not be a sales obligation in the allocation quarter commencing December 1, 1974. In computing sales obligations for a particular allocation quarter, unsold amounts are deducted from the total allocation obligation and the balance is apportioned among refiner-sellers in accordance with the fixed percentage share of each.

Corrections for February–April, 1974 Allocation Period

Correction for unsold amounts. To the extent that a refiner-buyer classified as a refiner-seller in the February through April 1974 period did not sell its entire required amount under the buy/sell list, its purchase opportunity in the allocation quarter commencing June 1, 1974, will be reduced by that unsold amount. Similarly, refiner-sellers that were classified as such in the February–April, 1974 period will first be required to sell their unsold amounts, if any, in the allocation quarter commencing June 1, 1974.

Correction for inaccurate estimates. The quantity of crude oil that a refiner-buyer is eligible to purchase in the allocation quarter commencing June 1, 1974, will be reduced by the excess, if any, of the volume of domestic crude oil runs to stills of that refiner-buyer for the period February through April, 1974 over the reported domestic crude oil supply estimates of that refiner-buyer for such period. Such purchase opportunity will be increased by (i) the excess, if any, of such estimated domestic crude oil runs to stills for such period over the volume of its domestic crude oil runs to stills for such period and by (ii) the excess, if any, of the reported imported crude oil supply estimates of that refiner-buyer for such period over the volume of its imported crude oil runs to stills for such period. The effect of this corrective provision will be the reverse when applied to refiner-sellers. That is to say, a seller's obligation will be increased where a buyer's rights would be decreased, and vice versa. FEO has adopted these corrective provisions because of certain inequities on the first buy/sell list, which were inherent in a system based on estimates.

Computation of sales obligations in first allocation quarter. In computing the amount required to be sold by each refiner-seller in the allocation quarter commencing June 1, 1974, unsold amounts from the February–April, 1974 allocation period shall be considered the first obligation of the refiner-seller concerned.

The total of the unsold amounts shall be deducted from the total allocation obligation, and the balance shall be apportioned among all refiner-sellers in accordance with their respective fixed percentage shares. Adjustments shall then be made to the fixed percentage share amounts to reflect inaccuracies in estimates in the February–April, 1974 allocation period, as described above. To the extent that there is a net overage or shortfall as a result of these adjustments as compared to the original balance, this amount will be either credited or added to the obligations of all refiner-sellers in accordance with their respective fixed percentage shares.

Miscellaneous

Provision is made for publication of a buy-sell list, the commencement of de-

V 39 94
MAY 14 74
XUM

liveries, the reporting of transactions under the program, and the conditions of sales (including new § 211.94 concerning prices). In addition, the revision deals with those situations where a refiner-buyer is unable to negotiate a transaction.

Section 211.66(f) requires that each refiner claiming the status of a small or independent refiner must submit to FEO by May 20, 1974 an affidavit setting forth the basis for its claim. FEO will review these claims and determine whether the refiner is entitled to be a refiner-buyer under the revised program.

Possible reduction of purchase opportunities. Finally, FEO may consider revision of the crude oil program in the future to reduce purchase opportunities for refiner-buyers, in subsequent allocation quarters, as the current February, 1975 termination date for the Emergency Petroleum Allocation Act approaches. Such a gradual phasing down of allocation entitlement could take the form of progressive percentage reductions of the fixed purchase opportunities in succeeding allocation quarters.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, E.O. 11748; 38 FR 33575)

In consideration of the foregoing, 10 CFR Chapter II is revised as set out herein, effective immediately.

Issued in Washington, D.C. on May 10, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

1. Subpart C of Part 211 is revised to read as follows:

Subpart C—Crude Oil and Refinery Yield Control

Sec.
211.61 Scope.
211.62 Definitions.
211.63 Supplier/purchaser relationships.
211.64 Transactions under prior program.
211.65 Method of allocation.
211.66 Reporting requirements.
211.71 Mandatory refinery yield control program.

Subpart C—Crude Oil and Refinery Yield Control

§ 211.61 Scope.

(a) This subpart is applicable to all producers, refiners and others who purchase or obtain crude oil for resale, transfer or use.

(b) This subpart provides for the mandatory allocation of crude oil produced in or imported into the United States other than the first sale of crude oil exempted pursuant to the provisions of § 210.32 of this chapter.

(c) This subpart also provides a program for refinery yield control.

§ 211.62 Definitions.

For purposes of this subpart—

"Allocation quarter" means a consecutive three month calendar period which commences one month prior to the start of each calendar quarter. The first allocation quarter shall be the three-month period from June 1, 1974 through August 31, 1974.

"Crude oil runs to stills" means, in the case of a refiner other than a petrochemical producer, the total number of barrels of crude oil input to distillation units processed by a refiner and measured in accordance with Bureau of Mines Form 6-1300-M and, in the case of a petrochemical producer, the total number of barrels of crude oil input to processing units for conversion into petrochemicals.

"Future refining capacity" means, for each refiner, the sum of the capacity of its refineries not included within the definitions of refining capacity and new refining capacity and operated continuously in the normal course of such refiner's business. Future refining capacity shall be certified by the FEO.

"Independent refiner" means a refiner which (a) obtained, directly or indirectly, in the calendar quarter which ended immediately prior to November 27, 1973, more than 70 percent of its refinery input of domestic crude oil (or 70 percent of its refinery input of domestic and imported crude oil) from producers which do not control, are not controlled by, and are not under common control with, such refiner, and (b) marketed or distributed in such quarter and continues to market and distribute a substantial volume of gasoline refined by it through independent marketers.

"New refining capacity" means, for each refiner, the sum of the capacity of its refineries not included within the definition of refining capacity and is operated continuously in the normal course of such refiner's business, a significant portion of the construction of which has been completed prior to May 1, 1974. New refining capacity shall either be certified by the FEO or be the subject of a starter allocation under Section 25 of the Oil Import Regulations (32A CFR OI Reg. 1-25).

"Petrochemical producer" means a person who manufactures petrochemicals in a petrochemical plant by processing petrochemical feedstock.

"Processing agreement" means any agreement pursuant to which an owner of crude oil agrees to have that crude oil processed or refined by another person and retains ownership in some or all of the petroleum products so processed or refined from the crude oil.

"Refinery" means an industrial plant, regardless of capacity, processing crude oil feedstock and manufacturing refined petroleum products, residual fuel oil or petrochemicals, and shall include a petrochemical plant.

"Refiner" means a firm which owns, operates or controls the operations of one or more refineries.

"Refiner-buyer" means any small refiner or independent refiner.

"Refiner-seller" means a refiner which is not a small refiner or an independent refiner as defined in this section, except that a refiner which is not a small refiner or an independent refiner, and the refinery capacity of which consists solely of new refining capacity or future refining capacity, shall not be classified as a refiner-seller.

"Refinery capacity" means, for each refiner, the sum of the refining capacity, new refining capacity and future refining capacity of its refineries.

"Refining capacity" means, for each refinery, the capacity reported to the Bureau of Mines as of January 1, 1973, as certified by the FEO. Any capacity of a refinery which has ceased to be operated continuously in the normal course of business since the January 1973 report to the Bureau of Mines shall be deducted from refining capacity.

"Small refiner" means a refiner, the sum of the capacity of the refineries of which (including the capacity of any person who controls, is controlled by, or is under common control with such refiner) does not exceed 175,000 barrels per day. A refiner which is a small refiner as of January 1, 1974 shall not cease to be classified as such by virtue of new refining capacity operational after January 1, 1974 or future refining capacity which results in a refinery capacity for such refiner in excess of 175,000 barrels per day.

§ 211.63 Supplier/purchaser relationships.

(a) All supplier/purchaser relationships in effect under contracts for sales, purchases, and exchanges of domestic crude oil on December 1, 1973, shall remain in effect for the duration of this program, except purchases and sales made to comply with this program: *Provided, however,* That (1) any such supplier/purchaser relationship may be terminated by the mutual consent of both parties; (2) the provisions of this paragraph do not apply to the first sale of crude oil pursuant to § 210.32 of this chapter; and (3) the provisions of this paragraph shall not apply to the seller of any crude oil if the present purchaser of such crude oil refuses, after notice by the seller, to meet any bona fide offer made by another purchaser to buy such crude oil at a lawful price above the price paid by the present purchaser.

(b) New crude petroleum may be sold to any person. Once the sale is made, the seller of such new crude petroleum shall continue to sell to that purchaser subject to the provisions of paragraph (a)(1), (2) and (3) of this section.

§ 211.64 Transactions under prior program.

(a) Any agreement for the sale or purchase of crude oil entered into as a result of the provisions of this subpart as in effect immediately prior to May 10, 1974, shall be fully performed notwithstanding any provision of this subpart as in effect on May 10, 1974.

(b) Special Rule No. 1 issued under the provisions of this subpart as in effect immediately prior to May 10, 1974, shall remain in full force and effect.

§ 211.65 Method of allocation.

(a) *Purchase opportunities of refiner-buyers.* (1) In each allocation quarter, each refiner-buyer shall be entitled to purchase an amount of crude oil equal to one quarter of the volume of crude oil runs to stills of such refiner-buyer for the year 1972 less the volume of crude oil runs to stills of such refiner-buyer for the period February through April 1974, as adjusted under the provisions of this section. If the estimated aggregate amount of crude oil to be produced in and imported into the United States in any allocation quarter is less than the aggregate amount of crude oil produced in and imported into the United States in the corresponding period of 1972, refiner-buyers for that allocation quarter shall have the amount of crude oil that they would otherwise be entitled to purchase reduced on a pro rata basis.

(2) A refiner-buyer's refinery capacity for the purposes of paragraphs (a)(6) and (c)(2) of this section and volume of crude oil runs to stills for the year 1972 and for the period February through April, 1974 shall (i) include (A) the volume of crude oil processed by another refiner for that refiner-buyer pursuant to a processing agreement and (B) the volume of crude oil processed by that refiner-buyer for a person other than a refiner pursuant to a processing agreement, and (ii) exclude the volume of crude oil processed by that refiner-buyer for another refiner pursuant to a processing agreement.

(3) A refiner-buyer's volume of crude oil runs to stills for the period February through April, 1974 shall exclude (i) the volume of crude oil runs to stills in such period attributable to crude oil purchased by that refiner-buyer in such period pursuant to the provisions of this subpart and (ii) the volume of crude oil runs to stills in such period attributable to imports of crude oil in such period in excess of the reported estimate of crude oil imports of that refiner-buyer for such period.

(4) Upon application by a refiner-buyer prior to May 20, 1974, for purposes of the calculations in paragraph (a)(1) of this section, the FEO may adjust such refiner-buyer's reported volume of crude oil runs to stills for the year 1972 to compensate for reductions in volume due to unusual or nonrecurring operating conditions. The FEO may at any time, for purposes of such calculations and without application by the refiner-buyer concerned, adjust the volume of crude oil runs to stills of a refiner-buyer for the year 1972 or for the period February through April, 1974, if it determines that such refiner-buyer's reported volume of crude oil runs to stills for such year or period is inaccurate or not representative of normal operating conditions.

(5) For purposes of the calculations in paragraph (a)(1) of this section, the volume of crude oil runs to stills of a refiner-buyer in 1972 shall be (i) increased by the volume of crude oil necessary to operate any new refining capacity of that refiner-buyer at the supply to capacity ratio at which all refineries of that refiner-buyer operated in the year 1972, taking into consideration crude oil supplies (in excess of supplies included in its February through April, 1974 crude oil runs to stills) available to that refiner-buyer for such new capacity, and (ii) decreased by the volume of crude oil runs to stills of such refiner-buyer attributable to any refining capacity which has ceased to be operated continuously in the normal course of business since December 31, 1972.

(6) No allocation shall be made under this subpart which will result in crude oil supplies in excess of 100 percent of refinery capacity to any refiner-buyer.

(7) Each refiner-buyer shall process in its refineries, or have processed for its account by another refiner, any crude oil purchased under this subpart in, or within a reasonable time following the allocation quarter in which such crude oil was so purchased.

(b) *Future refining capacity.* (1) Notwithstanding any provisions of paragraph (a) of this section to the contrary, future refining capacity of a refiner-buyer shall be eligible to receive allocations of crude oil, as hereinafter provided. Each refiner-buyer that wishes to receive an allocation under this paragraph (b) shall apply to the FEO, on forms and instructions issued by the FEO. No such application shall be made until such future capacity will become operational in the allocation quarter for which the allocation is sought. In no event shall any such application be made less than 60 or more than 90 days prior to the commencement of such allocation quarter. The FEO may specify a fixed or varying allocation amount or amounts of crude oil for such future refining capacity, and in so doing shall consider the following factors:

(i) The source and volume of anticipated crude oil supplies for such future refining capacity;

(ii) the efforts made by that refiner-buyer to obtain or locate crude oil supplies for such future refining capacity;

(iii) the projected ability of all refiner-sellers to obtain supplies of crude oil for their refinery capacity;

(iv) the economic feasibility of operating such future refining capacity absent any allocations;

(v) the extent to which such future refining capacity is designed to implement the national policies relating to protection of the environment; and

(vi) the extent to which such future refining capacity incorporates high conversion facilities and the patterns of product yield conform to the anticipated national requirements for refinery products.

(2) The FEO will endeavor to assure supplies to future refining capacity to enable such capacity to operate at the national supply to capacity ratio.

(c) *Computation of total allocation obligation.* (1) Prior to May 20, 1974, each refiner-buyer shall report to the FEO, as provided in § 211.66, its volume of crude oil runs to stills for the year 1972 and for the period February through April, 1974, which reported volume shall reflect the adjustments specified in paragraph (a)(2), (3), (4) and (5) of this section. The FEO will then compute the quantity of crude oil which each refiner-buyer will be eligible to purchase during an allocation quarter. The sum of the quantities of crude oil that all refiner-buyers are eligible to purchase for delivery during an allocation quarter shall be the total allocation obligation for refiner-sellers for such allocation quarter.

(2) The quantity of crude oil that a refiner-buyer shall be eligible to purchase under this subpart in an allocation quarter shall be reduced by the amount of crude oil available to refiner-buyer in a prior allocation quarter that resulted in crude oil supplies in excess of 100 percent of that refiner-buyer's refinery capacity, except that such reduction based on crude oil supplies in any prior allocation quarter shall not be for an amount in excess of the volume of crude oil actually purchased by that refiner-buyer under this subpart in such prior allocation quarter.

(3) The purchase opportunity of each refiner-buyer which was classified as a refiner-seller in the period February through April, 1974 and did not sell its total required quantity of crude oil in such period pursuant to the buy/sell list published by the FEO shall be reduced by such unsold amount in the allocation quarter commencing June 1, 1974.

(4) The quantity of crude oil that a refiner-buyer shall be eligible to purchase under this subpart in the allocation quarter commencing June 1, 1974, shall be (i) reduced by the excess of the volume of domestic crude oil runs to stills of that refiner-buyer for the period February through April, 1974 over the reported estimated domestic crude oil runs to stills of that refiner-buyer for such period and (ii) increased by (A) the excess of such estimated domestic crude oil runs to stills for such period over the volume of its domestic crude oil runs to stills for such period, and (B) the excess of the reported estimates of imported crude oil runs to stills of that refiner-buyer for such period over the volume of its imported crude oil runs to stills for such period.

(d) *Refiner-sellers' sales obligations.* (1) Each refiner-seller shall offer for sale crude oil, directly or through exchange, to refiner-buyers. The quantity of crude oil that each refiner-seller shall be required to offer for sale to refiner-buyers during an allocation quarter shall be equal to that refiner-seller's fixed percentage share multiplied by the total allocation obligation for the particular allocation quarter, as adjusted in this paragraph (d). A refiner-seller's fixed percentage share is its proportionate share of the total refining capacity of all refiner-sellers as reported to the Bureau of Mines on January 1, 1973, as certified by the FEO. New refining capacity or future refining capacity shall not subject a refiner-seller to any increase in its fixed percentage share.

(2) The quantity of crude oil that a refiner-seller shall be required to offer for sale in the allocation quarter commencing June 1, 1974, shall be (i) increased by the excess of the volume of domestic crude oil runs to stills of that refiner-seller for the period February through April, 1974 over the reported estimated domestic crude oil runs to stills

V 39 I 94 MAY 14 74 XUM

of that refiner-seller for such period and (ii) reduced by (A) the excess of such estimated domestic crude oil runs to stills for such period over the volume of its domestic crude oil runs to stills for such period, and (B) the excess of the reported estimates of imported crude oil runs to stills of that refiner-seller over the volume of its imported crude oil runs to stills for such period. For purposes of this paragraph (d)(2) a refiner-seller's crude oil runs to stills shall reflect the adjustments in paragraph (a)(2) of this section and include amounts sold and exclude amounts purchased under this subpart in the period February through April, 1974.

(3) In each allocation quarter, each refiner-seller that did not sell its total quantity of crude oil required to be offered for sale under this subpart in the prior allocation quarter or, in the case of the allocation quarter commencing June 1, 1974, the period February through April, 1974, shall first be required to offer for sale such unsold amount to refiner-buyers; *provided, however,* that such unsold amount in such prior allocation quarter or period shall constitute a sales obligation of a refiner-seller only for the allocation quarter immediately following such prior allocation quarter or period.

(4) In calculating the quantity of crude oil that each refiner-seller is required to offer for sale in an allocation quarter, the aggregate of the quantities of crude oil required to be sold under paragraph (d)(3) of this section shall be deducted from the total allocation obligation for such allocation quarter, and the balance shall be offered for sale by all refiner-sellers in accordance with their respective fixed percentage shares. Sales by a refiner-seller in an allocation quarter shall be deemed to be first in satisfaction of that refiner-seller's obligation under paragraph (d)(3) of this section, to the extent of such obligation, and next in satisfaction of that refiner-seller's fixed percentage share of such balance.

(5) For the allocation quarter commencing June 1, 1974, after calculation of the amount of each refiner-seller's fixed percentage share of the total allocation obligation less the quantities of crude oil required to be sold under paragraph (d)(3) of this section, the adjustments specified in paragraph (d)(2) of this section shall be made to such amount. To the extent that the aggregate of such adjusted obligations of all refiner-sellers either exceeds or is less than the total allocation obligation less such quantities under paragraph (d)(3) of this section, the adjusted obligation of each refiner-seller (exclusive of amounts required to be sold under paragraph (d)(3) of this section) shall be either reduced or increased, as the case may be, by its fixed percentage share of such excess or shortfall.

(e) *Buy-sell list.* On the first day of the allocation quarter commencing June 1, 1974, and 15 days prior to each subsequent allocation quarter, the FEO shall publish a notice for that allocation quarter listing the quantity of crude oil each refiner-buyer is eligible to purchase, the total allocation obligation for all refiner-sellers, the fixed percentage share for each refiner-seller and the quantity that each refiner-seller will be obligated to offer for sale to refiner-buyers. The commencement date for starting deliveries under sales agreements in an allocation quarter shall be 15 days after publication of the related notice. Any agreements for the sale or purchase of crude oil after such commencement date shall be retroactive to the starting delivery date. All deliveries must be completed or arranged for before the end of the allocation quarter.

(f) *Sale/purchase transaction report.* Within fifteen days of the publication of the notice under paragraph (e) of this section, each transaction made to comply with this program shall be reported by the buyer and seller to the FEO. This report shall identify the selling refiner and purchasing refiner-buyer and indicate the volumes of the crude oil sold or purchased.

(g) *Conditions of sale.* (1) The terms and conditions of each sale of crude oil, other than the prices, shall be consistent with normal business practices. The crude oil offered must be suitable for processing in and practical for delivery to the refiner-buyer.

(2) All crude oil transferred pursuant to this section shall be priced in accordance with the provisions of Part 212 of this chapter.

(3) Exchanges of crude oil may be utilized to comply with the purchase and sale provisions of this section.

(h) *Failure to negotiate transactions.* (1) Each refiner-buyer shall use its best effort to consummate the purchases of crude oil under this subpart from refiner-sellers prior to requesting assistance from the FEO. A refiner-buyer that is unable to negotiate a contract to purchase crude oil within 15 days of the publication of the notice specified in paragraph (e) of this section may request after the expiration of such 15 day period that the FEO direct one or more refiner-sellers to sell an acceptable type of crude oil to such refiner-buyer. Such a request must be made within 30 days of the publication of such notice. Upon such request, the FEO may direct one or more refiner-sellers which have not sold their required allocation quarter quantity to sell crude oil to the refiner-buyer. If the refiner-buyer declines to purchase the crude oil specified by the FEO, the rights of that refiner-buyer to purchase that volume of crude oil are forfeited during that allocation quarter, provided that the refiner-seller or refiner-sellers have fully complied with all of the provisions of this section.

(2) Refiner-sellers which have not negotiated sales with refiner-buyers of the required volume of crude oil within fifteen days of the publication of the notice specified in paragraph (e) of this section shall notify the FEO. The FEO may then direct that refiner-seller to sell that volume to a refiner-buyer which has not obtained its total amount permitted under paragraph (a) of this section.

§ 211.66 **Reporting requirements.**

(a) All matters pertaining to the allocation of crude oil and the refinery yield control program shall be addressed to the Administrator, Federal Energy Office, P.O. Box 2885, Washington, D.C. 20013.

(b) A monthly report shall be required from refiners on forms and instructions issued by the FEO as to crude oil runs and products produced.

(c) Initial report. By May 20, 1974 each refiner shall provide the FEO with a report showing the following:

(1) Its refining capacity (as defined in § 211.62).

(2) Any new refining capacity (as defined in § 211.62) of such refiner.

(3) The volume of the crude oil runs to stills of such refiner for the period February through April 1974, taking into account, and separately specifying the amount of, the adjustments provided for in § 211.65.

(4) The volume of the crude oil runs to stills of such refiner for the year 1972, taking into account, and separately specifying the amount of, the adjustments provided for in § 211.65.

(5) Estimated runs of all domestic and imported crude oil for the forthcoming allocation quarter including (i) the volume of crude oil processed by another refiner for that refiner pursuant to a processing agreement and crude oil processed by that refiner for a person other than a refiner pursuant to a processing agreement, and excluding (ii) the volume of crude oil which that refiner processes for another refiner pursuant to a processing agreement.

(6) Such other information as the FEO may request.

(d) Quarterly report. Thirty days prior to each allocation quarter commencing after August 31, 1974, each refiner shall file with the FEO a report showing the following:

(1) The volume of crude oil runs to stills of such refiner for the most recent calendar quarter, taking into account, and specifying the amount of, the adjustments provided for in § 211.65 (a)(2).

(2) The volume of crude oil runs to stills of such refiner for the allocation quarter preceding the current allocation quarter, taking into account, and specifying the amount of, the adjustments provided for in § 211.65(a)(2)

(3) The volume of crude oil available to such refiner in the allocation quarter preceding the current allocation quarter.

(4) Estimated runs of all domestic and imported crude oil for the forthcoming allocation quarter including (i) the volume of crude oil processed by another refiner for that refiner pursuant to a processing agreement and crude oil processed by that refiner for a person other than a refiner pursuant to a processing agreement, and excluding (ii) the volume of crude oil which that refiner processes for another refiner pursuant to a processing agreement.

(5) Any change in refinery capacity since the previous report.

(6) Such other information as the FEO may request.

(e) All information required by paragraphs (c) and (d) shall identify domestic and imported crude oil and shall state the average cost to the refiner of the domestic and imported crude oil run. Such reports shall also identify amounts of crude oil produced from a stripper well lease as defined in § 210.32 of this chapter.

(f) Each refiner who claims to be a small refiner or an independent refiner shall submit to the FEO ten days prior to the allocation quarter commencing June 1, 1974, an affidavit setting forth the factual basis for its claim.

(g) Any refiner whose refinery capacity exceeds 175,000 barrels per day and who does not report as provided in paragraph (f) of this section will be deemed a refiner-seller.

§ 211.71 **Mandatory refinery yield control program.**

(a) *Purpose.* The refinery yield control program is designed to require each refiner to utilize available supplies of crude oil in a manner best suited to ensure adequate production levels of refined petroleum products and residual fuel oil which are or may be in short supply, consistent with the objectives of this chapter.

(b) *Scope.* This section applies as specified to the production of refined petroleum products and residual fuel oil from crude oil by each refiner in the United States.

(c) *Product yield controls*—(1) *Definitions.* As used in this section—

"Adjustment factor" means the percentage established by the FEO by which the base percentage yield of a particular refined petroleum product or residual fuel oil is multiplied to obtain the adjusted percentage yield of that particular product or residual fuel oil.

"Adjusted percentage yield" means the product of the base percentage yield of a particular refined petroleum product or residual fuel oil multiplied by the adjustment factor for that product or residual fuel oil.

"Base percentage yield" means the ratio expressed as a percentage, which the total number of barrels of a particular refined petroleum product or residual fuel oil produced by a refiner during a specified base period bears to the refiner's total crude runs to stills in that base period.

(2) *Adjustment of base percentage yield.* Whenever a refined petroleum product or residual fuel oil is or will be in short supply, the FEO may require refiners to adjust their base percentage yield of that product or residual fuel oil in order to increase the relative output of that product or residual fuel oil in short supply. If the FEO determines that an adjustment to the base percentage yield of a particular refined petroleum product or residual fuel oil is necessary, the FEO shall publish an adjustment factor by which each refiner must multiply its base percentage yield of that product or residual fuel oil to obtain the adjusted percentage yield of that product or residual fuel oil.

(3) *Joint compliance.* Upon approval by the FEO, two or more refiners may adjust their base percentage yield of a particular refined petroleum product or residual fuel oil on a pooled basis, such that the combined production of that product or residual fuel oil by the two or more refiners would equal the combined production of those refiners if each refiner had separately equalled or exceeded its adjusted percentage yield of that product or residual fuel oil.

(d) *Allocation of crude oil.* The FEO may adjust the quantities of crude oil allocated among refiners under § 211.65 in a manner designed to ensure desired production levels of refined petroleum products or residual fuel oil in short supply for which an adjustment factor has been established. Such adjustments shall be designed to meet the objectives of this chapter and of the Act, such that refiners which increase production in excess of their adjusted percentage yield of that product or residual fuel oil, or less than the adjusted percentage yield of that product or residual fuel oil may be allocated greater or lesser quantities of crude oil during the next allocation quarter, respectively.

§ 212.88 [Revoked]

2. Section 212.88 of Part 212 is revoked.

3. Section 212.94 is added to read as follows:

• • • • • •

§ 212.94 **Allocated crude pricing.**

(a) *Scope.* This section applies to each sale of crude oil made pursuant to the provisions of § 211.65 of this chapter, effective for sales obligations for the June 1, 1974, and subsequent allocation quarters.

(b) *Rule.* Notwithstanding the general rules described in this subpart, the price at which crude oil shall be sold when required in § 211.65 of this chapter during each month shall be in Districts I–IV the weighted average price of all crude oil delivered to a refiner-seller in that month for those Districts, and in District V, the weighted average price of all crude oil delivered to a refiner-seller in that month for that District, plus, in all Districts, a handling fee of 30 cents per barrel, any transportation adjustment as specified in paragraph (b)(1) of this section and any gravity adjustment as specified in paragraph (b)(2) of this section. Each refiner-seller making such a sale shall calculate its price under this section and shall maintain records, which shall be made available to the FEO upon request, listing the volumes and delivered prices of all crude oil delivered to its refineries during each month.

(1) Actual additional transportation expenses incurred to move the crude oil to the refiner-buyer's refinery shall be paid by the refiner-buyer. Actual transportation expenses saved as a result of moving the offered crude oil directly to the refiner-buyer's refinery shall be deducted from the selling price, if customarily included in such price.

(2) The price adjustment for gravity differential of crude oil offered for sale under § 211.65 of this chapter in Districts I–IV shall be the weighted average price for those Districts calculated under paragraph (b) of this section plus or minus 2 cents per barrel per °API that the crude oil being offered for sale under § 211.65 of this chapter is above or below the weighted average °API of estimated runs of all crude oil for the forthcoming calendar quarter for the refiner-seller in Districts I–IV, and, in District V, shall be the weighted average price for that District calculated under paragraph (b) of this section plus or minus 5 cents per barrel per °API that the crude oil being offered for sale under § 211.65 of this chapter is above or below the weighted average °API of estimated runs of all crude oil for the forthcoming calendar quarter for the refiner-seller in District V.

(c) *Calculations.* For the purpose of calculating the weighted average price of all crude oil delivered to a refiner-seller during each month, a refiner-seller shall use, for domestic crude oil, the delivered cost of all domestic crude oil at the point of purchase, plus any gathering or trucking allowance, pipeline tariffs, water transportation costs, terminalling costs and exchange differentials paid to deliver such crude oil to the refiner-seller's refineries; and, for imported crude oil, the landed cost plus any pipeline tariffs, water transportation costs, terminalling costs, exchange differentials, import fees, insurance, duty, and taxes paid to deliver such crude oil to the refiner-seller's refineries.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

FEDERAL-AID HIGHWAY PROGRAM—DoT sets forth recordkeeping requirements and retention schedules; effective 5–6–74 17306

DoT regulates construction projects under certification acceptance procedures; effective 5–8–74 17309

DANGEROUS CARGO—DoT proposes requirements for carriage of solid hazardous materials in bulk; comments by 8–31–74 17331

BENDECTIN TABLETS—FDA allows product to remain on market pending completion of clinical studies; comments by 7–15–74 17343

NEW ANIMAL DRUGS—FDA approves safe use of monensin sodium compound in manufacturing broiler chicken feed; effective 5–15–74 17305

MANUFACTURERS EXCISE TAX—IRS proposal on sporting goods; comments by 6–17–74 17328

FOOD STANDARDS—FDA order establishing general definition of safe and suitable food ingredients; effective 6–14–74 17304

FROZEN ASPARAGUS—USDA amends United States standards for grades; effective 6–30–74 17303

INCOME TAX—Proposed IRS regulations relating to election as to treatment of income subject to foreign community property laws; comments by 6–14–74 17323

HAZARDOUS MATERIALS—DoT amends certain shipping requirements; effective 1–31–74 17313

(Continued inside)

PART II:

BUDGETARY RESERVES—OMB submits report of apportionment and reservation of funds process as of 4–20–74 17371

MEETINGS—
Federal Prevailing Rate Advisory Committee, 6–6, 6–13, 6–20, and 6–27–74 17347
Postal Service: Postal Service Advisory Council, 6–5–74 .. 17337
HEW: Briefing of Consultants on FD & C Red No. 2, 6–6–74 17343
National Advisory Council on Education Professions Development, 6–5 to 6–7–74 17343
National Advisory Council on Adult Education, 6–6 to 6–8–74 17344
Coal Mine Health Research Advisory Council, 6–3–74 17342
Interior Department: Burns District Grazing Advisory Board, 6–11–74 17337
DoD: U.S. Army Aviation System Command Scientific Advisory Group for Aviation Systems, 6–12 and 6–13–74 17337
Commerce Department: Second Technical Seminar on Recovery and Utilization of Minced Fish, 6–12 and 6–13–74 17331

CANCELLED MEETING—
AEC: U.S. Nuclear Data Committee Basic Science Subcommittee, 5–20–74 17357

federal register
Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

list of cfr parts affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published seperately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

Title 7—Agriculture

AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Standards for Grades of Frozen Asparagus

A notice of a proposal to amend the United States Standards for Grades of Frozen Asparagus (7 CFR 52.381–52.395) was published in the FEDERAL REGISTER of September 11, 1973 (38 FR 24910). Interested persons were given until October 31, 1973, to submit written comments concerning the proposed amendment. As a result of requests that were received, the Department, in a notice published in the FEDERAL REGISTER (39 FR 1053), extended the period of comment until February 28, 1974.

This amendment is issued under the authority of the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090, as amended, 7 U.S.C. 1624), which provides for the issuance of official U.S. Grades to designate different levels of quality for voluntary use by producers, buyers, and consumers. Official grading services are also provided under this Act upon request and upon payment of a fee to cover the cost of such services.

NOTE: Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

Statement of consideration leading to the amendment of the standards. The amendment reclassifies a unit of product with tough fiber from a "minor" to a "major" defect. Such reclassification would noticeably reduce the amount of tough fiber that would be permitted in U.S. Grade A and U.S. Grade B frozen asparagus. The request to amend the standards was formally made by the American Frozen Food Institute (AFFI).

Thirteen written responses were received, one which was from the Food and Drug Administration stating that they had no formal comment to make.

Four comments from consumers fully supported the amendment.

The AFFI (representing a substantial number of frozen asparagus packers in the United States) reaffirmed their support to the amendment and of attribute-type standards. AFFI points out that the elimination of tough fiber from the "minor" classification would reduce the maximum possible amount of tough fiber in U.S. Grade A frozen asparagus from an Acceptable Quality Level (AQL) of 15.0 to 6.5.

The American Farm Bureau Federation requested a postponement of the amendment "* * * until differences in the probable impact of these proposals on the different U.S. production areas can be thoroughly analyzed to determine whether modifications are needed in order to provide equitable treatment for all areas and to avoid a reduction in the supplies available to consumers."

The Department contends there is no useful purpose in postponing the amendment pending an anlysis of production area capabilities. Extensive studies were conducted in all producing areas prior to the revision of April, 1970. It is difficult to assure "equity" between and even within producing areas since asparagus is so sensitive to weather conditions. It seems more logical to base the grade requirements on what the market will tolerate for the respective grade, irrespective of growing area. The Department does not believe the proposed amendment will reduce overall supplies available to the consumer, even though it will reclassify product with too much tough fiber into a lower grade.

A processor of frozen asparagus contended that a portion of his 1973 pack would have been downgraded from U.S. Grade A to U.S. Grade B if the pack had been graded under the provisions of the proposed amendment.

The Department does not disagree with this statement. Undoubtedly the portion of the 1973 pack referred to did contain substantial amounts of fiber. It is the intent of the proposal to eliminate this type of product from the Grade A classification.

Five comments were received from growers and packers of asparagus in the Michigan area. Their consensus was that the amendment is discriminatory in that the revision would permit lesser amounts of tough fiber in U.S. Grade A frozen asparagus than in U.S. Grade A canned asparagus.

The standards for canned asparagus and frozen asparagus cannot be compared objectively to ascertain the effects of fiber on the final grade of the product. This situation exists because each standard treats product characteristics differently. Assuming that the raw material (fresh asparagus) has a normal distribution of imperfections—whether fiber development, pathological defects, open heads, etc.—the proposed revision would permit less fiber in the frozen product in Grades A and B than in the canned product. It would be desirable if both standards would treat fiber identically. However the Department should not disregard the request of the frozen food industry for a better product just because the canned standard is different. In fact, these differences have existed for several years. Therefore, the Department believes the interests of the frozen food industry would best be served by adopting the proposed amendment.

No additional comments were received.

After careful consideration of all relevant matters, the Department concludes that the amendment shall become effective.

Therefore, the United States Standards for Grades of Frozen Asparagus are hereby amended as proposed on September 11, 1973. The amendment is:

Table V is revised to read as follows:

V 39 I 95 MAY 15 74 XUM

TABLE V.—*Classification of defects, character—damage*

Quality factors	Defects	Classification		
		Minor	Major	Severe
Character	Spears and tips styles:			
	In Grade A only—			
	Reasonably well developed (worse than Plate 1 but not worse than Plate 2 or 3).		×	
	In all grades—			
	Poorly developed (worse than Plate 2 or 3):			
	Seedy		×	
	Flowered			×
	Cut spears or cuts and tips style:			
	In all grades—			
	Poorly developed (worse than Plate 2 or 3):			
	Seedy	×		
	Flowered		×	
	Tough fiber development:			
	2 inches or less		×	
	More than 2 inches or woody units of any length			×
Damage	Shattered heads—broken or shattered to the extent that it is definitely noticeable.	×		
	Misshappen—badly crooked or affected in appearance by doubles or malformations.	×		
	Poorly cut—angle of cut less than 45 degrees—cut is ragged or partially cut.	×		
	Discoloration, mechanical injury, pathological or damaged by other means to the extent that the appearance and eating quality of a unit is affected:			
	Slightly	×		
	Materially		×	
	Seriously			×

For interpretative guides, see USDA illustrations of "Stages of Development in Frozen Asparagus," which are a part of this document.

Effective date. The amendment to the United States Standards for Grades of Frozen Asparagus, which have been in effect since April 8, 1970, shall become effective June 30, 1974.

Dated: May 8, 1974.

E. L. PETERSON,
Administrator,
Agricultural Marketing Service.

Correction

In FR Doc. 74-10160 appearing on page 15404 in the issue of Friday, May 3, 1974, the second line of § 301.45-2b(c) reading "have dried, pressed, waxed, lacquered," should read "have been dried, pressed, waxed, lacquered,".

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

Authority of Special Inquiry Officers

Reference is made to the Notice of Proposed Rule Making which was published in the FEDERAL REGISTER on March 20, 1974 (39 FR 10436) pursuant to section 553 of Title 5 of the United States Code (80 Stat. 383) and in which there was set forth the proposed amendment of § 242.8(a) pertaining to the authority of special inquiry officers to consider, in deportation proceedings, claims for relief from deportation under Articles 32 and 33 of the Convention Relating to the Status of Refugees, as amended by the Protocol Relating to the Status of Refugees. The representation which was received in response to the proposed rule of March 20, 1974 has been considered. No change has been made in the proposed rule.

Although it has been the Service view that in deportation proceedings conducted under the present regulations special inquiry officers have authority, as an incident of determining deportability, to dispose of any contentions invoking Articles 32 and 33 of the Convention Relating to the Status of Refugees, litigants have questioned that interpretation of the regulations. In order to remove such doubts and to end unnecessary litigation, the proposed amendment to § 242.8(a) is being adopted so that such authority will be expressly stated. The adoption of the proposed amendment is not intended as a concession that in any particular situation Article 32 or 33 enlarges or adds to the rights of an alien under the immigration laws of the United States.

The proposed rule as set out below is hereby adopted:

In § 242.8(a), the first sentence is amended. As amended, § 242.8(a) reads as follows:

§ 242.8 Special Inquiry Officers.

(a) *Authority.* In any proceeding conducted under this part the special inquiry officer shall have the authority to determine deportability and to make decisions, including orders of deportation as provided by section 242(b) of the Act; to consider claims for relief from deportation under Articles 32 and 33 of the Convention Relating to the Status of Refugees, as amended by the Protocol Relating to the Status of Refugees; to reinstate orders of deportation as provided by section 242(f) of the Act; to determine applications under sections 244, 245, and 249 of the Act; to determine the country to which an alien's deportation will be directed in accordance with section 243(a) of the Act; to order temporary withholding of deportation pursuant to section 243(h) of the Act, and to take any other action consistent with applicable provisions of law and regulation as may be appropriate to the disposition of the case. A special inquiry officer shall have authority to certify his decision in any case to the Board of Immigration Appeals when it involves an unusually complex or novel question of law or fact. Nothing contained in this part shall be construed to diminish the authority conferred on special inquiry officers by the Act.

(Sec. 103, 66 Stat. 173; (8 U.S.C. 1103))

Effective date. This order shall become effective June 14, 1974.

Dated: May 9, 1974.

L. F. CHAPMAN, JR.,
Commissioner of
Immigration and Naturalization.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 74-WA-13]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Additional Control Area

Correction

In FR Doc. 74-10333 appearing at page 15383 in the issue of Friday, May 3, 1974, make the following change.

The amendment to § 71.163—"Control 1180."—on page 15384, is changed by deleting the 12th line, " radial at Lat. 39°50'00" N., Long. 70°00'00" " and substituting for it "cle centered on the Kennedy VORTAC 104".

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 10—DEFINITIONS AND STANDARDS FOR FOODS

"Safe and Suitable" Food Ingredients; General Definition

In the FEDERAL REGISTER of April 26, 1973 (38 FR 10274), the Commissioner of Food and Drugs proposed a new § 10.1 (d) (21 CFR 10.1(d)) which defines the phrase "safe and suitable" as it describes food ingredients. This phrase has been variously defined in numerous food standard regulations, and it was the intent of the Commissioner in his proposal to avoid repeating the same or similar definitions in every individual food standard in the future where it might be applicable.

Six comments were received representing one consumer, one consumer organization, one industry representative, and three trade associations. The issues raised and the Commissioner's conclusions are as follows:

1. One comment asked if the proposed 21 CFR 10.1(d) supersedes 21 CFR 121.1 and 121.3 amendments which were promulgated in the FEDERAL REGISTER of June 25, 1971 (36 FR 12093).

The Commissioner has previously concluded in 21 CFR 10.1(c) that "No provision of any regulation prescribing a definition and standard of identity or standard of quality or fill of container under section 401 of the act shall be construed as in any way affecting the concurrent applicability of the general provisions of the act and the regulations thereunder relating to adulteration and misbranding." New § 10.1(d) complements 21 CFR Parts 121 and 8, which were promulgated under sections 409 and 706 of the act, respectively, by proposing a definition that incorporates the provisions of the regulations in Parts 121 and 8 in the specific area of food standards. Therefore, the "safe and suitable" definition does not supersede 21 CFR 121.1 and 121.3.

2. One comment stated that it is inappropriate to omit from consideration the "safe and suitable" definition from future individual food standard making procedures.

The Commissioner concludes that there is no advantage to repeatedly define certain terms, such as "safe and suitable," which appear in many individual food standards. In the process of promulgating food standard regulations, all ingredients will be considered under the "safe and suitable" definition. Those ingredients which are deemed not suitable for a particular product will be excluded from the standard, as exemplified in 21 CFR 16.15, 28.1, and 36.30.

3. Two comments stated that the proposed definition is too broad to be enforceable.

The Commissioner concludes that the proposed definition has the effect of requiring that all ingredients which are deemed "safe and suitable" be generally recognized as safe (GRAS), subject to a prior sanction, or used in conformity with an established food or color additive regulation. Sections 409 (b) and (c) of the act require that the data which are submitted in support of the issuance of a food additive regulation must prove that the additive would accomplish its intended physical or other technical effect in the amount specified. Similar requirements are in effect for color additives in section 706(b) of the act. Section 121.101(b)(1) requires that the GRAS substances added to a food do not exceed the amount reasonably required to accomplish their intended physical, nutritional, or other technical effect. Therefore, the Commissioner does not agree that the proposed definition for "safe and suitable" is too broad to be enforceable, since an ingredient which is used under this definition must be safe and perform an appropriate function in the food, and cannot be used in amounts greater than necessary to achieve the desired effect in the food.

4. One comment stated that whether an ingredient performs an "appropriate" function in the food is largely a subjective evaluation, depending upon the attitudes of the person making the judgment. The comment recommended that the proposed terminology be changed from the word "appropriate" to the word "useful" in describing the function an ingredient shall perform. The comment stated that such a change would provide a more objective evaluation of functional performance.

The Commissioner disagrees with the comment and concludes that the word "appropriate" goes beyond the scope of the meaning of the word "useful" by including the connotation of "legitimate usefulness". The Commissioner further concludes that use of the word "appropriate" to describe the functional performance of an ingredient in a particular food product will promote honesty and fair dealing in the interest of consumers.

5. One comment expressed concern that certain food additives and color additives containing coal tar derivatives could be described as "safe and suitable" ingredients in future food standards. The person who submitted the comment stated that he was allergic to these ingredients and, consequently, they could not be deemed "safe" for him. The comment requested that these additives be listed on the label of the food products in which they are used.

The Commissioner has concluded that, since the label of foods must show when colors, spices, or flavorings are used, individuals are given notice that such ingredients are present, and they should exercise caution to protect themselves when they are aware of their sensitivity to certain ingredients. The food and color additives which may be permitted by food standards are regulated or certified for conditions of safe usage under regulations established pursuant to the act or are generally recognized as safe. The Commissioner does not have the authority to require the label declaration of specific colorings, spices, or flavorings. The Federal Food, Drug, and Cosmetic Act exempts spices, flavorings, and colorings, other than those sold as such, from being declared on the label by their common or usual names.

Accordingly, having reviewed the comments received and other relevant information, the Commissioner concludes that it will promote honesty and fair dealing in the interest of consumers to adopt the proposal, as set forth below.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(a), 52 Stat. 1046, as amended by 70 Stat. 919, 52 Stat. 1055; 21 U.S.C. 341, 371(a)) and under the authority delegated to the Commissioner (21 CFR 2.120): *It is ordered,* That 21 CFR 10.1 be amended by adding a new paragraph (d) to read as follows:

§ 10.1 Definitions and interpretations.

* * * * * *

(d) "Safe and suitable" means that the ingredient:

(1) Performs an appropriate function in the food in which it is used.

(2) Is used at a level no higher than necessary to achieve its intended purpose in that food.

(3) Is not a food additive or color additive as defined in section 201 (s) or (t) of the Federal Food, Drug, and Cosmetic Act as used in that food, or is a food additive or color additive as so defined and is used in conformity with regulations established pursuant to section 409 or 706 of the act.

Effective date. This order shall become effective on June 14, 1974.

(Secs. 401, 701(a), 52 Stat. 1046, as amended by 70 Stat. 919, 52 Stat. 1055; (21 U.S.C. 341, 371(a).))

Dated: May 8, 1974.

SAM D. FINE,
Associate Commissioner
for Compliance.

PART 135—NEW ANIMAL DRUGS

Subpart C—Sponsors of Approved Applications

PART 135e—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Monensin and 3-Nitro-4-Hydroxyphenylarsonic Acid

The Commissioner of Food and Drugs has evaluated a new animal drug application (93-599V) filed by Agricultural Processing Corporation, 225 Alabama St., P.O. Box 845, Salem, VA 24153, proposing the safe and effective use of premixes containing monensin sodium and 3-Nitro-4-hydroxyphenylarsonic acid for use in manufacturing broiler chicken feed. The application is approved.

To facilitate referencing, Agricultural Processing Corporation is being assigned a code number and added to the firms listed in § 135.501(c) (21 CFR 135.501 (c)).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 135 and 135e (21 CFR Parts 135 and 135e) are amended as follows:

1. Part 135 is amended in § 135.501 by adding a new code number 110 to paragraph (c), as follows:

§ 135.501 Names, addresses, and code numbers of sponsors of approved applications.

* * * * *

(c) * * *

Code No.	*Firm name and address*
110---	Agricultural Processing Corp., 225 Alabama St., P.O. Box 845, Salem, VA 24153.

V 39 I 95 MAY 15 74 XUM

2. Part 135e is amended in § 135e.50 by adding thereto a new paragraph (b)(6) as follows:

§ 135e.50 Monensin: monensin sodium.

• • • • • •

(b) • • •

(6) Premix level of 11.786 grams per pound of monensic acid activity from monensin sodium with 1.063 percent 3-Nitro-4-hydroxyphenylarsonic acid; premix level of 22 grams per pound of monensic acid activity from monensin sodium with 1.98 percent 3-Nitro-4-hydroxyphenylarsonic acid has been granted: For the sponsor see code No. 110 in § 135.501(c) of this chapter.

• • • • •

Effective date. This order shall be effective May 15, 1974.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: May 9, 1974.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

Tetracycline Oral Veterinary

Correction

In FR Doc. 74-6136 appearing at pages 9933-9935 in the issue of Friday, March 15, 1974 make the following changes:

1. In § 135c.121(e), the table entries should be numbered from 1 to 8 consecutively.

2. In § 135c.122(e), the table entries should be numbered from 1 to 3 consecutively.

3. In § 135c.123(e), the table entries should be numbered 1 and 2 consecutively.

4. In § 135c.124(e) the table entry should be preceded by the figure 1.

5. In § 135c.125(e) the table entries should be numbered 1 and 2 consecutively.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER A—GENERAL MANAGEMENT AND ADMINISTRATION

PART 17—RECORDKEEPING

Subpart A—Recordkeeping Requirements and Retention Schedules for Federal-Aid Highway Records of State Highway Departments

ELIGIBILITY FOR FEDERAL AID CRITERIA

A Federal Highway Administration (FHWA) directive, Policy and Procedure Memorandum 30-9, has heretofore set forth the Federal-aid provisions applicable to recordkeeping and retention schedules for Federal-aid highway records of State highway departments. That directive was predicated upon 23 CFR 1.30, "Records and Documents." The directive has been revised for addition to the Federal-Aid Highway Program Manual as Volume 1, Chapter 6, Section 2. Inasmuch as the Manual addition directly advises the State highway departments as recipients of Federal-aid highway funds of the necessity for recordkeeping as a condition of eligibility for Federal-aid reimbursement under the provisions of Title 23, United States Code, "Highways," those requirements are hereby published.

This matter relates to and involves agency management in a grant program within the purview of 5 U.S.C. 553(a)(2), thus general notice of proposed rulemaking is not required, and the regulations will be effective on the date of issuance set forth below.

The citation of 23 CFR 1.30 appearing in the FEDERAL REGISTER of March 21, 1974 (page 10824, Vol. 39, No. 56), with respect to Record Retention, Federal Highway Administration, in § 2.1, is amended to read: 23 CFR, Part 17.

Issued on May 6, 1974.

NORBERT T. TIEMANN,
Federal Highway Administrator.

§ 1.30 [Revoked]

1. Section 1.30, Title 23, CFR, is hereby revoked.

2. Part 17 of 23 CFR is added to read as follows:

Sec.

17.101 Purpose.
17.102 Applicability.
17.103 Waivers.
17.104 Definition of terms.
17.105 Retention Schedules for Federal-Aid Highway Records of State Highway Departments.
17.106 Authorization to Microfilm Records.
17.107 Microfilm Standards to be Applied.
Appendix A—Retention Schedules.

AUTHORITY: 23 USC 315, 49 USC 1655, and the delegation of 49 CFR 1.48.

§ 17.101 Purpose.

The regulations in this subpart A prescribe the recordkeeping requirements and retention schedules for State highway departments concerning the nature and extent of documentation required by the Federal Highway Administration (FHWA) for States to be eligible for Federal-aid reimbursement under the provisions of Title 23, United States Code, "Highways."

§ 17.102 Applicability.

(a) *Project-related records.* The records defined in § 17.104(a) and listed in Appendix A hereto are to be maintained or caused to be maintained by the State. Complete project documentation and maintenance of adequate records (including source data) to support a State's claim for reimbursement is the responsibility of the State highway department. These State records are subject to the provisions of this directive.

(b) *Railroad, utility or other third party project records.* Where records pertaining to Federal-aid highway matters are generated by third parties, it is the State's responsibility to clearly define the FHWA records retention requirements in agreements or subcontracts and to insure that they are complied with. Where reimbursement is requested, the costs incurred by railroads, utilities and other third parties are subject to examination and audit by the State and Federal Governments. To accomplish this, the records and accounts therefor will be made available for examination by representatives of the State and Federal Governments for a period of not less than 3 years from the date final payment has been received by the railroad, utility or other third party.

(c) *Toll facilities records.* Where Federal funds participate in a project for the construction of a toll bridge, toll tunnel, or approach to a toll facility, the State highway department shall maintain or cause to be maintained all records (including source data) set forth in Appendix A. Such records shall be retained until the facility shall have been operated on a toll-free basis for a period of at least 3 consecutive years.

(d) *State and Community Highway Safety Programs.* This directive does not apply to recordkeeping requirements of the State and Community Highway Safety Programs.

(e) *Federal records.* Federal records are those which document the Federal function of administering Federal-Aid Highway Programs. These records are maintained by FHWA offices and are not subject to provisions of this subpart A but are controlled by the authorized FHWA records schedules contained in Volume 34, Chapter IX, of the FHWA Administrative Manual.

(f) *Availability for inspection.* Records and source data maintained under §§ 17.102(a) and 17.102(b) shall be available at all reasonable times for inspection by any authorized representative of the Federal Government and copies thereof shall be furnished when requested.

§ 17.103 Waivers.

No waiver from any provision of this subpart A will be granted by the Federal Highway Administrator without full justification by the State highway department. Each written request from a State highway department for a waiver shall demonstrate that unusual circumstances warrant a departure from the prescribed minimum records retention period, procedures or techniques, or that compliance with the retention schedule would impose an unreasonable burden upon the State or contractor. The granting of a waiver is expressly reserved to the Federal Highway Administrator and shall be contingent upon his determination that the waiver requested is in the public interest.

§ 17.104 Definition of Terms.

(a) *Records.* Includes all accounts, papers, maps, photographs, or other documentary materials regardless of physical form or characteristics, made or

received by any agency, firm, or individual in connection with the transaction of Federal-aid highway business and preserved or appropriate for preservation as evidence of their organization, functions, policies, decisions, procedures, and operations or because of the informational value of data contained therein.

(b) *Retention period.* The minimum period of time records are required to be held. State highway departments may hold records for longer periods of time if they desire.

(c) *Final voucher.* Refers to the final voucher submitted by the State to FHWA with respect to a particular project.

§ 17.105 Retention Schedules of Federal-Aid Highway Records for State Highway Departments.

(a) *General.* Federal-aid project and project-related records shall be retained by State highway departments in accordance with the records retention schedule established by the Federal Highway Administrator in Appendix A. These recordkeeping requirements have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942 (OMB No. 04-R2296). The schedule provides for:

(1) The standard 3 years after submission of final voucher retention period for those records which are Federal-aid project oriented.

(2) A 3 year retention period which may expire earlier than the 3 years after submission of final voucher period for certain cost accounting and fiscal type files which usually relate to more than one project and are not project oriented. The retention period for these records shall be calculated from the end of the fiscal or calendar year, as appropriate, in which an entry is made. Where there is a series of such entries involving a specific record, the retention period shall be calculated from the end of the year in which the final entry is made.

(b) *Applicability.* Compliance with the retention requirements of Appendix A does not relieve a State or contractor from retaining any records for whatever longer periods may be required by any other applicable contract clause or lawful requirement, e.g., regulations of U.S. Department of Labor or Internal Revenue Service.

(c) *Request for records disposition.* Each State shall request final clearance from the FHWA division engineer for each category of record, prior to the application of the retention provisions of Appendix A designated as "3 years from end of fiscal or calendar year, as appropriate, in which an entry is made." Such final clearance from the division engineer will be contingent upon the completion of audit and the clearance of any and all questions raised related thereto. If a claim, investigation or litigation is pending after submission of the final voucher, or payment of any amount claimed is suspended by the division engineer, the retention period will not begin until final settlement of the claim, investigation or litigation, or approval of payment for amounts suspended.

§ 17.106 Authorization To Microfilm Records.

State highway departments are authorized to use computer output microfilm or to substitute microfilm for original Federal-aid highway records in accordance with the standards prescribed in § 17.107.

§ 17.107 Microfilm Standards To Be Applied.

(a) *Original documents exclusive of computer output microfilm records.* (1) Prior to microfilming, the original documents shall be prepared, arranged, classified, and indexed so as to readily permit the subsequent location, examination, and reproduction of the photographs thereof. Any significant characteristic, feature, or other attribute of the records which photography would not clearly reflect (e.g., that the record is a copy or that certain figures thereon are in color) shall be indicated on the records at the time of such arrangement, classification, and identification. When a number of records to be microfilmed have in common such a characteristic or attribute, an appropriate notation identifying the characteristic or attribute may be indicated in a statement at the beginning of the roll of film or group of aperture cards instead of on each individual record. Any notations on the face or reverse side of any document shall be photographed and identified as forming an integral part of the original document.

(2) Each roll of film or group of aperture cards shall include a microfilm of a certificate or certificates stating that the photographs are direct and facsimile reproductions of the original records and that they have been made in accordance with prescribed instructions. Such certificate or certificates shall be executed by a person or persons having personal knowledge of the facts covered thereby.

(3) The photographic matter on each roll or group of aperture cards shall begin and end with a statement as to the nature and order of arrangement of the records reproduced, the name of the photographer, and the date. Rolls of film shall not be cut. Supplemental or retaken film, whether of misplaced or omitted documents or of portions of a film found to be spoiled or illegible or of other matter, shall be attached to the beginning of the roll or listed at the beginning of the group of aperture cards, and in such event the aforementioned certificate or certificates shall cover also such supplemental or retaken film and shall state the reasons for taking such film.

(4) All film stock shall be approved permanent-record microfilm type either perforated or unperforated, such as meets the minimum specifications of the National Bureau of Standards. (Such film stock may be identified by a manufacturer's mark, a solid triangle after the word "safety" in the edge of the film.)

(b) *Reproduction and indexing.* (1) All microfilm records shall be such that clearly readable hard copy (paper) reproductions can be made during the periods prescribed in the records schedule for the retention of the records concerned.

(2) The microfilm records shall be indexed and retained in such manner as will render them readily accessible and identifiable.

APPENDIX A—RETENTION SCHEDULES OF FEDERAL-AID HIGHWAY RECORDS FOR STATE HIGHWAY DEPARTMENTS

The project related records listed in this appendix are to be maintained or caused to be maintained by the State for the periods designated.

Project records (filed or identified by project)

Category of records	*Minimum retention period*
1. Program documents	3 years after submission of the final voucher for last project programed.
2. Project agreements	3 years after submission of the final voucher for a project.
3. Letters of authority or notices to proceed	Do.
4. Plans, specifications and estimates (PS&E)	Do.
5. Contract records, including: Performance and payment bonds, prequalifying prospective bidders, licensing contractors, advertising bids, engineer's estimates, bid openings tabulations, award of contract and concurrence, agreement estimates, anticollusion certification for force account construction, and any similar records considered necessary to document the contract.	Do.
6. 3d party contracts or agreements	Do.
7. Supplemental agreements	Do.
8. Change or extra work orders	3 years after submission of the final voucher for a project.
9. Stop and start work orders	Do.
10. Right-of-way maps, construction plans and changes — tracings — Shop drawings, working drawings—prints.	Do.
11. Project diaries and/or journals.	Do.
12. Field notes and computation books including final quantity books, sumary books or records.	Do.

V 39 I 95 MAY 15 74 XUM

Category of records	Minimum retention period
Financial and accounting records (filed by fiscal or calendar year, as appropriate)	
1. Accounts receivable invoices, adjustments to the accounts, invoice registers, carrier freight bills, shipping orders, or other documents which detail the material or services billed on the related invoices.	3 years from end of fiscal or calendar year, as appropriate, in which an entry is made.
2. Material work order, or service order files, consisting of purchase requisitions or purchase orders for material or services, or orders for transfer of material or supplies.	Do.
3. Cash advance recapitulations, prepared as posting entries to accounts receivable ledgers for amounts of expense vouchers prepared for employees' travel and related expenses.	Do.
4. Paid, canceled, and voided checks, other than those issued for the payment of salary and wages.	Do.
5. Accounts payable records to support disbursements of funds for materials, equipment, supplies, and services containing originals or copies of the following and related documents: Remittance advices and statements, vendors' invoices, invoice audits and distribution slips.	Do.
6. Labor cost distribution cards or equivalent documents.	Do.
7. Petty cash records showing description of expenditures, to whom paid, name of person authorizing payment, and date, including copies of vouchers and other supporting documents.	Do.
Pay administration records (filed by fiscal or calendar year, as appropriate)	
1. Payroll sheets, registers, or their equivalent, of salaries and wages paid to individual employees for each payroll period; charge slips; and tax withholding statements.	3 years from end of fiscal or calendar year, as appropriate, in which an entry is made.
2. Clock cards or other time and attendance cards.	Do.
3. Paid checks, receipts for wages paid in cash, or other evidence of payments for services rendered by employees.	Do.
Procurement and supply records (filed by fiscal or calendar year, as appropriate)	
1. Stores requisitions for materials, supplies, equipment, and services.	3 years from end of fiscal or calendar year, as appropriate, in which an entry is made.
2. Work orders for maintenance and other services.	Do.
3. Equipment records, consisting of equipment utilization and status reports and equipment repair orders.	Do.
4. Expendable property records, reflecting accountability for the receipt and use of material in the performance of a contract.	Do.
5. Purchase order files for supplies equipment, materials, or services, to be used in the performance of a contract.	3 years from end of fiscal or calendar year, as appropriate, in which an entry is made.
Toll facilities	
1. Copies of statutory authorities creating study committees or similar bodies to study feasibility of toll facilities.	3 consecutive years after facility operated on toll-free basis.
2. Copies of statutory authority	Do.
3. Newspaper clippings, press releases, official statements, etc., concerning development and progress.	Do.
4. Copies of engineering and financial feasibility reports.	Do.
5. Copies of bond prospectus issued	Do.
6. Copies of trust indenture or trust agreement issued in connection with bond sale.	Do.
7. Contract award data (PR-525)	Do.
8. Copies of progress reports prepared by State or consultant during construction, including financial audit.	Do.
9. Copies of published annual reports of authority or annual audit.	Do.
10. Annual statement of source and application of funds (PR-530, 531, 532, 532 a, b, 535).	Do.
11. Annual schedules giving details of bond issues and future debt service requirements (PR-541, 542, 543, and 544).	Do.
12. Copies of monthly statements of operations giving toll revenues, operating costs, and traffic, where such data are prepared and published by the authority.	Do.
13. Copies of adopted toll schedules	Do.
14. Date of initiation or termination of tolls	Do.
Miscellaneous records	
1. General correspondence files affecting Federal-aid programs, policies, or procedures.	3 years after submission of final voucher for all Federal-aid funds pertaining to each program, or after 10 years.
2. Organization tables, charts, functional statements, and policy or procedures manuals or issuances.	3 years after submission of final voucher for last project affected, or after 10 years.
3. State internal audit reports and supporting working papers.	3 years subsequent to the year in which the report was issued.
13. Records and reports of materials used such as: Haul tickets, truck delivery tickets, weight tickets, daily water reports, daily rolling reports, and similar records.	3 years after submission of the final voucher for a project.
14. Supplies and equipment records such as: mill shipping records, bills of lading, supplier's invoices, certificate of materials for manufactured items, and similar records.	Do.
15. Inspection reports	Do.
16. Materials test reports	Do.
17. Progress and final pay estimates	Do.
18. Final construction report	Do.
19. As-built plans—tracings	Do.
20. Third party contract audit reports and related work papers.	Do.
21. Copies of contractor payrolls A-2 and weekly statements with respect to the wages paid during the preceding weekly payroll period.	Do.
Right-of-way records (filed or identified by project)	
1. Estimates of cost	Do.
2. Maps of proposed location and alternate routes.	Do.
3. Appraisal reports	Do.
4. Fee appraisal contracts	Do.
5. Negotiation reports	Do.
6. Negotiator's diary	Do.
7. Reviewing appraisers' and/or trial attorney's statements and recommendations.	Do.
8. Certificates of acquisition and cost of right-of-way.	Do.
9. Applications and supporting papers (including recordation) for lands or interest in lands acquired by the United States.	Do.
10. Relocation assistance records including public notices, hearings, requests for assistance and payments, including all supporting data such as receipted bills, or other evidence of expenses incurred.	Do.
11. Administrative settlement records	Do.
12. Disposal documents and related records	Do.
13. Property management records	Do.
Legal records (filed or identified by project)	
1. Certification and transcripts of public hearings on proposed route locations.	Do.
2. Contractor's public liability and property damage insurance.	Do.
3. Condemnation case files	Do.
4. Claim records	Do.
5. Tax records	Do.
6. Municipal agreements	Do.

[FR Doc.74-11113 Filed 5-14-74;8:45 am]

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

PART 640—CERTIFICATION ACCEPTANCE

Secondary Road Plan Replaced

This amendment adds Part 640 to Chapter I of Title 23 of the Code of Federal Regulations.

The Federal-aid highway program is now more than 50 years old, and the State highway departments have reached a degree of maturity such that they no longer need careful and detailed scrutiny by the Federal Highway Administration (FHWA) in some areas of program administration. This is evidenced by the fact that with the help of Federal financial assistance and Federal leadership, the State highway departments have provided the United States with the world's most efficient highway system for the transportation of people, goods, and services. Over the years, the volume of individual Federal-aid projects has increased. Approximately 18,000 Federal-aid highway projects are currently underway at any given time. The State highway departments have acquired the needed statutory powers, regulations and procedures, professional staffs, expertise, and experience in decisionmaking.

Certification Acceptance is the successor to the Secondary Road Plan which applied only to projects on the Federal-aid secondary system. To some extent, Certification Acceptance makes the principle of this plan applicable to all Federal-aid systems except the Interstate System. The advantage in adopting the principle of the Secondary Road Plan is that it has already been tested and has proved to be workable and effective. The FHWA has successfully administered Federal-aid projects under the Secondary Road Plan for the past 19 years, based upon the concepts of delegation to and flexibility for State and local governments in carrying out the technical aspects of highway construction.

The new Certification Acceptance procedure will permit the Federal Highway Administrator to discharge many of his Title 23 duties, particularly those in the plan preparation and construction stages, by accepting a certification submitted by the State highway department of its performance of certain Title 23 responsibilities. It also substitutes a planned monitoring of a State's procedures for the present step-by-step review and approval of each individual project action. However, the State's program will continue to come under the close scrutiny of FHWA in comprehensive planning, research, system designation, programming, environmental protection, relocation assistance, right-of-way acquisition, civil rights, and auditing matters. Transit projects approved under 23 U.S.C. 103 (e) (4) and 142(c) are not covered by the Certification Acceptance procedures. Adequate fiscal controls will continue to be a requirement on each project under guidelines and regulations promulgated by the Federal Highway Administrator.

Although the principle of the Secondary Road Plan is being followed, projects constructed under the Certification Acceptance procedure will differ from those constructed under the Secondary Road Plan in the following respects:

(1) Projects will be subject to the requirements of many more FHWA regulations, directives, and standards or to equivalent State regulations, directives, and standards.

(2) The State's procedures for administering projects will be evaluated at least once every 3 years instead of once every 5 years.

Part 640 implements section 116 of the Federal-Aid Highway Act of 1973 (23 U.S.C. 117) by establishing requirements for the preparation of certifications by the State highway departments and criteria for the approval thereof by the Federal Highway Administrator. The Certification Acceptance procedure is an alternative procedure to those contained in, or issued pursuant to Title 23, United States Code. Certification Acceptance procedures provide the States the option of relying upon their own laws and procedures to achieve Federal goals and objectives with a corresponding reduction in Federal engineering supervision and Federal controls over the State highway departments.

An earlier draft of this regulation and implementing instructions were widely circulated in late August and early September 1973 to State and local governments for coments through FHWA field offices, the Advisory Committee for Intergovernmental Relations' A-85 procedure, and the American Association of State Highway and Transportation Officials. Changes were made in the draft as a result of comments received from State and local officials as well as others within the Department of Transportation. In that this material is a matter relating to a grant program, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553), requiring notice of proposed rulemaking, opportunity for public participation and delay in effective date are inapplicable. However, since these changes were substantial and because of interest in this mat-

V 39 I 95 MAY 15 74 XUM

ter, FHWA will be receptive to further comments and suggestions after issuance of this regulation. Comments may be submitted to the Federal Highway Administration, 400 7th Street, SW., Room 4226, Washington, D.C. 20590, Attention: CA, FHWA Docket No. 74–4, by June 14, 1974. Material thus submitted will be considered and evaluated in determining any changes to this regulation. Until such time as further changes are made, the regulation as here set forth shall remain in effect.

In consideration of the foregoing and effective May 8, 1974, Chapter 1 of Title 23, Code of Federal Regulations is amended by adding a new Part 640. This amendment is issued under the authority of 23 U.S.C. 117 and 315, and the delegation of authority by the Secretary of Transportation at 49 CFR 1.48.

Issued on May 8, 1974.

NORBERT T. TIEMANN,
Federal Highway Administrator.

Sec.

640.1 Purpose.
640.3 Definitions.
640.5 Effect of State Certification Approval.
640.7 Finding of Equivalency Basis for Approval.
640.9 Content of State Certification.
640.11 Systems Actions, Program and Project Approval and Authorization.
640.13 Final Inspection and Acceptance.
640.15 Evaluation of State's Operation.
640.17 Effect of State's Noncompliance.
640.19 Rescission.

AUTHORITY: (23 U.S.C. 101(e), 117 and 315).

§ 640.1 Purpose.

The purpose of this part is to provide an alternative procedure for administering certain highway projects to be constructed with Federal fund participation in lieu of the detailed Federal Highway Administration (FHWA) procedure provided for in 23 U.S.C. 101, et seq., and regulations issued pursuant thereto which require FHWA review and approval at various stages of individual project development.

§ 640.3 Definitions.

(a) The word "administrator" means the Federal Highway Administration.

(b) The term "Certification Acceptance" is the alternative procedure which may be used for administering certain highway projects involving Federal funds pursuant to 23 U.S.C. 117.

(c) The term "State highway agency" means that department, commission, board, or official of any State charged by its laws with the responsibility for highway construction. The word "State" should be considered equivalent to the term "State highway agency" if the context so implies.

(d) The term "State Certification" means a written statement prepared by a State highway agency, signed by its chief administrative officer and approved by the Federal Highway Administrator, setting forth the State's organization and capability and the laws, regulations, directives and standards it will use, or cause to be used, in the administration of certain highway projects.

(e) The word "project" means an undertaking by a State highway agency for highway construction, or if the context so implies, the particular portion of a highway so constructed.

(f) The word "construction" shall be as defined in 23 U.S.C. 101.

§ 640.5 Effect of State Certification Approval.

(a) Approval of a State's Certification relieves the State of compliance with Title 23, United States Code, and those requirements issued pursuant thereto with respect to all construction projects under Certification Acceptance except as otherwise provided in this part.

(b) Forest Highways, Public Lands, and Emergency Relief projects, all projects included under Sections 131, 136 and 319(b) of Title 23, United States Code, and all projects constructed under the provisions of sections 203, 204, 205, 209, 210, and 230 of the Federal-Aid Highway Act of 1973 (Pub. L. 93–87, 87 Stat. 250) may be included in a State's Certification and processed under the regulations in this part.

(c) A State may include all or part of its eligible programs or projects in the Certification submitted for approval.

(d) The Certification Acceptance procedure shall not apply to transportation planning and research (23 U.S.C. 134 and 307), highway safety (23 U.S.C., Chapter 4), those public transportation projects proposed pursuant to sections 142(a)(2), 142(c), and 103(e)(4) of Title 23, United States Code, and projects on the Interstate System, except as otherwise provided in this part.

(e) Approved Action Plans will serve to satisfy the requirements of Certification Acceptance for such preconstruction activities as are covered in the Action Plan.

(f) Approval of a State Certification does not constitute a commitment or an obligation of Federal funds.

(g) Certification Acceptance is an alternative procedure which replaces detailed FHWA procedures with inspection and monitoring of a State's operations under State laws and procedures, which must assure that adequate consideration is given to proposed highway projects and that the decisions on such projects are made in the best overall public interest. The alternative procedure recognizes the unique situation of each State and does not prescribe specific organizations or procedures. Certification approval endorses the adequacy of a State's processes for achieving Federal objectives but does not constitute approval of individual projects.

(h) Certification Acceptance as an alternative procedure does not replace the fundamental provisions of law in Title 23, United States Code, with respect to the basic structure of the Federal-aid highway program, such as the authorization of funds (23 U.S.C. 102), Federal-aid systems (23 U.S.C. 103), apportionment (23 U.S.C. 104), programs (23 US.C. 105), designation of urbanized area boundaries (23 U.S.C. 101(a)(2)), allocation of urban system funds (23 U.S.C. 150), Federal share payable (23 U.S.C. 120), and toll roads and bridges (23 U.S.C. 129). Nor are the provisions of Title 23, United States Code, conferring a benefit or privilege abrogated by the approval of a State's Certification.

(i) Nothing in this part shall affect or discharge any responsibility or obligation of the Administrator under any Federal law, including the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.), section 4(f) of the Department of Transportation Act (49 U.S.C. 1653(f)), Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000(d), et seq.), Title VIII of the Act of April 11, 1968 (Pub. L. 90–284, 42 U.S.C. 3601, et seq.), and the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970 (42 U.S.C. 4601, et seq.), other than Title 23, United States Code.

§ 640.7 Finding of Equivalency Basis for Approval.

(a) Approval of a State's Certification will be based upon a finding by FHWA that the State laws, regulations, directives, and standards establish requirements at least equivalent to those contained in, or issued pursuant to Title 23, United States Code. The statutory phrase "State laws, regulations, directives, and standards establishing requirements at least equivalent to those contained in, or issued pursuant to . . . Title (23)" means State laws, etc., that, collectively, will achieve the Federal objectives in Title 23, United States Code. The statutory phrase does not mean State laws, etc., the same as or exactly like or identical to those in Title 23, United States Code, and issued pursuant thereto.

(b) Equivalency of State laws, regulations, directives, and standards with Title 23, United States Code, and requirements issued pursuant thereto shall be determined by finding the State has laws or regulations or directives or standards each of which contain requirements separately and/or all of which contain requirements collectively on:

(1) Construction and design,
(2) Competitive bidding,
(3) Payment of prevailing wages as determined in accordance with the Davis Bacon Act (40 U.S.C. 267a),
(4) Prohibition of convict labor unless the labor is performed by convicts on parole or on probation,
(5) Maintenance,
(6) Relocation of utilities,
(7) Public hearings,
(8) Construction and maintenance of ferry boats where applicable,
(9) Safeguarding the State and Federal interest in instances of irregularities,
(10) Equal employment opportunity,
(11) Control of outdoor advertising, and
(12) Control of junkyards.

(c) Equivalency of State laws, regulations, directives, and standards with Title 23, United States Code, and requirements issued pursuant thereto shall also be determined by finding that the State laws, etc., in the subject areas listed in § 640.7(b) will achieve the following Federal objectives of having Federal-aid and Federal highways constructed in a manner that will:

(1) Meet existing and probable future traffic needs,
(2) Be conducive to safety, durability, economy of maintenance and utilization by elderly and handicapped persons,
(3) Conform to the particular needs of each locality,
(4) Provide all-weather service,
(5) Provide uniform informational, regulatory and warning signs, markings, and signals that will promote the safe and efficient utilization of the highways,
(6) Provide proper safety protective devices at railroad grade crossings and drawbridges,
(7) Minimize soil erosion,
(8) Assure that possible adverse economic, social, and environmental effects relating to any proposed project on any Federal-aid system have been fully considered in developing such project, and that the final decisions on the project are made in the best overall public interest, taking into consideration the need for fast, safe and efficient transportation, public services, and the costs of eliminating or minimizing such adverse effects and the following:
(i) Air, noise, and water pollution,
(ii) Destruction or disruption of manmade and natural resources, aesthetic values, community cohesion and the availability of public facilities and services,
(iii) Adverse employment effects, and tax and property value losses,
(iv) Injurious displacement of people, businesses and farms, and
(v) Disruption of desirable community and regional growth.
(9) Provide for public participation in the development of projects in the location and design stages,
(10) Provide for competitive bidding that will effectively secure competition and punish fraud, bribery, collusion, conspiracy or other serious offense involving violation of State or Federal criminal statutes.
(11) Provide for an equal employment opportunity program including highway construction training and skill improvement programs, and
(12) Preserve natural beauty.

§ 640.9 Content of State Certification.

The State Certification shall include the following:

(a) The name of the State highway agency and the legal authority which permits such agency to comply with Title 23, United States Code, and other applicable Federal statutes and Executive Orders.

(b) A positive statement that projects administered under Certification Acceptance will comply with all applicable Federal statutes and Executive Orders. By such statement, the Federal laws and Executive Orders so applicable are incorporated by reference.

(c) A statement of the systems, programs, phases of work and classes of projects or combinations thereof that the State is including in the Certification being submitted for approval.

(d) A description or a table of organization of the State highway agency and an outline or flow chart indicating steps in project development and assignments of responsibility.

(e) A description of the methods and control procedures the State will follow to assure compliance with State and Federal requirements in the administration of projects covered by the State Certification, including the management, operational, and financial systems within the State's organization that insure the proper control of highway construction activities, accountability of Federal highway funds and the presentation of legitimate and correct claims to FHWA.

(f) A statement of the design and construction standards applicable to Certification Acceptance procedure projects. Where the Certification refers to American Association of State Highway and Transportation Officials (AASHTO), American Society of Testing Materials (ASTM), or other published standards and procedures, or incorporates any FHWA or other Federal publication or directive, these need not be submitted.

(g) A description of the State's methods for assuring local government knowledge of and compliance with State and Federal requirements where they perform services on projects to be administered under the Certification Acceptance procedure.

(h) A statement that all projects under Certification Acceptance shall be available for review by FHWA at any time and that all project documents shall be retained and available for inspection during the plan development, and construction stages and for a 3-year period after submission of the final voucher for the project.

(i) State Certifications are to be signed by the Chief Administrative Officer of the State highway agency or the official or officials of the State charged by its laws with the responsibility for highway construction an submitted to FHWA through the FHWA division engineer by letter.

§ 640.11 Systems Actions, Program and Project Approval and Authorization.

(a) Federal-aid highway systems actions and program approval shall be administered in compliance with applicable Title 23, United States Code, requirements and in accordance with applicable current FHWA directives issued pursuant thereto.

(b) Authorization to proceed with the project or any phase of the work shall be in response to a State request and may be concurrent with or subsequent to program approval. A project agreement is to be executed on each project.

(c) During the progress of the authorized project, the State highway agency shall furnish FHWA such information as the Administrator determines necessary in administering the Federal-aid highway program under Certification Acceptance.

§ 640.13 Final Inspection and Acceptance.

(a) FHWA shall make an inspection of each physical construction project upon its completion.

(b) The State shall furnish in respect to each construction project, as soon as practicable after project completion, a confirmation that the project was completed as programmed and in accordance with the procedures and standards contained in the State's Certification, with a request for final acceptance by the FHWA. Such confirmation shall include assurance that all applicable State and Federal laws have been complied with and shall be signed by the appropriate State official. The burden shall be upon the State to show compliance and the State shall furnish, upon request, all project documents and any other information pertaining to the project as necessary for final acceptance.

§ 640.15 Evaluation of State's Operation.

(a) Evaluations of the State's operation under the Certification Acceptance procedure shall be made by FHWA.

(b) As a part of the evaluation, the existing State Certification is to be reviewed to determine its adequacy in light of this part, the statutes in effect at the time of the review, and the operational reviews made by FHWA.

§ 640.17 Effect of State's Noncompliance.

(a) The Administrator shall determine whether a State has failed to comply with State and Federal law in implementing Certification Acceptance, and the decision shall be administratively final. A final judgment rendered against the State highway agency by a State court for noncompliance with State law in this respect will be prima facie evidence of a State's failure to comply with this directive.

(b) Failure to comply with Federal or State laws may be remedial and reparable or nonremedial and irreparable. In the event the noncompliance is remedial, corrective action shall be required to protect the Federal interest. If the noncompliance cannot be remedied or corrected, the Administrator will determine the action to be taken.

§ 640.19 Rescission.

(a) The Administrator's approval of a State's Certification may be rescinded at any time if, in the Administrator's opinion, it is necessary to do so.

(b) In the event a State's Certification is rescinded, the provisions of Title 23, United States Code, and the regulations issued pursuant thereto are immediately applicable. All required approvals must be obtained on projects which have not been processed beyond the obligation stage. Projects upon which FHWA has given authorization to proceed and obligation of the Federal share has occurred shall not be affected by rescission except in unusual cases where such action is necessary to protect the Federal interest.

FEDERAL REGISTER, VOL. 39, NO. 95—WEDNESDAY, MAY 15, 1974

V 39 I 95
MAY 15 74
XUM

(c) The Administrator shall provide the State with a written notice stating the reasons for his intention to rescind a State's Certification and the State shall have the opportunity to respond orally or in writing before a final decision is made. The Administrator's decision to rescind a State's Certification shall be administratively final.

[FR Doc.74-11217 Filed 5-14-74;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 74-78]

PART 3—COAST GUARD AREAS, DISTRICTS, MARINE INSPECTION ZONES, AND CAPTAIN OF THE PORT AREAS

Thirteenth Coast Guard District

These amendments revise the description of the two captain of the port areas and the two marine inspection zones of the Thirteenth Coast Guard District in Part 3 of Title 33, Code of Federal Regulations.

The boundary between the marine inspection zones that is described in §§ 3.65-10(b) and 3.65-15(b) is revised to coincide with the boundary between the captain of the port areas. The eastern boundaries of the two captain of the port areas that are described in §§ 3.65-55(b) and 3.65-60(b) are revised to coincide with the eastern boundaries of the marine inspection zones. The descriptions of the two captain of the port areas, as amended by this document, are transferred to §§ 3.65-10 and 3.65-15. Accordingly, §§ 3.65-55 and 3.65-60, which contain the present descriptions of the areas, are deleted.

Since these amendments are matters relating to agency organization, they are exempt from the notice of proposed rule making requirements in 5 U.S.C. 553(b)(3)(A), and since these amendments announce an existing change in Coast Guard organization, they are effective immediately under 5 U.S.C. 553(d)(3).

In accordance with the foregoing, Part 3 of Chapter I of Title 33 of the Code of Federal Regulations is amended as follows:

1. Section 3.65-10 is revised to read as follows:

§ 3.65-10 Seattle Marine Inspection Zone and Captain of the Port.

(a) The Seattle Marine Inspection Office and the Seattle Captain of the Port Office are located in Seattle, Washington.

(b) The boundary of the Seattle Marine Inspection Zone, and of the Seattle Captain of the Port Area, starts at a point 48° 29' 35'' N. latitude, 124° 43' 45'' W. longitude and follows the international boundary eastward to the Montana-North Dakota boundary; thence southerly along this boundary to the Wyoming State line; thence westerly and southerly along the Montana-Wyoming boundary to the Idaho State line. Thence northwesterly along the Montana-Idaho boundary to 46° 55' N. latitude thence westerly to a point 46° 55' N. latitude, 123° 18' W. longitude; thence northerly to a point 47° 32' N. latitude, 123° 18' W. longitude; thence westerly along the 47° 32' N. latitude to the sea.

2. Section 3.65-15 is revised to read as follows:

§ 3.65-15 Portland, Oregon Marine Inspection Zone and Captain of the Port Area.

(a) The Portland Marine Inspection Office and the Portland Captain of the Port Office are located in Portland, Oregon.

(b) The boundary of the Portland Marine Inspection Zone, and of the Portland Captain of the Port Area, starts at the Washington coast on the 47° 32' N. latitude and follows this latitude easterly to a point 47° 32' N. latitude, 123° 18' W. longitude; thence south to the 46° 55' N. latitude; thence easterly along this latitude to the eastern Idaho State line; thence southeasterly along the Idaho State line to the Idaho-Wyoming boundary junction; thence southerly along the Idaho-Wyoming boundary to the Idaho-Utah-Wyoming boundary junction; thence westerly along the 42° N. latitude to the sea.

3. Sections 3.65-55 and 3.65-60 are deleted.

§§ 3.65-55, 3.65-60 [Deleted]

(5 U.S.C. 552; 14 U.S.C. 633); 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b))

Effective date: These amendments are effective May 15, 1974.

Dated: May 10, 1974.

C. R. BENDER,
Admiral U.S. Coast Guard,
Commandant.

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

PART 213—WATER RESOURCES PROJECTS

Project Deauthorization Review Program

Notice is hereby given that the regulation set forth below by the Secretary of the Army (acting through the Chief of Engineers), prescribes implementing policy and procedures pursuant to section 12 of the Water Resources Development Act of 7 March 1974 (Pub. L. 93-251). The Congress, in section 12, has directed the review of all projects which have been authorized for a period of at least 8 years without any Congressional appropriations within the last 8 years. It has further directed the Secretary of the Army, acting through the Chief of Engineers, to submit a list of projects to Congress, at least once each year, which he determines, after appropriate review, should no longer be authorized.

The regulation set forth below provides policies and proceduers for field office formulation of recommendations for submission to the Chief of Engineers. Subsequent to review of these recommendations, the Chief of Engineers will obtain the views of interested Federal departments, agencies and instrumentalities, and of the Governor of each State wherein any project on his list of recommended projects for deauthorization shall be located. These views will accompany the list submitted to Congress. Further, prior to submission of such list to Congress, the Secretary of the Army, acting through the Chief of Engineers, shall notify each Senator in whose State, and Member of the House of Representatives in whose district, a project (including any part thereof) on such list shall be located.

Since this regulation prescribes a general statement of agency policy and procedures, and since Congress has directed that this action be taken as soon as practicable, notice of proposed rulemaking and the procedures thereto are considered to be impractical and unnecessary. This regulation will become effective on May 15, 1974.

Dated: May 7, 1974.

J. W. MORRIS,
Major General, USA,
Director of Civil Works.

§ 213.100 Project Deauthorization Review Program.

(a) *Purpose.* This regulation provides policies and guidelines for first-year implementation of section 12 of the Water Resources Development Act of 1974, Pub. L. 93-251. Specifically, it provides for field office formulation of recommendations for deauthorization of selected projects, and submission of such recommendations to the Chief of Engineers in August 1974. These recommendations are to be the basis for the Chief of Engineers' first list of projects recommended for deauthorization to be submitted to Congress early in 1975.

(b) *Applicability.* This regulation is applicable to all OCE elements and field operating agencies having civil works responsibilities.

(c) *Basic policies.* (1) The first review of projects meeting the Congressional criteria for deauthorization consideration will include only those projects which reporting officers consider appropriate for deauthorization action under criteria outlined in this regulation without detail study.

(2) Field offices will solicit comments from local interests regarding proposed deauthorization action on selected projects as part of their formulation of recommendations to the Chief of Engineers. The Chief of Engineers will request comments on his recommended list from Governors and appropriate Federal department, agency, and instrumentality heads, and will notify Senators and Congressmen at the appropriate time.

(d) *Implementing guidelines.* Following are the work tasks on which the Office, Chief of Engineers is providing guidance toward meeting the completion date for field input to the Chief of Engineers' first list of recommended deauthorizations.

(1) Districts prepare a listing of all projects (active, deferred, and inactive), which meet the Congressional criteria for consideration for deauthorization action, i.e., authorized for at least eight years and having no Congressional appropriations during the past eight years. The date of March 7, 1966 is the baseline for this list. The listing should include all projects, project modifications, or separable parts of projects, identified on the CWIS Planning and Construction Schedule (Engineer Regulation 18-2-1), and others identified that missed the current listing.

(2) Districts classify projects on the above list into one of the following categories, based on the criteria given in Appendix A:

(i) Suitable for Recommendation of Deauthorization Without Further Study;

(ii) Not Suitable for Recommendation Without Further Study; or

(iii) Suitable for Recommendation of Continued Authorization.

(3) Division Engineers submit to the Office, Chief of Engineers, information copies of project listings required by paragraph (d)(1) of this section.

(4) Districts prepare updated Project Information Sheets for all active projects classified in paragraph (d)(2)(i) of this section in accordance with paragraph 7, Chapter 3, Engineer Regulation 11-2-101, insuring that information regarding the deauthorization criteria (Appendix A) is adequately addressed. For inactive and deferred projects classified in paragraph (d)(2)(i) of this section, prepare an abbreviated Project Information Sheet, as follows:

(i) *Name of project.* No change.

(ii) *Authorization.* No change.

(iii) *Location.* No change.

(iv) *Description.* No change.

(v) *Summarized financial data.* Include estimated cost and the year cost was computed, funds allotted to date, and the last year funds were allotted.

(vi) *Reasons for classification of (Deferred) (Inactive).* Cite reasons and the data classification occurred, indicating any additional changes since that time.

(5) Districts request comments from local interests on all projects classified in paragraph (d)(2)(i) of this section. Local interests should include primarily those parties responsible for items of local cooperation or otherwise directly involved in plan implementation. Determination of relevant parties from whom comments are requested should be consistent with the general policy given in paragraph (c)(2) of this section.

(6) Division Engineers submit recommendations of the reporting officers, with indorsements of the Division Engineer, Project Information Sheets and copies of comments received from local interests, to the Office, Chief of Engineers. Submissions should also be accompanied by a single page supplement to each Project Information Sheet, referencing significant comments received from local interests, summarizing the results of any other studies made, and stating conclusions which support the recommendation.

(7) Division Engineers are not to release a public notice on this action.

(e) *Submission addressee.* All submissions requested by this regulation should be sent in three (3) copies to HQDA (DAEN-CWP) Wash., D.C. 20314.

APPENDIX A—CRITERIA FOR RECOMMENDING PROJECT DEAUTHORIZATION

1. The project lacks economic justification, and it is apparent that a restudy would not develop an economically justified plan.

2. The project, as authorized, is not adequate to meet current or prospective needs, and to obtain an adequate improvement would require such substantial modifications and involve such increased costs that the Corps could not proceed without new authorization from Congress.

3. The project is generally opposed by local interests, or there is little or no prospect that the required local cooperation will be forthcoming.

4. The project, or part thereof, is no longer required because it has been accomplished by local interests or another agency, has been superseded by another project, or for any other reason.

[FR Doc.74-10971 Filed 5-14-74;8:45 am]

Title 49—Transportation

CHAPTER I—DEPARTMENT OF TRANSPORTATION

SUBCHAPTER A—HAZARDOUS MATERIALS REGULATIONS BOARD

[Docket No. HM-106; Amdt. Nos. 172-26, 173-81, 174-22, 178-33, 179-13]

SHIPMENT OF HAZARDOUS MATERIALS

On March 23, 1973, the Hazardous Materials Regulations Board published a notice of proposed rulemaking, Docket No. HM-106, Notice No. 73-2 (38 FR 7470), which proposed certain amendments. Interested persons were invited to give their views and several comments were received by the Board.

The purpose of these amendments to the Hazardous Materials Regulations of the Department of Transportation is (1) to identify iodine pentafluoride by name as a hazardous material; (2) to authorize the shipment of iodine pentafluoride in certain packagings; (3) to make certain editorial changes which will group a number of fluoride materials presently covered in different sections into one section; (4) to delete the authorization for 10 pounds or less of certain fluoride materials to be shipped in cylinders approved by the Bureau of Explosives; (5) to delete unnecessary references to DOT-106A500 tanks; (6) to limit the requirement for a reflective exterior surface finish on DOT-51 portable tanks to only those tanks containing compressed gas; (7) to eliminate this reflective exterior surface finish requirement for other substances, such as flammable liquids; (8) to make editorial changes which clarify the reflective exterior surface finish requirements; (9) to prohibit the transportation of flammable liquids, having a Reid vapor pressure between 16 p.s.i.a. and 27 p.s.i.a. at 100° F., in certain tank motor vehicles; (10) to authorize the shipment of specific mercaptan materials and aliphatic mercaptan mixtures in DOT-51 portable tanks; (11) to authorize the shipment of sodium hydrosulfite in DOT-56 portable tanks; (12) to authorize the shipment of lithium metal wire in a DOT-12B fiberboard box with inside air-tight nonsparking metal packagings; (13) to authorize the shipment of certain alkali metal and alkali metal compounds in a DOT-19A or DOT-19B wooden box with inside air-tight metal packagings; (14) to authorize the shipment of wet zirconium metal powder in a DOT-37M nonreusable cylindrical steel overpack with an inside DOT-2S polyethylene container; (15) to change the quantity requirements for bromine authorized in MC 310 and MC 312 cargo tanks; (16) to change the cladding and lining requirements for MC 310 and MC 312 cargo tanks containing bromine; (17) to make editorial changes in DOT-105A300W tank car requirements for bromine shipments; (18) to authorize the shipment of fluosulfonic acid in MC 310, MC 311, and MC 312 cargo tanks; (19) to provide for the transportation of liquefied petroleum gas in DOT-2P and DOT-2Q containers, without safety relief devices, with slightly increased charging pressures; (20) to authorize DOT-2Q containers, with safety relief devices, as an alternate packaging for the shipment of liquefied petroleum gas; (21) to change the requirements for exemption from specification packaging, marking, and labeling for the shipment of audible fire alarm systems and fire extinguishers; (22) to require the use of safety relief devices on DOT specification multiunit tank car tanks transporting hydrogen sulfide; (23) to delete the shipping container specifications for wooden barrels and kegs made under DOT-10A, 10C, 11A, and 11B designations, and (24) to delete from certain sections the reference to these wooden barrel and keg specifications and to specification DOT-10B.

A number of comments were submitted on these proposals and each comment was given due consideration. The following is a discussion of the comments received and a statement of the changes made as a result of these comments:

Fluoride materials. A comment was directed to the proposal which grouped a number of the fluoride materials into one section. This comment questioned why the maximum quantity in one outside container was limited to 25 pounds for antimony pentafluoride for shipment by rail express (cargo aircraft). The present regulations contain this packaging weight restriction for antimony pentafluoride and since this rulemaking did not propose to change the quantity limitation, the comment regarding a higher maximum weight in one outside container for antimony pentafluoride when shipped by rail express (cargo aircraft) is not considered within the scope of the proposed action.

Flammable liquids in tank motor vehicles. A commenter requested a clarification of the proposal which requires, when necessary, interior cleaning of cargo tanks between changes in lading. He states that the present regulations only require interior cleaning of MC 330 and MC 331 tanks whereas the proposal requires the interior cleaning of

V 39 I 95 MAY 15 74 XUM

all tanks authorized in the section. The Board has purposely amended the regulations so that this requirement is applicable to all tank motor vehicles when it is known that a change of lading may cause an unsafe condition.

Obsolete wooden barrel and keg specifications. Several commenters objected to the deletion of one specific barrel specification, namely the DOT–10B. The Board's proposal was to eliminate all of the wooden barrel and keg specifications and their authorizations for use. The commenters requested retention of this barrel specification for use in the shipment of alcohol and alcohol-water mixtures. In addition, another commenter suggested that of the two types of wooden barrels (tight and slack) one barrel specification from each type should be retained. Since no response was received to this proposal in the form of a justification to maintain any barrel specification, other than the DOT–10B, the Board has eliminated the remaining wooden barrel specifications and their authorizations from the regulations. The Board has therefore, retained only the DOT–10B specification for alcohol and alcohol-water mixtures. However, a study to change the present requirements of this specification to performance oriented requirements will be under taken by the Board.

Audible fire alarm systems. A commenter objected to the proposed burst test requirements for the pressure vessel contained within the fire alarm system. The proposal states that the pressure vessel must be designed and fabricated to withstand a pressure equal to five times its charged pressure at 130°F. The objections were based on the fact that a special permit, presently in effect, authorizes the pressure vessel of a fire alarm system to be constructed with a minimum burst pressure of 850 p.s.i.g. This minimum burst pressure of 850 p.s.i.g. is slightly less than the proposal requirements for the pressure vessel to have a burst pressure of not less than five times its charged pressure at 130°F.

Based on the satisfactory shipping experience under special permit and the fact that the pressure vessel is of a non-refillable type, the Board agrees with the commenter and has provided in this amendment that non-refillable pressure vessels must be designed and fabricated with a burst pressure of not less than four times its charged pressure at 130°F. For fire alarm systems which incorporate refillable pressure vessels, the Board requires that these vessels must have a burst pressure of not less than five times its charged pressure at 130°F.

Fire extinguishers. One commenter requested clarification of the marking requirements for fire extinguishers shipped under the proposed exemption provisions. The proposed marking requirement states that each fire extinguisher shipped under the exemption provision must be durably and legibly marked with a required statement. The purpose of the marking is to convey the fact that the fire extinguisher meets the requirements of the exemption provisions. The Board considers that a label may be recognized as a permanent part of an extinguisher. Therefore, marking of the required statement on the label would be authorized.

Several commenters objected to that portion of the proposal which requires the fire extinguisher to be designed and fabricated with a burst pressure of not less than six times its charged pressure at 70°F. when shipped. Although some of these commenters did not take exception to the existing test pressure provisions that require the extinguisher to be tested to at least three times its charged pressure a 70°F. before initial shipment, they have stated that a burst pressure of "• • • four times the normal charged pressure is adequate and provides a reasonable safety margin when coupled with good engineering design criteria." Close examination of this statement establishes the fact that the burst pressure would be only one and one-third the test pressure which the Board believes is an unacceptable margin of safety for non-specification cylinders. Even for the DOT specification 39 cylinder, a non-refillable pressure container, the burst pressure must be at least two times the test pressure. Also, the reference to "good engineering design criteria" implies certain manufacturing controls over cylinder construction which are not intended in this exemption provision.

Another commenter suggested that the exemption provision for fire extinguishers contain test pressure requirements of only two times the charged pressure at 70°F. and burst pressure requirements of only four times the charged pressure at 70°F. In support of this suggestion, the commenter indicated that a complete review of the stress conditions present in cyclinders used for stored fire extinguishers was conducted. The results of this review showed "• • • every cylinder which is currently shipped under the provisions of the existing extinguisher exemption is stressed to levels above those permitted by DOT–4B–XXX when it is tested to three times charged pressure at 70°F." This statement is construed as an admission that the sidewall strength of these cylinders is inadequate since the stress levels of the cylinders were so high. For such reasons, the Board amended § 173.306(c) to include a burst pressure requirement of six times the charged pressure as one means to assure adequate wall strength.

To act otherwise, the Board would be reducing the present requirement of three times charged pressure to two times without any showing that three times is not required. This is based on the fact that the Board has no information indicating that the present safety record is not based on a three times charged pressure test. The present test requirement of three times charged pressure was not proposed to be changed, and unless persons were not following "good engineering practices" as described above, the Board must conclude that the test requirement is valid. Further, the Board notes that although the three times and six times tests are in excess of certain cylinder specifications, where specific manufacturing controls are prescribed by the regulations, the regulation at issue is for cylinders which are otherwise exempt from specification construction requirements of the Hazardous Materials Regulations. Any manufacturer, wishing to take advantage of lower test pressures, may design fire extinguisher units to specification requirements and ship them subject to the regulations applicable to compressed gases. The end use of a packaged gaseous material does not change the gas hazard in transportation and, therefore, does not warrant special treatment for the cylinder used to contain it when considering design criteria.

There were a number of commenters who proposed that the Board consider a new specification cylinder as proposed by the Compressed Gas Association (CGA). The Board in its ongoing study of the present regulations has been working toward a consolidation of the present cylinder specifications. This study has generated favorable comment from the general public and many trade associations. It was the Board's understanding that CGA supported this objective. The addition of a new specification would appear to be directed toward proliferation, not consolidation, of the present cylinder specifications. In addition, the recommendations for the new cylinder specification are not considered within the scope of this rulemaking action.

In consideration of the foregoing, 49 CFR Parts 172, 173, 174, 178, and 179 are amended as follows:

PART 172—LIST OF HAZARDOUS MATERIALS CONTAINING THE SHIPPING NAME OR DESCRIPTION OF ALL MATERIALS SUBJECT TO PARTS 170–189 OF THIS SUBCHAPTER

In § 172.5 paragraph (a), the list of hazardous materials is amended as follows:

§ 172.5 List of hazardous materials.

(a) • • •

Article	Classed as—	Exemption and packing (see sec.)	Label required if not exempt	Maximum quantity in 1 outside container by rail express
(Add)				
Iodine pentafluoride	Cor	No exemption, 173.246	Corrosive	100 pounds.
(Change)				
Antimony pentafluoride	Cor	No exemption, 173.246	Corrosive	25 pounds.
Bromine pentafluoride	Cor	No exemption, 173.246	Corrosive	100 pounds.
Bromine trifluoride	Cor	No exemption, 173.246	Corrosive	100 pounds.
Chlorine trifluoride	Cor	No exemption, 173.246	Corrosive	100 pounds.

PART 173—SHIPPERS

1. In Part 173 Table of Contents, § 173.246 is amended; §§ 173.283, 173.284, and 173.285 are deleted as follows:

Sec.
173.246 Antimony pentafluoride, bromine pentafluoride, iodine pentafluoride, bromine trifluoride, and chlorine trifluoride.
173.283 [Deleted.]
173.284 [Deleted.]
173.285 [Deleted.]

2. In § 173.32, paragraph (a)(3) is added to read as follows:

§ 173.32 Qualification, testing, maintenance, and use of portable tanks.

(a) • • •

(3) Each uninsulated portable tank used for the transportation of compressed gases, as defined in § 173.300, must have an exterior surface finish complying with § 178.245–1(c) of this subchapter.

• • • • • •

3. In § 173.60, paragraph (a)(1) is deleted as follows:

§ 173.60 Black powder and low explosives.

(a) • • •

(1) Deleted.

• • • • • •

4. In § 173.64, paragraph (a)(3) is deleted as follows:

§ 173.64 High explosives with no liquid explosive ingredient and propellant explosives, Class A.

(a) • • •

(3) [Deleted.]

• • • • • •

5. In § 173.65, paragraphs (a)(3) and (e)(1) are deleted as follows:

§ 173.65 High explosives with no liquid explosive ingredient nor any chlorate.

(a) • • •

(3) [Deleted.]

• • • • • •

(e) • • •

(1) [Deleted.]

• • • • • •

6. In § 173.70, the introductory text of paragraph (b) and paragraph (d) are amended to read as follows:

§ 173.70 Diazodinitrophenol or lead mononitroresorcinate.

• • • • • •

(b) Diazodinitrophenol or lead mononitroresorcinate must be packed wet with not less than 40 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, with inside containers which must be bags made of at least 10-ounce cotton duck, rubber, or rubberized cloth. Each bag must be securely closed. The bags containing diazodinitrophenol or lead mononitroresorcinate must be placed in a rubber bag, rubberized cloth bag, or bag made of suitable watertight material and then placed in the barrel or drum. Any empty space in the outside bag must be filled with water and th bag securely closed. The dry weight of diazodinitrophenol in one outside container must not exceed 220 pounds and the dry weight of lead mononitroresorcinate in one outside container must not exceed 100 pounds.

• • • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE — DANGEROUS — DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVES."

• • • • • •

7. In § 173.71, paragraphs (b) and (d) are amended to read as follows:

§ 173.71 Fulminate of mercury.

• • • • • •

(b) Fulminate of mercury must be packed wet with not less than 25 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip), with an inside container which must be a bag made of 4-ounce duck. Inside the bag and over the fulminate, there must be placed a cap of the same fabric and of the same diameter as the bag. The bag must be securely tied and placed in a strong grain bag. The grain bag must also be securely tied. The bag and contents must be packed in the center of the metal barrel or drum and must be entirely surrounded by not less than three inches of well-packed sawdust saturated with water. The metal barrel or drum must be lined with a heavy, close-fitting, jute bag closed by secure sewing to prevent escape of sawdust. The barrel or drum must be inspected carefully and all leaks stopped. The dry weight of fulminate in one outside container must not exceed 150 pounds.

• • • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE — DANGEROUS — DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVES."

• • • • • •

8. In § 173.72, paragraphs (b) and (d) are amended to read as follows:

§ 173.72 Guanyl nitrosamino guanylidene hydrazine.

• • • • • •

(b) Guanyl nitrosamino guanylidene hydrazine must be packed wet with not less than 30 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip), with an inside container which must be a bag made of 4-ounce duck. Inside the bag and over the guanyl nitrosamino guanylidene hydrazine, there must be placed a cap of the same fabric and of the same diameter as the bag. The bag must be securely tied and placed in a strong grain bag. This grain bag must also be securely tied. The bag and contents must be packed in the center of the metal barrel or drum, and must be entirely surrounded by not less than three inches of well-packed sawdust saturated with water. The metal barrel or drum must be lined with a heavy, close-fitting, jute bag closed by secure sewing to prevent escape of sawdust. The barrel or drum must be inspected carefully and all leaks stopped. The dry weight of guanyl nitrosamino guanylidence hydrazine in one outside container must not exceed 75 pounds.

• • • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • • •

9. In § 173.73, paragraphs (b) and (d) are amended to read as follows:

§ 173.73 Lead azide.

• • • • • •

(b) Lead azide, dextrinated type, or otherwise prepared to effectively control grain size, must be packed wet with not less than 20 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip), with an inside container which must be a bag made of 4-ounce duck. Inside the bag and over the lead azide, there must be placed a cap of the same fabric and of the same diameter as the bag. The bag must be securely tied and placed in a strong grain bag. This grain bag must also be securely tied. The bag and contents must be packed in the center of the metal barrel or drum, and must be entirely surrounded by not less than three inches of well-packed sawdust saturated with water. The metal barrel or drum must be lined with a heavy, close-fitting, jute bag closed by secure sewing to prevent escape of sawdust. The barrel or drum must be inspected carefully and all leaks stopped. The dry weight of lead azide in one container must not exceed 150 pounds.

• • • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • • •

10. In § 173.74, paragraphs (b) and (d) are amended to read as follows:

§ 173.74 Lead styphnate.

• • • • • •

(b) Lead styphnate (lead trinitroresorcinate) must be packed wet with not less than 20 percent by weight of water in specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip), with an inside container which must be a bag made of rubber cloth. The lead styphnate

V 39 I 95 MAY 15 74 XUM

within this bag should be divided into a number of smaller packages. Inside the bag and over the lead styphnate, there must be placed a cap of the same fabric and of the same diameter as the bag. The bag and contents must be packed in the center of the metal barrel or drum, and must be entirely surrounded by not less than three inches of well-packed sawdust saturated with water. The metal barrel or drum must be lined with a heavy, close-fitting, jute bag closed by secure sewing to prevent escape of sawdust. The barrel or drum must be inspected carefully and all leaks stopped. The dry weight of lead styphnate in one outside container must not exceed 150 pounds.

• • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • •

11. In § 173.75, the introductory text of paragraph (b) and paragraph (d) are amended to read as follows:

§ 173.75 -Nitro mannite.

• • • • •

(b) Nitro mannite must be packed wet with not less than 40 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, with inside container which must be bags made of at least 10-ounce cotton duck, rubber or rubberized cloth. Each bag must be securely closed. These bags containing the nitro mannite must then be placed in a rubber bag, rubberized cloth bag, or bag made of suitable watertight material and then placed in the barrel or drum. Any empty space in the outside bag must be filled with water and this bag securely closed. The dry weight of nitro mannite in one outside container must not exceed 100 pounds.

• • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • •

12. In § 173.76, paragraphs (b) and (c) are amended to read as follows:

§ 173.76 Nitrosoguanidine.

• • • • •

(b) Nitrosoguanidine must be packed wet with not less than 10 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip) with an inside container which must be a bag made of strong cloth, which must in turn be placed in the barrel or drum. The dry weight of nitrosoguanidine in one outside container must not exceed 75 pounds.

(c) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • •

13. In § 173.77, paragraphs (b) and (d) are amended to read as follows:

§ 173.77 Pentaerythrite tetranitrate.

• • • • •

(b) Pentaerythrite tetranitrate must be packed wet with not less than 40 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip) with inside containers which must be bags made of at least 10-ounce cotton duck, rubber, or rubberized cloth. Each bag must be securely closed. These bags containing pentaerythrite tetranitrate must then be placed in a rubber bag, rubberized cloth bag, or bag made of suitable watertight material and then placed in the barrel or drum. Any empty space in the outside bag must be filled with water and this bag securely closed. The dry weight of pentaerythrite tetranitrate in one outside container must not exceed 300 pounds.

• • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • •

14. In § 173.78, paragraphs (b) and (d) are amended to read as follows:

§ 173.78 Tetrazene.

• • • • •

(b) Tetrazene (guanyl nitrosamino guanyl tetrazene) must be packed wet with not less than 30 percent by weight of water in a specification container 5 or 5B (§§ 178.80, 178.82 of this subchapter) metal barrel or drum, 17H (§ 178.118 of this subchapter) metal drum (single-trip) with an inside container which must be a bag made of 4-ounce duck. Inside the bag and over the tetrazene, there must be placed a cap of the same fabric and of the same diameter as the bag. The bag must be securely tied and placed in a strong grain bag. This grain bag must also be securely tied. The bag and contents must be packed in the center of the metal barrel or drum, and must be entirely surrounded by not less than three inches of well-packed sawdust saturated with water. The metal barrel or drum must be lined with a heavy, close-fitting, jute bag closed by secure sewing to prevent escape of sawdust. The barrel or drum must be inspected carefully and all leaks stopped. The dry weight of tetrazene in one outside container must not exceed 75 pounds.

• • • • •

(d) Each barrel or drum must be plainly marked "INITIATING EXPLOSIVE—DANGEROUS—DO NOT STORE OR LOAD WITH ANY HIGH EXPLOSIVE."

• • • • •

15. In § 173.91, paragraph (a)(1) is deleted as follows:

§ 173.91 Special fireworks.

(a) • • •
(1) [Deleted.]

• • • • •

16. In § 173.93, paragraphs (a)(1), (b)(2), and (d)(2) are deleted as follows:

§ 173.93 Propellant explosives (solid) for cannon, small arms, rockets, guided missiles, or other devices, and propellant explosives (liquid).

(a) • • •
(1) [Deleted.]

• • • • •

(b) • • •
(2) [Deleted.]

• • • • •

(d) • • •
(2) [Deleted.]

• • • • •

17. In § 173.108, paragraph (a)(1) is deleted as follows:

§ 173.108 Common fireworks, signal flares, hand signal devices, smoke signals, smoke candles, smoke grenades, smoke pots, and Very signal cartridges.

(a) • • •
(1) [Deleted.]

• • • • •

18. § 173.119, paragraphs (a)(5) and (a)(6) are deleted; paragraphs (b)(3), (e)(1) and (e)(3) are amended to read as follows:

§ 173.119 Flammable liquids not specifically provided for.

(a) • • •
(5) [Deleted.]
(6) [Deleted.]

• • • • •

(b) • • •

(3) Specification 10B (§ 178.156 of this subchapter). Wooden barrels or kegs. Authorized only for alcohol and alcohol-water mixtures.

• • • • •

(e) • • •

(1) As prescribed in paragraphs (a)(1) to (11) of this section, except spec. 17E (§ 178.116 of this subchapter). Bung labels required, for metal barrels and drums, as prescribed in paragraph (i) of this section.

• • • • •

(3) Specification MC 304, MC 307, MC 330, or MC 331 (§§ 178.340, 178.342, 178.337 of this subchapter). Tank motor vehicles. Necessary interior cleaning of the tanks must be performed between changes in lading. Each safety relief device must have a start-to-discharge pressure of not less than 25 p.s.i.g. Each tank must meet the following requirements as applicable:

(i) Bottom outlets on each specification MC 304 cargo tank must be equipped with valves conforming to the requirements of § 178.342-5(a) of this subchapter; and

(ii) Bottom outlets on each specification MC 330 and MC 331 cargo tank must be equipped with valves conforming to the requirements of § 178.337-11(c) of this subchapter. Safety relief devices on these tanks must be in accordance with specification MC 331 (§ 178.337 of this subchapter) requirements.

19. In § 173.121, paragraph (a)(1) is deleted as follows:

§ 173.121 Carbon bisulfide (disulfide).

(a) • • •
(1) Deleted.

• • • • •

20. In § 173.128, paragraph (b)(1) is deleted as follows:

§ 173.128 Paints and related materials.

• • • • •

(b) • • •
(1) [Deleted.]

• • • • •

21. In § 173.131, paragraph (a)(2) is deleted as follows:

§ 173.131 Road asphalt, or tar, liquid.

(a) • • •
(2) [Deleted.]

22. In § 173.132, paragraphs (a)(1) is amended; Note 1 is deleted as follows:

§ 173.132 Cement, liquid, n.o.s., container cement, linoleum cement, pyroxylin cement, rubber cement, tile cement, wallboard cement, and coating solution.

(a) • • •

(1) As prescribed in § 173.119, irrespective of flash point or viscosity.

NOTE 1: [Deleted.]

• • • • •

23. In § 173.141, paragraph (a)(10) is added to read as follows:

§ 173.141 Amyl mercaptan, butyl mercaptan, ethyl mercaptan, isopropyl mercaptan, propyl mercaptan, and aliphatic mercaptan mixtures.

(a) • • •

(10) Specification 51 (§ 178.245 of this subchapter). Portable tank. Each tank must be equipped with safety relief valves which must be in compliance with all requirements of § 173.315(i) except for paragraph (i) (9), (10), and (11). A tank must not be liquid full at 130°F.

• • • • •

24. In § 173.154, paragraphs (a) (3), (4), and (5) are deleted as follows:

§ 173.154 Flammable solids and oxidizing materials not specifically provided for.

(a) • • •
(3) [Deleted.]
(4) [Deleted.]
(5) [Deleted.]

• • • • •

25. In § 173.155, paragraph (a)(2) is deleted as follows:

§ 173.155 Bags, nitrate of soda, empty and unwashed.

(a) • • •
(2) [Deleted.]

• • • • •

§ 173.263 [Amended].

26. In § 173.163, paragraph (a)(4) is amended by deleting the following words in the first sentence: "or spec. 11A or 11B (§§ 178.160 or 178.161 of this chapter) wooden barrels or kegs,".

27. In § 173.184, paragraph (a)(1) is deleted as follows:

§ 173.184 Nitrocellulose or collodion cotton, wet, or nitrocellulose, colloided, granular, or flake, wet, or nitrostarch, wet, or nitroguanidine, wet.

(a) • • •
(1) [Deleted.]

• • • • •

28. In § 173.187, paragraph (a)(1) is amended to read as follows:

§ 173.187 Peroxide of sodium.

(a) • • •

(1) Specification 15A, 15B, 15C, 16A, or 19A (§§ 178.168, 178.169, 178.170, 178.185, 178.190 of this subchapter). Wooden boxes with inside containers which must be air-tight metal cans.

• • • • •

29. In § 173.188, paragraph (a)(1) is amended to read as follows:

§ 173.188 Phosphoric anhydride.

(a) • • •

(1) Specification 15A, 15B, or 15C (§§ 178.168, 178.169, 178.190 of this subchapter). Wooden boxes with inside containers which must be tightly stoppered glass bottles not over 1 pound capacity each; or metal cans, not over 3 pounds capacity each, hermetically sealed (soldered) or closed with cork securely held in place by metal strap soldered in position. All inside containers must be cushioned with elastic incombustible packing materials.

(Note 1 remains the same.)

• • • • •

30. In § 173.191, paragraph (a)(1) is amended; paragraph (a)(3) is deleted as follows:

§ 173.191 Phosphorus pentachloride.

(a) • • •

(1) Specification 15A, 15B, 15C, 16A, or 19A (§§ 178.168, 178.169, 178.170, 178.185, 178.190 of this subchapter). Wooden boxes with inside containers which must be glass or glazed earthenware containers, not over 25 pounds capacity each, cushioned with mineral packing; when inside containers are packed in the same outside container with other articles, they must be enclosed in tightly closed metal cans. Net weight of phosphorus pentachloride not over 50 pounds in each outside container.

• • • • •

(3) [Deleted.]

• • • • •

31. In § 173.195, paragraph (a)(3) is deleted as follows:

§ 173.195 Pyroxylin plastic scrap, photographic film scrap, X-ray film scrap, motion-picture film scrap, or pieces of exposed or unexposed film.

(a) • • •
(3) [Deleted.]

• • • • •

32. In § 173.201, paragraph (a)(3) is deleted as follows:

§ 173.201 Rubber scrap, rubber buffings, reclaimed rubber, or regenerated rubber.

(a) • • •
(3) [Deleted.]

• • • • •

33. In § 173.204, paragraph (a)(1) is amended; (a)(8) is added to read as follows:

§ 173.204 Sodium hydrosulfite.

(a) • • •

(1) Specification 15A, 15B, 15C, 16A, or 19A (§§ 178.168, 178.169, 178.170, 178.185, 178.190 of this subchapter). Wooden boxes with inside glass bottles of capacity not exceeding 5 pounds each, or metal containers.

• • • • •

(8) Specification 56 (§§ 178.251, 178.252 of this subchapter). Portable tank. Authorized only for shipment in a closed transport vehicle. For rail transportation see § 174.534 of this subchapter. Not authorized for transportation by water.

34. In § 173.205, paragraph (a)(2) is deleted as follows:

§ 173.205 Sodium picramate, wet.

(a) • • •
(2) [Deleted.]

35. In § 173.206, paragraphs (a)(1) and (c)(4) are amended; paragraph (a)(11) is added to read as follows:

§ 173.206 Sodium or potassium, metallic, sodium amide, sodium potassium alloys, sodium aluminum hydride, lithium metal, lithium silicon, lithium ferro silicon, lithium hydride, and lithium aluminum hydride.

(a) • • •

(1) Specification 15A, 15B, 19A, or 19B (§§ 178.168, 178.169, 178.190, 178.191 of this subchapter). Wooden boxes must have inside air-tight metal packagings. Each inside air-tight metal packaging must have a closing device securely fastened by positive means (not friction). For shipments of lithium aluminum hydride, each inside metal packaging must not exceed 1 gallon capacity and must be securely closed, positive means not required. Each inside metal packaging containing lithium aluminum hydride must be cushioned in outside packagings with sufficient incombustible packaging material.

• • • • •

(11) Specification 12B (§ 178.205 of this subchapter). Fiberboard box. Au-

V 39 I 95 MAY 15 74 XUM

thorized only for lithium metal in wire form. Fiberboard box must have inside nonsparking metal packaging. Each inside nonsparking metal packaging must be tin coated and sealed by rolled-on lids. The contents of each inside packaging must be coated with heavy mineral oil or petroleum and wound on a 3-inch by 3-inch nonsparking metal spool. The net weight of the contents in each inside packaging must not exceed one-fourth pound.

• • • • • •

(c) • • •

(4) Specification 51 (§ 178.245 of this subchapter). Portable tank. Each tank must have a minimum design pressure of 150 p.s.i.g. Each tank must be equipped with safety valves having a start-to-discharge pressure of 150 p.s.i.g. If a tank has exterior heating coils these coils must be welded to the tank and must be stress relieved. The material must be in molten condition when loaded and the tank must be held for sufficient time to allow the material to be completely solidified before being offered for transportation. Outage must be five percent or more at sodium fusion temperature of 208° F.

• • • • • •

36. In § 173.214, paragraphs (a)(2) and (c)(2) are deleted; paragraph (c)(4) is added to read as follows:

§ 173.214 Hafnium metal or zirconium metal, wet, minimum 25 percent water by weight, mechanically produced, finer than 270 mesh particle size; hafnium metal or zirconium metal, dry, in an atmosphere of inert gas, mechanically produced, finer than 270 mesh particle size; hafnium metal or zirconium metal, wet, minimum 25 percent water by weight, chemically produced (see Note 1), finer than 20 mesh particle size; hafnium metal or zirconium metal, dry, in an atmosphere of inert gas, chemically produced (see Note 1), finer than 20 mesh particle size.

(a) • • •

(2) [Deleted.]

• • • • • •

(c) • • •

(2) [Deleted.]

• • • • • •

(4) Specification 37M (§ 178.134 of this subchapter). Cylindrical steel overpack with inside specification 2S (§ 178.35 of this subchapter) polyethylene container. Each overpack must be constructed of at least 24-gage steel. Each packaging may not exceed a capacity of 5 gallons. Net weight of contents may not exceed 50 pounds of dry material.

• • • • • •

37. In § 173.216, paragraph (a)(2) is deleted as follows:

§ 173.216 Zirconium picramate, wet.

(a) • • •

(2) [Deleted.]

38. In § 173.245, paragraphs (a)(5) and (a)(6) are deleted as follows:

§ 173.245 Corrosive liquids not specifically provided for.

(a) • • •

(5) [Deleted.]

(6) [Deleted.]

• • • • • •

39. In § 173.246, the heading, paragraph (a), and paragraph (a)(1) are amended; paragraph (a)(2) is added as follows:

§ 173.246 Antimony pentafluoride, bromide pentafluoride, iodine pentafluoride, bromine trifluoride, and chlorine trifluoride.

(a) Antimony pentafluoride must be chemically anhydrous. Materials cited in the heading of this section must be packed in specification packagings as follows:

(1) Specification 3A150, 3AA150, 3B240, 3BN150, 4B240, 4BA240, 4BW240, or 3E1800 (§§ 178.36, 178.37, 178.38, 178.39, 178.50, 178.51, 178.61, 178.42 of this subchapter). Cylinders. Each valve outlet must be sealed by a threaded cap or a threaded plug. Cylinder valves must be protected as specified for corrosive gases in § 173.301(g). No cylinder may be equipped with any safety relief device. Specification 3E1800 cylinders must be packaged in accordance with the requirements of § 173.301(k).

(2) Specification 106A500X or 110A-500W (§§ 179.300, 179.301 of this subchapter). Tanks. Authorized for iodine pentafluoride and chlorine trifluoride only. Each tank must be equipped with a valve protection cover and with solid steel plugs in place of fusible plug safety devices. No tank may be equipped with any safety relief device.

40. In § 173.247, paragraph (a)(2) is deleted as follows:

§ 173.247 Acetic anhydride; Acetyl bromide; Acetyl chloride; Acetyl iodide; Antimony pentachloride; Benzoyl chloride; Boron trifluoride-acetic acid complex; Chromyl chloride; Dichloroacetyl chloride; Diphenylmethyl bromide solutions; Pyro sulfuryl chloride; Silicon chloride; Sulfuryl chloride; Thionyl chloride; Tin tetrachloride (anhydrous); Titanium tetrachloride; Trimethyl acetyl chloride.

(a) • • •

(2) [Deleted.]

• • • • • •

41. In § 173.252, paragraphs (a)(3) and (a)(4) are amended; paragraph (a)(5) is deleted as follows:

§ 173.252 Bromine.

(a) • • •

(3) Specification 105A300W (§§ 179.100, 179.101 of this subchapter). Tank car. Each tank must have a nickel cladding material on the inside surface comprising at least 20 percent of the total thickness, or be lined with lead no less than 3/16-inch thick. Openings in tank heads to facilitate application of lead lining are authorized and must be closed in an approved manner. All closures and appurtenances which are in contact with the lading must be lead lined or must be made of metal not subject to rapid deterioration by contact with the lading. All interior welds in nickel clad tanks must be protected by pure nickel butt straps. Except as otherwise provided herein, the water weight capacity of the tank must not be more than 20,400 pounds, and the maximum quantity of liquid bromine loaded into the tank must not be more than 60,000 pounds or 300 percent of the water weight capacity of the tank, whichever quantity is less. The total quantity loaded must not be less than 98 percent of the quantity the tank is authorized to carry.

(i) A tank constructed and maintained in full compliance with the requirements of a Specification DOT-105A500W is authorized for larger capacities of bromine. However, this tank may be marked DOT-105A300W and may be equipped with manway cover plates, safety valves, venting valves, loading valves, and unloading valves that are in compliance with the requirements of a Specification DOT-105A300W tank. The water weight capacity of this tank must not be more than 37,400 pounds, and the maximum quantity of liquid bromine loaded into the tank must not be more than 110,000 pounds or 300 percent of the water weight capacity of the tank, whichever quantity is less.

(4) Specification MC 310 or MC 312 (§ 178.343 of this subchapter). Tank motor vehicles. Each tank must have a shell and head thickness of at least three-eighths inch. Each tank must have a nickel cladding material on the inside surface comprising at least 20 percent of the total thickness or be lined with lead at least 3/16-inch thick. The cladding material must conform to requirements of ASTM Specification B-162-69. The composite plate must conform to requirements of ASTM Specification A-265-69. The maximum quantity of liquid bromine loaded into the tank must not exceed 300 percent of the water weight capacity of the tank. The total quantity loaded must not be less than 98 percent of the quantity the tank is authorized to carry.

(5) [Deleted.]

42. In § 173.254, paragraph (a)(3) is deleted as follows:

§ 173.254 Chlorosulfonic acid and mixtures of chlorosulfonic acid-sulfur trioxide.

(a) • • •

(3) [Deleted.]

• • • • • •

43. In § 173.262, paragraph (a)(3) is deleted as follows:

§ 173.262 Hydrobromic acid.

(a) • • •

(3) [Deleted.]

• • • • • •

44. In § 173.263, paragraphs (a)(4), (a)(8), and (b)(1) are deleted as follows:

§ 173.263 Hydrochloric (muriatic) acid, hydrochloric (muriatic) acid mixtures, hydrochloric (muriatic) acid solution, inhibited, sodium chlorite solution (not exceeding 42 percent sodium chlorite), and cleaning compounds, liquid, containing hydrochloric (muriatic) acid.

(a) • • •

(4) [Deleted.]

• • • • • •

(8) [Deleted.]

(b) • • •

(1) [Deleted.]

• • • • • •

45. In § 173.265, paragraphs (a)(2) and (a)(3) are deleted as follows:

§ 173.265 Hydrofluosilicic acid.

(a) • • •

(2) [Deleted.]

(3) [Deleted.]

• • • • • •

46. In § 173.266, paragraph (d)(1) is deleted as follows:

§ 173.266 Hydrogen peroxide solution in water.

• • • • • •

(d) • • •

(1) [Deleted.]

• • • • • •

47. In § 173.268, paragraphs (d)(1) and (e)(1) are amended to read as follows:

§ 173.268 Nitric acid.

• • • • • •

(d) • • •

(1) Specification 15A, 15B, 15C, 16A, or 19A (§§ 178.168, 178.169, 178.170, 178.185, 178.190 of this subchapter). Wooden boxes with inside containers which must be glass bottles not over 5 pints capacity each, individually enclosed in tightly closed metal cans and cushioned therein with sufficient incombustible mineral material. (See paragraphs (g) and (h) of this section.)

49. In § 173.271, paragraph (a)(3) is deleted as follows:

§ 173.271 Phosphorus oxybromide, phosphorus oxychloride, phosphorus trichloride, and thiophosphoryl chloride.

(a) • • •

(3) [Deleted.]

• • • • • •

50. In § 173.274, paragraph (a)(4) is added to read as follows:

§ 173.274 Fluosulfonic acid.

(a) • • •

(4) Specification MC 310, MC 311, or MC 312 (§ 178.343 of this subchapter). Tank motor vehicles.

§§ 173.283—173.285 [Deleted].

51. Section 173.283 thru 173.285 are deleted.

52. In § 173.289, paragraph (a)(3) is deleted as follows:

§ 173.289 Formic acid and formic acid solutions.

(a) • • •

(3) [Deleted.]

• • • • • •

53. In § 173.291, paragraphs (a)(4) and (a)(5) are deleted as follows:

§ 173.291 Flame retardant compound liquid.

(a) • • •

(4) [Deleted.]

(5) [Deleted.]

• • • • • •

54. In § 173.295, paragraph (a)(2) is deleted as follows:

§ 173.295 Benzyl chloride.

(a) • • •

(2) [Deleted.]

• • • • • •

55. In § 173.304 paragraph (d)(3)(ii), the table is amended to read as follows:

§ 173.304 Charging of cylinders with liquefied compressed gas.

• • • • • •

(d) • • •

(3) • • •

(ii) • • •

Type of container	Maximum capacity		Maximum charging pressure—p.s.i.g.
	Cubic inches	Gallons	
DOT-2P or DOT-2Q (see Note 1)	31.83		45 p.s.i.g. at 70° F. and 106 p.s.i.g. at 130° F. (see Note 2).
DOT-2P or DOT-2Q (see Note 1)	31.83		35 p.s.i.g. at 70° F. and 100 p.s.i.g. at 130° F.
DOT-3C or DOT-4C	3,881	16+5% tolerance	145 p.s.i.g. at 130° F.

Notes 1 and 2 remain the same.

• • • • • •

(Notes 1 and 2 remain the same.)

• • • • • •

56. In § 173.306, paragraphs (b)(6) and (c) are amended to read as follows:

§ 173.306 Exemptions from compliance with regulations for shipping compressed gas.

• • • • • •

(b) • • •

(6) Audible firm alarm systems powered by a compressed gas contained in an inside metal container when shipped under the following conditions:

(i) Each inside container must have contents which are not flammable, poisonous, or corrosive as defined under this part:

(ii) Each inside container may not have a capacity exceeding 35 cubic inches (19.3 fluid ounces);

(iii) Each inside container may not have a pressure exceeding 70 p.s.i.g. at 70° F. and the liquid portion of the gas may not completely fill the inside container at 130° F., and

(iv) Each non-refillable inside container must be designed and fabricated with a burst pressure of not less than four times its charged pressure at 130° F. Each refillable inside container must be designed and fabricated with a burst pressure of not less than five times its charged pressure at 130° F.

(c) *Fire extinguishers.* Fire extinguishers charged with a compressed gas to not more than 240 p.s.i.g. at 70°F. are exempt from specification packaging, marking, and labeling requirements when shipped under the following conditions, except that marking name of contents on outside packaging is required for shipments via carriers by water. In addition to the above exemptions, shipments via highway carriers are exempt from Part 177 of this subchapter, except § 177.817.

(1) Each fire extinguisher must be shipped as an inside packaging.

(2) Each fire extinguisher must have contents which are not flammable, poisonous, or corrosive as defined under this part.

(3) Each fire extinguisher under stored pressure may not have an internal volume exceeding 1,100 cubic inches. For fire extinguishers not exceeding 35 cubic inches capacity, the liquid portion of the gas plus any additional liquid or solid must not completely fill the container at 130°F. Fire extinguishers exceeding 35 cubic inches capacity may not contain any liquefied compressed gas.

(4) Each fire extinguisher must be designed and fabricated with a burst pressure of not less than six times its charged pressure at 70°F. when shipped.

(5) Each fire extinguisher must be tested, without evidence of failure or damage, to at least three times its charged pressure at 70°F. but not less than 120 p.s.i.g. before initial shipment. For any subsequent shipment, each fire extinguisher must be in compliance with the retest requirements of the Occupational Safety and Health Administration regulations of the Department of Labor, 29 CFR 1910.157(d), and

(6) Each fire extinguisher manufactured after January 31, 1975 and filled and shipped under this paragraph must be legibly and durably marked "This extinguisher meets all requirements of 49 CFR 173.306(c)."

(7) When specification 2P or 2Q packagings are used, paragraphs (c)(4)

V 39 I 95 MAY 15 74 XUM

through (6) of this section are not applicable provided each packaging meets the requirements of paragraph (a)(3) of this section.

• • • • • •

57. In § 173.314, paragraph (c), Table Note 8 is amended to read as follows:

§ 173.314 Requirements for compressed gases in tank cars.

• • • • •

(c) • • •

NOTE 8: Each tank must be equipped with adequate safety relief devices of the fusible plug type having a yield temperature not over 170° F., nor less than 157° F. Each device must be resistant to extrusion of the fusible alloy and leak tight at 130° F. Each valve outlet must be sealed by a threaded cap or a threaded solid plug. In addition, all valves must be protected by a metal cover.

• • • • • •

58. In § 173.346, paragraphs (a)(5) and (a)(6) are deleted as follows:

§ 173.346 Poisonous liquids not specifically provided for.

(a) • • •

(5) [Deleted.]

(6) [Deleted.]

• • • • • •

59. In § 173.351, paragraph (a)(2) is deleted as follows:

§ 173.351 Hydrocyanic acid solutions.

(a) • • •

(2) [Deleted.]

60. In § 173.360, paragraph (a)(1) is deleted as follows:

§ 173.360 Perchloro-methyl-mercaptan.

(a) • • •

(1) [Deleted.]

• • • • • •

61. In § 173.365, paragraphs (a)(4) and Note 1, and (a)(5) are deleted as follows:

§ 173.365 Poisonous solids not specifically provided for.

(a) • • •

(4) [Deleted.]

NOTE 1: [Deleted.]

(5) [Deleted.]

• • • • • •

62. In § 173.366, paragraph (a)(2) is deleted as follows:

§ 173.366 Arsenic (arsenic trioxide) or arsenic acid (solid).

(a) • • •

(2) [Deleted.]

• • • • • •

63. In § 173.367, Note 1 following paragraph (a)(1) is deleted as follows:

§ 173.367 Arsenical compounds n.o.s., arsenate of lead, calcium arsenate, Paris green, and arsenical mixtures.

(a) • • •

(1) • • •

NOTE 1: [Deleted.]

• • • • • •

64. In § 173.369, paragraphs (a)(2) and (a)(3) are deleted as follows:

§ 173.369 Carbolic acid (phenol), not liquid.

(a) • • •

(2) [Deleted.]

(3) [Deleted.]

• • • • • •

65. In § 173.370, paragraph (a)(2) is deleted as follows:

§ 173.370 Cyanides, or cyanides mixtures, except cyanides of calcium and mixtures thereof.

(a) • • •

(2) [Deleted.]

• • • • • •

66. In § 173.371, paragraph (a)(2) is deleted as follows:

§ 173.371 Dinitrobenzol.

(a) • • •

(2) [Deleted.]

67. In § 173.373, paragraph (a)(2) is deleted as follows:

§ 173.373 Ortho-nitroaniline and paranitraniline.

(a) • • •

(2) [Deleted.]

• • • • • •

PART 174—CARRIERS BY RAIL FREIGHT

In § 174.534, paragraph (c) is added to read as follows:

§ 174.534 Portable containers or tanks.

• • • • • •

(c) Specifications 52, 53, 56, and 57 (§§ 178.251, 178.252, 178.253 of this subchapter) portable tanks must be shipped only in a rail car that provides specific facilities for bracing and tie down of these tanks. If TOFC or COFC service is utilized, tanks must be secured in trailer bodies in compliance with Bureau of Explosives' Pamphlet 6C.

PART 178—SHIPPING CONTAINER SPECIFICATIONS

1. In Part 178 Table of Contents, §§ 178.155, 178.157, 178.160, and 178.161 are deleted.

§ 178.155 [Deleted].

2. § 178.155 is deleted.

§ 178.157 [Deleted].

3. § 178.157 is deleted.

§ 178.160 [Deleted].

4. § 178.160 is deleted.

§ 178.161 [Deleted].

5. § 178.161 is deleted.

6. In § 178.245–1, paragraph (c) is amended as follows:

§ 178.245 Specification 51; steel portable tanks.

§ 178.245–1 Requirements for design and construction.

• • • • • •

(c) Each uninsulated tank used for the transportation of compressed gas, as defined in § 173.300 of this subchapter, must have an exterior surface finish that is significantly reflective such as a light reflecting color if painted, or a bright reflective metal or other material if unpainted.

PART 179—SPECIFICATIONS FOR TANK CARS

In § 179.302 paragraph (a), the table is amended; footnote 7 is added to read as follows:

§ 179.302 Special commodity requirements for multi-unit tank car tanks.

(a) • • •

Commodity	Safety relief device	Valve protective housing	Miscellaneous
(Change)			
Hydrogen sulfide	Fusible plugs required [7].	Required [8]	(7)

[7] Safety relief devices for hydrogen sulfide must be of the fusible plug type utilizing a fusible alloy with yield temperature not over 170° F., nor less than 157° F. Each device must be resistant to extrusion of the fusible alloy and leak tight at 130° F.

This amendment is effective January 31, 1974. However, immediate compliance with the regulations, as amended herein, is authorized.

(Transportation of Explosives Act (18 U.S.C. 831–835), section 6 of the Department of Transportation Act (49 U.S.C. 1655); Title VI and section 902(h) of the Federal Aviation Act of 1958 (49 U.S.C. 1421–1430, 1472(h), and 1655(c)).

This is one of four signature pages in Docket No. HM–106; Amendment Nos. 172–26, 173–81, 174–22, 178–33, 179–13, Shipment of Hazardous Materials. Signature pages have been submitted to the Board Members for the Federal Highway Administration, the Federal Railroad Administration, and the United States Coast Guard.

Issued in Washington, D.C. on May 9, 1974.

C. R. MELUGIN, JR.,
Alternate Board Member for the Federal Aviation Administration.

ROBERT A. KAYE,
Board Member for the Federal Highway Administration.

MAC E. ROGERS,
Board Member for the Federal Railroad Administration.

W. F. REA III,
Rear Admiral, Board Member for the United States Coast Guard.

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73–9; Notice 5]

PART 570—VEHICLE IN USE INSPECTION STANDARDS

Response to Petitions for Reconsideration; Correction

In FR Doc. 74–7966, appearing at page 12867 in the issue of April 9, 1974, the following corrections are made:

1. In the second paragraph of the preamble, the FEDERAL REGISTER citation for the Vehicle In Use Inspection Standard is amended to read: "38 FR 23949."

2. Section 570.5(b)(1) is revised to read:

§ 570.5 Service brake system.

• • • • •

(b) • • •

(1) *Inspection procedures.* With the engine running on vehicles equipped with power brake systems, and the ignition turned to "on" in other vehicles, apply a force of 125 pounds to the brake pedal and hold for 10 seconds. Note any decrease in pedal height, and whether the lamp illuminates.

• • • • •

3. Amendment "5." concerning § 570.10(b), should read "4."

(Sec. 103, 108, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1397, 1401); delegation of authority at 49 CFR 1.51)

Issued on May 8, 1974.

GENE G. MANNELLA,
Acting Administrator.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S. O. 1184]

PART 1033—CAR SERVICE

Central Iowa Railway Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 10th day of May 1974.

It appearing, that, in Finance Docket No. 27637, the Central Iowa Railway Company (CIRC) was authorized to acquire and operate a line of railroad abandoned by the Chicago, Rock Island and Pacific Railroad Company (RI), extending from a connection with the RI at Hills, Iowa, to Montezuma, Iowa; that the purchase agreement between the CIRC and the RI provided for operation of the CIRC over tracks of the RI between Hills, Iowa, and Iowa City, Iowa; that an agreement governing such operations by the CIRC over the RI is being negotiated; that the RI has consented to use of its line between Hills and Iowa City by the CIRC pending disposition of the application; that operation over the aforementioned tracks of the RI by the CIRC is necessary to provide uninterrupted railroad service to shippers served by this line in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1184 Service Order No. 1184.

(a) *Central Iowa Railway Company authorized to operate over tracks of Chicago, Rock Island and Pacific Railroad Company.* The Central Iowa Railway Company (CIRC) be, and it is hereby, authorized to operate over tracks of the Chicago, Rock Island and Pacific Railroad Company (RI) between Iowa City, Iowa, and Hills, Iowa, a distance of approximately 7.73 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) Nothing herein shall be considered as a pre-judgment of the application of the CIRC seeking permanent authority to operate over this line.

(d) *Effective date.* This order shall become effective at 11:59 p.m., May 10, 1974.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., October 31, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; (49 U.S.C. 1, 12, 15, 17(2)). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; (49 U.S.C. 1(10–17), 15(4), 17(2)))

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.74–11206 Filed 5–14–74;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Certain Wildlife Refuges in Montana

The following special regulations are issued and are effective on May 15, 1974.

§ 33.5 Special regulations; sport fishing, for individual wildlife refuge areas.

MONTANA

NATIONAL BISON RANGE

Sport fishing on the National Bison Range, Moiese, Montana, is only permitted along the portions of the Jocko River as posted. These open areas are delineated on maps available at refuge headquarters, one-half mile east of Moiese, Montana. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1974.

NINEPIPE NATIONAL WILDLIFE REFUGE

(HEADQUARTERS NATIONAL BISON RANGE, MOIESE, MONTANA)

Sport fishing is permitted in accordance with special regulations. Entire refuge is open from July 15, until beginning of waterfowl hunting season, and before July 15, on west and north shore lines from picnic area to Allentown bridge, except central portion of north shore (nine-tenths of a mile), as posted. Entire refuge is closed during migratory waterfowl hunting season. Ice fishing is permitted after the closure of waterfowl hunting season until March 1. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1974.

Special Regulations: Ninepipe National Wildlife Refuge

1. Off shore islands are closed to fishing and trespass.
2. Use of boats is prohibited.
3. Vehicles must be parked at designated areas.
4. Motorized travel on the ice is prohibited.
5. No ice fishing shelters may be left overnight.

PABLO NATIONAL WILDLIFE REFUGE

(HEADQUARTERS NATIONAL BISON RANGE, MOIESE, MONTANA)

Sport fishing is closed on Pablo Reservoir during the migratory waterfowl hunting season. It is open during the balance of the year, in accordance with special regulations, on the north and east shore lines from inlet canal to south end of dam as posted. Ice fishing is permitted after the closing of the waterfowl hunting season. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth, in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1974.

Special Regulations: Pablo National Wildlife Refuge

1. Off shore islands are closed to fishing and trespass.
2. Use of boats is prohibited.
3. Vehicles must be parked at designated areas.

V 39 I 95 MAY 15 74 XUM

4. Motorized travel on the ice is prohibited.

5. No ice fishing shelters may be left overnight.

(HEADQUARTERS NATIONAL BISON RANGE, MOIESE, MONTANA)

Sport fishing is permitted north end of Flathead Lake within the boundaries of the Waterfowl Production Area. Fishing from shore is prohibited from March 1, to July 1. All islands at the mouth of Flathead River are closed to trespass except during the waterfowl hunting season. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1974.

Special Regulations: Northwest Montana Waterfowl Production Areas

1. Vehicle travel is permitted only on designated roads and parking areas.

MARVIN R. KASCHKE,
Refuge Manager, National Bison, Range, Moiese, Mont.

APRIL 15, 1974.

[FR Doc.74-11192 Filed 5-14-74;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

INCOME TAX

Income Subject to Foreign Community Property Laws

Notice is hereby given that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing (preferably six copies) to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by June 14, 1974. Written comments or suggestions which are not exempt from disclosure by the Internal Revenue Service may be inspected by any person upon compliance with 26 CFR 601.702(d)(9). The provisions of 26 CFR 601.601(b) shall apply with respect to the designation of portions of comments or suggestions as exempt from disclosure. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner by June 14, 1974. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER, unless the person or persons who have requested a hearing withdraw their requests for a hearing before notice of the hearing has been filed with the Office of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917 (26 U.S.C. 7805)).

[SEAL] DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

This document contains proposed amendments to conform the Income Tax Regulations (26 CFR Part 1) to section 981 of the Internal Revenue Code of 1954, relating to election as to the treatment of income subject to foreign community property laws, as added by section 105(e) of the Foreign Investors Tax Act of 1966 (80 Stat. 1565).

Section 981(a) provides that for any taxable year beginning after December 31, 1966, an individual who is (1) a citizen of the United States, (2) a bona fide resident of a foreign country or countries during the entire taxable year, and (3) married at the close of the taxable year to an individual who is a nonresident alien during the entire taxable year may, together with his spouse, elect for such year to treat the income which is community income under the community property laws of any foreign country in the special manner provided by section 981(b).

Section 981(b) contains special rules for dividing the community income between the husband and wife in the case of earned income, trade or business income, community income derived from the separate property of the respective spouses, and all other community income.

Section 981(c)(1) provides that an individual who was a citizen of the United States and married at the close of any taxable year beginning before January 1, 1967, to an individual who was a nonresident alien during the entire taxable year may, together with his spouse, elect, for all open taxable years beginning before January 1, 1967, for which such conditions are satisfied to have the special rules of section 981(c)(2) apply to their community income under foreign community property laws. These rules for treating the community income are generally the same as those prescribed by section 981(b) except that the community income (other than earned income, trade or business income, or community income derived from separate property) is treated as the income of the spouse who had the greater amount of gross income, determined by adding to the separate gross income the amount attributed to such spouse under section 981(b) in the case of earned income, trade or business income, and community income derived from separate property. Under conditions described in section 981(d)(3) the nonresident alien spouse is not required to join in the election under section 981(c)(1).

Either the election for post-1966 years or the election for pre-1967 years can be made for any year, at any time, so long as the year is still open. An election may be made for an open taxable year even though no return was filed for that year. If the election is exercised for any post-1966 year, the treatment provided by section 981(b) applies not only to the year of election but also to all subsequent years which are open; and, if it is made for pre-1967 years, section 981(c)(2) applies for all open years beginning before January 1, 1967. An election in respect of a pre-1967 year is not considered effective for any post-1966 year. An election for a post-1966 year is binding and may be terminated only with consent of the Director of International Operations. An election for a pre-1967 year is binding and may not be revoked. Either election is to be made by filing with the Director of International Operations a return, an amended return, or a claim for refund, accompanied by certain prescribed information.

In order to conform the Income Tax Regulations to such changes, the regulations are hereby amended as follows:

1. Section 1.911 is amended by revising subsections (c)(1)(B) and (d) of section 911 and the historical note to read as follows:

§ 1.911 Statutory provisions; earned income from sources without the United States.

SEC. 911. *Earned income from sources without the United States.* • • •

(c) *Special rules.* • • •

(1) *Limitations on amount of exclusion.* • • •

(B) $25,000 in the case of an individual who qualifies under subsection (a)(1), but only with respect to that portion of such taxable year occurring after such individual has been a bona fide resident of a foreign country or countries for an uninterrupted period of 3 consecutive years.

• • • • • •

(d) *Cross references.* (1) For administrative and penal provisions relating to the exclusion provided for in this section, see sections 6001, 6011, 6012(c), and the other provisions of subtitle F.

(2) For elections as to treatment of income subject to foreign community property laws, see section 981.

[Sec. 911 as amended by sec. 72(b), Technical Amendments Act 1958 (72 Stat. 1660); sec. 11(a), Rev. Act 1962 (76 Stat. 1003); sec. 237(a), Rev. Act 1964 (78 Stat. 128); sec. 105(e)(3), Foreign Investors Tax Act 1966 (80 Stat. 1567)]

2. The following new sections are added immediately after § 1.972-1:

§ 1.981 Statutory provision; election as to treatment of income subject to foreign community property laws.

SEC. 981. *Election as to treatment of income subject to foreign community property laws*—(a) *General rule.* In the case of any taxable year beginning after December 31, 1966, if—

(1) An individual is (A) a citizen of the United States, (B) a bona fide resident of a foreign country or countries during the entire taxable year, and (C) married at the close of the taxable year to a spouse who is a nonresident alien during the entire taxable year, and

V 39 I 95 MAY 15 74 XUM

(2) Such individual and his spouse elect to have subsection (b) apply to their community income under foreign community property laws, then subsection (b) shall apply to such income of such individual and such spouse for the taxable year and for all subsequent taxable years for which the requirements of paragraph (1) are met, unless the Secretary or his delegate consents to a termination of the election.

(b) *Treatment of community income.* For any taxable year to which an election made under subsection (a) applies, the community income under foreign community property laws of the husband and wife making the election shall be treated as follows:

(1) Earned income (within the meaning of the first sentence of section 911(b)), other than trade or business income and a partner's distributive share of partnership income, shall be treated as the income of the spouse who rendered the personal services.

(2) Trade or business income, and a partner's distributive share of partnership income, shall be treated as provided in section 1402(a)(5).

(3) Community income not described in paragraph (1) or (2) which is derived from the separate property (as determined under the applicable foreign community property law) of one spouse shall be treated as the income of such spouse.

(4) All other such community income shall be treated as provided in the applicable foreign community property law.

(c) *Election for pre-1967 years*—(1) *Election.* If an individual meets the requirements of subsections (a)(1)(A) and (C) for any taxable year beginning before January 1, 1967, and if such individual and the spouse referred to in subsection (a)(1)(C) elect under this subsection, then paragraph (2) of this subsection shall apply to their community income under foreign community property laws for all open taxable years beginning before January 1, 1967 (whether under this chapter, the corresponding provisions of the Internal Revenue Code of 1939, or the corresponding provisions of prior revenue laws), for which the requirements of subsection (a)(1)(A) and (C) are met.

(2) *Effect of election.* For any taxable year to which an election made under this subsection applies, the community income under foreign community property laws of the husband and wife making the election shall be treated as provided by subsection (b), except that the other community income described in paragraph (4) of subsection (b) shall be treated as the income of the spouse who, for such taxable year, had gross income under paragraphs (1), (2), and (3) of subsection (b), plus separate gross income, greater than that of the other spouse.

(d) *Time for making elections; period of limitations; etc.*—(1) *Time.* An election under subsection (a) or (c) for a taxable year may be made at any time while such year is still open, and shall be made in such manner as the Secretary or his delegate shall by regulations prescribe.

(2) *Extension of period for assessing deficiencies and making refunds.* If any taxable year to which an election under subsection (a) or (c) applies is open at the time such election is made, the period for assessing a deficiency against, and the period for filing claim for credit or refund of any overpayment by, the husband and wife for such taxable year, to the extent such deficiency or overpayment is attributable to such an election, shall not expire before 1 year after the date of such election.

(3) *Alien spouse need not join in subsection (c) election in certain cases.* If the Secretary or his delegate determines—

(A) That an election under subsection (c) would not affect the liability for Federal income tax of the spouse referred to in subsection (a)(1)(C) for any taxable year, or

(B) That the effect on such liability for tax cannot be ascertained and that to deny the election to the citizen of the United States would be inequitable and cause undue harship,

such spouse shall not be required to join in such election, and paragraph (2) of this subsection shall not apply with respect to such spouse.

(4) *Interest.* To the extent that any overpayment or deficiency for a taxable year is attributable to an election made under this section, no interest shall be allowed or paid for any period before the day which is 1 year after the date of such election.

(e) *Definitions and special rules.* For purposes of this section—

(1) *Deductions.* Deductions shall be treated in a manner consistent with the manner provided by this section for the income to which they relate.

(2) *Open years.* A taxable year of a citizen of the United States and his spouse shall be treated as "open" if the period for assessing a deficiency against such citizen for such year has not expired before the date of the election under subsection (a) or (c), as the case may be.

(3) *Elections in case of decedents.* If a husband or wife is deceased his election under this section may be made by his executor, administrator, or other person charged with his property.

(4) *Death of spouse during taxable year.* In applying subsection (a)(1)(C), and in determining under subsection (c)(2) which spouse has the greater income for a taxable year, if a husband or wife dies the taxable year of the surviving spouse shall be treated as ending on the date of such death.

[Sec. 981 as added by sec. 105(e)(1), Foreign Investors Tax Act 1966 (80 Stat. 1565)]

§ 1.981–1 Foreign law community income for taxable years beginning after December 31, 1966.

(a) *Election for special treatment*—(1) *In general.* An individual citizen of the United States who meets the requirements of section 981(a)(1) and subparagraph (2) of this paragraph for any open taxable year beginning after December 31, 1966, may make a binding election with his nonresident alien spouse to have section 981(b) and paragraph (b) of this section apply to their income for such year which is treated as community income under the applicable community property laws of a foreign country or countries. Generally, the community property laws of a foreign country operate upon land situated within its jurisdiction and upon personal property owned by spouses domiciled therein. If the election is made for any taxable year, it shall also apply for all subsequent open taxable years of such citizen and his nonresident alien spouse for which all the requirements of section 981(a)(1) and subparagaraph (2) of this paragraph are met, unless the Director of International Operations consents, in accordance with paragraph (c)(2) of this section, to a termination of the election. An election under section 981(a) and this section has no effect for any taxable year beginning before January 1, 1967, for which a separate election, if made, must be made under section 981(c)(1) and § 1.981–2. For the definition of "open taxable year" see section 981(e)(2) and paragraph (a) of § 1.981–3. If the citizen and his nonresident alien spouse have different taxable years, see paragraph (c) of § 1.981–3. If one of the spouses is deceased, see paragraph (d) of § 1.981–3.

(2) *Requirements to be met.* In order for a U.S. citizen and his nonresident alien spouse to make an election under section 981(a) and this section for any taxable year and in order for the election to apply for any subsequent taxable year it is required under section 981(a)(1) that, for each such taxable year, such citizen be (i) a citizen of the United States, (ii) a bona fide resident of a foreign country or countries during the entire taxable year, and (iii) married at the close of the taxable year to an individual who is (*a*) a nonresident alien during the entire taxable year and (*b*), in the case of any such subsequent taxable year, the same nonresident alien individual to whom the citizen was married at the close of the earliest of such taxable years. If either spouse dies during a taxable year, the taxable year of the surviving spouse shall be treated, solely for purposes of making the determination under subdivision (iii) of this subparagraph, as ending on the date of such death. A citizen of the United States shall be considered as not married at the close of his taxable year if he is legally separated from his spouse under a decree of divorce or of separate maintenance. However, the mere fact that spouses have not lived together during the course of the taxable year shall not cause them to be considered as not married at the close of the taxable year. A husband and wife who are separated under an interlocutory decree of divorce retain the relationship of husband and wife until the decree becomes final.

(3) *Determination of residence.* The principles of paragraphs (a)(2) and (b)(7) of § 1.911–1 shall apply in order to determine for purposes of this paragraph whether a U.S. citizen is a bona fide resident of a foreign country or countries during the entire taxable year. The principles of § 1.871–2 through § 1.871–5 shall apply in order to determine whether the alien spouse of a U.S. citizen is a nonresident during the entire taxable year.

(4) *Manner of electing.* The election under section 981(a) and this section shall be made in accordance with the applicable rules set forth in paragraph (c) of this section.

(b) *Treatment of community income*—(1) *In general.* Community income for any taxable year to which an election under section 981(a) and this section applies, and the deductions properly allocable to such income, shall be divided between the electing U.S. citizen and nonresident alien spouses in accordance with the rules set forth in section 981(b) and subparagraphs (2) through (8) of this paragraph. Community income for this purpose means all gross income, whether derived from sources within or without the United States, which is treated as community income of the spouses under the community property laws of the foreign country having jurisdiction to determine the legal ownership of the income. A spouse has ownership of the income for this purpose if under the applicable foreign law he has a proprietary vested interest in the income.

(2) *Earned income.* Wages, salaries, or professional fees, and other amounts received as compensation for personal services actually performed, which are community income for the taxable year, shall be treated as the income of the spouse who actually performed the personal services. This subparagraph does not apply, however, to community income (i) derived from any trade or business carried on by the husband or the wife, (ii) attributable to a spouse's distributive share of the income of a partnership to which subparagraph (4) of this paragraph applies, (iii) consisting of compensation for personal services rendered to a corporation which represents a distribution of the earnings and profits of the corporation rather than a reasonable allowance as compensation for the personal services actually performed, or (iv) derived from property which is acquired as consideration for personal services performed.

(3) *Trade or business income.* If any income derived from a trade or business carried on by the husband or wife is community income for the taxable year, all of the gross income, and the deductions attributable to such income, shall be treated as the gross income and deductions of the husband unless the wife exercises substantially all of the management and control of the trade or business, in which case all of the gross income and deductions shall be treated as the gross income and deductions of the wife. This subparagraph does not apply to any income derived from a trade or business carried on by a partnership of which both or one of the spouses is a member. For purposes of this subparagraph, income derived from a trade or business includes any income derived from a trade or business in which both personal services and capital are material income producing factors. The term "management and control" means management and control in fact, not the management and control imputed to the husband under the community property laws of a foreign country. For example, a wife who operates a beauty parlor without any appreciable collaboration on the part of a husband is considered as having substantially all of the management and control of the business despite the provisions of any community property laws of a foreign country vesting in the husband the right of management and control of community property; and the income and deductions attributable to the operation of the beauty parlor are considered the income and deductions of the wife. See paragraph (a) of § 1.1402(a)–8.

(4) *Partnership income.* If any portion of a spouse's distributive share of the income of a partnership of which such spouse is a member is community income for the taxable year, all of that distributive share shall be treated as the income of that spouse and shall not be taken into account in determining the income of the other spouse. If both spouses are members of the same partnership, the distributive share of the income of each spouse which is community income shall be treated as the income of that spouse. See paragraph (b) of § 1.1402(a)–8. A spouse's distributive share of such income of a partnership shall be determined as provided in section 704, and the regulations thereunder.

(5) *Income from separate property.* Any community income for the taxable year, other than income described in section 981(b)(1) or (2) and subparagraph (2), (3), or (4) of this paragraph, which is derived from the separate property of one of the spouses shall be treated as the income of that spouse. The determination of what property is separate property for this purpose shall be made in accordance with the laws of the foreign country which, in accordance with subparagraph (1) of this paragraph, has jurisdiction to determine that the income from such property is community income.

(6) *Other community income.* Any community income for the taxable year, other than income described in section 981(b)(1), (2), or (3), and subparagraph (2), (3), (4), or (5) of this paragraph, shall be treated as the income of that spouse who has a proprietary vested interest in that income under the laws of the foreign country which, in accordance with subparagraph (1) of this paragraph, has jurisdiction to determine that such income is community income. Thus, for example, this subparagraph applies to community income not described in subparagraph (2), (3), (4), or (5) of this paragraph which consists of dividends, interest, rents, royalties, or gains, from community property or of the earnings of unemancipated minor children.

(7) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example (1). H, a nonresident alien individual and W, a U.S. citizen, each of whose taxable years is the calendar year, were married throughout 1967. H and W were residents of, and domiciled in, foreign country Z during the entire taxable year. During 1967, H earned $10,000 from the performance of personal services as an employee. H also received $500 in dividend income from stock which under the community property laws of country Z is considered to be the separate property of H. W had no separate income for 1967. Under the community property laws of country Z all income earned by either spouse is considered to be community income, and one-half of such income is considered to belong to the other spouse. In addition, such laws of country Z provide that all income derived from property held sepately by either spouse is to be treated as community income and treated as belonging one-half to each spouse. Thus, under the community property laws of country Z, H and W are both considered to have realized income of $5,250 during 1967, even though such laws recognize the stock as the separate property of H. If the election under this section is in effect for 1967, under the rules of subparagraphs (2) and (5) of this paragraph all of the income of $10,000 derived during 1967 shall be treated, for U.S. income tax purposes, as the income of H.

Example (2). The facts are the same as in example (1) except that H is the sole proprietor of a retail merchandising company and such company has a $10,000 profit during 1967. W exercises no management and control over the business. In addition, H is a partner in a wholesale distributing company, and his distributive share of the partnership profit is $5,000. Both of these amounts of income are treated as community income under the community property laws of country Z, and under such laws both H and W are treated as realizing $7,500 of such income. If the election under this section is in effect for 1967, under the rule of subparagraphs (3) and (4) of this paragraph all $15,000 of such income shall be treated as the income of H for U.S. income tax purposes.

Example (3). The facts are the same as in example (1) except that H also received $1,000 in dividends on stock held separately in his name. Under the community property laws of country Z the stock is considered to be community property; and the dividends, to be community income, one-half of such income being treated as the income of each spouse. If the election under this section is in effect for 1967, under the rule of subparagraph (6) of this paragraph, $500 of the dividend income shall be treated, for U.S. income tax purposes, as the income of each spouse.

(c) *Time and manner of making or terminating an election*—(1) *In general.* A citizen of the United States and his nonresident alien spouse shall, for the first taxable year beginning after December 31, 1966, for which an election under section 981(a) and this section is to apply, make the election by filing a return, an amended return, or a claim for refund, whichever is proper, for such taxable year and attaching thereto a statement that the election is being made and that the requirements of paragraph (a)(2) of this section are met for such taxable year. The statement must show the name, address, and account number, if any, of each spouse, the name and address of the executor, administrator, or other person making the election for a deceased spouse, the taxable year to which the election applies, and the name

V 39 I 95 MAY 15 74 XUM

of the foreign country or countries having jurisdiction to determine the ownership of any income being treated in accordance with section 981(b) and paragraph (b) of this section. The statement must be signed by both persons making the election. Copies of any relevant community property laws of such foreign country or countries must also be submitted with the election, except that, if such laws are not in the English language, properly authenticated translations of such laws must be submitted. An election under this section may be made only for a taxable year which, on the date of the election, as defined in paragraph (b) of § 1.981–3, is open within the meaning of section 981(e)(2) and paragraph (a) of § 1.981–3.

(2) *Termination only with consent of Director of International Operations*—(i) *In general.* An election under this section for any taxable year is binding and may not be revoked. The election shall also remain in effect for all subsequent taxable years of the spouses for which the requirements of paragraph (a)(2) of this section are met and which on the date of the election are open, within the meaning of paragraph (a) of § 1.981–3, unless the election is terminated for any such subsequent taxable year or years in accordance with subdivision (ii) of this subparagraph. Any return, amended return, or claim for refund in respect of any such subsequent taxable year for which the election is in effect shall have attached thereto a copy of the statement filed in accordance with subparagraph (1) of this paragraph and an additional signed statement that for such subsequent taxable year the requirements of paragraph (a)(2) of this section are met.

(ii) *Written request to terminate required.* A request to terminate an election under this section for a subsequent taxable year or years shall be made in writing by the persons who made the election and shall be addressed to the Director of International Operations, Internal Revenue Service, Washington, D.C. 20225. The request must include the name, address, and account number, if any, of each spouse and must be signed by the persons making the request. It must specify the taxable year or years for which the termination is to be effective and the grounds which justify the termination. The request shall be filed not later than 90 days before the close of the period for assessing a deficiency against the U.S. citizen for the earliest taxable year of such citizen for which the termination is to be effective. The Director of International Operations may require such other information as may be necessary in order to determine whether the termination will be permitted. A copy of the consent by the Director of International Operations to terminate must be attached to an amended income tax return for each taxable year for which the termination is effective and for which a return has previously been filed.

§1.981–2 Foreign law community income for taxable years beginning before January 1, 1967.

(a) *Election for special treatment*—(1) *In general.* For all open taxable years beginning before January 1, 1967, for which an individual citizen of the United States meets the requirements of subparagraphs (A) and (C) of section 981(a)(1) and subparagraph (2) of this paragraph, such citizen and his nonresident alien spouse may make a joint election to have section 981(c)(2) and paragraph (b) of this section apply to their income which is treated as community income under the applicable community property laws of a foreign country or countries. However, if the conditions prescribed by section 981(d)(3) and subparagraph (3) of this paragraph are met, the nonresident alien spouse is not required to join in the election and such citizen may make a separate election to have section 981(c)(2) and paragraph (b) of this section apply to such income for such taxable years. An election under section 981(c)(1) and this section shall apply to every open taxable year of such citizen and his nonresident alien spouse beginning before January 1, 1967, for which all the requirements of subparagraphs (A) and (C) of section 981(a)(1) and subparagraph (2) of this paragraph are met. It is immaterial whether such open taxable year is a taxable year subject to the provisions of the 1954 Code, the 1939 Code, or any other internal revenue law in effect before the 1939 Code. An election under section 981(c)(1) and this section has no effect for any taxable year beginning after December 31, 1966. For the definition of "open taxable year" see section 981(e)(2) and paragraph (a) of § 1.981–3. If the citizen and his nonresident alien spouse have different taxable years, see paragraph (c) of § 1.981–3. If one of the spouses is deceased, see paragraph (d) of § 1.981–3. An election under section 981(c)(1) and this section is binding and may not be revoked.

(2) *Requirements to be met.* In order for the citizen of the United States to make an election under this section, whether required to be made jointly with his nonresident alien spouse or permitted to be made separately, it is required under section 981(c)(1) that, for each taxable year to which the election applies, the citizen making the election be (i) a citizen of the United States and (ii) married at the close of the taxable year to an individual who is (a) a nonresident alien during the entire taxable year and (b), in the case of any such taxable years subsequent to the first, the same nonresident alien individual to whom the citizen was married at the close of such first taxable year. The provisions of paragraph (a)(2) of § 1.981–1 apply to determine whether a U.S. citizen making an election under section 981(c)(1) and this section is married at the close of a taxable year to an individual who is a nonresident alien during the entire taxable year.

(3) *Cases where joint election is not required.* A nonresident alien spouse is not required to join in an election under section 981(c)(1) and this section if the Director of International Operations determines in accordance with paragraph (c)(4) of this section—

(i) That an election under section 981(c)(1) and this section would not affect the liability for Federal income tax of the nonresident alien spouse for any taxable year, whether beginning on, before, or after January 1, 1967, or

(ii) That the effect of the election on the liability of the nonresident alien spouse for Federal income tax for any such taxable year cannot be ascertained and that to deny the election to the U.S. citizen spouse would be inequitable and cause undue hardship to the U.S. citizen.

If in accordance with this subparagraph the nonresident alien spouse is not required to join in the election by the U.S. citizen, the provisions of section 981(d)(2) and paragraph (e) of § 1.981–3 shall not apply so as to extend the period for assessing deficiencies or filing a claim for credit or refund for any taxable year of the nonresident alien spouse.

(4) *Manner of electing.* The election under section 981(c)(1) and this section shall be made in accordance with the applicable rules set forth in paragraph (c) of this section.

(b) *Treatment of community income*—(1) *In general.* Community income, as defined in paragraph (b)(1) of § 1.981–1, for any taxable year beginning before January 1, 1967, to which an election under section 981(c)(1) and this section applies, and the deductions properly allocable to such income, shall be divided between the U.S. citizen and his nonresident alien spouse in accordance with the rules set forth in section 981(c)(2) and subparagraphs (2) and (3) of this paragraph. The income shall be divided in such manner even though the nonresident alien spouse is not required, in accordance with paragraph (a)(3) of this section, to join in the election by the U.S. citizen.

(2) *Earned income, business income, partnership income, and income from separate property.* All community income for any taxable year to which this paragraph applies which is treated as the income of one of the spouses in accordance with section 981(b)(1), (2), or (3) and paragraph (b)(2), (3), (4), or (5) of § 1.981–1 shall be treated as the income of that spouse for purposes of this paragraph.

(3) *Other community income.* All community income for any taxable year to which this paragraph applies, other than income described in subparagraph (2) of this paragraph, shall be treated as the income of the spouse who, for such taxable year, has a greater amount of gross income than the other spouse, determined by adding to the amount of gross income which is treated as the gross income of that spouse in accordance with subparagraph (2) of this paragraph the amount of the gross income

for the taxable year which is treated as the separate income of that spouse under the community property laws of the foreign country having jurisdiction to determine the legal ownership of the income. If either spouse dies during a taxable year, the taxable year of the surviving spouse shall be treated as ending on the date of such death for the purpose of determining which spouse has the greater amount of gross income for such taxable year. Moreover, if the U.S. citizen and his nonresident alien spouse do not have the same taxable year, as defined in section 441(b) and the regulations thereunder, the periods for which the amounts of gross income are to be compared under this subparagraph are (i) the taxable year of the citizen and (ii) that period falling within the consecutive taxable years of the nonresident alien spouse which coincides with the period covered by such taxable year of the citizen. See paragraph (c) of § 1.981–3.

(c) *Time and manner of making election*—(1) *In general.* A citizen of the United States and his nonresident alien spouse or, if subparagraph (4) of this paragraph applies, such citizen alone may make an election under section 981(c)(1) and this section at any time on or after November 13, 1966, for each and every taxable year beginning before January 1, 1967, which on the date of the election, as defined in paragraph (b) of § 1.981–3, is open within the meaning of section 981(e)(2) and paragraph (a) of § 1.981–3. The election shall be made by filing a return, an amended return, or a claim for refund, whichever is proper, for each taxable year to which the election applies and attaching thereto a statement that the election is being made and that the requirements of paragraph (a)(2) of this section are met for each such taxable year. The statement must also show the information required by subparagraph (2) of this paragraph and must, where applicable, be signed by both persons making the election. Copies of the foreign community property laws which are being applied must also be submitted with the election, except that, if such laws are not in the English language, properly authenticated translations of such laws must be submitted.

(2) *Information required.* The statement described in subparagraph (1) of this paragraph must show—

(i) The name, address, and account number, if any, of each spouse,

(ii) The name and address of the executor, administrator, or other person making the election for a deceased spouse,

(iii) The taxable years to which the election applies,

(iv) The office of the district director, or the service center, where the return or returns, if any, for such taxable year or years were filed,

(v) The dates on which such return or returns, if any, were filed and on which the tax for such taxable year or years was paid, if the tax has been paid, and

(vi) The name of the foreign country or countries having jurisdiction to determine the ownership of any income being treated in accordance with section 981(c)(2) and paragraph (b) of this section.

(3) *Place for filing.* Any return, amended return, or claim for refund filed under subparagraph (1) of this paragraph in respect of any taxable year shall be filed with the Director of International Operations, Internal Revenue Service, Washington, D.C. 20225. (See § 1.6091–3.)

(4) *Determination that joint election is not required.* A U.S. citizen spouse entitled to make an election under section 981(c)(1) and this section for open taxable years beginning before January 1, 1967, may apply to the Director of International Operations for a determination under section 981(d)(3) that the nonresident alien spouse is not required to join in the election by such citizen. This application shall be made by filing with the Director of International Operations, Internal Revenue Service, Washington, D.C. 20225, a statement setting forth the same information required by subparagraph (2) of this paragraph and such other information as is required by the Director of International Operations to justify a claim that the requirements of section 981(d)(3) and paragraph (a)(3) of this section are met. The Director of International Operations shall notify the U.S. citizen by letter of his determination with respect to the application. If the determination is that the nonresident alien spouse is not required to join in the election, a copy of the letter of determination shall be attached to each return, amended return, or claim for refund, to be filed pursuant to subparagraph (1) of this paragraph.

§ 1.981–3 Definitions and other special rules.

(a) *Open taxable years.* (1) For purposes of paragraph (a) of § 1.981–1, and paragraph (a) of § 1.981–2, a taxable year of the U.S. citizen, and the taxable year or years of his nonresident alien spouse ending or beginning within such taxable year of such citizen, shall be treated as open if the period prescribed by section 6501(a) (or section 6501(c)(4) if the period is extended by agreement) for assessing a deficiency against the citizen for his taxable year has not expired before the date of the election, determined under paragraph (b) of this section. Thus, for example, a taxable year of a U.S. citizen beginning before January 1, 1967, is open for purposes of this subparagraph if, before the election under section 981(c)(1) and § 1.981–2, such citizen has never filed a return for such year and a return was required under section 6012 without reference to section 981. For example, if a U.S. citizen spouse on a calendar year basis who has never filed a return for 1960 decides in 1975 that he wishes to make the election under section 981(c)(1) and § 1.981–2 in order to avoid being subject to tax for 1960 on his share of the community income for that year, he may in 1975 elect the benefits of section 981(c)(2) by filing an election in accordance with paragraph (c) of § 1.981–2. In such case, a taxable year or years of the nonresident alien spouse of such citizen ending or beginning within 1960 shall be treated in 1975 as an open taxable year.

(2) Subparagraph (1) of this paragraph shall apply even though the period prescribed by section 6501 for assessing a deficiency against the nonresident alien spouse for his taxable year or years ending or beginning within the taxable year of the U.S. citizen has expired before the election is made.

(3) If either spouse dies during a taxable year to which an election under § 1.981–1 or § 1.981–2 applies, the taxable year of the decedent and the surviving spouse shall be determined under this paragraph without regard to section 981(e)(4), relating to death of spouse during the taxable year. See paragraph (a)(2) of § 1.443–1.

(4) For definition of the term "taxable year", see section 441(b) and the regulations thereunder.

(b) *Date of election.* (1) For purposes of § 1.981–1 and this section the date of an election made under section 981(a) and § 1.981–1 is the date on which the return, amended return, or claim for refund required by paragraph (c)(1) of § 1.981–1 is filed.

(2) For purposes of § 1.981–2 and this section the date of an election made under section 981(c)(1) and § 1.981–2 is the date on which the returns, amended returns, or claims for refund, required by paragraph (c)(1) of § 1.981–2 are filed.

(3) For provisions treating timely mailing as timely filing, see section 7502 and the regulations thereunder.

(c) *Spouses with different taxable years.* If the U.S. citizen and his nonresident alien spouse do not have the same taxable year, as defined in section 441(b) and the regulations thereunder, the election under § 1.981–1 or § 1.981–2 shall apply to each taxable year of such citizen in respect of which the election is made and to that period falling within the consecutive taxable years of the nonresident alien spouse which coincides with the period covered by such taxable year of the citizen.

(d) *Election on behalf of deceased spouse.* Any election, statement, or request, required to be made under paragraph (c) of § 1.981–1, or paragraph (c) of § 1.981–2, by one of the spouses may, if such spouse is deceased, be made by the executor, administrator, or other person charged with the property of such deceased spouse.

(e) *Extension of period of limitations on assessment or refund*—(1) *Assessment of deficiency.* Except as provided in subparagraph (3) of this paragraph, if an election under section 981(a) and § 1.981–1, or under section 981(c)(1) and § 1.981–2, is properly made, the period within which a deficiency may be assessed for any taxable year to which the election applies shall, to the extent the deficiency is attributable to the application of such election, not expire before one year after the date of the election,

V 39 I 95 MAY 15 74 XUM

determined under paragraph (b) of this section.

(2) *Refund of tax.* Except as provided in subparagraph (3) of this paragraph, if an election under section 981(a) and § 1.981–1, or under section 981(c)(1) and § 1.981–2, is properly made, the period within which a claim for credit or refund of an overpayment for any taxable year to which the election applies may be filed shall, to the extent the overpayment is attributable to the application of the election, not expire before one year after the date of the election, determined under paragraph (b) of this section.

(3) *Exception in case of nonelecting alien.* Subparagraphs (1) and (2) of this paragraph shall not apply to any taxable year of a nonresident alien spouse who, in accordance with paragraph (a)(3) of § 1.981–2, is not required to join in the election by the U.S. citizen spouse under section 981(c)(1) and § 1.981–2.

(f) *Payment of interest for extension period.* To the extent that an overpayment or deficiency for any taxable year is attributable to an election made under § 1.981–1 or § 1.981–2, no interest shall be allowed or paid for any period ending with the day before the date which is one year after the date of the election, determined under paragraph (b) of this section.

[26 CFR Part 48]

SPORTING GOODS

Manufacturers Excise Tax

Notice is hereby given that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing (preferably six copies) to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by June 17, 1974. Written comments or suggestions which are not exempt from disclosure by the Internal Revenue Service may be inspected by any person upon compliance with 26 CFR 601.702(d)(9). The provisions of 26 CFR 601.601(b) shall apply with respect to the designation of portions of comments or suggestions as exempt from disclosure. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner by June 17, 1974. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER, unless the person or persons who have requested a hearing withdraw their requests for a hearing before notice of the hearing has been filed in the Office of the Federal Register. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917 (26 U.S.C. 7805)).

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

This document contains proposed amendments to the Manufacturers and Retailers Excise Tax Regulations (26 CFR Part 48) in order to conform such regulations to section 205(a) of the Excise Tax Reduction Act of 1965 (79 Stat. 240), and section 201 of Pub. L. 92–558 (86 Stat. 1173).

Section 205(a) of the Excise Tax Reduction Act of 1965 repealed all of the manufacturers excise taxes imposed on articles of sporting goods by section 4161 of the Internal Revenue Code of 1954, except the tax imposed on fishing rods, reels, creels, and artificial lures, baits, and flies. Section 201 of Pub. L. 92–558, amended section 4161 of the Code by adding a tax on certain bows and arrows, parts and accessories for bows and arrows, and quivers, effective with respect to sales made on and after July 1, 1974. In addition to conforming the regulations under section 4161 to the foregoing amendments, the regulations pertaining to the tax on fishing equipment would be expanded to provide additional guidance to persons concerned.

Proposed amendments to the regulations. In order to conform the Manufacturers and Retailers Excise Tax Regulations (26 CFR Part 48) under section 4161 of the Internal Revenue Code of 1954 to section 205 (a) of the Excise Tax Reduction Act of 1965 (Pub. L. 89–44, 79 Stat. 140), and section 201 of Pub. L. 92–558 (86 Stat. 1173), such regulations are amended to read as follows:

1. Subpart K of the table of contents for the Manufacturers and Retailers Excise Taxes (26 CFR Part 48) is amended to read as follows:

Subpart K—Sporting Goods and Firearms

SPORTING GOODS

48.4161(a)	Statutory provisions; imposition of tax; rods, creels, etc.
48.4161(a)–1	Imposition and rate of tax; fishing equipment.
48.4161(a)–2	Meaning of terms.
48.4161(a)–3	Parts and accessories.
48.4181(a)–4	Use considered sale.
48.4161(a)–5	Tax-free sales.
48.4161(b)	Statutory provisions; imposition of tax; bows and arrows, etc.
48.4161(b)–1	Imposition and rates of tax; bows and arrows.
48.4161(b)–2	Meaning of terms.
48.4161(b)–3	Use considered sale.
48.4161(b)–4	Tax-free sale.
48.4161(b)–5	Effective date.

FIREARMS

48.4181	Statutory provisions; imposition of tax.
48.4181–1	Imposition and rates of tax.
48.4181–2	Meaning of terms.
48.4182	Statutory provisions; exemptions.
48.4182–1	Exempt sales.
48.4182–2	Other tax-free sales.

2. Subpart K of Part 48 is amended by deleting §§ 48.4161, 48.4161–1, 48.4161–2, 48.4161–3, 48.4171, 48.4171–1, 48.4171–2, 48.4171–3, 48.4172, 48.4172–1, 48.4173, 48.4173–1 and 48.4173–2 and inserting in lieu thereof the following new sections:

SPORTING GOODS

§ 48.4161(a) Statutory provisions; imposition of tax; rods, creels, etc.

SEC. 4161. *Imposition of tax*—(a) *Rods, creels, etc.*—There is hereby imposed upon the sale of fishing rods, creels, reels, and artificial lures, baits, and flies (including parts or accessories of such articles sold on or in connection therewith, or with the sale thereof) by the manufacturer, producer, or importer a tax equivalent to 10 percent of the price for which so sold.

[Sec. 4161(a) as amended by section 205(a) of the Excise Tax Reduction Act of 1965 (79 Stat. 140), and section 201 of the Act of Oct. 25, 1972 (Public Law 92–558, 86 Stat. 1173)]

§ 48.4161(a)–1 Imposition and rate of tax; fishing equipment.

(a) *Imposition of tax.* Section 4161(a) imposes a tax on the sale of the following articles of fishing equipment (including in each case parts or accessories of such articles sold on or in connection therewith or with the sale thereof) by the manufacturer, producer, or importer thereof:

(1) Fishing rods;
(2) Fishing creels;
(3) Fishing reels; and
(4) Artificial lures, baits, and flies.

The tax applies only to those items of fishing equipment specified in section 4161 (a) and this paragraph. Therefore, other items of fishing equipment, such as fishing nets, lines, hooks, sinkers, gaffs, etc., are not subject to the tax. Furthermore, the tax applies only to those specified articles of fishing equipment that are designed or constructed for use in the sport of fishing. Accordingly, the tax does not apply to those articles which, although nominally articles that are specified in section 4161 (a), are in the nature of toys or novelties that merely simulate articles of a type referred to in section 4161 (a), and are not designed or constructed for practical use in the sport of fishing.

(b) *Rate of tax.* Tax is imposed on the sale of the articles enumerated in section 4161 (a) and paragraph (a) of this section at the rate of 10 percent of the price for which such articles are sold. For the definition of the term "price" see section 4216 and the regulations thereunder.

(c) *Liability for tax*—(1) *In general.* The tax imposed by section 4161(a) is payable by the manufacturer, producer, or importer making the sale.

(2) *Special rules.* A person who collects and sells in kit form all the materials and components necessary for the assembling of an article taxable under section 4161(a) is considered to be the manufacturer of a taxable article, and subject to tax on his sale of the kits. Anyone who supplies to another person the materials, tools, or the tools and materials, necessary for the manufacture of an article taxable under section 4161(a), with the understanding that upon completion the article will be sold to the supplier, is considered to be the manufacturer of the finished article, and not the person who actually fabricated the article.

§ 48.4161(a)–2 Meaning of terms.

(a) *Fishing rods.* The term "fishing rods" includes all articles, however, designated, that are designed or constructed for use in conjunction with a fishing reel for casting a line and hook in the sport of fishing. The term does not include any article that is neither designed for use in casting, nor suitable for such use. A so-called fishing rod "blank" is not considered to be a "fishing rod" unless the blank contains an affixed handle and reel seat, or is sold in the form of a kit that contains a rod blank, a handle, and a reel seat.

(b) *Fishing creels.* The term "fishing creels" includes all portable containers, of whatever material made, that are designed for storing and carrying fish from the time they are caught until such time as they are removed from the container for consumption or preservation. The term does not include any article primarily designed for use in the commercial fishing industry, or an article such as a collapsible wire basket designed to be hung over the side of a boat to keep fish captive and alive in the water.

(c) *Fishing reels.* The term "fishing reels" includes all mechanical and electrical devices that contain a spool for dispensing and recovering fishing line, and are designed for use with fishing rods in casting and in reeling in hooked fish in the sport of fishing. The term also includes reels designed for use with bows, in the sport of bowfishing.

(d) *Artificial lures, baits, and flies.* The term "artificial lures, baits, and flies" includes all artifacts, of whatever materials made, that are designed to be attached to a fishing line or hook to attract fish. Thus, the term includes edible material that has been processed so as to resemble an article purported to be more attractive to fish; for example, bread crumbs treated so as to simulate salmon eggs, and pork rind cut and dyed to simulate frogs, eels, or tadpoles.

§ 48.4161(a)–3 Parts and accessories.

(a) *In general.* The tax attaches with respect to part and accessories for articles specified in section 4161(a) and § 48.4161(a)–1 that are sold on or in connection with such articles, or with the sale thereof, at the same rate applicable to the sale of the basic articles. The tax attaches in such cases whether or not charges for the parts or accessories are billed separately. To be considered a part or accessory for an article specified in section 4161(a), an item must be either essential to the operation of the specified article, or be designed to directly improve the performance of the specified article, or to improve its appearance. For example, a carrying case for a fishing rod is not considered to be a part or accessory for a fishing rod, despite the fact that it is designed for use with the rod, because it is neither essential to the use of the rod, nor does it in any way improve its performance or appearance. A sale of a part or accessory which would otherwise be considered a sale "on or in connection with" the sale of an article taxable under section 4161(a), is not subject to tax if the part or accessory is sold as a replacement for an identical part or accessory being sold with the taxable article.

(b) *Essential equipment.* If taxable articles are sold by the manufacturer, producer, or importer thereof without parts or accessories that are essential for the operation or appearance of such articles, the separate sale of such parts or accessories to the same vendee will be considered, in the absence of evidence to the contrary, to have been made in connection with the sale of the basic article, even though the parts or accessories are shipped separately, at the same time or on a different date.

§ 48.4161(a)–4 Use considered sale.

For provisions relating to the tax on use of taxable articles by the manufacturer, producer, or importer thereof, see section 4218 relating to use by a manufacturer being considered a sale, and the regulations thereunder.

§ 48.4161(a)–5 Tax-free sales.

For provisions relating to the tax-free sales of articles referred to in section 4161(a) see—

(a) Section 4221, relating to certain tax-free sales;

(b) Section 4222, relating to registration;

(c) Section 4223, pertaining to special rules relating to further manufacture; and

(d) Section 4225, relating to exemption of articles manufactured or produced by Indians; and the regulations thereunder.

§ 48.4161(b) Statutory provisions; imposition of tax; bows and arrows, etc.

SEC. 4161. *Imposition of tax*—(a) * * *

(b) *Bows and arrows, etc.*—

(1) *Bows and arrows.*—There is hereby imposed upon the sale by the manufacturer, producer, or importer—

(A) Of any bow which has a draw weight of 10 pounds or more, and

(B) Of any arrow which measures 18 inches overall or more in length,

a tax equivalent to 11 percent of the price for which so sold.

(2) *Parts and accessories.*—There is hereby imposed upon the sale by the manufacturer, producer, or importer—

(A) Of any part or accessory (other than a fishing reel) suitable for inclusion in or attachment to a bow or arrow described in paragraph (1), and

(B) Of any quiver suitable for use with arrows described in paragraph (1),

a tax equivalent to 11 percent of the price for which so sold.

[Sec. 4161(b) as added by section 201 of the Act of Oct. 25, 1972 (Public Law 92–558, 86 Stat. 1173)]

§ 48.4161(b)–1 Imposition and rates of tax; bows and arrows.

(a) *Imposition of tax.* Section 4161(b) imposes a tax on the sale of the following articles by the manufacturer, producer, or importer thereof:

(1) Any bow that has a draw weight of 10 pounds or more;

(2) Any arrow that measures 18 inches overall or more in length;

(3) Any part or accessory (other than a fishing reel) suitable for inclusion in or attachment to a bow or arrow described in subparagraph (1) or (2) of this paragraph; and

(4) Any quiver suitable for use with arrows described in subparagraph (2) of this paragraph.

(b) *Rate of tax.* The tax is imposed on the sale of articles enumerated in section 4161(b) and paragraph (a) of this section at the rate of 11 percent of the price for which such articles are sold. For the definition of the term "price", see section 4216 and the regulations thereunder.

(c) *Liability for tax*—(1) *In general.* The tax imposed by section 4161(b) is payable by the manufacturer, producer, or importer making the sale.

(2) *Special rules.* A person who collects and sells in kit form all the materials and components necessary for the assembling of an article taxable under section 4161(b) is considered to be the manufacturer of a taxable article, and subject to tax on his sale of the kits. Anyone who supplies another person with the materials, tools, or the tools and materials, necessary for the manufacture of an article taxable under section 4161(b), with the understanding that upon completion the article will be sold to the supplier, is considered to be the manufacturer of the finished article, and not the person who actually fabricated the article.

§ 48.4161(b)–2 Meaning of terms.

(a) For purposes of the tax imposed by section 4161(b), and unless otherwise expressly indicated:

(1) *Bows.* The term "bows" includes all articles made of flexible materials, that are designed to be equipped with a string and used for the propelling of arrows in the sport of archery (target shooting), or in hunting or fishing.

(2) *Arrows.* The term "arrows" includes all articles designed or constructed to be propelled by a bow in the sport of archery (target shooting), or in hunting or fishing. The overall length of an arrow is to be measured from the point of the tip or arrow-head to the end of the arrow nock. In the case of arrows sold by the manufacturer without heads, tips, or nocks, the overall length is to include the length of the nock and head or tip that is normally used with the particular type of arrow shaft.

(b) *Parts and accessories*—(1) *In general.* "Parts and accessories" for bows and arrows include all articles (other than fishing reels) suitable for inclusion in, or attachment to, a bow or arrow of the type described in section 4061(b)(1) and paragraphs (a) and (b) of this section. Examples of parts and accessories for bows are bow handles, bow limbs, bow strings, arrow rests, bow slings, bow sights, bow levels, bow tip protectors, brush buttons, camouflaged bow covers, and all other articles designed to be attached to or included in a

V 39 N 95 MAY 15 74 XUM

bow to assist in aiming or propelling an arrow, or to protect the bow while in use. Example of parts and accessories for arrows are arrow shafts, nocks, tips, heads, head adapters, and feathers.

(2) *General purpose materials and articles.* General purpose materials, and articles that are not specifically designed to directly improve the performance or appearance of bows or arrows, or to protect them while in use, are not considered to be "parts and accessories" for bows or arrows, even though such materials may be intended, after further processing, to be included in or attached to bows or arrows. An example of a nontaxable article that is designed for use with a bow, but is neither attached to a bow, nor serves a purpose directly related to the efficient use of a bow, is a carrying case for a bow. Examples of nontaxable general purpose materials or articles are glues and cements, feathers before they are prepared for use with arrows, and bowstring thread before it is processed into bowstrings. Arrow-shaft materials is considered to be a taxable part for an arrow, unless the manufacturer, producer, or importer can establish that the particular material is unsuitable for use in the manufacture of arrows that are subject to the tax imposed by section 4161 (b) (1) (B). In addition, the term "parts and accessories" does not include articles in the nature of expendable supplies, even though such articles are designed to be applied to, or used with, bows or arrows. Examples of such supply materials are bowstring wax, and archery powder.

(c) *Quivers.* The term "quivers" includes all articles, of whatever material made, that are designed to contain, and to provide ready access to, taxable arrows during the time an archer is engaged in target shooting, hunting, or fishing. The term does not include any article designed solely for storing or transporting arrows during times when the arrows are not in use.

§ 48.4161(b)–3 Use considered sale.

For provisions relating to the tax on use of taxable articles by the manufacturer, producer, or importer thereof, see section 4218 relating to use by a manufacturer considered a sale, and the regulations thereunder.

§ 48.4161(b)–4 Tax-free sales.

For provisions relating to tax-free sales of articles referred to in section 4161(b) see—

(a) Section 4221, relating to certain tax-free sales;

(b) Section 4222, relating to registration;

(c) Section 4223, pertaining to special rules relating to further manufacture; and

(d) Section 4225, relating to exemption of articles manufactured or produced by Indians; and the regulations thereunder.

§ 48.4161(b)–5 Effective date.

The taxes imposed by section 4161(b) are effective with respect to sales made on and after July 1, 1974.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 221]

FLATHEAD IRRIGATION PROJECT, MONTANA

Proposed Operation and Maintenance Rates

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2 (32 FR 13938), and by virtue of the authority delegated to the Commissioner of Indian Affairs to the Area Director (10 BIAM–3; 34 FR 637), and by authority delegated to the Project Engineer and to the Superintendent by the Area Director June 11, 1969, Release 10–2t, 10 BIAM 7.0 sections 2.70–2.75.

Notice is hereby given that it is proposed to revise §§ 221.16 and 221.17 of Title 25, Code of Federal Regulations, dealing with the irrigable lands of the Flathead Indian Irrigation Project, Montana, that are not subject to the jurisdiction of the several irrigation districts. The purpose of the amendment is to establish the assessment rate for non-district lands of the Flathead Indian Irrigation Project for 1974 and thereafter until further notice.

It is the policy of the Department of the Interior, whenever practicable, to afford the public the opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections with respect to the proposed amendment to the Project Engineer, Bureau of Indian Affairs, Flathead Indian Irrigation Project, St. Ignatius, Montana 59865, on or before June 14, 1974.

1. Section 221.16 is amended to read as follows:

§ 221.16 Charges, Jocko Division.

(a) An annual minimum charge of $4.40 per acre, for the season of 1974 and thereafter until further notice, shall be made against all assessable irrigable land in the Jocko Division that is not included in an Irrigation District organization, regardless of whether water is used.

(b) The minimum charge when paid shall be credited on the delivery of the pro rata per acre share of the available water up to one and one-half acre feet per acre for the entire assessable area of the farm unit, allotment or tract. Additional water, if available, will be delivered at the rate of two dollars and ninety-four cents ($2.94) per acre foot or fraction thereof.

2. Section 221.17 is amended to read as follows:

§ 221.17 Charges, Mission Valley and Camas Division.

(a) (1) An annual minimum charge of $4.87 per acre, for the season of 1974 and thereafter until further notice, shall be made against all assessable irrigable land in the Mission Valley Division that is not included in an Irrigation District organization regardless of whether water is used.

(2) The minimum charge when paid shall be credited on the delivery of pro rata per acre share of the available water up to one and one-tenth acre feet per acre for the entire assessable area of the farm unit, allotment or tract. Additional water, if available, will be delivered at the rate of three dollars and twenty-six ($3.26) per acre foot or fraction thereof.

(b) (1) An annual minimum charge of $5.77 per acre, for the season of 1974 and thereafter until further notice, shall be made against all assessable irrigable land in the Camas Division that is not included in an Irrigation District organization regardless of whether water is used.

(2) The minimum charge when paid shall be credited on the delivery of the pro rata per acre share of the available water up to one and one-half acre feet per acre for the entire assessable area of the farm unit, allotment or tract. Additional water, if available, will be delivered at the rate of three dollars and eighty-six cents ($3.86) per acre foot or fraction thereof.

GEORGE L. MOON,
Project Engineer.

[FR Doc.74–11190 Filed 5–14–74;8:45 am]

[25 CFR Part 221]

FLATHEAD IRRIGATION PROJECT, MONTANA

Proposed Operation and Maintenance Rates

MAY 6, 1974.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM (32 FR 13938), and by virtue of the authority delegated by the Commissioner of Indian Affairs to the Area Director (10 BIAM–3; 34 FR 637), and by authority delegated to the Project Engineer and to the Superintendent by the Area Director June 11, 1969, Release 10–2, 10 BIAM 7.0, sections 2.70–2.75.

Notice is hereby given that it is proposed to revise §§ 221.24, 221.26, and 221.28, Subchapter T, Chapter 1, of Title 25 of the Code of Federal Regulations. This revision is proposed pursuant to the authrity contained in the Acts of August 1, 1914 (38 Stat. 583), May 18, 1916 (39 Stat. 142), and March 7, 1928 (45 Stat. 210).

The purpose of this amendment is to establish the lump sum assessments against the Flathead, Mission, and Jocko Valley Irrigation Districts within the Flathead Irrigation Project for the 1975 season.

Since this revision will change the basic rate of operation and maintenance charges of lands within an Irrigation District, public comment and expression are deemed advisable. Accordingly, interested persons may submit written comments, suggestions, or arguments with respect to the proposed amendment to the Project Engineer, Flathead Irrigation Project, St. Ignatius, Montana, 59865, on or before June 14, 1974.

1. Sections 221.24, 221.26 and 221.28 are amended to read as follows:

§ 221.24 Charges.

Pursuant to a contract executed by the Flathead Irrigation District, Flathead Indian Irrigation Project, Montana, on May 12, 1928, as supplemented and amended by later contracts dated February 27, 1929, March 28, 1934, August 26, 1936, and April 5, 1950, there is hereby fixed for the season of 1975 an assessment of $477,348.58 for the operation and maintenance of the irrigation system which serves that portion of the project within the confines and under the jurisdiction of the Flathead Irrigation District. This assessment involves an area of approximately 86,790.65 acres, which does not include any land held in trust for Indians and covers all proper general charges and project overhead.

§ 221.26 Charges.

Pursuant to a contract executed by the Mission Irrigation District, Flathead Indian Irrigation Project, Montana, on March 7, 1931, approved by the Secretary of the Interior on April 21, 1931, as supplemented and amended by later contracts dated June 2, 1934, June 6, 1936, and May 16, 1951, there is hereby fixed, for the season of 1975 an assessment of $90,881.42 for the operation and maintenance of the irrigation system which serves that portion of the project within the confines and under the jurisdiction of the Mission Irrigation District. This assessment involves an area of approximately 16,584.20 acres, which does not include any land held in trust for Indians and covers all proper general charges and project overhead.

§ 221.28 Charges.

Pursuant to a contract executed by the Jocko Valley Irrigation District, Flathead Indian Irrigation Project, Montana, on November 13, 1931, approved by the Secretary of the Interior on February 26, 1935, as supplemented and amended by later contracts dated August 26, 1936, April 18, 1950, and August 24, 1967, there is hereby fixed for the season of 1975 an assessment of $38,338.23 for the operation and maintenance of the irrigation system which serves that portion of the project within the confines and under the jurisdiction of the Jocko Valley Irrigation District. This assessment involves an area of approximately 7,473.34 acres, which does not include any lands held in trust for Indians and covers all proper general charges and project overhead.

GEORGE L. MOON,
Project Engineer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 260]

FROZEN BLOCKS OF MINCED FISH FLESH

Availability of Draft Proposed Quality Standard

MAY 8, 1974.

A Statement of Findings and Intent relative to the processing of minced fish flesh into uniformly shaped rectangular fish blocks for further manufacture into consumer items such as portion-controlled fish sticks and portions was published in the August 19, 1972, issue of the FEDERAL REGISTER (37 FR 16808). In that notice, the National Marine Fisheries Service express findings resulting from comments received from the public and private sector on the recovery processes and utilization of minced fish. One of the significant points made repeatedly by interested parties was that the newer type minced fish blocks and end products made therefrom merited appropriate research studies including delineation of quality characteristics and product defects, and the organization of these characteristics and defects into appropriate standards of quality. Since the August 1972 notice, various research activities relating to identification, classification and organization of quality and safety attributes of minced fish have been carried out.

Notice is hereby given that a draft quality standard for frozen blocks of minced fish is on display by the National Marine Fisheries Service, Department of Commerce, National Oceanic and Atmospheric Administration, Washington, D.C. 20235. Copies of the draft quality standard are being distributed to participants in the Department of Commerce voluntary Fishery Products Inspection and Safety Program, administered by NMFS. These participants are most directly affected by the draft quality standard.

Notice is also made of the Second Technical Seminar on Recovery and Utilization of Minced Fish to be held June 12–13, 1974, in Boston, Massachusetts, at the Boston Sheraton Hotel beginning at 9 a.m. The technical seminar is an open meeting, jointly sponsored by the National Marine Fisheries Service and the National Fisheries Institute. One of the topics for discussion at this seminar will be the draft quality standard for minced fish blocks, and inspectional needs particular to minced fish blocks.

Persons interested in obtaining copies of the draft quality standard or desiring further information about the technical seminar should contact Mr. J. R. Brooker, Fishery Products Inspection and Safety Program, National Marine Fisheries Service, Department of Commerce, NOAA, Washington, D.C. 20235. Any person who wishes to submit comments on the draft quality standard may do so on or before June 30, 1974.

JACK W. GEHRINGER,
Acting Director, National Marine Fisheries Service.

FIRST AID CERTIFICATES

Amended Licensing Regulations; Extension of Comment Period

This notice extends the period for comments to the notice, published April 2, 1974 (39 FR 12033), proposing regulations for acceptance of First Aid Certificates other than those issued by the Public Health Service.

Because of a delay in distribution of copies of the notice, certain segments of the interested public have not had sufficient time to evaluate the proposal. The Coast Guard is desirous of obtaining all possible comments before the final rule is drafted. Therefore, the comment period will be extended 30 days, and comments will be received until June 15. 1974.

Dated: May 3, 1974.

D. H. CLIFTON,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

[CGD 74–13]

CARRIAGE OF SOLID HAZARDOUS MATERIALS IN BULK

Proposed Changes and Transfer

The Coast Guard is considering amending the dangerous cargo regulations to transfer the requirements for the carriage of solid hazardous materials in bulk from 46 CFR 146 to 46 CFR 148 simultaneously with the transfer of the other regulations in 46 CFR 146 into 49 CFR Parts 170–189. In addition several

V 39 I 95
MAY 15 74
XUM

changes to the existing requirements for these bulk hazardous materials are being proposed.

Written comments. Interested persons are invited to participate in this proposed rulemaking by submitting written data, views, or arguments to the Executive Secretary, Marine Safety Council, U.S. Coast Guard Headquarters (G-CMC/82), Room 8234, 400 Seventh Street, SW., Washington, D.C. 20590 (Telephone 202–426–1477). Each person submitting comments should include his name and address, identify the notice (CGD 74–13), and give reasons for any recommendations. Comments received will be available for examination by interested persons in Room 8234, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. Copies will be furnished upon payment of fees prescribed in 49 CFR 7.81.

Public Hearing. The Coast Guard will hold a hearing on 16 July, 1974 at 0930 a.m. in Conference Room 8332, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590. Interested persons are invited to attend the hearing and present oral or written statements on this proposal. It is requested that anyone desiring to attend the hearing notify the Executive Secretary at least ten days in advance of the time needed for his presentation. Written summaries or copies of oral presentations are encouraged.

Closing date for comments. All communications received before August 31, 1974 will be evaluated before final action is taken on this proposal. The proposed regulations may be changed in the light of comments received.

In a separate document published on page 3022 of the January 24, 1974, issue of the FEDERAL REGISTER, the Hazardous Materials Regulations Board of the Department of Transportation amended Title 49, Code of Federal Regulations. One of the purposes of that document was a proposal to combine 46 CFR 146 (except for § 146.29 and bulk solid hazardous materials) with 49 CFR Parts 170–189.

The purpose of this notice is to propose that the carriage of solid hazardous materials in bulk be transferred to 46 CFR 148. The carriage of solid hazardous materials in bulk by vessels is not intermodal in nature. Consequently, the requirements are being retained in Title 46 of the Code of Federal Regulations. Part 148 of 46 CFR has been chosen since this part and 149 will be transferred to Subchapter O by a separate document. Subchapter O deals with bulk carriage of hazardous materials.

Most of the existing requirements for the bulk carriage of solid hazardous materials have been retained in these proposed regulations. In some instances, however, new requirements have been introduced to be observed:

(1) prior to loading (§ 148.03–5);

(2) during transport (§ 148.03–7);

(3) as a stowage condition (§ 148.03–11); and

(4) after completion of off-loading. (§ 148.03–13) The proposals in this area are considered necessary "housekeeping" requirements associated with the carriage of hazardous materials in bulk as well as the need to observe the cargo during transit for signs of problems that could effect the safety of the vessel.

Some of the general requirements for the carriage of hazardous materials are relevant to the carriage of these materials in bulk; consequently, they have been retained.

Requirements are being proposed for ground fishmeal or scrap and several changes to the present requirements for pelletized fishmeal are being proposed. Presently only pelletized fishmeal may be shipped in bulk (see § 146.27–27); however, the Coast Guard has been allowing the shipment of ground fishmeal in bulk for several years now. The conditions for transportation have been similar to those outlined in § 146.27–27; in addition the holds had to be inerted. Recently we were appraised that processors of fishmeal have been applying a higher level of antioxidant to the meal, thereby greatly reducing the tendency toward spontaneous heating. As a result, recent shipments of ground fishmeal were made without the need to inert the hold. The temperatures recorded during these shipments gave no indication that the fishmeal was tending toward self heating, therefore, this requirement is being excluded.

Concurrent with our efforts with regard to the higher treated fishmeal, the Inter-governmental Maritime Consultative Organization (IMCO) had under discussion conditions for the proper shipment of fishmeal. IMCO recently approved conditions for the transportation of fishmeal which closely resemble those the U.S. Coast Guard had been using to approve shipments of fishmeal treated with a higher level of antioxidant; this proposal for ground fishmeal, scrap and pelletized fishmeal, is based on the new IMCO recommendations.

Requirements are being proposed for the transportation of calcined petroleum coke at a temperature exceeding 130° F. Presently, the regulations in 46 CFR 146 do not permit "hot coke" to be transported. The Coast Guard was asked to define what was meant by "hot". A similar provision prohibiting the transportation of "hot coke" appears in 49 CFR Parts 170–189, the regulations for the land carriage of hazardous materials. After discussion with the Hazardous Materials Regulations Board, whose regulations are in 49 CFR Parts 170–189, and the Bureau of Explosives it was determined that coke at a temperature exceeding 130° F, was hot. Those who petitioned the Coast Guard for a definition of "hot" were interested in shipping calcined petroleum coke, which is normally shipped above 130° F for reasons of product purity. The only concern for calcined petroleum coke above 130° F was the high temperature, that could adversely affect the ship's structure. With this in mind, shipments of calcined petroleum coke were permitted by special permit. Several shipments have been made without incident and the U.S. Coast Guard now proposes to adopt these requirements in the regulations.

The transfer of the requirements for the carriage of solid hazardous materials in bulk from 46 CFR 146 to 46 CFR 148 will be accomplished in the following manner:

1. In the Docket No. HM–112 appearing in the 24 January 1974 FEDERAL REGISTER it was proposed that all the hazardous materials regulations in 46 CFR 146.01 thru 46 CFR 146.28 be combined into 49 CFR 170–189 with the exception of the regulations for solid hazardous materials carried in bulk (substances which are loaded and carried on board a vessel without benefit of containers or wrappers and received and delivered by the vessel carrier without mark or count).

2. It was stated in the preamble of *HM–112* that at a later date a proposal would be made to transfer bulk solids hazardous materials regulations located in 46 CFR 146 to Subchapter O.

3. If the proposal in *HM–112* is adopted and those contained in this document are adopted, then in another document Parts 148 and 149 will be transferred to Subchapter O.

4. In consideration of the foregoing, it is proposed to amend Title 46 of the Code of Federal Regulation by adding Part 148—Solids in Bulk as follows:

PART 148—SOLIDS IN BULK

Subpart 148.01—General

Sec.

148.01–1 Application/Definitions.
148.01–7 Permitted Cargoes.
148.01–9 Filing of Special Petition for Special Permit.
148.01–11 Special Permits; Standard Conditions.
148.01–13 Assignment and Certification.

Subpart 148.02—Vessel Requirements

148.02–1 Shipping Papers.
148.02–3 Dangerous Cargo Manifest.
148.02–5 Report of Hazardous Materials Incidents.

Subpart 148.03—Minimum Transportation Requirements

148.03–1 General.
148.03–3 Direction and Observation.
148.03–5 Prior to Loading.
148.03–7 During Transport.
148.03–11 Stowage Conditions.
148.03–13 Completion of Off-Loading.

Subpart 148.04—Special Additional Requirements for Certain Materials

148.04–1 Radioactive Material, Low Specific Activity (LSA).
148.04–9 Fishmeal or Scrap, Ground or Pelletized; Fishmeal or Scrap, Ground and Pelletized (Mixture).
148.04–13 Metal Borings, Shavings, Turnings, Cuttings.
148.04–15 Petroleum Coke, Uncalcined; Petroleum Coke, Uncalcined and Calcined (Mixture).
148.04–17 Petroleum Coke, Calcined, at 130°F or Above.
148.04–19 Tankage, Garbage or Rough Ammoniate, Solid.
148.04–20 Sulfur.
148.04–21 Coconut Meal Pellets (Also known as Copra Pellets).

AUTHORITY: The provisions of this Part 148 issued under R.S. 4405, as amended, 4462, as amended, 4472, sec. 6(b)(1), 80 Stat. 938; (46 U.S.C. 375, 416, 170, 49 U.S.C. 1665(b)); 49 CFR 1.46(b), (35 FR 4959), unless otherwise noted. Interpret or apply sec. 3, 68 Stat. 675; (50 U.S.C. 198); E.O. 11239, July 31, 1965, 30 FR 9671, 3 CFR, 1965 Supp.

Subpart 148.01—General

§ 148.01–1 Application/Definitions.

(a) The regulations in this Part contain the conditions under which bulk shipments of solid hazardous materials may be transported on board cargo vessels or barges.

(b) For the purposes of this Part, the term "bulk" applies only to cargoes transported on board cargo vessels or barges without mark or count and which are to be directly loaded into the holds of such vessels or barges without containers or wrappers.

(c) For the purposes of this Part, the term "vessel" means a "cargo vessel or barge" which is not exempt from the provisions of 46 USC 170.

(d) For the purposes of this Part, the terms "transported" includes the various operations associated with the cargo transportation, i.e., loading, off-loading, handling, storing, stowing, carrying, etc.

(e) The term "hazardous material" is defined in Title 46 CFR 2.20–65(a). The term "hazardous materials" includes a number of specific classes, the definitions of which are contained in Title 49 CFR Parts 170–189.

§ 148.01–7 Permitted Cargoes.

(a) Only hazardous materials cargoes which are listed here may be transported on board vessels unless express authority for other cargoes is given by the Commandant in accordance with § 148.01–9 of this Part:

Aluminum nitrate
Ammonium nitrate fertilizer, formulation or mixture, containing less than 60 percent ammonium nitrate with no organic filler
Ammonium sulfate nitrate
Barium nitrate
Calcium nitrate
Charcoal briquets
Coconut meal pellets (or copra pellets)
Copra
Ferrophosphorous
Ferrosilicon
Fishmeal or scrap, ground
Fishmeal or scrap, ground and pelletized (mixture)
Fishmeal or scrap, pelletized
Guanidine nitrate
Iron mass or sponge, spent
Metal borings, shavings, turnings, cuttings
Petroleum coke, calcined, at 130°F or above
Petroleum coke, calcined and uncalcined (mixture)
Petroleum coke, uncalcined
Potassium nitrate
Radioactive material, low specific activity (LSA)
Sawdust
Sodium nitrate
Strontium nitrate
Sulfur
Tankage, garbage or rough ammoniate, solid

(b) A mixture or blend of two or more cargoes, one or more of which is listed in paragraph (a) of this section, will be treated as an unlisted cargo and specific authorization by the Commandant, in accordance with § 148.01–9, for shipment in bulk is required.

§ 148.01–9 Filing of Special Petition for Special Permit.

(a) Each petition for authorization to transport an unlisted cargo or to use alternative procedures must be submitted to the U.S. Coast Guard (GMHM), 400 Seventh St. SW., Washington, D.C. 20590, and must contain the following minimum information:

(1) The regulatory provisions involved.

(2) The justification for the proposed shipments or alternative procedure, including any reasons why the current regulations are not appropriate, why the public interest would be served by the proposal, and the basis upon which the proposal would provide an equivalent degree of safety as those shipments conducted in accordance with the current regulations.

(3) A detailed description of the proposal, including when appropriate, drawings, plans, calculations, procedures, tests results, previous approvals or permits, and any other supporting information.

(4) The chemical name, common name, hazard classification, form properties (chemical and physical), and characteristics of the materials covered by the proposal, including composition and ingredient percentages (specified by weight) if a mixture.

(5) Any relevant shipping or accident experience.

(6) A description of the vessel or vessels to be employed for the shipments and the U.S. ports to be involved.

(7) A statement or recommendation regarding any changes to the regulations which would be desirable to obviate the need for similar permission from the Commandant.

(8) Unless there is good reason for priority treatment, each proposal is considered in the order in which it is received. To permit timely consideration, proposals should be submitted at least 45 days before the requested effective date.

§ 148.01–11 Special Permits; Standard Conditions.

(a) Each person to whom a special permit is issued under the terms of § 148.01–9 shall comply with all requirements of this Part except as specifically provided by the terms of the special permit.

(b) Unless otherwise specified in the special permit, each shipment made under special permit must comply with the following:

(1) Each shipping paper issued and the dangerous cargo manifest prepared in connection with such shipment must bear the notation "CG Special Permit No. *" with the * to be filled in with the assigned special permit number.

(2) Each person to whom a special permit is issued shall furnish a summary of experience to the U.S. Coast Guard (GMHM), 400 Seventh St., SW., Washington, D.C. 20590, before the date of expiration of the permit and when any amendment to the special permit is requested. The information must include the number of shipments made, tonnage of each shipment, and what vessels and U.S. ports were involved. In addition, an immediate report must be submitted to the U.S. Coast Guard (GMHM) in the event of any casualty, accident, or damaging incident which occurs as a result of transporting solid hazardous materials in bulk under the terms of the special permit.

(3) A copy of the special permit, kept current, and any amendments thereto, must be on board each vessel while transporting solid hazardous materials in bulk under the terms of a special permit. The special permit must be kept with the dangerous cargo manifest (§ 148.02–03).

(c) Each permit is subject to suspension or revocation for cause by the U.S. Coast Guard before its expiration date.

§ 148.01–13 Assignment and Certification.

(a) The National Cargo Bureau, Inc., is authorized to assist the U.S. Coast Guard in administering the provisions contained in this Part which are applicable to the transportation of solid hazardous materials in bulk on vessels with respect to;

(1) Inspection of vessels for suitability for loading such materials in bulk,

(2) Examination of stowage of such materials loaded in bulk on board vessels,

(3) Making recommendations as to stowage requirements applicable to the transportation of such materials in bulk, and

(4) Issuing of certificates of loading, setting forth that the stowage of such materials in bulk is in accordance with the applicable regulations contained in this Part.

(b) Certificates of loading from the National Cargo Bureau, Inc., are accepted as evidence of compliance with the applicable provisions of this Part with respect to the transportation of solid hazardous materials in bulk on board vessels.

Subpart 148.02—Vessel Requirements

§ 148.02–1 Shipping Papers.

(a) Carriers may not accept for transportation nor transport by vessel in bulk any solid hazardous material listed in § 148.01–7 (a) of this Part, unless the hazardous material offered for such shipment is accompanied by a shipping paper on which the following information is shown:

(1) The shipping name of the hazardous materials as listed in § 148.01–7 (a) of this Part,

(2) The quantity of the hazardous material to be transported,

(3) The name and address of the U.S. shipper or his authorized representative, as applicable, and

(4) A certification which bears the following statement, signed by the shipper or his authorized representative:

This is to certify that the above-named hazardous material is properly named, prepared, and otherwise in proper condition

V 39 I 95
MAY 15 74
XUM

for bulk shipment by vessel in accordance with the applicable regulations of the U.S. Coast Guard.

(b) For import shipments, the consignee must advise the carrier or foreign shipper (consignor) of the applicable U.S. Coast Guard regulations. The carrier or foreign shipper (consignor) must then furnish the information required in paragraph (a) of this section, as advised by the consignee, either on the shipping papers or dangerous cargo manifest.

(c) Shipping papers issued in connection with solid hazardous materials shipments in bulk must be kept on board the vessel along with the dangerous cargo manifest (§ 148.02–3 of this Part).

§ 148.02–3 Dangerous Cargo Manifest.

(a) Each vessel transporting solid hazardous materials in bulk under the terms of this Part must have on board a dangerous cargo manifest, kept in a conspicuous place on or near the bridge house, on which the following information is entered:

(1) Name of vessel and official number. (If the vessel has no official number, the international radio call sign shall be substituted.)

(2) Nationality of vessel.

(3) The name of the hazardous material as listed in § 148.01–7(a) of this Part.

(4) The hold(s) in which the material is being transported.

(5) The quantity of the material loaded in each hold.

(6) Date and signature of Master or person in charge to acknowledge correctness of the dangerous cargo manifest.

§ 148.02–5 Report of Hazardous Materials Incidents.

(a) A written report must be submitted to the U.S. Coast Guard (GMHM), 400 Seventh St., SW., Washington, D.C. 20590 within fifteen days of any casualty, accident, damaging incident, or personnel injury which occurs as a direct result of transporting any hazardous materials under the provisions of this Part.

(b) This report must include the following minimum information:

(1) Name of vessel (nationality), vessels' owner, charterer or person submitting report; address of vessel's owner, charterer or person submitting report;

(2) Date and time of incident;

(3) Geographic location of incident;

(4) Hazardous material(s) involved;

(5) A detailed report of the incident; events must be reported chronologically; and

(6) Emergency action taken during incident and results (if not already explained in the report).

Subpart 148.03—Minimum Transportation Requirements

§ 148.03–1 General.

The conditions specified in this Subpart apply to each bulk shipment of a solid hazardous material listed in § 148.04 of this Part.

§ 148.03–3 Direction and Observation.

Loading or off-loading of a solid hazardous material in bulk within the navigable waters of the U.S. must be conducted only under the direction and observation of a person assigned or employed for such duty by the vessel's master or his authorized representative.

§ 148.03–5 Prior to Loading.

Prior to loading any solid hazardous material in bulk on board a vessel:

(a) Each hold must be thoroughly cleaned of all loose debris and dunnage; permanent wooden battens or sheathing may remain in such holds; and

(b) Each hold and each bilge of that hold must be dry.

§ 148.03–7 During Transport.

During the transport of a solid hazardous material in bulk, the master of the vessel shall take whatever means necessary to periodically inspect such cargo to ensure that there are no undetected increases in temperature in that cargo and that no other changes in the cargo are occurring which might affect the safety of his vessel.

§ 148.03–11 Stowage Conditions.

(a) No other hazardous materials cargo may be showed in the same hold or on deck above a hold in which a solid hazardous material in bulk is loaded.

(b) No explosive Class C, flammable liquid, flammable solid, flammable or nonflammable compressed gas, organic peroxide, or extremely toxic material may be stowed in any hold adajcent to a hold in which a solid hazardous material in bulk is loaded.

(c) All explosive Class A and/or B material must be stowed longitudinally at least one hold (or an equivalent longitudinal distance if on deck) from any hold in which a solid material in bulk is loaded.

(d) Only nonhazardous, noncombustible cargo may be stowed in a hold in which a solid hazardous material in bulk is loaded.

§ 148.03–13 Completion of Off-loading.

Upon the completion of off-loading of a solid hazardous material in bulk, each hold must be thoroughly cleaned of all residue of such material.

Subpart 148.04—Special Additional Requirements for Certain Materials

§ 148.04–1 Radioactive Material, Low Specific Activity (LSA).

(a) Authorized materials are limited to the following:

(1) Uranium or thorium ores and physical or chemical concentrates or such ores;

(2) Uranium metal, natural thorium metal and alloys of these metals; and

(3) Material of low radioactive concentration, if the estimated radioactivity concentration does not exceed 0.001 millicurie per gram and the contribution from Group I material (see Title 49, Code of Federal Regulations, Parts 170 to 189, inclusive) does not exceed 1 percent of the total radioactivity.

(b) Each hold used for the transportation of any of these materials must be surveyed with appropriate radiation-detection instruments after the completion of off-loading. Such holds may not again be used for the transportation of any cargo if the radiation dose rate at any accessible surface is more than 0.5 millirem per hour and there is a significant removable radioactive surface contamination.

§ 148.04–9 Fish Meal or Scrap, Ground or Pelletized; Fishmeal or Scrap, Ground and Pelletized (Mixture).

(a) The material must contain at least 6 percent moisture by weight but not more than 12 percent moisture by weight.

(b) The material must not contain more than 18 percent fat by weight.

(c) At the time of production of the material, it must be treated with at least 400 ppm antioxidant (ethoxyquin); in the case where the material contains more than 12 percent fat by weight, it must be treated with at least 1000 ppm antioxidant (ethoxyquin) at the time of production.

(d) Shipment of the material in bulk must take place within 12 months of the date of production.

(e) The material must contain at least 100 ppm antioxidant (ethoxyquin) at the time of shipment.

(f) Each shipment of the material in bulk must be accompanied by a statement in which the shipper certifies the following:

(1) The moisture content of the material,

(2) The fat content of the material,

(3) The concentration of antioxidant (ethoxyquin) in the material in ppm at the time the material is loaded on a vessel in bulk,

(4) Date and place of production of the material, and

(5) The physical state of the material (ground, pelletized, or mixture).

(g) Temperature readings must be taken 3 times a day and recorded. If the temperature of the cargo exceeds 130° F and continues to increase, ventilation to the hold must be restricted.

§ 148.04–13 Metal Borings, Shavings, Turnings, Cuttings.

(a) *Conditions for stowage and transportation.* Metal borings, shavings, turnings and cuttings may be stowed and transported in bulk if the following conditions are met:

(1) Each hold in which the article is stowed must have a fire extinguishment system that uses carbon dioxide or an equivalent to carbon dioxide with respect to fire extinguishing capability. Temporary systems are acceptable.

(2) All wooden sweat battens, dunnage and debris must be removed from the hold before the article is loaded.

(3) During loading and transporting, the bilge of each hold in which the article is stowed or is to be stowed must be as dry as practicable.

(4) During loading, the article must be compacted in the hold as frequently as practicable with a bulldozer or means that provides equivalent surface compaction. Upon completion of loading, the article must be trimmed to eliminate peaks or mounds and compacted.

(5) Other cargo may be loaded in a hold containing the article if—

(i) The cargo to be loaded in the same hold with the article is not another hazardous material as defined in this Part or a combustible material;

(ii) The loading of the article is completed first; and

(iii) The temperature of the article in the hold is 130°F or less and has not increased within at least eight hours prior to the loading of the other cargo.

(6) During loading, the temperature of the article in the pile being loaded must be less than 130°F.

(7) Upon completion of loading, the vessel may not leave the port unless—

(i) The temperature of the article in each hold is less than 150°F and, if the temperature of the article in a hold has been more than 150°F during loading, the temperature of the article has shown a downward trend below 150°F for at least eight hours after completion of loading of the hold; or

(ii) The vessel intends to sail directly to another port that is no further than twelve hours sailing time for the vessel concerned, for the purpose of loading more of the article in bulk or to completely off-load the article, and the temperature of the article is less than 190°F and has shown a downward trend for at least eight hours after completion of loading.

(b) *Temperature of article.* For the purposes of each temperature requirement of this section, the temperature of the article is the highest temperature taken between eight and fourteen inches below the surface at ten-foot intervals over its length and width.

(c) *Duties of master or person in charge.* The following rules apply to the master or person in charge of each vessel that is loading and transporting the article:

(1) The master or person in charge of a vessel that is loading or transporting the article must ensure that the temperature of the article is taken—

(i) Before loading;

(ii) During loading, in each hold and in the pile being loaded at least every twenty-four hours and, if the temperature is rising, as often as necessary to ensure the conditions in this section are met; and

(iii) After loading, in each hold at least every twenty-four hours.

(2) During loading, if the temperature of the article in a hold is 200° F or higher, the master or person in charge of the vessel must notify the Coast Guard Captain of the Port and suspend loading until the temperature of the article is less than 190° F.

(3) After loading—

(i) If the temperature of the article is 150°F or above, the master or person in charge must notify the Captain of the Port and ensure that the vessel remains in the port area until the conditions of paragraph (a)(7)(i) of this section are met; or

(ii) In the case of a short-duration voyage to which paragraph (a)(7)(ii) of this section applies, if the temperature of the article in a hold is 190°F or above, the master or person in charge must notify the Captain of the Port and ensure that the vessel remains in the port area until the conditions of paragraph (a)(7)(ii) of this section are met.

(4) Except for shipments of the article in bulk which leave the port of loading under the conditions specified in paragraphs (a)(7)(ii) of this section, after the vessel leaves the port, if the temperature of the article in the hold rises above 149°F, the master must notify the nearest Coast Guard Captain of the Port as soon as possible of—

(i) The name, nationality, and position of the vessel;

(ii) The most recent temperature taken;

(iii) The length of time that the temperature has been above 149°F and the rate of rise, if any;

(iv) The port where the article was loaded and the destination of the article;

(v) The last port of call of the vessel and its next port of call;

(vi) What action has been taken; and

(vii) Whether any other cargo is endangered.

(5) To meet the conditions of this section, the master of a vessel that is transporting the article must ensure that each temperature taken is recorded.

§ 148.04–15 Petroleum Coke, Uncalcined; Petroleum Coke, Uncalcined and Calcined (Mixture).

The material at 130°F or above is not permitted shipment in bulk on any vessel.

§ 148.04–17 Petroleum Coke, Calcined, at 130°F or Above.

(a) The requirements of this Part do not apply to bulk shipments of petroleum coke, calcined, on any vessel when the material is less than 130°F.

(b) The material must not be loaded in cargo vessels when temperatures exceed 225°F.

(c) Other hazardous materials must not be stowed in any hold adjacent to any other hold containing this material except as stipulated in paragraph (d) of this section.

(d) In holds over tanks containing fuel or material having a flash point under 200°F, a two-to-three-foot layer of the material at a temperature not greater than 110°F must be first loaded into that hold. Only then may the material at 130°F or above be loaded into that hold.

(e) The loading of the material under the terms of this section must be as follows:

(1) For shipments in holds over fuel tanks, the loading of the two-to-three-foot layer of the material at a temperature not greater than 110°F (as required by paragraph (d) of this section) in these holds must be completed prior to the loading of the material at 130°F or above in any hold of the vessel.

(2) Upon completion of the loading requirement outlined in paragraph (e)(1) of this section, when required, a two-to-three-foot layer of the material at 130°F or above must first be loaded in each hold (including those holds, if any, already containing a layer of the material at a temperature not greater than 110°F) in which the material is to be loaded under the terms of this section.

(3) Upon the completion of the loading of the two-to-three-foot layer of the material at 130°F or above in each hold, as required in paragraph (e)(2) of this section, the normal loading of the material at 130°F or above may proceed to completion.

(f) Personnel must be warned by the Master of the vessel or his authorized representative that calcined petroleum coke loaded and transported under the terms of this section is hot and that injury due to burns is possible.

§ 148.04–19 Tankage, Garbage or Rough Ammoniate, Solid.

(a) The material must contain at least 7 percent by weight moisture.

(b) The material must not be loaded if the temperature in the material, prior to loading, exceeds 100°F.

§ 148.04–20 Sulfur.

(a) When sulfur is loaded in a deep hold with general cargo in the 'tween deck hold above the sulfur, a dust proof wooden bulkhead enclosure must be built in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure capable of preventing sulfur dust from entering the 'tween decks during loading.

(b) Ceiling must be made tight to prevent sulfur dust from entering the bilges; any chinking necessary in the way of tank tops or bilges must be made of non-combustible material.

(c) Cowl ventilators serving the hold into which sulfur is being loaded or discharged must be blanked off to prevent circulation of air.

(d) No smoking is permitted on board the vessel and "No Smoking" signs must be conspicuously posted.

(e) If a metal chute is used it must be grounded using a flexible cable.

(f) Upon completion of loading, the sulfur must be leveled off. Any decks, bulkheads, or overheads containing sulfur dust must be swept clean or washed down.

(g) Other cargo, which is oxygen bearing, must not be stowed in the same hold with sulfur.

(h) An oxygen breathing apparatus, or proper gas mask, must be made readily available.

(i) A fire hose, preferably supplied with fresh water from a shore supply

V 39 I 95 MAY 15 74 XUM

source, must be available at each hatch through which sulfur is being loaded.

§ 148.04–21 Coconut Meal pellets (also known as Copra pellets).

(a) Must contain at least 6 percent and not more than 13 percent moisture and not more than 10 percent residual fat contents.

(b) Must not be loaded if the temperature exceeds 120° F.

(c) Must not be stowed within 4 feet of any bulkheads subject to artificial heat.

(d) Must not be overstowed with any other cargo.

(e) A clear space of at least 1 foot must be provided between the top of the cargo and underside of deck beams.

(f) Only dry dunnage must be used.

(g) At least two layers of plank dunnage must be placed on the deck or tank tops. The first layer must be laid fore and aft and the second athwartships.

W. F. REA, III,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 74–NW–10]

CONTROL ZONE

Alteration

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Hillsboro, Oregon, Control Zone.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington, 98108. All communications received by June 14, 1974; will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108.

An RNAV Instrument Approach procedure has been established for the Portland-Hillsboro Airport Runway 20. A review of Hillsboro Control Zone airspace disclosed that an additional control zone extension is needed to contain the approach procedure within controlled airspace.

In consideration of the foregoing, the FAA proposes to amend Part 71 of the Federal Aviation Regulations as follows:

In § 71.171 (39 FR 354) the description of the Hillsboro, Oregon, Control Zone is amended to read:

HILLSBORO, OREGON

Within a 5-mile radius of Portland-Hillsboro Airport (Latitude 45°32'15" N., Longitude 122°56'46" W.); within 2 miles each side of the Newberg VORTAC 007° radial, extending from the 5-mile radius area to 8 miles south of the airport; and within 2 miles each side of the 039° bearing from the airport, extending from the 5-mile radius area to 9.5 miles northeast of the airport. This control zone will be effective during the time established in advance by a Notice to Airmen and continuously published in the Airmen's Information Manual.

(Section 307(a) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington, on May 7, 1974.

C. B. WALK, Jr.,
Director, Northwest Region.

[FR Doc.74–11134 Filed 5–14–74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74–NW–08]

TRANSITION AREA

Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Coeur D'Alene, Idaho, Transition Area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108. All communications received by June 14, 1974 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108.

A new VOR approach procedure is proposed for the Coeur D'Alene Air Terminal, Coeur D'Alene, Idaho. A review of the airspace requirements for the new procedure revealed that additional 700' Transition Area airspace would be required to provide controlled airspace protection for aircraft executing the proposed procedure.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (39 FR 440) the description of the Coeur D'Alene, Idaho, Transition Area would be amended to read as follows:

COEUR D'ALENE, IDAHO

That airspace extending upward from 700 feet above the surface within 5-mile radius of Coeur D'Alene Air Terminal (Latitude 47°46'30" N., Longitude 116°49'04" W.) and within 9.5 miles north and 5 miles south of the Post Falls VOR (Latitude 47°44'57" N., Longitude 116°56'49" W.) 073° and 253° radials extending from 6 miles east to 18.5 miles west of the VOR.

(Sec. 307(a) of the Federal Aviation Act of 1958 as amended (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Seattle, Washington, on May 7, 1974.

C. B. WALK, Jr.,
Director, Northwest Region.

DEPARTMENT OF DEFENSE

Department of the Army

U.S. ARMY AVIATION SYSTEMS COMMAND

Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee meeting:

The U.S. Army Aviation Systems Command (AVSCOM), will conduct a meeting of the Scientific Advisory Group for Aviation Systems (SAGAS), 0900 hours, June 12, 1974 thru 1900 hours, June 13, 1974, at The Lewis Directorate, U.S. Army Air Mobility Research and Development Laboratory, Cleveland, Ohio. The meeting will consist of a tour of the facilities and discussion of classified defense information. The meeting will not be opened to the public.

Any additional information concerning the above may be obtained from Mr. B. Thomas Horace, Executive Secretary, SAGAS, Autovon 698–3821.

By authority of the Secretary of the Army.

R. B. BELNAP,
Special Advisor to TAG.

MAY 9, 1974.

POSTAL SERVICE

POSTAL SERVICE ADVISORY COUNCIL

Notice of Meeting

Notice is hereby given that a meeting of the Postal Service Advisory Council will be held on Wednesday, June 5, 1974, in room 206, USPS Training and Development Institute, 7900 Wisconsin Avenue NW, Washington, D.C., starting at 9:30 a.m.

The Postal Service Advisory Council was established by 39 U.S.C. 206, which provides that "(t)he Postal Service shall consult with and receive the advice of the Advisory Council regarding all aspects of postal operations."

The meeting has been called for consideration by the Council of the work of the Training and Development Institute. The meeting is open to the public. Persons wishing to be present or to obtain further information on this meeting should contact Mrs. Rita Moroney, Office of the Postmaster General, room 10171, U.S. Postal Service, 475 L'Enfant Plaza West, SW, Washington, D.C. Mrs. Moroney's telephone number is 202–245–5343.

ROGER P. CRAIG,
Deputy General Counsel.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[S1491]

CALIFORNIA

Proposed Withdrawal and Reservation of Lands

Correction

In FR Doc. 74–9204 appearing on page 14363 in the issue of Tuesday, April 23, 1974, the sixth line of the land description for Mount Diablo Meridian should read as follows:

Sec. 19, W½SE¼, NE¼SE¼, S½S½SE¼ NE¼.

BURNS DISTRICT GRAZING ADVISORY BOARD

Notice of Meeting

The Burns District Grazing Advisory Board, Oregon 2, will meet at 8 a.m. on June 11, 1974, at the Bureau of Land Management District Office, 74 South Alvord, Burns, Oregon. The meeting will be held over a 2 day period, June 11 and 12, for the purpose of inspecting wildhorse use, range and watershed conditions, and grazing management in the Andrews Resource Area.

Prior to the tour, time will be available for a limited number of brief statements by members of the public. Those wishing to make an oral statement should inform the Advisory Board Chairman prior to the meeting of the Board. Any interested person may file a written statement with the Board for its consideration. The Advisory Board Chairman is Mr. James Sitz. Mr. Sitz may be contacted by writing a letter in care of the Bureau of Land Management, 74 South Alvord, Burns, Oregon 97720. Telephone number 503–573–2071.

Dated: May 7, 1974.

L. CHRISTIAN VOSLER,
District Manager.

[Serial No. I–6302 et al.]

IDAHO

Proposed Classification

Lands located in Fremont County have been examined and found suitable for State Indemnity Lieu Selection. Therefore, it is proposed to classify the following described lands as suitable for disposal through State Indemnity Lieu Selection (43 CFR 2620). The classification would be made pursuant to section 7 of the Taylor Grazing Act of June 28, 1934, as amended (43 U.S.C. 315(f)):

BOISE MERIDIAN, IDAHO

T. 13 N., R. 41 E.,
Sec. 10, SW¼NE¼, SE¼;
Sec. 11, lots 3 and 4, NE¼SW¼;
Sec. 12, S½;
Sec. 13, E½, E½W½;
Sec. 23, SE¼SE¼;
Sec. 24, E½, E½W½, W½SW¼.
T. 13 N., R. 42 E.,
Sec. 7, lots 1, 2, 3, and 4, NW¼NE¼, NE¼NW¼, E½SW¼, SE¼;
Sec. 8, lots 1–6 inclusive, NE¼, E½NW¼, NE¼SW¼, N½SE¼;
Sec. 9, N½, N½SW¼, SE¼SW¼, SE¼;
Sec. 10, N½;
Sec. 11, W½NE¼, NW¼;
Sec. 14, NW¼, W½NE¼;
Sec. 17, all;
Sec. 18, lots 1–4 inclusive, E½, E½W½;
Sec. 19, lots 1–4 inclusive, E½, E½W½;
Sec. 20, all;

V 39 I 95
MAY 15 74
XUM

Sec. 27, W½NW¼;
Sec. 28, N½, N½S½.
T. 14 N., R. 43 E.,
Sec. 2, lot 3.
T. 15 N., R. 43 E.,
Sec. 13, SE¼NE¼.
T. 16 N., R. 43 E.,
Sec. 31, lot 3;
Sec. 32, N½NW¼;
Sec. 33, N½, N½NE¼SE¼, NW¼SW¼ NE¼SE¼, E½SE¼NE¼SE¼, SW¼SE¼ NE¼SE¼.
T. 14 N., R. 44 E.,
Sec. 5, lots 1 and 2;
Sec. 7, lots 1, 2, 3, and 8;
Sec. 17, SE¼SW¼, S½SE¼.
T. 15 N., R. 44 E.,
Sec. 31, lot 8.
T. 16 N., R. 44 E.,
Sec. 31, E½SW¼.

The area described contains approximately 7,997.58 acres of National Resource Lands.

1. The lands are physically suitable and adaptable to the uses and purposes for which they are being classified.

2. Present and potential uses and users of the lands have been taken into consideration. The lands are in scattered locations and are not part of any integrated management area.

3. The classification is consistent with federal, State and local Government programs, plans, zoning and regulations.

4. The lands are valuable for the public purpose of transfer to the State in satisfaction of a State land grant.

5. The State and Bureau of Land Management have mutually agreed that the above described lands are suitable for disposal under the State Indemnity Lieu Selection program.

Until July 15, 1974, all persons who wish to submit comments, suggestions or objections in connection with the proposed classification may present their views to the Idaho Falls District Manager, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401.

Dated: May 7, 1974.

For the State Director.

WALTER JONES,
District Manager.

[FR Doc.74-11194 Filed 5-14-74;8:45 am]

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-414]

ZAPATA WESTERN SHIPHOLDINGS, INC.

Notice of Application

Notice is hereby given that Zapata Western Shipholdings, Inc., has filed application dated January 21, 1974, supplemented March 20, 1974, under the Merchant Marine Act, 1936, as amended, (the Act), for operating-differential subsidy on two ore/bulk/oil vessels (to be constructed) of approximately 80,000 deadweight tons each, which are to be employed in U.S. foreign trade. Since Zapata Coastal Transport, and affiliate of Zapata Western Shipholdings, Inc., plans to operate crude oil carriers in domestic trade between Alaska and the continental United States, written permission of the Maritime Administration under Section 805(a) of the Act will be required by Zapata Western Shipholdings, Inc., if its application for operating-differential subsidy is approved.

Zapata Western Shipholdings, Inc., advises that at the present time its affiliate, Zapata Coastal Transport, does not own or charter any vessels and consequently is not engaged in domestic trades. However, Zapata Coastal Transport's immediate plans cover operation of two to four crude oil carriers from Alaska to ports on the West, Gulf or East Coasts of the United States. Therefore, Zapata Western Shipholdings, Inc. is applying for permission for its affiliate, Zapata Coastal Transport, Inc., to operate up to four tankers of from 90,000 DWT to 150,000 DWT primarily in the transportation of crude oil from Alaska to the West, Gulf or East Coasts of the United States.

Interested parties may inspect this application in the Office of Subsidy Administration, Maritime Administration, Room No. 4085, Department of Commerce Building, Fourteenth and E Streets NW., Washington, D.C. 20235.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on May 28, 1974, file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS))

By Order of the Maritime Administration.

Dated: May 10, 1974.

JAMES S. DAWSON, Jr.,
Secretary.

[FR Doc.74-11216 Filed 5-14-74;8:45 am]

National Bureau of Standards

PROPOSED REVISION TO FEDERAL INFORMATION PROCESSING STANDARD 21—COBOL

Requests for Comments

NOTE: FR Doc. 74-10536 was published on page 16501 in the issue of Thursday, May 9, 1974. Part of this document was inadvertently omitted. For the convenience of the reader, we are republishing this document in its entirety as set forth below:

Under the provisions of Pub. L. 89-306, the Secretary of Commerce is authorized to establish uniform Federal ADP standards. A proposed revision to Federal Information Processing Standard 21—COBOL is being recommended for Federal use. It is based on the Federal adoption of the voluntary industry standard that has been developed by the American National Standards Institute. This proposed revision supersedes FIPS PUB 21 and reflects major changes and improvements to the earlier COBOL specification.

Prior to the submission of a final endorsement of this proposal to the Secretary of Commerce for approval, it is essential to assure that proper consideration is given to the needs and views of manufacturers, the public and state and local governments. The purpose of this notice is to solicit such views.

The proposed Federal Information Processing Standard contains two basic sections: (1) An announcement section which provides information concerning the applicability, implementation, and maintenance of the standard; and (2) a specification section which deals with the technical requirements of the standard. The first section is provided in its entirety in this notice.

Interested parties may obtain a copy of the technical specifications from and may submit comments to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, on or before August 7, 1974.

Dated: May 2, 1974.

RICHARD W. ROBERTS,
Director.

PROPOSED FEDERAL INFORMATION, PROCESSING STANDARDS PUBLICATION 21-1

Date ----------

ANNOUNCING THE STANDARD FOR COBOL

Federal Information Processing Standards Publications are issued by the National Bureau of Standards in accordance with the provisions of Pub. L. 89-306 and Executive Order 11717.

1. *Name of Standard.* COBOL (FIPS PUB 21-1).

2. *Category of Standard.* Software Standard, Programming Language.

3. *Explanation.* This FIPS PUB announces the adoption of American National Standard COBOL, X3.------, as amplified herein as a Federal Standard. This revision supersedes FIPS PUB 21 and reflects major changes and improvements to the COBOL specifications. The American National Standard defines the elements of the COBOL Programming Language and the rules for their use. The standard is used by implementors as the reference authority in developing compilers and by users for writing programs in COBOL. The primary purpose of the standard is to promote a high degree of interchangeability of programs for use on a wide variety of information processing systems. Other languages, appropriate for applications that are not adequately serviced by COBOL, are being considered for adoption as Federal Standards.

4. *Approving authority.* Secretary of Commerce.

5. *Maintenance agency.* Department of Commerce, National Bureau of Standards (Institute for Computer Sciences and Technology).

6. *Cross index.* American National Standard X3.------, COBOL.

7. *Related documents.* a. Federal Information Processing Standards Publication 29, Procedurea For Processing Interpretations For Federal Standard COBOL. (To be published in the near future.)

b. Federal Property Management Regulation 101-32.1305-1, Implementation of Federal Information Processing Standards Publications (FIPS PUB) Into Solicitation Documents, Software Standards.

c. Federal Property Management Regulation ----------, COBOL Compiler Validation. (To be published in the near future.)

d. Federal Information Processing Standards Publication ----, Aids for COBOL Program Conversion (FIPS Pub 21 to FIPS Pub 21-1). (To be published in the near future.)

8. *Objectives.* The basic objectives in applying Federal Standard COBOL are (1) to achieve the long-recognized advantages that are inherent in the use of higher level languages, and (2) to maximize and protect program investments by making it easier and less expensive to exchange programs among different computer systems, including replacement systems.

The attainment of these objectives, from a Government-wide point of view, depends upon the widespread use of Federal Standard COBOL. Thus, the general intent of this FIPS PUB is to provide a standard language that can be used in programming information processing applications except in circumstances, discussed below, where such use would not be advantageous.

9. *Applicability.* Federal Standard COBOL will be used in programming computer applications and programs that emphasize the manipulation of characters, records, files and input/output (as contrasted with those concerned primarily with computational problem solving) which are developed or acquired for Government use. Specifically, the standard will be used for such applications whenever—

The application is being designed and programmed centrally for a decentralized system that employs computers of different makes, models, and configurations.

The program will or might possibly be run on equipment other than that for which the program is initially written.

It is anticipated that the life of the program will be longer than the life of the presently installed equipment.

The application or program is under constant review for updating of the specifications, and changes may result frequently.

The advantages of the use of this higher level language can accrue locally irrespective of interchange potential (e.g. ease of coding, ease of documentation, improved understanding, and ease of debugging).

Exceptions to the use of Federal Standard COBOL may be made when:

a. A comparative analysis shows that the advantages inherent in the use of Federal Standard COBOL are clearly offset by even greater advantages obtainable through use of an alternative language. The language selection should be made in consideration of the Government's overall objectives. Such exceptions to the use of Federal Standard COBOL shall be subject to a waiver procedure approved by the head of the agency. The special circumstances identified in paragraphs b through e below are exempted from the requirement for a waiver at the discretion of the head of an agency. See Paragraph 12, Waivers.

b. The program requirements are more economically and efficiently satisfied through the use of report generation, data base management, or text processing languages.

c. The program is to be processed on systems for which COBOL compilers are normally not developed. If, however, a COBOL compiler is available on a system other than the target system and the compiler generates object code for the target system (cross-compiler), COBOL should be used to the extent practicable.

d. The program is to be processed on systems that are in the Federal Inventory and for which a standard COBOL compiler is not available.

e. The computer installation is oriented toward the use of scientific and engineering applications in which case incidental information processing applications may be programmed in locally used languages.

Federal agencies should give special attention to ensuring that programs for applications that will or are likely to be used by organizations outside the Federal Government (i.e., state and local governments and others) are written and made available in Federal Standard COBOL, in order to provide maximum interchangeability in their use.

10. *Specifications.* Federal Standard COBOL specifications are the language specifications contained in American National Standard COBOL, X3. ------. For purposes of Federal Standard COBOL, the modules defined in X3.------ are combined into four levels (see paragraph 10.1, Levels). Additionally, minimum compiler specifications are provided herein for certain language elements contained in X3. ------ where an undefined number of repetitions is allowed in a defined syntax (see paragraph 10.2, Minimum Compiler Specifications).

10.1 Levels. The four levels of Federal Standard COBOL are identified as: Low, Low-Intermediate, High-Intermediate, and High. Each Federal Standard COBOL level is composed of either the high or low levels of the nucleus and ten of the eleven Functional Processing Modules (FPM's) defined in X3. ------. The four Federal Standard COBOL levels are reflected in the following table. The numbers in the table refer to the level within the FPM or nucleus as designated in X3.------, and a dash in the table denotes that the corresponding FPM is omitted.

	Low level	Low intermediate level	High intermediate level	High level
Nucleus	1	1	2	2
FUNCTIONAL PROCESSING MODULES				
Table handling	1	1	2	2
Sequential I-O	1	1	2	2
Relative I-O	-	1	2	2
Indexed I-O	-	-	-	2
Sort-merge	-	-	1	2
Report writer	-	-	-	-
Segmentation	-	1	1	2
Library	-	1	1	2
Debug	-	1	2	2
Interprogram communication	-	1	2	2
Communication	-	-	2	2

NOTE.—The "Report Writer" module is not mandatory in any Federal Level. However, the specifications contained in X3.------ should be used to the extent practical, consistent with the re uirements.

10.2 *Minimum compiler specifications.* The specifications contained in X3.------ include some language elements whose syntactic definition allow an unspecified number of repetitions of portions of the format. Within Federal Standard COBOL, these language elements are identified and minimum compiler specifications are provided. The purpose of defining minimum specifications for compilers for these elements is to simplify the problems of producing application programs that are portable across various systems. The success of writing a portable program often depends on the amount of effort devoted to determining the limitations inherent in all the compilers for which the program is written. The minimum specifications contained herein are not intended to be ceilings. Compilers can, therefore, be built to handle any number of occurrences of a specific language element considered desirable so long as the implementation provides the relevant minimum capabilities.

In the following list, the language elements are organized by FPM. They are listed in the order in which they appear within the module. The values in the "low" and "high" columns represent the minimum specifications for the low-level or high-level, respectively, of each module defined in X3.------. The following meanings are applicable to the entries in the "low" and "high" columns.

a. "0" indicates the feature is not available in that level of the module or that the module is null.

b. "1" indicates a minimum imposed because of subsetting within the FPM.

c. "I" indicates the feature is implementor-defined and thus minimum specifications are not appropriate.

d. "U" indicates that whatever is presented in the source program must be accepted by the compiler. This implies that, for the given language element there are known compiling techniques such that the source program is not limited in the use of the capabilities of that language element.

e. "L" indicates there may be an implementor-defined limit to the number of operands or the size of the operand or both in an ACCEPT or DISPLAY statement depending upon the specific device that is the object of the statement. Any such limitation must be described in the programmer's manual that accompanies the compiler. This specification is applicable only to low-level nucleus.

3.6 USE AFTER EXCEPTION/ERROR file-names		

[1] Although the "Report Writer" module is not mandatory in any Federal Level, if it is requested, these specifications apply.

The above minimum compiler specifications are defined for each language element independent of any interaction with other language elements. It is possible, therefore, that a given program may not compile because of total system resource limitations, even though none of the minimums has been exceeded. The considerations determining the limitations imposed on the source program will be described in the programmer's manual that accompanies the compiler.

11. *Implementation.* Implementation of Federal Standard COBOL is divided into four areas of consideration: acquisition of COBOL compilers, conformance to Federal Standard COBOL, interpretation of Federal Standard COBOL, and use of COBOL in application programs.

11.1 *Acquisition of COBOL compilers.* The provisions reflected in this FIPS publication are effective upon the date this document is approved. All COBOL compilers specified for procurement on or after the effective date must be identified as implementing one of the levels of Federal Standard COBOL. In order to allow adequate time for implementation of compilers that conform to Federal Standard COBOL, delivery of such compilers may be deferred to, but not to exceed, 18 months after the effective date of this FIPS publication. The requirements set forth in this paragraph are applicable to compilers developed in-house, compilers acquired as part of an ADP system procurement, compilers acquired by separate procurement and compilers used under an ADP leasing arrangement. These requirements are not applicable to orders placed before the effective date of this FIPS publication for compilers to be delivered subsequent to the effective date.

11.2 *Conformance to Federal Standard COBOL.* A compiler implemented in conformance to Federal Standard COBOL must satisfy at least the following requirements:

a. The implementation must include *all* of the language elements of at least one of the levels of Federal Standard COBOL.

b. The implementation must satisfy *all* of the minimum compiler requirements defined in Paragraph 10.2, Minimum Compiler Specifications.

c. The implementation must satisfy all of the requirements defined in American National Standard COBOL, X3. ------, Section I, paragraph 1.5, Definition of An Implementation of American National Standard COBOL. Any requirement stated herein that may differ from the requirements for an implementation of American National Standard COBOL take precedence over the requirements stated in X3.------

d. The implementation must provide a facility for the user to optionally specify a level of Federal Standard COBOL for monitoring his source program at compile time. The monitoring will be an analysis of the syntax used in a source program against the syntax included in the specified level of Federal Standard COBOL. Any syntax used in the source program that does not conform to that allowed by the user selected level of Federal Standard COBOL will be diagnosed. The syntax diagnosed as not conforming to the specified level will be identified to the user through a diagnostic message on the source program listing. The diagnostic message will contain, at least: (1) the identification of the source program line number in which the non-conforming syntax occurs, and (2) the identification of the level of Federal Standard COBOL that supports the syntax or that the syntax is non-standard COBOL.

In order to confirm that an implementation satisfies the requirements of a designated level of Federal Standard COBOL, validation routines (which include the Report Writer module) have been developed and approved for testing COBOL compilers. A Federal COBOL Compiler Testing Service (FCCTS) also is available to provide validating services. For further information regarding validation See FPMR ------ (see paragraph 7c) or contact:

Director, Federal COBOL Compiler Testing Service, Department of the Navy, ADPE Selection Office, Washington, D.C. 20376.

11.3 *Interpretation of Federal standard COBOL.* During the use of Federal Standard COBOL, whether implementing compilers, validating compilers or writing source programs, questions may arise from time to time as to the meaning of specific language specifications. It is desirable when this happens to apply a solution to these questions that can be used uniformly throughout the Federal Government and by all implementors of Federal Standard COBOL and the Report Writer module. To achieve this objective, a Federal COBOL Interpretations Committee has been organized. Procedures for processing interpretation of Federal Standard COBOL are provided in FIPS Publication 29 (paragraph 7a). For further information contact:

Chairman, Federal COBOL Interpretations Committee, Computer Science Section, System and Software Division, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234.

11.4 *Use of COBOL.* Federal Standard COBOL will be used as defined in Paragraph 9, Applicability, as soon as compilers that conform to the standard are available and acquired. It is not intended that existing programs be rewritten solely for the purpose of conforming to the standard.

Programs should, to the extent practicable, be limited to the elements of one of the specified levels of Federal Standard COBOL. It should be recognized that the use of any non-standard language elements may compromise interchangeability of programs between various systems or may complicate future conversion to a replacement system. Extensions should, therefore, be employed only when their use will result in efficiencies that clearly outweigh the difficulties they may cause. To the extent that specifications for the required extensions have already been included in the CODASYL COBOL Journal of Development, use of these specifications should minimize future conversion difficulties.

12. *Waivers.*—12.1 *Policy.* Heads of agencies are permitted to waive the requirements stated in this FIPS publication in the following circumstances. Each waiver will cover only the specific requirements of the FIPS publication related to the need for a waiver.

a. A waiver may be granted for an exception to any of the requirements stated in this FIPS publication provided it can be clearly demonstrated that there are appreciable and continuing performance or cost adavntages to be gained or that the extenuating circumstances are such that the overall interests of the Federal government are served by granting the requested waiver.

b. Special capabilities may be required to accommodate the needs of a particular application that can not be achieved through the use of Federal Standard COBOL. A waiver must be obtained before these special capabilities are specified for implementation or acquisition. Requests for waiver must clearly demonstrate an appreciable and continuing performance or cost advantage will be obtained through use of these special capabilities.

12.2 *Reporting.* Waivers granted in the acquisition of compilers will be reported to the National Bureau of Standards, with the following supporting documentation, within seven working days after approval by the head of the agency.

a. Relevant documentation considered by the head of the agency in authorizing the waiver.

b. Detailed technical specifications of the language deviations granted. In the case of deletions, exact reference to the items in X3. ------ is all that is required. In case of additions that are already developed and approved by CODASYL, exact reference to the items in the CODASYL COBOL Journal of Development is all that is required.

c. A recommendation for action by NBS concerning future development of COBOL, relative to the waiver, should be included, as appropriate.

Correspondence should be addressed to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234.

13. *Special information.* a. Development and maintenance of the COBOL language are the responsibilities of the Programming Languages Committee of the Conference on Data Systems Languages (CODASYL), a voluntary organization comprised of interested organizations. Standardization of COBOL in the United States is in the purview of the American National Standards Institute (ANSI), X3J4 Committee. The technical specifications of American National Standard COBOL, herein adopted as a Federal Standard, are based on the specifications contained in CODASYL COBOL Journal of Development, 1973, and changes that were made to the JOD in response to X3J4 requests. The COBOL language is under continual review by the CODASYL organization for modification and extension. These changes are then reviewed by ANSI for incorporation in revised editions of ANS COBOL.

b. In the event that there is no prospect for the development of a COBOL compiler conforming to this standard for the machine used, serious consideration should be given to using the existing COBOL compiler, if available, for new or revised applications to ease the eventual conversion to a new system employing a standard COBOL compiler.

14. *Where to obtain copies of COBOL publications.* a. Federal Government activities should obtain copies of this FIPS publication from established sources within each agency. When there is no established source, purchase orders should be submitted to the General Services Administration, Specifications Activity, Printed Materials Supply Division, Building 197, Washington Navy Yard Annex, Washington, D.C. 20407. Refer to Federal Information Processing Standard Number 21–1 (FIPS PUB 21–1). Copies of American National Standard COBOL, X3. ------, accompany each copy of FIPS PUB 21–1, (Price, ------ a copy.)

b. Others may obtain copies of American National Standard COBOL, X3. ------, from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018. Refer to American National Standard ------, Standard for Common Business Oriented Language (COBOL). (Price, ------ a copy. Discounts available on quantity orders.)

c. Copies of the CODASYL COBOL Journal of Development may be obtained from the Technical Services Branch, Department of Supply and Services, 5th Floor, 88 Metcalfe Street, Ottawa, Ontario, Canada K1A 0S5.

PROPOSED FEDERAL INFORMATION PROCESSING STANDARD CODE EXTENSION TECHNIQUES IN 7 OR 8 BITS

Requests for Comments

NOTE: FR Doc. 74–10537 was published at page 16501 in the issue of Thursday, May 9, 1974. The "Draft For Coordination" was inadvertently ommitted. Therefore, for the convenience of the reader, we are republishing this document, as set forth below:

Under the provisions of Pub. Law 89–306, the Secretary of Commerce is authorized to establish uniform Federal ADP standards. A proposed standard on code extension techniques in 7 or 8 bits that is based upon the Federal adoption of voluntary industry standards which were developed by the American National Standards Institute and the International Organization for Standardization is being recommended for Federal use. This proposed standard specifies methods of extending ASCII (the American Standard Code for Information Interchange) (FIPS–1) by remaining in either a 7 bit environment or increasing to an 8 bit environment and building upon the structure of ASCII to describe

V 39 I 95
MAY 15 74
XUM

various means of extending the control and graphic sets of the code.

Prior to the submission of a final endorsement of this proposal to the Secretary of Commerce for approval, it is essential to assure that proper consideration is given to the needs and views of manufacturers, the public and state and local governments. The purpose of this notice is to solicit such views.

The proposed Federal Information Processing Standard contains two basic sections: (1) An announcement section which provides information concerning the applicability, implementation, and maintenance of the standard; and (2) a specification section which deals with the technical requirements of the standard. The first section is provided in its entirety in this notice.

Interested parties may obtain copies of the technical specifications from, and may submit comments to, the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washing, D.C. 20234, on or before August 7, 1974.

Dated: May 2, 1974.

RICHARD W. ROBERTS,
Director.

DRAFT FOR COORDINATION

FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATION------

Date----------

ANNOUNCING THE STANDARD FOR CODE EXTENSION TECHNIQUES IN 7 OR 8 BITS

Federal Information Processing Standards Publications are issued by the National Bureau of Standards pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Pub. L. 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15 CFR (Code of Federal Regulations).

Name of standard. Code Extension Techniques in 7 or 8 Bits.

Category of standard. Hardware Standard, Interchange Codes and Media.

Explanation. This standard specifies methods of extending the 7-bit code of ASCII (American Standard Code for Information Interchange) (FIPS 1), remaining in a 7-bit environment or increasing to an 8-bit environment, building upon the structure of ASCII to describe various means of extending the control and graphic sets of the code. It also describes techniques for constructing codes related to ASCII so as to allow application dependent usage without preventing the interchangeability of their data. It also describes 8-bit codes for general information interchange in which ASCII is a subset.

Approving authority. Secretary of Commerce.

Maintenance agency. Institute for Computer Sciences and Technology, National Bureau of Standards. The National Bureau of Standards will also maintain and disseminate a registery of ASCII-related 7-Bit Escape Sequences and 8-Bit Codes used by Federal agencies. Department or agency requests for code extensions may be submitted to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234.

Cross index. a. FIPS PUB 1, Federal Standard Code for Information Interchange.

b. American National Standard X3.4-1968, Code for Information Interchange (ASCII).

c. International Standard ISO 646-1973, 7-Bit Coded Character Set for Information Processing Interchange.

d. International Standard ISO 2022-1973, Code Extension Techniques for Use with the ISO 7-Bit Coded Character Set.

e. Draft International Standard ISO/DIS 2375, Data Processing-Procedure for Registration of Escape Sequences.

Applicability. This standard is applicable to coded character situations which require control functions and/or graphic symbols that are not included in the 128 characters of ASCII, ranging from one such additional character up to extensive families of control and graphic sets, especially where interchange is required to be accomplished in an ASCII-compatible environment.

Implementation schedule. This standard becomes effective one year after the publication date of this FIPS PUB. All applicable coded character sets designed or specified after this date must be in conformance with this standard unless a waiver has been obtained in accordance with the procedure described below. Exceptions to this standard are made in the following cases:

a. For coded character sets installed or on order prior to the effective date of this FIPS PUB.

b. Where procurement actions are into the solicitation phase (i.e., Request for Proposals or Invitation for Bids have been issued) on the effective date of this FIPS PUB.

Waiver procedure. Heads of agencies may waive the provisions of the implementation schedule. Proposed waivers relating to the procurement of non-conforming coded character sets will be coordinated in advance with the National Bureau of Standards. Letters should be addressed to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234. They should describe the nature of the waiver and set forth the reasons therefor.

Sixty days should be allowed for review and response by the National Bureau of Standards. The waiver is not to be made until a reply from the National Bureau of Standards is received; however, the final decision for granting the waiver is a responsibility of the agency head.

Specifications. This standard adopts in whole American National Standard X3.41-Code Extension Techniques for Use With the 7-Bit Coded Character Set of ASCII, which was developed and approved by the American National Standards Institute.

Qualifications. It is not the intention of this standard that all instances of its application accommodate all of its provisions. It is not intended that any one representation be implemented to the exclusion of any other. Further, it is not intended that all applicable devices implement the full set of control functions and/or graphic representations implied by this standard. A partial implementation to meet specific requirements is acceptable provided that the coded representations of those selected control or graphic characters are in conformance with this standard.

Special information. The description of code extension techniques is contained in four interrelated sections:

a. The extension of the 7-bit code remaining in a 7-bit environment;

b. The structure of a family of 8-bit codes;

c. The extension of an 8-bit code remaining in an 8-bit environment; and

d. The relationship between the 7-bit code and an 8-bit code.

This standard provides for the addition of characters to the 128 provided by the structure of the 7-bit code in the following ways:

a. Additional single controls;

b. Additional sets of 32 control characters;

c. Additional sets of 94 graphic characters;

d. Sets of more than 94 graphic characters (multiple byte sets).

Appendices to this standard present pictorial representations of 7-bit and 8-bit code extensions, as well as technical discussions of the interaction of code extension with multiprogramming and/or multiprocessing environments, and system start-up and restart.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Center for Disease Control

COAL MINE HEALTH RESEARCH ADVISORY COUNCIL

Notice of Meeting

Pursuant to Pub. L. 92-463, the Director, Center for Disease Control, announces the meeting date and other required information for the following National Advisory body of the National Institute for Occupational Safety and Health which is scheduled to assemble during the month of June 1974.

Committee name	Date, time, place	Type of meeting and/or contact person
Coal Mine Health Research Advisory Council.	June 3, 1974, 9 a.m. Conference Room G Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open—9 a.m.-3 p.m. Closed remainder of meeting. Contact: Dr. Raymond T. Moore, NIOSH, Room 3-50, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md. Code: 301-443-2100.

Purpose: The Council is charged with advising the Secretary, Department of Health, Education, and Welfare on matters involving or relating to coal mine health research, including grants and contracts for such research.

Agenda: From 9 a.m. to 3 p.m. on June 3, the Council will be open for discussion of progress reports on second round medical examinations under the Federal Coal Mine Health and Safety Act of 1969, presentation of certificates to retiring members, coal mine health research program for fiscal year 1975, criteria for the diagnosis of disability and death from coal workers' pneumoconiosis, pulmonary function determination cooperative program, intermediate report on use of computer in X-ray analysis. From 3 p.m. through the end of the meeting, the Council will review research grant applications and will not be open to the public, in accordance with the determination by the Director, Center for Disease Control, pursuant to the provisions of Pub. L. 92-463, section 10(d).

Agenda items are subject to change as priorities dictate.

A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: May 6, 1974.

DAVID SENCER,
Director,
Center for Disease Control.

[FR Doc.74-11189 Filed 5-14-74;8:45 am]

Food and Drug Administration

ANTIEMITIC COMBINATION DRUG

Permission for To Remain on the Market

A notice was published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623) informing manufacturers of prescription drugs for human use of the future schedule for implementation of the drug efficacy study. That notice listed certain drugs, together with the justification for their medical need, which may remain on the market pending completion of scientific studies to determine effectiveness, and providing for future additions to or deletions from that list.

In the FEDERAL REGISTER of July 8, 1972 (37 FR 13489), the Food and Drug Administration published its conclusions (DESI 10598) pursuant to evaluation of a report received from the National Academy of Sciences—National Research Council, Drug Efficacy Study Group on Bendectin Tablets containing dicyclomine hydrochloride, doxylamine succinate, and pyridoxine hydrochloride, stating that this combination drug product was regarded possibly effective for nausea and vomiting of pregnancy. Clinical studies thus far submitted by the sponsor have not conclusively shown that this combination fulfills the requirements of § 3.86—Fixed Combination Presciption Drugs for Humans. Another study is ongoing and is expected to provide a basis for a definitive conclusion concerning the effectiveness of the combination. In view of the fact that this is the only product on the market indicated for nausea and vomiting of pregnancy, the Commissioner concludes that it may remain available pending completion and review of the studies. Accordingly, a new section is added to the list of drugs which may remain on the market (paragraph 3 of the notice of December 14, 1972, as amended), to read as follows:

XVI. ANTIEMETIC COMBINATION DRUG

A FEDERAL REGISTER announcement published July 8, 1972 (37 FR 13489) (DESI 10598) stated that Bendectin Tablets (dicylomine hydrochloride, doxylamine succinate, and pyridoxine hydrochloride) was regarded possibly effective for its recommended use in nausea and vomiting of pregnancy. Clinical studies ongoing are expected to provide a basis for a definitive conclusion concerning the effectiveness of this combination product. In view of the fact that this is the only product available indicated for nausea and vomiting of pregnancy, the Commissioner concludes that the product may remain on the market labeled as less-than-effective (possibly effective) for nausea and vomiting of pregnancy pending completion and review of clinical studies to determine its effectiveness.

Every manufacturer or distributor of such combination who intends to, but has not already begun studies required to determine effectiveness or who has begun studies but has not yet discussed the protocols with the Food and Drug Administration, is required to communicate with the Division of Neuropharmacological Drug Products (HFD-120), Office of Scientific Evaluation, Bureau of Drugs on or before July 15, 1974 to discuss and agree to undertake the studies necessary to justify continued marketing of the product.

(Secs. 505, 701, 52 Stat. 1052-1053, as amended; (21 U.S.C. 355, 371)), the Administrative Procedure Act (5 U.S.C. 553, 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: May 8, 1974.

SAM D. FINE,
Associate Commissioner
for Compliance.

[FR Doc.74-11171 Filed 5-14-74;8:45 am]

FD&C RED NO. 2 FOOD COLORING

Briefing of Food and Drug Administration Consultants and Notice of Public Meeting

In the FEDERAL REGISTER of May 14, 1973 (38 FR 12642), the Food and Drug Administration announced a meeting on FD&C Red No. 2 to be held on May 16, 1973, for the purpose of briefing an ad hoc advisory group of consultants concerning the relevant background and scientific material pertinent to the question of whether the adverse results originally obtained in gavage studies of FD&C Red No. 2 performed by the Food and Drug Administration could properly be extrapolated to humans. At that meeting, the following individuals served as ad hoc consultants:

Gloria Sarto, M.D., University of Wisconsin Hospitals, Department of Obstetrics and Gynecology, Madison, WI 53706.

Ivan Danhof, M.D., Ph.D., Professor of Physiology, University of Texas, Southwestern Medical School, Dallas, TX 75235.

Leon Golberg, Ph.D., The Institute of Experimental Pathology and Toxicology, Albany Medical College, Albany, NY 12208.

James G. Wilson, M.D., Ph. D., Children's Hospital Research Foundation, Cincinnati, OH 45229.

E. Noel McIntosh, M.D., Department of Population Science, Harvard School of Public Health, 665 Huntington Ave., Boston, MA 02115.

The data obtained by Food and Drug Administration scientists and other independent studies and views were presented. After reviewing all of these relevant materials, the consultants concluded that further studies were needed in order to establish the degree to which differences in methodology could influence the outcome of experimental work.

A study protocol was developed by the ad hoc advisory group of consultants, and it was agreed that tests following this protocol would be performed by Food and Drug Administration scientists who had performed the first study, the scientists representing the Interindustry Color Task Force, and scientists at the National Center for Toxicological Research having particular expertise in teratology and biostatistics. These studies have now been completed, and the Commissioner has determined that the results shall be presented to the same group of ad hoc consultants in order to obtain their evaluations and advice prior to the promulgation of a final regulation in this matter.

Accordingly, a meeting has been scheduled for Thursday, June 6, 1974, in Room 1813, 200 C Street SW., Washington, D.C., beginning at 9 a.m. The results of each portion of the collaborative study as well as the study in its totality, using the standard protocol as well as the relevant background scientific material will be presented initially. Other interested individuals and organizations will then have an opportunity to make presentations on this same subject. Presentations will be limited to the issue of results of studies comparing administration of the color by gavage and administration in food. Any presentations should be made by scientific experts competent in the fields relevant to this issue.

Any interested person who wishes to be assured of an opportunity to make an oral presentation at this briefing must so inform Dr. Ruth L. Kirschstein, Deputy Associate Commissioner for Science, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852 (telephone 301-443-1587), of that intention by close of business on Thursday, May 30, 1974. The volume and nature of material to be presented will determine the time allotted to each such participant making a request by that date, and this allocation will be announced at the time of the meeting. Other interested persons will be allowed to make oral presentations to the extent that time permits. Any interested persons may also present written data or views which shall be considered. Six copies of such written presentations should be addressed to Dr. Kirschstein at the address given above.

Dated: May 10, 1974.

SAM D. FINE,
Associate Commissioner
for Compliance.

Office of Education

NATIONAL ADVISORY COUNCIL ON EDUCATION PROFESSIONS DEVELOPMENT

Notice of Public Meeting

Notice is hereby given, pursuant to section 10(a)(2), Pub. L. 92-463, that the next meeting of the National Advisory Council on Education Professions Development will be held on Wednesday, June 5, 1974, 9 a.m. to 5 p.m.; Thursday, June 6, 1974, 9 a.m. to 5 p.m.; and Friday, June 7, 1974, 9 a.m. to 12:30 p.m., local time, in the New York Room of the Stat-

V 39 I 95 MAY 15 74 XUM

ler Hilton Hotel, Sixteenth Street between K and L Streets NW., Washington, D.C.

The National Advisory Council on Education Professions Development is established under section 502 of the Education Professions Development Act (Pub. L. 90–35). The Council is charged with the review of the Education Professions Development Act and of all other Federal programs for the training and development of educational personnel.

The meeting of the Council shall be open to the public. The proposed agenda includes discussion of in-service education, educational manpower forecasting, the Teacher Corps, and legislative developments related to the training of educational personnel. Records shall be kept of all Council proceedings and shall be available for public inspection at the Council office, located at 1111—20th Street, NW., Room 308, Washington, D.C. 20036.

Signed at Washington, D.C., on May 10, 1974.

JOSEPH YOUNG,
Executive Director.

[FR Doc.74–11182 Filed 5–14–74;8:45 am]

NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION

Notice of Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), that the next meeting of the National Advisory Council on Adult Education will be held on June 6–7, 1974, from 9 a.m. to 4:30 p.m., and on June 8, 1974, from 8:30 a.m. to 12 noon, at the Gramercy Inn, 1616 Rhode Island Avenue NW., Washington, D.C.

The National Advisory Council on Adult Education is established under section 311 of the Adult Education Act (80 Stat. 1216; (20 U.S.C. 1201)). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Council shall be open to the public.

The proposed agenda includes:

Action on Senate and House thrusts in adult education—H.R. 69, S. 1539, and related legislation.

Election of Council officers.

Meetings and reports of the Council's Committees on Governmental Relations, Planning and Publications, and Research.

Adult education actions within USOE—Deputy Commissioner for the Bureau of Occupational and Adult Education.

Council staffing and FY–75 budget.

Development of 309 priorities for FY–75.

Records shall be kept of all Council proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Adult Education located in Room 323, Pennsylvania Bldg., 425 13th Street NW., Washington, D.C. 20004).

Signed at Washington, D.C. on May 8, 1974.

GARY A. EYRE,
Executive Director, National Advisory Council on Adult Education.

Office of the Secretary

SECRETARY'S ADVISORY COMMITTEE ON THE RIGHTS AND RESPONSIBILITIES OF WOMEN

Notice of Renewal

I hereby determine that renewal of the Secretary's Advisory Committee on the Rights and Responsibilities of Women beyond May 3, 1974, is in the public interest in connection with the performance of duties imposed on the Department by law, that such duties can best be performed through the advice and counsel of this group, that no other committee in HEW can suitably perform these duties, and that the committee is appropriately balanced. Therefore, the committee is continued for a period of two years.

Dated: May 2, 1974.

CASPAR W. WEINBERGER,
Secretary.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CCGD5–74–05R]

PRESIDENT'S CUP REGATTA, WASHINGTON, D.C.

Special Local Regulations

Under the authority of the Act of April 28, 1908 (35 Stat. 69) as amended, and 33 CFR 100.35, as amended, this notice promulgates special local regulations for the President's Cup Regatta. These special local regulations are established to insure the safety of life on the Potomac River at Washington, D.C., immediately before, during, and immediately after this regatta. Since these special rules must be made effective in less than 30 days to apply at the time of the scheduled event, I find that notice and public procedure on the issuance of these rules is impracticable and contrary to the public interest and that they may be made effective in less than 30 days from publication.

(a) *Location.* The area subject to these regulations is those waters enclosed by a line drawn from the southern tip of Haines Point northwards along the eastern seawall to a point 1,000 feet from the southern tip of Haines Point; thence easterly to a point 400 feet from the seawall; thence in a southerly direction to a point 1,400 feet distant, thence along a line of bearing 240° T. to the Virginia shore, upstream thence along the Virginia shoreline to the Penn Central Railroad bridge between Washington, D.C., and Arlington, Va.; thence 034° T. to the Potomac Park-Potomac River shoreline; thence along the Potomac Park-Potomac River shoreline to the southern tip of Haines Point.

(b) *Regulations.* (1) Except for participants in the President's Cup Regatta or persons or vessels authorized by the Coast Guard patrol officer, no person or vessel may enter or remain in the area specified in paragraph (a) of these regulations.

(2) The operator of any vessel in the immediate vicinity of the area specified in paragraph (a) above of these regulations shall:

(i) Stop his vessel immediately upon hearing five or more short blasts of a horn or whistle from any vessel displaying a Coast Guard emblem; and

(ii) Proceed as directed by any Coast Guard officer or petty officer.

(3) Any spectator vessel may anchor outside of the area specified in paragraph (a) of these regulations.

(4) The Coast Guard patrol officer is a commissioned officer of the Coast Guard, who has been designated by the Commander, Fifth Coast Guard District.

(5) These regulations and other applicable laws and regulations are enforced by Coast Guard officers and petty officers on board Coast Guard, public, and private vessels displaying the Coast Guard emblem.

(Sec. 1, 35 Stat. 69 as amended, sec. 6(b)(1) 80 Stat. 937; (46 U.S.C. 454, 49 U.S.C. 1655 (b)(1)); 33 CFR 100.35, 49 CFR 1.46(b).)

Effective dates. These regulations are effective from 9 a.m. e.d.s.t. until 6 p.m. e.d.s.t. on June 6, 7, 8, and 9, 1974.

Dated: May 6, 1974.

ROSS P. BULLARD,
Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

AMERICAN CYANAMID CO.

Establishment of Temporary Tolerances

American Cyanamid Co., Post Office Box 400, Princeton, NJ 08540, submitted a petition (PP 4G1453) requesting establishment of temporary tolerances for residues of the herbicide 1,2-dimethyl-3,5-diphenylpyrazolium methyl sulfate in or on barley straw at 0.5 part per million; barley grain at 0.05 part per million (negligible residue); and in meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep at 0.02 part per million (negligible residue).

Subsequently, the petitioner amended the petition by increasing the proposed temporary tolerance for negligible residues in the meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep from 0.02 to 0.05 part per million.

It has been determined that these temporary tolerances will protect the public health. They are therefore established on condition that the herbicide be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the American Cyanamid Co. name.

These temporary tolerances expire May 8, 1975.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; (21 U.S.C. 346a(j))), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated: May 8, 1974.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.74-11133 Filed 5-14-74;8:45 am]

[OPP-32000/59]

NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION; DATA TO BE CONSIDERED IN SUPPORT OF APPLICATIONS

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-37, East Tower, 401 M Street SW., Washington, D.C. 20460.

On or before July 15, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held for the 60-day period before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received within 60 days, the applicants against whom the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 15, 1974.

APPLICATIONS RECEIVED

EPA Reg. No. 241-175. American Cyanamid Company, Agricultural Division, P.O. Box 400, Princeton, New Jersey 08540. *Cygon Systemic 25 Insecticide.* Active Ingredients: Dimethoate (O,O-dimethyl S-(N-methylcarbamoylmethyl) phosphorodithioate) 25.0 percent. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 18194-R. Anscott Chemical Industries, Inc., Allwood, P.O. Box 566, Clifton, New Jersey 07012. *De-moth Liquid Moth-Proofer.* Active Ingredients: Diethyl Diphenyl Dichloroethane 19.36 percent; Related Reaction Products 2.64 percent; Petroleum Distillates 70.68 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 9582-G. Associated Chemicals Corporation, 231 Oak Street, Quincy, Illinois 62301. *Two-In-One Disinfectant Cleaner.* Active Ingredients: Didecyl dimethyl ammonium chloride 4.5 percent; Tetrasodium ethylenediamine tetraacetate 2.0 percent; Sodium carbonate 1.0 percent; Sodium metasilicate, anhydrous, 0.5 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 11556-UG. Chemagro Division of Baychem Corporation, Box 4913, Kansas City, Missouri 64120. *Sendran Concentrate No. 2 An Insecticide for Formulating Use.* Active Ingredients: o-Isopropoxyphenyl methylcarbamate 75.0 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 11556-UE. Chemagro Division of Baychem Corporation, Box 4913, Kansas City, Missouri 64120. *Sendran Concentrate No. 1 An Insecticide for Formulating Use.* Active Ingredients: o-Isopropoxyphenyl methylcarbamate 75.0 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 9143-LR. Chemscope Corporation, 1909 Hi-Line Drive, P.O. Box 10752, Dallas, Texas 75207. *Chemscope Aerosol Insecticide Pyrethrum.* Active Ingredients: Pyrethrins 0.6 percent; Technical Piperonyl Butoxide 1.4 percent; Petroleum Distillate 13.0 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 1066-9. Cre-O-Tox Chemical Co., 2670 Broad Avenue, Memphis, Tennessee 38112. *Cre-O-Tox Chlordane 8 Concentrate.* Active Ingredients: Technical Chlordane 72.0 percent; Petroleum Distillate 21.0 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 682-TT. Crop King, Box 574, Yakima, Washington 98907. *Crop King ZL-C.* Active Ingredients: Ziram (Zinc dimethyldithiocarbamate) 33.0 percent; Lindane (Gamma Isomer of Benzene Hexachloride) 5.0 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 33798-R. Dixon Brothers, 330 West 41st Street, Jacksonville, Florida 32208. *Tool Life.* Active Ingredients: Rose Oil, Petroleum solvent #10, Methyl Salicylate. Total 69.28 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 11037-RR. Hacienda Enterprises 565 Charles Street, San Jose, California 95112. *Hacienda Malathion 50 percent.* Active Ingredients: Malathion 50.0 percent; Xylene 45.0 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 3432-GT. N. Jonas & Co., Inc., 1919 East Boston Street, Philadelphia, Pennsylvania 19125. *"POW"—Super Chlorinator.* Active Ingredients: Sodium Dichloro-s-triazinetrione 100 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 3432-GA. N. Jonas & Co., Inc., 1919 East Boston Street, Philadelphia, Pennsylvania 19125. *Maxi-Clor Stabilized Chlorine Concentrate Sticks.* Active Ingredients: Trichloro-s-Triazinetrione 99 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 10462-E. Multi-Chemical Products Inc., G.P.O. Box 2380, San Juan, Puerto Rico 00936. *Diacidon F-6 Aerosol Kills Flies, Mosquitoes & Roaches.* Active Ingredients: Petroleum Distillates 58.00 percent; Piperonyl Butoxide 1.60 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 1258-889. Olin Corporation, Agricultural Division, P.O. Box 991, Little Rock, Arkansas 72203. *Omacide—645 Industrial Microbiostat.* Active Ingredients: Zinc 2-pyridinethiol 1-Oxide 20 percent; 4'5-Dibromosalicylanilide 36 percent; 3,4'5-Tribromosalicylanilide 36 percent; Other brominated salicylanilides 7 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 892-EI. Pioneer Manufacturing Company, 3053 East 87th Street, Cleveland, Ohio 44104. *Pioneer Control—35 Germicidal Cleaner.* Active Ingredients: Didecyl dimethyl ammonium chloride 4.5 percent; Tetrasodium ethylenediamine tetraacetate 2.0 percent; Sodium carbonate 1.0 percent; Sodium metasilicate anhydrous 0.5 percent. Method of Support: Application proceeds under 2(a) of interim policy.

EPA File Symbol 9195-G. Royal Bond, Inc., 1919 North Broadway, St. Louis, Missouri 63102. *Royal Bond Vapocide Vaporizing Insecticide.* Active Ingredients: Petroleum Distillate 16.84 percent; N-Octyl Bicloheptene Dicarboximide 1.66 percent; Technical Piperonyl Butoxide 1.00 percent; Pyrethrins 0.50 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 11656-RR. Western Farm Service, Inc., 2401 Crow Canyon Road, San Ramon, California 94583. *Toxaphene 8-E Emulsifiable Liquid.* Active Ingredients: Toxaphene (Technical Chlorinated Camphene) (Chlorine 67 percent to 69 percent) 72 percent; Aromatic Petroleum Hydrocarbons 22 percent. Method of Support: Application proceeds under 2(c) of interim policy.

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

NOTICE OF COMMITTEE MEETINGS

Pursuant to the provisions of section 10 of Pub. L. 92-463, effective January 5, 1973, notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, June 6, 1974
Thursday, June 13, 1974
Thursday, June 20, 1974
Thursday, June 27, 1974

The meetings will convene at 10 a.m. and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street, NW., Washington, D.C.

The committee's primary responsibility is to study the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the committee will consider proposed plans for implementation of Pub. L. 92-392, which law establishes pay systems for Federal prevailing rate employees.

The meetings will be closed to the public on the basis of a determination under section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) that the closing is necessary in order to provide the members with the opportunity to advance proposals and counter proposals in meaningful debate on issues related solely to the Federal Wage System with the view toward ultimately formulating advisory policy recommendations for the consideration of the Civil Service Commission.

However, members of the public who wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the committee's attention. Additional information concerning these meetings may be obtained by contacting the Chairman, Federal Prevailing Rate Advisory Committee, Room 5451, 1900 E Street, NW., Washington, D.C. 20415.

Dated: May 9, 1974.

DAVID T. ROADLEY,
Chairman, Federal Prevailing Rate Advisory Committee.

[FR Doc.74-11158 Filed 5-14-74;8:45 am]

FEDERAL POWER COMMISSION

[Docket Nos. E-8137, E-8139]

BOSTON EDISON CO.

Order Accepting Initial Rate Schedules, Initiating an Investigation Under Section 206 of the Federal Power Act and Granting Waiver of the Notice Requirements

MAY 9, 1974.

On April 17, 1973, Boston Edison Company (Edison) submitted two separate system sales agreements.[1] In Docket No.

[1] The filings were completed on Aug. 27, 1973, which is considered the official filing date.

V 39 I 95 MAY 15 74 XUM

E–8137, the agreement provided for the sale of system capacity by Edison to Fitchburg Gas and Electric Light Company (Fitchburg) [2] and in Docket No. E–8139, Edison agreed to sell system capacity to Public Service Company of New Hampshire (PSCNH).[3]

Edison states that the sale of system capacity and related energy is as follows:

Second party	Amount of capacity (megawatts)
PSNH:	
Dec. 9, 1972–Apr. 30, 1973	100
Nov. 1, 1973–Apr. 30, 1974	40
Fitchburg:	
Dec. 9, 1972–Sept. 30, 1981	40

Edison states that the agreements provide that the amount of contracted capacity will be reduced by the ratio of the reduced capacity of the Pilgrim Unit No. 1 to such unit's net demonstrated capability. Furthermore, Edison states that whenever the Pilgrim Unit No. 1 is shut down due to scheduled maintenance, Fitchburg and PSNH will be entitled to purchase their contract capacity at Edison's NEPOOL scheduled outage rate for Pilgrim Unit No. 1 plus 2.3 mills/kWh.

Edison also states that the power purchased under the subject agreements will be wheeled to Fitchburg and PSNH over the facilities of the New England Power Company (NEPCO).[4] Edison states that the agreements provide for the charges for operation and maintenance, local taxes, insurance costs and other expenses to be the actual costs for the contract year. The billing will be on an estimated basis, with adjustments after actual costs have been determined. Finally, Edison requested a waiver of the 30 day prior notice requirements to permit an effective date of December 9, 1972.

The filing of April 17, 1973, was noticed on May 8, 1973, setting May 30, 1973, as the due date for responses. No comments protests, or petitions to intervene have been received in either docket.

Since both of the initial service contracts with PSNH have expired, no useful purpose would be served by instituting an investigation thereof in Docket No. E–8139 under section 206 of the Federal Power Act. However, our review of the agreement with Fitchburg in Docket No. E–8137 indicates inter alia, that the proposed energy charge, over-all return and the cost-basis of the rate may be excessive and therefore the proposed rates may be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful. Accordingly, we shall institute an investigation under section 206 of the Federal Power Act in Docket No. E–8137 to determine the justness and reasonableness of the filed initial Rate Schedule, FPC No. 71. Furthermore, our review of both dockets indicates that a waiver of the 30 day notice requirement of § 35.3 of the Commission's regulations is appropriate. Accordingly, we shall accept the proposed rate schedules for filing, to become effective as of December 9, 1972, the requested effective date.

The Commission finds: (1) It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act that an investigation be instituted under section 206 thereof concerning the lawfulness of Edison initial rate schedule filing in Docket No. E–8137 (FPC No. 71).

(2) The Commission finds good cause to allow Edison's requested waiver of the 30 day notice requirement to permit an effective date of December 9, 1972.

The Commission orders: (A) Pursuant to the authority of the Federal Power Act, particularly section 206 thereof, and the Commission's rules and regulations, and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held on August 13, 1974, at 10:00 A.M., EDT, in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, concerning the lawfulness of Edison's proposed rates in Docket No. E–8137.

(B) Edison shall serve its prepared testimony and exhibits in Docket No. E–8137 on or before June 18, 1974. The Commission Staff shall serve its prepared testimony and exhibits on or before July 16, 1974. Any rebuttal evidence by Edison shall be served on or before August 6, 1974.

(C) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5 (d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in the Commission's rules of practice and procedure.

(D) Nothing contained herein should be construed as limiting the rights of the parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to § 1.18 of the Commission's rules of practice and procedure.

(E) Edison's proposed system sales agreements, filed on April 17, 1973, in Docket Nos. E–8137 and E–8139 are accepted for filing to be effective on December 9, 1972, subject to the terms and conditions of this order.

(F) Waiver of the notice requirements under § 35.3 of the Commission's regulations to permit an effective date of December 9, 1972, is hereby granted.

(G) The Secretary shall cause prompt publication of this notice.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Project No. 2742]

COPPER VALLEY ELECTRIC ASSOCIATION, INC.

Application of Preliminary Permit Unconstructed Project

MAY 8, 1974.

Public notice is hereby given that application for a preliminary permit was filed March 8, 1974, under the Federal Power Act (16 U.S.C. §§ 791a–825r) by Copper Valley Electric Association, Inc., Glennallen, Alaska (correspondence to: James F. Palin, Manager, Copper Valley Electric Association, Inc., Post Office Box 45, Glennallen, Alaska 99588) for proposed Project No. 2742, to be known as (Solomon Gulch Hydroelectric Project), at the outlet of Solomon Lake, Third Judicial District, State of Alaska, near the City of Valdez.

The proposed Solomon Gulch Hydroelectric Project would consist of: the principal dam, with a crest elevation of approximately 700 ft. (U.S.G.S.), to be erected at the outlet of Solomon Lake; an auxiliary dam to be located approximately 1000 feet east of the lake outlet; a steel penstock 4 feet in diameter and approximately 4400 feet in length; a powerhouse located at tidewater near the mouth of Solomon Gulch, containing two 6000 kW generating units; approximately 7.5 miles of transmission line or approximately 3.5 miles of submarine cable; and a substation located in the City of Valdez. The proposed project would allow applicant to provide lower-cost electrical energy for the growing system now served and to extend service beyond the present area. No construction is authorized under a preliminary permit.

Any person desiring to be heard or to make protest with reference to said application should on or before July 22, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirement of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

MARY B. KIDD, *Acting Secretary.*

[Docket Nos. RP74–22, RP74–23]

EL PASO NATURAL GAS CO. AND EL PASO NATURAL GAS CO. AND NORTHWEST PIPE LINE CORP.

Extension of Time and Postponement of Hearing

MAY 7, 1974.

On April 30, 1974, El Paso Natural Gas Company filed a motion for continuance of the procedural dates fixed by Orders issued April 22, 1974, in the above-designated matters. The motion states that Staff Counsel and all parties consent to the motion.

Upon consideration notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of further direct evidence by El Paso and Northwest, May 7, 1974.
Service of answering evidence of interveners and further answering evidence of Commission Staff to El Paso and Northwest's further direct evidence, May 21, 1974.
Service of Staff Rebuttal to intervener's answering evidence and rebuttal evidence of El Paso and Northwest, June 11, 1974.
Hearing, June 25, 1974 (10 a.m. e.d.t.).

MARY B. KIDD, *Acting Secretary.*

[Docket No. CI73–784]

BLAKE HAMMAN

Extension of Time and Postponement of Hearing

MAY 8, 1974.

On April 26, 1974, Blake Hamman filed a motion for a continuance of the hearing and for an extension of time within which to serve testimony fixed by Order issued March 25, 1974, in the above-designated matter. The motion states that the interveners have no objection to the motion.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Applicant's Testimony, May 30, 1974.
Hearing, June 20, 1974 (10 a.m. e.d.t.).

[Docket No. E–8212]

MONTANA-DAKOTA UTILITIES CO.

Amendment to Application

MAY 9, 1974.

Take notice that on May 6, 1974, Montana-Dakota Utilities Company filed a letter amendment to its application pursuant to Section 204 of the Federal Power Act seeking an order extending the time period for issuing short-term Promissory Notes authorized in Docket No. E–8212 from May 15, 1974 to May 15, 1975, and the final maturity date from May 14, 1975 to May 14, 1976.

Applicant is incorporated under the laws of the State of Bismarck, North Dakota, and is engaged in the gas and electrical utility business in the States of Montana, North Dakota, South Dakota and Wyoming.

The purpose of such extension of time is to permit Applicant to postpone the sale of First Mortgage Bonds and Preferred Stock. Although Applicant has scheduled a sale of First Mortgage Bonds and Preferred Stock for October, 1974, unsettled market conditions or high interest rates may make it desirable for Applicant to defer the sale of said securities until early 1975.

Any person desiring to be heard or to make any protest with reference to said amendment to said application should on or before May 15, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Comission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Comission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Comission's rules. The amendment to said application is on file with the Commission and available for public inspection.

MARY B. KIDD, *Acting Secretary.*

[Docket Nos. E–8641, E–8251, E–8169, E–8476]

NEW ENGLAND POWER COMPANY

Order Amending Suspension Period and Permitting Intervention

MAY 8, 1974.

New England Power Company (NEPCO) on February 26, 1974 tendered for filing a Petition for Emergency Relief in which it requested the acceptance of a proposed rate increase (Rate R–8) to be effective April 1, 1974. This was designated as Docket No. E–8641. Because it stated an emergency situation existed, NEPCO also requested waiver of §§ 35.13(b)(4)(i) and 35.13(b)(5)(i) to allow it to file for Rate R–8 without also filing detailed data to support its proposal. NEPCO stated such data would be filed on or before April 15, 1974.

The Commission, by its order issued March 29, 1974, stated it could not ascertain whether an emergency situation existed on the basis of the filing made by NEPCO and the responses made thereto.

Accordingly, the Commission ordered a conference to be held on April 5, 1974 at which time comments and responses from all interested parties were to be received for the Commission's review. The Commission further ordered that the proposed Rate R–8 be suspended for five months until September 1, 1974. This suspension was subject to such change as the Commission deemed appropriate after its reviews of the comments and responses received at the April 5, 1974 conference and examination of the detailed data filed by NEPCO on or before April 15, 1974. The Commission stated that the suspension period may be shortened should the Commission determine from its review of the information and data that an emergency exists. The Commission also ordered that Docket Nos. E–8641, E–8251, E–8169 and E–8476 be consolidated for purposes of hearing and decision and set procedural dates for the proceeding.

On April 5, 1974, the conference, which had been ordered in the March 29, 1974, order, was held. NEPCO stated that if the five-month suspension period for the proposed R–8 rate was not shortened, NEPCO would be unable to finance its present construction program. On April 9, 1974 NEPCO filed a "Petition for Reconsideration of Rate-8 Order at the Earliest Possible Time" in which it reasserted its position that an emergency situation exists which can only be alleviated by the immediate implementation of the Rate R–8. The NEPCO Municipal Customers [1] filed a Response to NEPCO Coverage Estimates on April 18, 1974 in which they assert that NEPCO would be able to continue financing necessary construction if the Rate R–8 were suspended until September 1, 1974. They urge the Commission not to alter the five month suspension so that adequate time be given to consider the supporting cost of service data to NEPCO's Rate R–8 filing. On April 24, 1974, the Rhode Island Consumers' Council filed an answer to NEPCO's Petition for Reconsideration in which it urges the Commission not to shorten the suspension period because it asserts NEPCO has failed to establish that an emergency situation exists requiring the extraordinary relief for which NEPCO has asked. Rhode Island Consumers' Council also filed a petition to intervene. NEPCO, on April 26, 1974, filed an Answer to the Response of the NEPCO Municipal Customers. In this Answer, NEPCO responds by stating the unfavorable position in which NEPCO's parent, New England Electric System, would be placed by having to sell a large offering of common stock in the near future to finance NEPCO's construction program and again asks for an April 1, 1974 effective date for Rate R–8. The NEPCO Municipal Customers also on April 26, 1974 filed an Initial Analysis of NEPCO Cost of Service. They contend in this pleading that the proposed rate increase is not justified by increased cost of service and that the suspension period should not be shortened.

Our review of the comments and responses received at the April 5, 1974 conference and the data filed by NEPCO on April 15, 1974 indicates that a shortened suspension period is necessary in order to allow NEPCO to continue to finance its construction program. To force NEPCO to defer its construction program could seriously impair its service reliability and increase construction costs considerably. Therefore, we will amend the suspension period for NEPCO's proposed R–8 rate to 45 days until May 15, 1974. However, we will also require NEPCO to submit within 60 days its plans for preventing a recurrence of the financial situation in which they represent themselves to be at present.

The Commission finds:

(1) The suspension period for NEPCO's proposed R–8 rate should be

[1] See Appendix A.

V 39 I 95 MAY 15 74 XUM

amended to 45 days to become effective as of May 15, 1974, as hereinafter ordered.

(2) Participation in this proceeding of the Rhode Island Consumers' Council may be in the public interest.

(3) NEPCO should be directed to submit within 60 days information concerning its future financing as hereinafter ordered.

The Commission orders: (A) The suspension period for NEPCO's proposed R–8 Rate, previously set in the Commission's March 29, 1974, order, is hereby amended, and pending hearing and a final decision thereon, NEPCO's proposed R–8 rate is suspended for 45 days and the use thereof deferred until May 15, 1974.

(B) The Rhode Island Consumer's Council is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenor shall be limited to matters affecting rights and interests specifically set forth in its petition to intervene, and *Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it may be aggrieved because of any order or orders issued by the Commission in this proceeding.

(C) NEPCO is hereby ordered to submit within 60 days of the issuance of this order detailed plans for preventing a recurrence of the financial situation in which they represent themselves to be at present. Such plans shall include: (1) two year detailed projection of its revenue and expenses and capital requirements as related to facilities as proposed to be installed and proposed financings, (2) a review of tentative financing plans and statements supporting the proposition that the proposed plans are in the public interest, and (3) a review of current coverage requirements, including plans to effect such revisions as may become appropriate.

(D) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[Docket No. E–8749]

PUBLIC SERVICE CO. OF OKLAHOMA

Proposed Change in Rates

MAY 7, 1974.

Take notice that on April 26, 1974, Public Service Company of Oklahoma (PSCO) tendered for filing a proposed supplement to its FPC Rate Schedule 186. The proposed supplement provides for sale by PSCO of 15 MW of capacity to Associated Electric Cooperative, Inc. (AEC) for the twelve-month period June 1, 1974 to May 31, 1975.

PSCO states that the supplement is similar to Supplement No. 6 to Rate Schedule FPC 161 which provides for sale by PSCO to Kansas Gas and Electric Company, with conditions, however, limiting total annual deliveries. The maximum daily delivery may also be limited under the agreement. AEC will purchase this energy for resale to City Utilities of Springfield, Missouri. PSCO requests an effective date of June 1, 1974, for the supplement.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. E–7711]

SOUTHWESTERN ELECTRIC POWER CO.

Order Approving Settlement Agreement

MAY 9, 1974.

On December 11, 1973, Presiding Administrative Law Judge Walter T. Southworth certified to the Commission a proposed settlement agreement (Agreement) purporting to resolve outstanding issues in this docket. The history of these proceedings is involved and lengthy and merit some extended discussion.

This docket results from a filing by Southwestern Electric Power Company (SWEPCO) on February 7, 1972, cancelling its FPC Rate Schedule No. 56. Under the terms of that rate schedule, SWEPCO purchased from and exchanged with Tex-La Electric Cooperative, Inc.[1] (Tex-La) hydro-electric power and energy purchased by Tex-La from the Southwestern Power Administration (SPA). As part of that same filing, SWEPCO tendered Rate Schedule REA under which it proposed to bill the member cooperatives without any exchange of hydro power and energy purchased by Tex-La from SPA. The proposed cancellation date of Rate Schedule No. 56 and effective date of Rate Schedule REA was February 29, 1972. Tex-La intervened and protested the cancellation of Rate Schedule No. 56.

On March 8, 1972, the Commission suspended the cancellation of Rate Schedule No. 56 until further order, although the suspension period was not to extend past the five months ending August 9, 1972. Subsequently,[2] the Commission ordered an expedited hearing on the issue, denied SWEPCO's request to set aside the suspension period and accepted Rate Schedule REA for filing to become effective August 9, 1972. The hearing was held on July 10 to 13, 1972.[3]

On July 11, 1972, Tex-La filed a motion requesting the Commission to require SWEPCO to continue the three party arrangement for exchange of power as had been in operation under Rate Schedule No. 56. SWEPCO responded stating that, without prejudice to its cancellation of Rate Schedule No. 56, it had no objection to a continuation of the three party arrangement. As part of the response, SWEPCO filed a new rate schedule designated SPA/Tex-La/SWEPCO which would continue the three party arrangement of Rate Schedule No. 56, although under a different rate structure and level.

By order of August 8, 1972, the Commission accepted Rate Schedule SPA/Tex-La/SWEPCO for filing effective August 9, 1972, subject to refund and permitted the withdrawal of Rate Schedule REA.

On March 20, 1973, the Commission established dates for the service of evidence and hearing on Rate Schedule SPA/Tex-La/SWEPCO and directed the company to file updated data in support of that rate schedule.[4] The Commission Staff filed a statement of position indicating that it found the rates, charges, and conditions proposed by SWEPCO in this rate schedule to be just and reasonable. The hearing was convened on November 20, 1973, and adjourned for settlement discussions. These discussions led to the Agreement presently before us.

The major elements of the Agreement are as follows:

(1) Rates: SWEPCO and the Commission Staff accept the rates in Rate Schedule SPA/Tex-La/SWEPCO as reasonable while Tex-La agrees to contest the rates no further.

(2) Terms and Conditions: SWEPCO and Tex-La/SWEPCO as reasonable while Tex-La particularly with respect to the procedures for establishing new delivery points and to evaluate the practicality of existing delivery points. Included in these are methods of payment, schedule of charges, and the conditions for abandonment.

(3) Conditions: The parties agree that this settlement is without prejudice to positions they have taken or may take in the Court of Appeals case presently pending (Footnote 4, supra).

The rates in Rate Schedule SPA/Tex-La/SWEPCO are based on a cost of serving Tex-La by SWEPCO of $4,827,148 for the twelve months ended December 31, 1972.[5] These rates will result in a rate of return to SWEPCO of 4.20 percent.

Notice of certification of the Agreement was issued on December 18, 1973, with comments to be filed on or before January 18, 1974. No comments have been received.

Based on our review of the record and the pleadings in this docket, including the Agreement itself, we conclude that the proposed settlement represents a reasonable resolution of the issues in this proceeding, is in the public interest, and should be approved.

The Commission finds: The proposed settlement agreement in this docket, filed by the parties on December 6, 1973, should be approved and made effective.

The Commission orders: (A) The proposed settlement agreement filed by the parties on December 6, 1973, is hereby incorporated by reference, approved and made effective as of August 9, 1972.

(B) Within 30 days of the issuance of this order, SWEPCO shall file supplements to its Rate Schedule SPA/Tex-La/SWEPCO in conformity with the settlement agreement as herein approved.

(C) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its staff, or any party or person affected by this order, in any proceeding now pending or hereinafter instituted by or against SWEPCO or any person or party.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

TEXAS EASTERN TRANSMISSION CO. AND TRANSCONTINENTAL GAS PIPELINE CORP.

Order Requiring Payment and Flow-Through of Refunds

MAY 9, 1974.

Texas Eastern Transmission Company (Texas Eastern) is currently retaining, pursuant to Commission order,[1] refunds due to Consolidated Gas Supply Corporation (Consolidated), Transcontinental Gas Pipeline Corporation (Transco) is similarly retaining refunds due to Consolidated pursuant to various Commission orders.[2]

On February 8, 1974, Consolidated transmitted a request that this Commission direct Texas Eastern and Transco to release to it various amounts which Consolidated alleged were due to it pursuant to the above mentioned orders. The request was noticed on April 3, 1974, with petitions to intervene or protests due on or before April 23, 1974. No petitions or protests were received. Consolidated stated that both Texas Eastern and Transco have informally expressed their willingness to pay such refunds to Consolidated and that Consolidated will in turn flow-through such refunds to its jurisdictional customers on a volumetric basis.

Our review of Consolidated's undertaking in the instant filing indicates that it satisfies the conditions in the orders involved for these refunds. Accordingly, we shall direct Texas Eastern and Transco to refund to Consolidated the amounts due and Consolidated to flow-through such refunds as hereinafter ordered.

The Commission finds: It is necessary and appropriate in the public interest and to aid in the enforcement of the Natural Gas Act that the refunds which are the subject of these proceedings which are due to Consolidated be paid by Texas Eastern and Transco to Consolidated and further that such refunds be flowed-through to Consolidated's jurisdictional customers on a volumetric basis.

The Commission orders: (A) Within 30 days of the issuance of this order, Texas Eastern and Transco shall pay to Consolidated the refund monies plus interest to the date of payment in these proceedings and shall file a report with this Commission showing the principal and interest so refunded.

(B) Within 30 days of the receipt of such payments from Transco and Texas Eastern, Consolidated shall refund such payments, on a volumetric basis, to its jurisdictional customers and shall file a report with this Commission showing the principal and interest refunded to each of Consolidated's jurisdictional customers.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

FEDERAL REGISTER, VOL. 39, NO. 95—WEDNESDAY, MAY 15, 1974

V 39 NO 95
MAY 15 74
XUM

Applicant proposes, pursuant to a letter agreement dated February 15, 1974, to transport approximately 8,000 Mcf at 15.025 psia of natural gas per day for Transco and Consolidated at 6.24 cents per Mcf through Applicant's existing offshore Cameron Lateral pipeline from West Cameron Block 235, offshore Louisiana, onshore to a proposed point of interconnection between Applicant's and Transco's pipeline system near Ragley, Louisiana. Construction of the facilities for the latter point of interconnection is proposed in Applicant's and Transco's joint application pending in Docket No. CP74–224, notice of which was published in the FEDERAL REGISTER on March 21, 1974 (39 FR 10661).

Applicant states that the instant transportation agreement is part of a general scheme to avoid the duplication of facilities for the transportation of natural gas purchased for resale in interstate commerce from the Block 118 and 119 Fields, East Cameron Area, offshore Louisiana. According to the letter agreement of February 15, 1974, if the volumes of gas redelivered by Applicant at the proposed Ragley interconnection are not equivalent to the volumes delivered to Applicant by Transco and Consolidated into Applicant's Cameron Lateral, such deliveries and redeliveries shall be balanced within thirty days, or such longer period as may be mutually agreeable to the parties. Other applications related to the instant proposal are as follows:

(1) A joint application in Docket No. CP74–249, notice of which was published in the FEDERAL REGISTER on April 8, 1974 (39 FR 12789), by Transco, Consolidated and Columbia Gulf Transmission Company (Columbia Gulf), for a certificate of public convenience and necessity authorizing the construction of a six-inch lateral pipeline to transport natural gas purchased or produced by various parties in the Block 118 and 119 Fields to Applicant's Cameron Lateral to be transported further, as proposed in the instant application; authorizing the exchange gas in order to enable Consolidated to transport gas committed to it from said fields eventually into its own pipeline; and authorizing the transportation of gas purchased by Applicant in the Block 118 and 119 Fields to Applicant's Cameron Lateral;

(2) An application in Docket No. CP74–265, notice of which was published in the Federal Register on ----------, 1974, (39 FR ------), by Transco for a certificate of public convenience and necessity authorizing the addition of the proposed Ragley interconnection as a delivery point from Consolidated for the exchange of gas transported, as proposed by Applicant in the instant application, for Consolidated's account;

(3) Applications for certificates of public convenience and necessity authorizing the sale for resale of natural gas in interstate commerce to Applicant by C & K Petroleum, Inc., et al., to Consolidated by CNG Producing Company, to Columbia Gas Transmission Corporation by Columbia Gas Development Company, and to Transco by Odeco, et al., which gas would be transported in the above described pipelines.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[Docket No. E–8025]

UPPER PENINSULA GENERATING CO.

Notice of Application

MAY 9, 1974.

Take notice that on February 19, 1974, Upper Peninsula Generating Company (Applicant), filed a Supplement and Amendment to its Application in Docket No. E–8025 with the Federal Power Commission seeking authority pursuant to Section 204 of the Federal Power Act to issue unsecured promissory notes not to exceed $15,000,000 face value at any one time outstanding.

The Applicant is incorporated under the laws of the State of Michigan with its principal business office at Houghton, Michigan and is engaged in the generation of electric energy for sale only to Upper Peninsula Power Company and the Cliffs Electric Service Company.

The Applicant proposes to issue unsecured promissory notes, payable to such bank or banks from which the Applicant may borrow for periods not exceeding twelve months from the date of original issue or renewal thereof, as the case may be, such notes, issued either originally or upon renewal from time to time, to have maturity dates not later than July 1, 1975.

The interest rate on the Notes to be issued to commercial banks not for resale to the public will be at a rate not exceeding one-quarter of one percent over the floating prime rate in effect from time to time, meaning by "prime rate" the lowest rate at which the banks to whom the notes are payable are then making short term commercial loans to depositors.

The proceeds from the sale of the Notes will be used, pending permanent financing, to finance the buildup of its coal stock to last through the non-navigation months to finance a portion of the Applicant's construction program for the years 1974 and 1975 having an estimated cost of $18,247,300.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 29, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become a party to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. E–8762]

YORK HAVEN POWER CO.

Initial Rate Filing

MAY 8, 1974.

Take notice that on May 2, 1974 York Haven Power Company (York Haven) tendered for filing as an initial rate an Agreement for the sale and purchase of power generated by FPC License Project No. 1888. This agreement is dated April 30, 1974 between York Haven and Metropolitan Edison (Met-Ed).

York Haven states that said Agreement provides for the sale of the total power and energy from Project No. 1888 to Met-Ed on a rate based upon York Haven's costs and expenses in generating and transmitting such power and energy. York Haven further states that a copy of this filing has been mailed to Met-Ed and interested state commissions.

York Haven requests an effective date of May 1, 1974 for said Agreement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 17, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

MARY B. KIDD,
Acting Secretary.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 10, 1974 (44 USC 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529).

SECURITIES AND EXCHANGE COMMISSION

[File No. 500–1]

BBI, INC.

Suspension of Trading

MAY 8, 1974.

The common stock of BBI, Inc., being traded on the American Stock Exchange and the Philadelphia-Baltimore-Washington Stock Exchange pursuant to provisions of the Securities Exchange Act of 1934 and all other securities of BBI, Inc. being traded otherwise than on a national securities exchange; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such exchanges and otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to sections 19(a)(4) and 15(c)(5) of the Securities Exchange Act of 1934, trading in such securities on the above mentioned exchange and otherwise than on a national securities exchange is suspended, for the period from May 9, 1974 through May 18, 1974.

By the Commission.

[70–5497]

DELMARVA POWER & LIGHT CO.

Proposed Issue and Sale of Bonds at Competitive Bidding

MAY 10, 1974.

Notice is hereby given that Delmarva Power & Light Company ("Delmarva"), 800 King St., Wilmington, Del. 19899, a registered holding company and a public-utility company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6 and 7 of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which are summarized below, for a complete statement of the proposed transaction.

Delmarva proposes to issue and sell, subject to the competitive bidding requirements of Rule 50, $35,000,000 principal amount of First Mortgage and Collateral Trust Bonds, ---- percent Series due June 1, 2004. The interest rate (which shall be a multiple of ⅛ of 1 percent) and the price to be paid to Delmarva, exclusive of accrued interest, (which shall be not less than 99 percent nor more than 101.75 percent of the principal amount thereof) for the bonds will be determined by the competitive bidding. The bonds will be issued under a Mortgage and Deed of Trust, dated October 1, 1943, between Delmarva and Chemical Bank, Successor Trustee, as heretofore supplemented and as to be further supplemented by a Forty-seventh Supplemental Indenture to be dated as of June 1, 1974 which includes a prohibition until June 1, 1979 against refunding the issue with the proceeds of funds borrowed at a lower effective interest cost.

It is stated that the net proceeds from the sale of the bonds will be applied toward the retirement of unsecured short-term notes issued primarily for interim financing of the construction programs of Delmarva and its subsidiary companies and for other corporate purposes. As of April 18, 1974, such short-term notes outstanding amounted to $64,100,-

V 39 I 95 MAY 15 74 XUM

000. Delmarva estimates its 1974 construction program at $99,625,000 and contemplates the sale of additional permanent securities and unsecured short-term notes during 1974.

The declaration states that the issuance and sale of the bonds is subject to the approval of The Public Service Commission of Delaware, and indicates that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction. The fees and expenses to be incurred by Delmarva in connection with the sale of the bonds will be in the aggregate amount of $114,000, which includes $38,000 for printing expenses, $10,000 for legal fees and $13,250 for accounting services.

Notice is further given that any interested person may, not later than June 3, 1974, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[812-3391]

TEMPORARY INVESTMENT FUND, INC.

Application for Exemption

MAY 8, 1974.

Notice is hereby given that Temporary Investment Fund, Inc. ("Applicant") 1730 Penn. Ave., Wash., D.C. 20006, an open-end diversified management investment company registered under the Investment Company Act of 1940 ("Act"), has filed an application pursuant to section 6(c) of the Act for exemption from the provisions of Rule 19b-1 under the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations therein, which are set forth below.

Applicant was organized on February 8, 1973, as a vehicle through which institutions can invest short-term cash reserves in a portfolio of so-called "money market" securities with maturities generally not exceeding 6 months including Treasury Bills, other obligations issued or guaranteed by the Federal Government, its agencies or instrumentalities, certificates of deposit, bankers' acceptances, commercial paper and variable amount demand master notes. Applicant's investment objectives are to seek current income and stability of principal.

Except in limited instances, it is not anticipated that Applicant will invest in securities with maturities exceeding six months, and in no event will such securities be purchased with a view to the realization of long-term capital gains. Assuming that this application is granted,, any capital gains realized by Applicant will be distributed currently.

The Comptroller of the Currency has determined that the purchase of shares of Applicant by national banks acting on behalf of their fiduciary accounts, is not contrary to applicable regulations if consistent with the purposes of the particular account and proper under the laws of the state in which the bank is located. Although Applicant is particularly designed for investment by banks, the Application states that it may be equally suitable for the investment of short-term funds held or managed by broker/dealers, investment counsellors, insurance companies, employee benefit plans, colleges, churches, charities, corporations and other institutions. However, Applicant's shares may not be purchased by individuals.

Loeb, Rhoades & Co. will serve as Administrator and Distributor of the Applicant and Provident National Bank will serve as Investment Adviser. Shares of Applicant will be sold and may be redeemed by shareholders on any business day at the net asset value per share. Net asset value will be determined once each day immediately after the declaration of dividends comprising the previous period's net income. Dividends will be declared daily and paid to shareholders monthly.

The minimum initial investment in Applicant is $100,000. Subsequent investments must be made in increments of $1,000, but an investor need not maintain any minimum investment. All funds will be invested in full and fractional shares. Shares must be paid for, and redemptions will be made, in Federal Funds. Stock certificates will not be issued unless requested in writing by a shareholder.

Rule 19b-1, as here pertinent, prohibits distributions of capital gains dividends more frequently than once a year. Applicant represents that it will generally not acquire portfolio securities with maturities exceeding six months except in limited instances, but in no case will such instruments be acquired with a view to the realization of long-term capital gains. If unanticipated circumstances in fact result in the realization of such gains, however, Applicant wishes to be in a position to distribute such gains at approximately the same time they are realized in light of Applicant's investment objective of seeking current income and its intended practice of declaring dividends daily and distributing them monthly. If such gains could not be distributed currently, Applicant's net asset value on each daily valuation day would be increased by the amount of such undistributed gain with no current benefits accruing to shareholders unless they opt to redeem.

The application alleges that the principal purposes of Rule 19b-1 are to avoid confusion of the shareholder as to what constitutes regular dividends from interest income, as opposed to capital gains; and to relieve investment company managers from pressure to realize such gains. Applicant states that such dangers are irrelevant to its operations in light of: (a) the sophistication of its shareholders; (b) the fact that Applicant explicitly disclaims any intention of seeking such gains (or, except in limited circumstances, of even acquiring securities with maturities of more than 6 months); and (c) the intention of Applicant to advise shareholders as to what portion of any distribution comprises capital gains.

Section 6(c) authorizes the Commission to exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from the provisions of the Act and Rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than June 3, 1974 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter, accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney at law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the matter will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether

a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[Docket No. 50-331]

IOWA ELECTRIC LIGHT AND POWER CO. ET AL.

Issuance of Facility License Amendment

Notice is hereby given that the U.S. Atomic Energy Commission (the Commission) has issued Amendment No. 2 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative and Corn Belt Power Cooperative, which revised Technical Specifications for operation of the Duane Arnold Energy Center, located near Palo in Linn County, Iowa. The amendment is effective as of its date of issuance.

The amendment permits a temporary increase in allowable conductivity of the reactor coolant.

The application for the amendment complies with the standards and requirements of the Act and the Commission's rules and regulations and the Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulation in 10 CFR Chapter 1, which are set forth in the license amendment.

For further details with respect to this action, see (1) the application for amendment, dated May 6, 1974, (2) Amendment No. 2 to License No. DPR-49, with attachments, and (3) the Commission's related Safety Evaluation, dated May 7, 1974. All of these are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Reference Service, Cedar Rapids Public Library, 426 Third Avenue SE., Cedar Rapids, Iowa 52401.

A copy of items (2) and (3) may be obtained upon request addressed to the United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing—Regulation.

Dated at Bethesda, Maryland, this 8th day of May, 1974.

For the Atomic Energy Commission.
WALTER R. BUTLER,
Chief, Light Water Reactors Projects Branch 1-2, Directorate of Licensing.

[Docket Nos. 50-413, 50-414]

CATAWBA NUCLEAR STATION

Availability of Partial Initial Decision on Environmental Issues

Pursuant to the National Environmental Policy Act of 1969 and the United States Atomic Energy Commission's regulation in Appendix D, § A.9 and A.11, to 10 CFR Part 50, notice is hereby given that a Partial Initial Decision on Environmental Issues dated April 9, 1974, by the Atomic Safety and Licensing Board, in the above captioned proceeding involving an application by Duke Power Company for a construction permit for the Catawba Nuclear Station, Units 1 and 2, to be located in York County, South Carolina, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. and in the York County Library, 325 South Oakland Avenue, Rockhill, South Carolina 29730.

The Partial Initial Decision is also being made available at the State Clearinghouse, ATTN: Mr. Elmer Witten, Jr., Office of the Governor, Division of Administration, Edgar A. Brown State Office Building, Columbia, South Carolina 29201 and the State Clearinghouse & Information Center, ATTN: Mr. Randolph Hendricks, 116 West Jones Street, Raleigh, North Carolina 27603.

Based on the record developed in the public hearing in the above captioned matter, the Partial Initial Decision (PID) on Environmental Issues of the Atomic Safety and Licensing Board supplements and modifies the Final Environmental Statement prepared by the Commission's Directorate of Licensing relating to the construction of the Catawba Nuclear Station, Units 1 and 2. A copy of this Final Environmental Statement is also available for public inspection at the above designated locations.

Pursuant to the provisions of 10 CFR Part 50, Appendix D, § A.11, the Final Environmental Statement is deemed modified to update the population projections in § 2.1 and supplemented to include pertinent portions of the environmental hearing record relating to anticipated transients without scram which were not addressed by the staff in the Final Environmental Statement. As required by § A.11 of Appendix D, a copy of the Partial Initial Decision by the Atomic Safety and Licensing Board and the Final Environmental Statement have been transmitted to the Council on Environmental Quality and made available to the public as noted herein.

The Partial Initial Decision is subject to review by an Atomic Safety and Licensing Appeal Board prior to becoming final. Any decision or action taken by an Atomic Safety and Licensing Appeal Board in connection with the Partial Initial Decision may be reviewed by the Commission.

Single copies of the Partial Initial Decision on Environmental Issues by the Atomic Safety and Licensing Board and the Final Environmental Statement may be obtained by writing the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing-Regulation.

[Docket No. 50-469]

GENERAL ELECTRIC CO.

Issuance of Facility Export License

Please take notice that no request for a hearing or a petition for leave to intervene having been filed following publication of notice of proposed action in the FEDERAL REGISTER on March 1, 1974 (39 FR 7977) and the Atomic Energy Commission having found that:

(a) The application filed by General Electric Company, Docket No. 50-469, complies with the requirements of the Act, and the Commission's regulations set forth in Title 10, Chapter I, Code of Federal Regulations, and

(b) The reactors proposed by the exported are utilization facilities as defined in said Act and regulations,

the Commission has issued License No. XR-96 to General Electric Company, authorizing the export of two boiling water reactors each with a thermal power level of 2894 megawatts to the Taiwan Power Company, Taipei, Taiwan, Republic of China.

The export of these reactors to the Republic of China is within the purview of the present Agreement for Cooperation Between the Government of the United States of America and the Government of the Republic of China Concerning Civil Uses of Atomic Energy.

Dated at Bethesda, Maryland this 7th day of May 1974.

For the Atomic Energy Commission.

S. H. SMILEY,
Deputy Director for Fuels and Materials, Directorate of Licensing.

GEORGIA POWER CO.

Health and Safety Hearing

Take notice that pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's regulations, and pursuant to the Commission's "Notice Of Hearing On Application For Construction Permits" dated April 26, 1973 (38 FR 10751, May 1, 1973), a public evidentiary hearing will be held before an Atomic Safety & Licensing Board (the Board) to consider the application of the Georgia Power Company (the Applicant) for construction permits for four pressurized water nuclear reactors, proposed to be built on the Applicant's property, near Waynesboro, Georgia, about 26 miles south-southeast of Augusta.

The evidentiary hearing will commence at 9:30 a.m. local time on Wednesday, May 29, 1974, and will continue from day-to-day until completed. The hearing will take place at:

City-County Municipal Building
Courtroom 603
530 Green Street
Augusta, Georgia 31902

The proposed nuclear plantsite is in Burke County, Georgia, and would be known as the Alvin W. Vogtle Nuclear Plant, Units 1, 2, 3 and 4. Each of the units is designed for initial operation at about 3411 megawatts thermal, with a net electrical output of 1100 megawatts.

The public hearing is in addition to the public hearing sessions already held in Waynesboro, Georgia on last April 16 (environmental portion of the construction permit proceeding) and in Bethesda, Maryland on May 9 (supplemental hearing on site suitability). The subject of the hearing now scheduled to start May 29 in Augusta will be the radiological health and safety issues set forth in the Commission's April 26, 1973 "Notice Of Hearing On Application For Construction Permits" (referred to in first paragraph above), specifically those set forth in the section entitled "Issues Pursuant to the Atomic Energy Act of 1954, as Amended."

Persons who have requested leave to make limited appearance statements, and who have not already done so at the April 16 or May 9 sessions, will be heard on the morning of May 29, 1974.

All interested members of the public are invited to attend the hearing.

It is so ordered.

For the Atomic Safety and Licensing Board.

Issued at Bethesda, Maryland this 10th day of May, 1974.

THOMAS W. REILLY,
Chairman.

[Docket No. 50-219]

JERSEY CENTRAL POWER AND LIGHT CO.

Proposed Issuance of Amendment to Facility Operating License

The Atomic Energy Commission (the Commission) is considering the issuance of an amendment to Facility Operating License No. DPR-16 which would authorize the Jersey Central Power & Light Company (the licensee) to operate the Oyster Creek Nuclear Generating Station Unit 1 (the facility) using four 8 x 8 fuel assemblies (containing U-235) and also would revise the provisions in the Technical Specifications relating to the limiting conditions for operation associated with fuel densification for the 8 x 8 fuel. The applicant is presently licensed to possess and operate its facility located in Lacey Township, Ocean County, New Jersey, at power levels up to 1930 MWt using a full core of 7 x 7 fuel assemblies (containing U-235).

The Commission has found that the application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Chapter I. Prior to issuance of the license amendment, the Commission's Directorate of Licensing will have (1) made the remainder of the findings required by the Act and the Commission's regulations and (2) completed a favorable Safety Evaluation on the application dated April 16, 1974.

On or before June 14, 1974, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license, and any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed within the time prescribed in this notice, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

A petition for leave to intervene must be filed under oath or affirmation in accordance with the provisions of 10 CFR 2.714. As required in 10 CFR 2.714, a petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by June 14, 1974. A copy of the petition and/or request should also be sent to the Chief Hearing Counsel, Office of the General Counsel, Regulation, U.S. Atomic Energy Commission, Washington, D.C. 20545.

For further details, see the application by Jersey Central Power and Light Company dated April 16, 1974, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Ocean County Library, 15 Hooper Avenue, Toms River, New Jersey 08753. When the Safety Evaluation report to be prepared by the Directorate of Licensing on the application is available, it may be inspected at the above locations and a single copy may be obtained.

Single copies of the Safety Evaluation and proposed license amendment, when available, may be obtained by request to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing—Regulation.

For the Atomic Energy Commission.

Dated at Bethesda, Maryland this 9th day of May 1974.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Directorate of Licensing.

[Docket No. RM-50-2]

EFFLUENTS FROM LIGHT-WATER-COOLED NUCLEAR POWER REACTORS

Order Rescheduling Hearing

By previous order, the Commission determined to hear oral argument in this proceeding on May 21, 1974. Due to the press of other matters, the Commission has rescheduled the oral argument for June 6, 1974. The argument will commence at 10 a.m. at Commission Headquarters in Germantown, Maryland, and will be open to the public.

Each participant who has requested an opportunity to make a presentation will be allotted one hour. This time period shall include any questions which may be propounded by Commissioners and participants' responses thereto. No more than two persons may present argument for any single participant. Argument may be presented by counsel, by persons who testified on behalf of that participant during the proceedings, or by persons who qualified as technical interrogators during the proceedings. Participants may use all or any part of the time allotted, but may not yield any of their time to other participants.

The order of presentation shall be as follows:

AEC staff
Consolidated Utility Group
General Electric Company
State of Minnesota
Mr. Andrew Hull (limited participant)
Atomic Industrial Forum (limited participant)

It is anticipated that there will be at least one 15-minute recess during the morning session and another during the afternoon session. In addition, there will be a one-hour luncheon recess.

In view of the issuance of this order, no further notification from the Secretary concerning procedural details will be necessary.

It is so ordered.

By the Commission.

Dated at Germantown, Md., this 13th day of May 1974.

PAUL C. BENDER,
Secretary of the Commission.

INTERSTATE COMMERCE COMMISSION

[Notice No. 508]

ASSIGNMENT OF HEARINGS

MAY 10, 1974.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after May 15, 1974.

MC-F-12110, Arkansas-Best Freight System, Inc.—Purchase—Harry N. Nicklaus and Albert P. Nicklaus, now being assigned June 26, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC-F-12113, Nationwide Carriers, Inc.—Purchase—Mabel Lynn Michael (Nevin H. Fiery, Executor), now being assigned July 8, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 106644, Sub-165, Superior Trucking Company, Inc., now being assigned July 9, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 128383 Sub-41, Pinto Trucking Service, Inc., now being assigned July 10, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 128383 Sub-44, Pinto Trucking Service, Inc., now being assigned July 17, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 128383 Sub-45, Pinto Trucking Service, Inc., now being assigned July 24, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 107012 Sub 182, North American Van Lines, Inc., now assigned June 19, 1974, at Seattle, Wash., is postponed indefinitely.

FF-C-52, Darrell J. Sekin & Company, Inc., and Regional International Services, Inc.—Investigation of Operations—now assigned May 20, 1974, at Dallas, Tex., is postponed indefinitely.

MC-125035 Sub 28, Ray E. Brown Trucking, Inc., application is dismissed.

MC 138926 Sub-2, Gencom, Inc., now assigned June 11, 1974, at Kansas City, Mo., is postponed indefinitely.

MC-C-8247, Eagle Trucking Company—Investigation and Revocation of Certificates—now assigned May 13, 1974, at Dallas, Tex., is postponed to May 20, 1974 (2 days), in Room 5A15-17 Federal Office Bldg., 1100 Commerce Street, Dallas, Texas.

I&S M 27312, Restructured Rates and Charges, Central States Territory, I&S M 27312 Sub 2, Restructured Rates and Charges, Indiana Motor Rate and Tariff Bureau, now assigned May 21, 1974, at Washington, D.C., is postponed to June 6, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

[No. AB–19 (Sub-No. 7)]

THE BALTIMORE AND PHILADELPHIA RAILROAD COMPANY AND THE BALTIMORE AND OHIO RAILROAD COMPANY ABANDONMENT CRUM CREEK BRANCH, EDDYSTONE, DELAWARE COUNTY, PENNSYLVANIA

The Interstate Commerce Commission hereby gives notice that by order dated May 1, 1974, it has been determined that the proposed abandonment of the Crum Creek branch line of the Baltimore and Philadelphia Railroad Company and the Baltimore and Ohio Railroad Company, in Eddystone, Delaware County, Pa., a distance of 1.05 miles, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(c) of the NEPA.

It was concluded, among other things, that abandonment of this line will not have a significant impact on the environment because shippers no longer reply on rail service on this branch, and there has been no traffic moved over the line for over a year. Alternative rail transportation is located at both end points of the line. In addition, abandonment will facilitate the construction of Interstate Highway 95 in Delaware County. This action, therefore, is consistent with local and regional land use policies.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–343–6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C., 20423, on or before May 30, 1974.

[Finance Docket No. 27546]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD CO.

Proposed Acquisition and Operation of Line

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available for public inspection upon request; and

It appearing, That no environmental impact statement need be issued in this proceeding, because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Allamakee County, Iowa, within 15 days of the date of service of this order, and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 1st day of May, 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Finance Docket No. 27546]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD COMPANY—ACQUIRE AND OPERATE—A LINE OF RAILROAD, POSTVILLE, ALLAMAKEE COUNTY, IOWA

The Interstate Commerce Commission hereby gives notice that by order dated May 1, 1974, it has been determined that the proposed acquisition by the Chicago, Milwaukee, St. Paul and Pacific Railroad Company of an industrial spur track in Postville, Allamakee County, Iowa, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(c) of the NEPA.

It was concluded, among other things that, approval of this action will result in the reinstitution of rail service to one shipper in Postville, which lost rail service in 1973, when the Chicago, Rock Island and Pacific Railroad Company abandoned service to Postville. Accomplishment of this action will not require any new construction, nor will there be any effect on local land use plans or policies. Reinstitution of service to this shipper will result in the diversion of approximately 60 carloads of freight a year from motor carrier to rail transportation. This diversion should have a beneficial effect on the environment.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–343–6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before May 30, 1974.

[Notice No. 17]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

MAY 10, 1974.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969 (49 CFR 1042.4(c)(11)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.4(c)(12)) at any time, but will not operate to stay commencement of the proposed operations unless filed on or before June 14, 1974.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC–2202 (Deviation No. 128), ROADWAY EXPRESS, INC., P.O. Box 471, Akron, Ohio 44309, filed May 2, 1974. Carrier proposes to operate as a common carrier, by motor vehicle, of general commodities, with certain exceptions, over a deviation route as follows: From Muskogee, Okla., over State Highway 16 to junction of U.S. Highway 75, and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Muskogee, Okla., over U.S. Highway 69 to junction U.S. Highway 266, thence over U.S. Highway 266 to junction U.S. Highway 75, thence over U.S. Highway 75 to junction State Highway 16, and return over the same route.

By the Commission.

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before June 4, 1974. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–75076. By order of May 9, 1974, the Motor Carrier Board approved the transfer to W. P. Lambert Transfer, Inc., Lancaster, S.C., of the operating rights in Certificate No. MC–107148 issued March 27, 1963, to W. P. Lambert, doing business as W. P. Lambert Transfer, Lancaster, S.C., authorizing the transportation of brick and household goods between Lancaster County, S.C., on the one hand, and, on the other, points in North Carolina. Ned Gregory, P.O. Drawer 967, Lancaster, S.C., 29720, attorney for applicants.

No. MC–FC–75107. By order of May 9, 1974, the Motor Carrier Board approved the transfer to Lorsbach Trucking, Inc., Hardin, Ill., of the operating rights in Certificate No. MC–95296 issued January 11, 1973, to Lucille C. Lorsbach, Hardin, Ill., authorizing the transportation of general commodities, with usual exceptions, over a regular route between St. Louis, Mo., and Jerseyville, Ill., and livestock, agricultural commodities, and household goods, serving points in the St. Louis, Mo.-East St. Louis, Ill., Commercial Zone in connection with said regular-route operations; general commodities, from St. Louis, Mo., to Hardin, Ill., and livestock and fruit, from Hardin, Ill., and points in Calhoun County, Ill., within 15 miles, to St. Louis, Mo. Robert T. Lawley, 300 Reisch Building, Springfield, Ill. 62701, attorney for applicants.

No. MC–FC–75131. By order of May 9, 1974, the Motor Carrier Board approved the transfer to A-Emergency Tow Service, Inc., Kansas City, Mo., of the operating rights in Certificate No. MC–116178 (Sub-No. 1), issued February 10, 1971, to David W. Dodson, doing business as A-Emergency Tow Service, Kansas City, Mo., authorizing the transportation of wrecked, damaged, or disabled motor vehicles and trailers, and replacement motor vehicles and trailers to points of wreck, damage, or disablement, by the use of towing equipment, between points in Iowa, Kansas, Nebraska, Oklahoma, and Missouri. Frank W. Taylor, Jr., 1221 Baltimore Avenue, Kansas City, Mo. 64105, attorney for applicants.

No. MC–FC–75135. By order of May 9, 1974, the Motor Carrier Board approved the transfer to R. L. Seasholtz, Inc., Pottstown, Pa., of the operating rights in Permit No. MC–22815 issued May 15, 1941 to Roy L. Seasholtz, Pottstown, Pa., authorizing the transportation of precast concrete products from Pottstown and Eddystone, Pa. to points in New Jersey and Delaware. Raymond A. Thistle, Jr., Four Penn Center Plaza, Philadelphia, Pa. 19103, attorney for applicants.

No. MC–FC–75140. By order of May 9, 1974, the Motor Carrier Board approved the transfer to Billy J. Elkins, West Terre Haute, Ind., of the operating rights in Certificate No. MC–117647 issued April 4, 1973, to George H. Germann, doing business as Germann Trucking Co., Mount Vernon, Ill., authorizing the transportation of various commodities from and to specified points and areas in Indiana, Illinois, Kentucky, Michigan, Ohio, Iowa and Wisconsin. Robert W. Loser, II, 1009 Chamber of Commerce Bldg., Indianapolis, Ind., 46204, attorney for applicants.

[No. AB–52]

NEW MEXICO CENTRAL RAILWAY CO. AND ATCHISON, TOPEKA AND SANTA FE RAILWAY CO.

Abandonment of Line

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available for public inspection upon request; and

It appearing, That no environmental impact statement need be issued in this proceeding, because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor;

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Torrance County, N. Mex., within 15 days of the date of service of this order, and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 1st day of May 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[No. AB–52]

NEW MEXICO CENTRAL RAILWAY COMPANY AND THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY ABANDONMENT BETWEEN WILLARD AND CALVERT, TORRANCE COUNTY, NEW MEXICO

The Interstate Commerce Commission hereby gives notice that by order dated May 1, 1974, it has been determined that the proposed abandonment of the line of The New Mexico Central Railway Company and The Atchison, Topeka and Santa Fe Railway Company between Willard and Calvert, a distance of approximately 28 miles all in Torrance County, N. Mex., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(c) of the NEPA.

It was concluded, among other things, that the environmental impacts are considered insignificant because there are no identifiable developmental plans in the area of the proposed abandonment predicated upon the availability of direct rail access. Further, the volume of traffic is minimal and declining, and alternative transportation is available over the surrounding highway system and at the trailer-on-flatcar facility located in Albuquerque, N. Mex.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–343–6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before May 30, 1974.

[No. AB–10 (Sub-No. 5) and No. AB–2 (Sub-No. 6)]

NORFOLK AND WESTERN RAILWAY CO. AND LOUISVILLE AND NASHVILLE RAILROAD CO.

Abandonment of Lines

Upon consideration of the record in the above-entitled proceedings, and of a staff-prepared environmental threshold assessment survey which is available for public inspection upon request; and

It appearing, that no environmental impact statement need be issued in these proceedings, because these proceedings do not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicants be, and they are hereby, directed to publish the appended notice in a newspaper of general circulation in Indianapolis, Ind., within 15 days of the date of service of this order, and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 1st day of May, 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[No. AB–10 (Sub-No. 5)]

NORFOLK AND WESTERN RAILWAY COMPANY ABANDONMENT OF PORTION OF MUNCIE DIVISION IN CITY OF INDIANAPOLIS, INDIANA

[No. AB–2 (Sub-No. 6)]

LOUISVILLE AND NASHVILLE RAILROAD COMPANY ABANDONMENT BETWEEN 17TH AND 10TH STREETS IN INDIANAPOLIS, MARION COUNTY, INDIANA

The Interstate Commerce Commission hereby gives notice that by order dated May 1, 1974, it has been determined that the proposed abandonments (1) by the Norfolk and Western Railroad Company of a line of

V 39 I 95 MAY 15 74 XUM

railroad between East 10th and East 13th Streets, a distance of approximately 0.26 miles, and (2) by the Louisville and Nashville Railroad Company of a line of railroad between East 10th and East 17th Streets, a distance of approximately 3,500 feet, both in the City of Indianapolis, Ind., if approved by the Commission, do not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(c) of the NEPA.

It was concluded, among other things, that the environmental effects are considered insignificent because no rail service has been provided over the Norfolk and Western Line since August, 1970, and there are no indentifiable prospects for a demand for service over the line in the forseeable future, and the sole shipper served by the Louisville and Nashville line will continue to have direct access to rail service over the Indianapolis Belt Railway. In addition, the abandonments are consistent with local land use plans in the involved area because they will eliminate the necessity of constructing a new railroad bridge in connection with the city's thoroughfare rehabilitation project.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-6989.

Interested parties may comment on this matter by the submission reoresentations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before May 30, 1974.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

MAY 10, 1974.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065(a)), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before May 27, 1974. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC-25798 (Sub-No. E29), filed May 2, 1974. Applicant: CLAY HYDER TRUCKING LINES, INC., P.O. Box 1186, Auburndale, Fla. 33823. Applicant's representative: Tony G. Russell, P.O. Box 1186, Auburndale, Fla. 33823. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen vegetables products*, from Seabrook, N.J., to points in Florida, Georgia, and South Carolina. The purpose of this filing is to eliminate the gateway of Crozet, Va.

No. MC-30280 (Sub-No. E1), filed May 1, 1974. Applicant: WATKINS CAROLINA EXPRESS INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Paul Daniell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), from those points in Georgia on and north of Interstate Highway 85 to those points in South Carolina on and north of a line beginning at the North Carolina-South Carolina State line thence along U.S. Highway 276 to junction South Carolina Highway 121, thence along South Carolina Highway 121 to junction U.S. Highway 76, thence along U.S. Highway 76 to junction South Carolina Highway 391, thence along South Carolina Highway 391 to Batesburg, thence along U.S. Highway 178 to junction U.S. Highway 78, thence along U.S. Highway 78 to Charleston. The purpose of this filing is to eliminate the gateway Greenville, S.C.

No. MC-30280 (Sub-No. E10), filed May 2, 1974. Applicant: WATKINS CAROLINA EXPRESS INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Paul Daniell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Textile products*, from those points in North Carolina west of a line beginning at the Tennesse-North Carolina State line, thence along U.S. Highway 321 to junction U.S. Highway 421, thence along U.S. Highway 421 to North Carolina Highway 115, thence along North Carolina Highway 115 to junction U.S. Highway 70, thence along U.S. Highway 70 to junction U.S. Highway 52, thence along U.S. Highway 52 to the North Carolina-South Carolina State line, to New York, N.Y. The purpose of this filing is to eliminate the gateway of Gastonia, N.C.

No. MC-30280 (Sub-No. E11), filed May 2, 1974. Applicant: WATKINS CAROLINA EXPRESS INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Paul Daniell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Textile products*, from points in Georgia to those points in that part of Pennsylvania on and south of a line beginning at the Pennsylvania-New Jersey State line and extending along U.S. Highway 22 to junction unnumbered highway (formerly portion U.S. Highway 22), thence along unnumbered highway through Upper Bern to junction U.S. Highway 22, thence along U.S. Highway 22 to Harrisburg, and thence along U.S. Highway 15 to the Pennsylvania-Maryland State line. The purpose of this filing is to eliminate the gateway of Gastonia, N.C.

No. MC-30280 (Sub-No. E12), filed May 2, 1974. Applicant: WATKINS CAROLINA EXPRESS, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Paul Daniell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), from Norfolk, Va., to Burlington, Thomasville, Winston-Salem, Yanceyville, and High Point, N.C., and those points in that Part of North Carolina on and west of U.S. Highway 29 and within 30 miles of Danville, Va. The purpose of this filing is to eliminate the gateway of Danville, Va.

No. MC 55777 (Sub-No. E1), filed April 4, 1974. Applicant: MILLS TRANSFER CO., 47 Sycamore Street, Gallipolis, Ohio 45631. Applicant's representative: John M. Friedman, 2930 Potnam Ave., Hurricane, W. Va. 25526. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel, and iron and steel articles*, (1) from points in that part of Pennsylvania on and east of U.S. Highway 15, and points on West Virginia to points in Illinois, Indiana (except South Bend), Kentucky, and Tennessee (except Johnson City), and (2) from points in Ohio on and north of U.S. Highway 40, and on and east of U.S. Highway 23, to points in Tennessee. The purpose of this filing is to eliminate the gateway of Wellston, Ohio.

No. MC-76177 (Sub-No. E22), filed April 24, 1974. Applicant: BAGGETT TRANSPORTATION COMPANY, 2 South 32nd Street, Birmingham, Ala. 35233. Applicant's representative: T. C. Sinclair, 2 South 32nd Street, Birmingham, Ala. 35233. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Classes A and B explosives* and *blasting supplies*, between points in Alabama, Florida, and Mississippi, on the one hand, and, on the other, points in Montana. The purpose of this filing is to eliminate the gateway of points within 15 miles of both Energy and Wolf Lake, Ill.

No. MC-95540 (Sub-No. E46), filed April 15, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clvde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits and frozen vegetables*, from points in Florida on and east of a line beginning at the Georgia-Florida State line, thence south along U.S. Highway 319 to Medart, thence along Highway 98 to Teresa on the Gulf of Mexico, to points in Alabama on and north of a line beginning at the Georgia-Alabama State line, thence west along Alabama Highway 22 to Newsite, thence along Alabama Secondary Highway 86 to Goodwater, thence along U.S. 280 to Birmingham, thence along U.S. Highway 78 to Guin, thence along U.S. Highway 278 to the Mississippi-Alabama State line. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E47), filed April 15, 1974. Applicant: WATKINS MOTOR LINES. INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Dade City, Fla., to the District of Columbia. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E58), filed April 15, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Dade City, Fla., to points in Delaware. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E85), filed April 19, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from points in California on and south of the line beginning at Jenner on the Pacific Ocean, thence along California Highway 116 to Santa Rosa, thence along California Highway 12 to Lodi, thence along California Highway 88 to the California-Nevada State line, to points in Pennsylvania on, east, and south of a line beginning at the Pennsylvania-Maryland State line, thence north along Pennsylvania Highway 10 to Reading, thence along Pennsylvania Highway 61 to its junction with U.S. Highway 22, thence along U.S. Highway 22 to the Delaware River. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E89), filed April 19, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30342. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Birmingham, Ala., to points in Florida on and east of a line beginning at the Florida-Georgia State line, thence along U.S. Highway 319 to its junction with Florida Highway 369, thence along Florida Highway 369 to Crawfordsville, thence along U.S. Highway 319 to Medart, thence along U.S. Highway 98 to St. Teresa on the Gulf of Mexico. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E117), filed April 19, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212. 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* from points in California, to points in Rhode Island. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E119), filed April 19, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from points in California on and south of Interstate Highway 8 to points in New York. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E122), filed April 22, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meats, and frozen meat products*, from Jacksonville, Fla., to points in Nevada. The purpose of this filing is to eliminate the gateway of Tifton, Ga., and points in Tennessee.

No. MC-95540 (Sub-No. E123), filed April 22, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles) from Cincinnati, Ohio, to points in Florida. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E124), filed April 22, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meats and frozen meat products*, from Dade City, Fla., to points in Washington. The purpose of this filing is to eliminate the gateway of Tifton, Ga., and points in Tennessee.

No. MC-95540 (Sub-No. E125), filed April 22, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Elmira, N.Y., to points in Florida. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E180), filed April 28, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Road NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Dade City, Fla., to points in Pennsylvania. The purpose of this filing is to eliminate the gateway of Tifton, Ga.

No. MC-95540 (Sub-No. E184), filed April 28, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Road NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bananas*, from Tampa and Jacksonville, Fla., to points in Oregon. The purpose of this filing is to eliminate the gateway of Gulfport, Mississippi.

No. MC-100666 (Sub-No. E4) (CORRECTION)', filed March 25, 1974, published in the FEDERAL REGISTER April 23, 1974. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard W. May (same as above). In No. MC-100666 (Sub-No. E4); (2) *Composition boards, and materials, supplies, and accessories* incidental to the installation thereof, from the plant site of the Celotex Corporation at Marrero, La., to points in California, Idaho, Montana, Nevada, Oregon, Utah, Washing-

V 39 I 95 MAY 15 74 XUM

ton, and points in Arizona on, north, and west of U.S. Highway 160 from the Arizona-Colorado State line to junction U.S. Highway 89; thence along U.S. Highway 89 to Flagstaff; thence along Alternate U.S. Highway 89 to Prescott; thence along U.S. Highway 89 to junction U.S. Highway 60; thence along U.S. Highway 60 to junction I–10; thence along I–10 to Arizona-California State line. The purpose of this filing is to eliminate the gateway of Pittsburgh, Kans. The purpose of this correction is to set forth the proper route description.

No. MC–100666 (Sub-No. E55), filed April 23, 1974. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard W. May, P.O. Box 7666, Shreveport, La. 71107. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, plastic tubing, plastic conduit, valves, fittings, compound joint sealer, bonding cement, and accessories* used in the installation of such products (except commodities in bulk), from Waco, Tex., to points in North Carolina. The purpose of this filing is to eliminate the gateway of the plant site of Smith Plastics, Inc., at Little Rock, Ark.

No. MC–105457 (Sub-No. E2), filed May 1, 1974. Applicant: THURSTON MOTOR LINES, INC., P.O. Box 10638, Charlotte, N.C. 28201. Applicant's representative: John V. Luckadoo (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between points in Russell County, Ala., on the one hand, and, on the other, points in South Carolina, and (B) *General commodities* (with exceptions as specified in (A) above, and except livestock and commodities injurious or contaminating to other lading), between points in Russell County, Ala., on the one hand, and on the other, (1) points in that part of North Carolina east of U.S. Highway 29 and Winston-Salem, N.C., and (2) those points in Virginia on and east of a line beginning at the Kentucky-Virginia State Line along U.S. Highway 460 to Oakwood, Va., thence along Virginia Highway 621 to Honaker, Va., thence along Virginia Highway 80 to junction Virginia Highway 740, thence along Virginia Highway 740 to junction U.S. Highway 58, thence along U.S. Highway 58 to Damascus, Va., thence along Virginia Highway 133 to the Virginia-North Carolina State Line. The purpose of this filing is to eliminate the gateways of (1) Columbus, Ga., (2) any point in Georgia. (3) any point in that part of South Carolina within 150 miles of Charlotte, N.C., and west of a line extending from the North Carolina-South Carolina State Line along South Carolina Highway 59 to York, thence along U.S. Highway 321 to Chester, thence along U.S. Highway 21 to Columbia, and thence along South Carolina Highway 5 to Ulmers, not including points on the highways specified. (4) Charlotte, N.C., and (5) Roanoke Rapids, N.C.

No. MC–105457 (Sub-No. E6), filed May 1, 1974. Applicant: THURSTON MOTOR LINES, INC., P.O. Box 10638, Charlotte, N.C. 28201. Applicant's representative: John V. Luckadoo (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), (A) between Columbia, Tenn., on the one hand, and, on the other, points in that part of Georgia on and east of a line beginning at the Georgia-North Carolina State line, thence along U.S. Highway 23 to Dillard, thence along an unnumbered Highway through Titus, Ga., to U.S. Highway 76, thence along U.S. Highway 76 to junction Georgia Highway 197, thence along Georgia Highway 197 to junction Georgia Highway 255, thence along Georgia Highway 255 to Sautee, thence along Georgia Highway 17 to Clarkesville, thence along Georgia Highway 15 to junction Georgia Highway 98 at or near Homer, thence along Georgia Highway 98 to Maysville, thence along Georgia Highway 82 to junction Georgia Highway 330, thence along Georgia Highway 330 to junction Georgia Highway 211, thence along Georgia Highway 211 to junction U.S. Highway 29, thence along U.S. Highway 29 to junction Georgia Highway 209 at or near Bogart, thence along Georgia Highway 209 to junction Georgia Highway 186, thence along Georgia Highway 186 to Bishop, thence along U.S. Highway 441, to Pearson, thence along U.S. Highway 221 to junction U.S. Highway 129, thence along U.S. Highway 129 to the Georgia-Florida State Line; (B) between Cookeville, Tenn., on the one hand, and, on the other, points in that part of Georgia on and east of a line beginning at the Georgia-North Carolina State Line, thence along U.S. Highway 441 to junction Georgia Highway 98 at or near Homer, thence along Georgia Highway 98 to junction Georgia Highway 82, thence along Georgia Highway 82 to Jefferson, thence along Georgia Highway 11 to Gray, thence along Georgia Highway 18 to junction Georgia Highway 57, thence along Georgia Highway 57 to Irwinton, thence along U.S. Highway 441 to Braxton, thence along Georgia Highway 268 to junction Georgia Highway 149, thence along Georgia Highway 149 to junction Georgia Highway 135 at or near Willacoochee, thence along Georgia Highway 135 to junction Georgia Highway 76 to Nashville, thence along Georgia Highway 125 to Valdosta, thence along Georgia Highway 31 to the Florida-Georgia State Line;

(C) Between Murfreesboro, Tenn., on the one hand, and, on the other, points in that part of Georgia on and east of a line beginning at the Georgia-North Carolina State Line, thence along U.S. Highway 441 to junction Georgia Highway 98, thence along Georgia Highway 98 to Commerce, thence along U.S. Highway 441 to Pearson, thence along U.S. Highway 221 to junction U.S. Highway 129, thence along U.S. Highway 129 to the Georgia-Florida State Line; and (D) between Nashville, Tenn., on the one hand, and, on the other, points in that part of Georgia on and east of a line beginning at the Georgia-North Carolina State Line, thence along U.S. Highway 23 to Dillard, thence along an unnumbered Highway through Titus, to U.S. Highway 76, thence along U.S. Highway 76 to junction Georgia Highway 197, thence along Georgia Highway 197 to junction Georgia Highway 225, thence along Georgia Highway 225 to Sautee, thence along Georgia Highway 17 to Clarkesville, thence along U.S. Highway 23 to junction Georgia Highway 15 at or near Baldwin, thence along Georgia Highway 15 to Homer, thence along Georgia Highway 98 to Maysville, thence along Georgia Highway 82 to Jefferson, thence along Georgia Highway 11 to junction Georgia Highway 142, thence along Georgia Highway 142 to Willard, thence along Georgia Highway 16 to Eatonton, thence along U.S. Highway 441 to Pearson, thence along U.S. Highway 221 to junction U.S. Highway 129, thence along U.S. Highway 129 to the Georgia-Florida State Line. The purpose of this filing is to eliminate the gateway of points in South Carolina.

No. MC–106647 (Sub-No. E3), filed May 2, 1974. Applicant: CLARK TRANSPORT CO., INC., 13101 S. Torrence Ave., the gateway of Cedartown, Ga.; (B) Chicago, Ill. 60633. Applicant's representative: Edward E. Colt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Automobiles, trucks, chassis*, and *cabs*, in secondary movements, in truckway service, from Detroit, Mich., and points in Illinois, Indiana, Iowa, Maryland, Ohio, Pennsylvania, and the District of Columbia, to points in South Dakota. The purpose of this filing is to eliminate the gateways of Chicago, Chicago Heights, Ill., or Clinton, Iowa.

No. MC–107002 (Sub-No. E1), filed April 15, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: John J. Borth (Same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Liquid chemicals* (except liquid hydrogen, liquid oxygen, and liquid nitrogen), in bulk, in tank vehicles, from the plant site and facilities of Tenneco Chemicals, Inc., at Pensacola and Telogia, Fla., and Bay Minette, Ala., to points in Minnesota, restricted against the transportation of petroleum products from Pensacola, Fla. The purpose of this filing is to eliminate *Liquid chemicals*, in bulk, in tank vehicles, from the plant site and facilities of Tenneco Chemicals, Inc., at Pensacola and Telogia, Fla., and Bay Minette, Ala., to points in Oklahoma. The purpose of this filing is to eliminate the gateway of Hattiesburg, Miss.

No. MC–111375 (Sub-No. E2), filed April 5, 1974. Applicant: PIRKLE REFRIGERATED FREIGHT LINES, INC., P.O. Box 3358, Madison, Wis. 53704. Applicant's representative: Charles E. Dye (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (a) *cheese*, from Chicago, Ill., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. Purpose of this filing is to eliminate the gateway of points in that part of Wisconsin south and west of a line beginning at the Wisconsin-Iowa State line near Prairie du Chien, Wis., thence over U.S. Highway 18 to the junction of U.S. Highway 12, thence over U.S. Highway 12 to the Wisconsin-Illinois State line. (b) *frozen fruits and vegetables*, from points in California to points in that part of Wisconsin south and west of a line beginning at the Wisconsin-Minnesota State line near La Crosse, Wis., thence over U.S. Highway 16 to the junction of U.S. Highway 12, thence over U.S. Highway 12 to the Wisconsin-Illinois State line. The purpose of this filing is to eliminate the gateway of Chicago, Ill.

No. MC–111375 (Sub-No. E3), filed April 5, 1974. Applicant: PIRKLE REFRIGERATED FREIGHT LINES, INC., P.O. Box 3358, Madison, Wis. 53704. Applicant's representative: Charles E. Dye (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Powdered milk*, when moving in the same vehicle and at the same time with a commodity subject to economic regulation under the Interstate Commerce Act, from Chicago, Ill., to Phoenix, Ariz., Portland, Oreg., Spokane, Wash., and points in California, Montana, and Wyoming. The purpose of this filing is to eliminate the gateway of points within the Eau Claire, Wis., Commercial Zone as defined by the Commission which are not within the municipal limits of Eau Claire and are located south and west of U.S. Highway 12.

(B) *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C 209 and 766, from Chicago, Ill., to Los Angeles, San Francisco, and San Diego, Calif. The purpose of this filing is to eliminate the gateway of points within the Madison, Wis., Commercial Zone, as defined by the Commission, which are not within the municipal limits of Madison and are south and west of U.S. Highway 12.

(C) *Powdered milk*, when moving in the same vehicle and at the same time with a commodity subject to economic regulation under the Interstate Commerce Act, *powdered milk*, containing animal or vegetable fats ingredients, *canned creams dietary liquids, milk and cream substitutes, dessert preparations, and beverage preparations*, from Chicago, Ill., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. The purpose of this filing is to eliminate the gateway of points within the Menomonie, Wis., Commercial Zone as defined by the Commission, which are not within the municipal limits of Menomonie, and are south and west of U.S. Highway 12.

(D) (1) *Powdered milk* when moving in the same vehicle and at the same time with a commodity subject to economic regulation under the Interstate Commerce Act (otherwise authorized), and (2) *Powdered milk*, containing animal or vegetable ingredients, *canned milk and cream dietary liquids, milk and cream substitutes, beverage and dessert preparations and ingredients thereof, and shortening* (except in D (1) and (2) commodities in bulk), from Chicago, Ill., to points in Washington, Oregon, Montana, Utah, Idaho, California, Colorado, Arizona, Nevada, New Mexico, and Wyoming. The purpose of this filing is to eliminate the gateway of points within the Madison, Wis., Commercial Zone, as defined by the Commission, which are not within the municipal limits of Madison, and are south and west of U.S. Highway 12.

(E) *Pickles, sauerkraut, and horseradish*, from Chicago, Ill., to points in Arizona. The purpose of this filing is to eliminate the gateway of points within the Eau Claire, Wis., Commercial Zone, as defined by the Commission, which are not within the municipal limits of Eau Claire and are south and west of U.S. Highway 12.

(F) (1) *Foodstuffs* (except fresh meat), and (2) *fresh meat* when moving in mixed loads with the commodities in F(1) above, from Chicago, Ill., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming. The purpose of this filing is to eliminate the gateway of points within the Fort Atkinson, Wis., Commercial Zone which are not within the municipal limits of Fort Atkinson, and are south and west of U.S. Highway 12.

No. MC–111625 (Sub-No. E1), filed April 22, 1974. Applicant: BERMAN'S MOTOR EXPRESS INC., P.O. Box 1566, Binghamton, N.Y. 13902. Applicant's representative: J. Edward Derrick (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles* (except those requiring special equipment), from Elmira, N.Y., to points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut. The purpose of this filing is to eliminate the gateway of points in Broome County, N.Y.

No. MC–112822 (Sub-No. E27), filed April 28, 1974. Applicant: BRAY LINES, INC., P.O. Box 1191, Cushing, Oklahoma 74023. Applicant's representative: Robert A. Stone (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in packages and containers, from Wichita, Kans., to points in Arizona and New Mexico. The purpose of this filing is to eliminate the gateway of Enid and Ponca City, Okla.

No. MC–112822 (Sub-No. E28), filed April 28, 1974. Applicant: BRAY LINES, INC., P.O. Box 1191, Cushing, Oklahoma 74023. Applicant's representative: Robert A. Stone (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in packages and containers, from El Dorado, Kans., to points in Arizona and New Mexico. The purpose of this filing is to eliminate the gateway of Enid and Ponca City, Okla.

No. MC–113362 (Sub-No. E3), filed May 2, 1974. Applicant: ELLSWORTH FREIGHT LINES, INC., 310 East Broadway, Eagle Grove, Iowa 50533. Applicant's representative: Melton D. Adams, P.O. Box 562, Austin, Minn. 55912. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in containers, from Houston, Tex., to points in Minnesota, except Minneapolis, Minn. The purpose of this filing is to eliminate the gateway of points in Iowa within 15 miles of Elmore, Minn.

No. MC–113843 (Sub-No. E2), filed April 29, 1974. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer Street, Boston, Massachusetts 02210. Applicant's representative: Lawrence T. Sheils (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as defined by the Commission from the plantsite and storage facilities utilized by Wilson & Co., Inc., at or near Cherokee, Iowa, to Richmond, Va. No. MC–114019 (Sub-No. E17), filed May 1, 1974. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik, 7000 South Pulaski Road, Chicago, Ill. 60629. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products*, as described in Section B of the Appendix to *Modification of Permits—Packing House Products*, 46 M.C.C. 23, from points in Wisconsin and Iowa to Philadelphia, Pa., Wilmington, Del., Baltimore, Md., and Washington, D.C., restricted to the transportation of shipments moving from, to, or between warehouses, and wholesale, retail, or chain outlets of food business houses, or when moving from, to, or between food processing plants, or warehouses or other facilities of such plants. The purpose of this filing is to eliminate the gateway of Chicago, Ill.

No. MC–114045 (Sub-No. E10), filed May 3, 1974. Applicant: TRANS-COLD

V 39 I 95 MAY 15 74 XUM

EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen dessert and bakery goods toppings, frozen sauces*, and *frozen ingredients* for sauces, salad dressings, soup mixes, and soft drinks, from Wilmington and Dover, Del., to points in Arkansas. The purpose of this filing is to eliminate the gateway of Cleveland, Ohio.

No. MC–114045 (Sub-No. E11), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen pies* and *frozen baking products*, from Houston, Del., to points in Colorado, New Mexico, California, Oregon, Washington, Nevada, Arizona, and Utah. The purpose of this filing is to eliminate the gateway of Tulsa, Okla.

No. MC–114045 (Sub-No. E12), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen dessert and bakery goods toppings, frozen sauces*, and *frozen ingredients* for sauces, salad dressings, soup mixes, and soft drinks, from Wilmington and Dover, Del., to New Orleans and Shreveport La. The purpose of this filing is to eliminate the gateway of Louisville, Ky.

No. MC–114045 (Sub-No. E13), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen pies* and *frozen bakery products*, from Hartford, Norwalk, and Wethersfield, Conn., to points in Colorado, New Mexico, California, Oregon, Washington, Nevada, Arizona, and Utah. The purpose of this filing is to eliminate the gateway of Tulsa, Okla.

No. MC–114045 (Sub-No. E14), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen poultry*, including boned or boned and stuffed poultry, from Pomfret Center, Conn., to points in Arizona and California. The purpose of this filing is to eliminate the gateway of Wapakoneta, Ohio.

No. MC–114045 (Sub-No. E17), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits, frozen vegetables, and frozen berries, and frozen fish, and frozen poultry* when moving in the same vehicle with frozen fruits, vegetables and berries, from points in California to points in Connecticut, Delaware, Kentucky, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, and West Virginia. The purpose of this filing is to eliminate the gateway of points in Texas.

No. MC–114045 (Sub-No. E19), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen bakery goods toppings*, from Wilmington and Dover, Del., to points in California, Oregon, Washington, Nevada, and Utah. The purpose of this filing is to eliminate the gateway of Tulsa, Okla.

No. MC–114045 (Sub-No. E20), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits, frozen berries, and frozen vegetables*, from points in California to points in Connecticut, Delaware, Kentucky, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, West Virginia, and the District of Columbia. The purpose of this filing is to eliminate the gateway of points in Texas.

No. MC–114045 (Sub-No. E21), filed May 3, 1974. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen juices and juice concentrates*, from Ventura, Anaheim, and Corona, Calif., to points in Connecticut, Delaware, Kentucky, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, and West Virginia, restricted against the transportation of the above-specified commodities unless they are transported in mixed loads with frozen vegetables, frozen fruits, and frozen berries, or with frozen fish and frozen poultry when moving in the same vehicle with frozen fruits, frozen vegetables, and frozen berries. The purpose of this filing is to eliminate the gateway of points in Texas.

No. MC–115840 (Sub-No. E1), filed April 15, 1974. Applicant: COLONIAL FAST FREIGHT, INC., P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: Roger M. Shaner (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel, and iron and steel articles*, as encompassed by iron and steel mill products (except commodities used in or in connection with discovery, development, production, refining, manufacturing, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products), from points in Florida east of U.S. Highway 331 and points in Georgia to points in Arkansas and Oklahoma. The purpose of this filing is to eliminate the gateway of Birmingham, Ala.

No. MC–115840 (Sub-No. E2), filed April 15, 1974. Applicant: COLONIAL FAST FREIGHT, INC., P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: Roger M. Shaner (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, the transportation of which because of their size or weight require the use of special equipment (except commodities used in or in connection with discovery, development, production, refining, manufacturing, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products), from points in Florida east of U.S. Highway 331 and points in Georgia to points in Arkansas and Oklahoma. The purpose of this filing is to eliminate the gateway of Birmingham, Ala.

No. MC–117119 (Sub-No. E14), filed April 30, 1974. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Ark. 72728. Applicant's representative: L. M. McLean (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meat*, from the plantsite of Iowa Beef Processors, Inc., at or near Emporia, Kans., to points in Ohio, New York, Pennsylvania, New Jersey, Connecticut, Indiana, Massachusetts, West Virginia, Maryland, Delaware, and the District of Columbia. The purpose of this filing is to eliminate the gateway of Quincy, Ill.

No. MC–127042 (Sub-No. E3), filed April 14, 1974. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, Sioux City, Iowa 51108. Applicant's representative: Joseph W. Harvey (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products and meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carriers Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk). from the plant site of and storage facilities utilized by Bird Provision Company at or near Pekin, Ill., to points in Idaho and Montana, and points in Baker and Malheur Counties, Oreg. The purpose of this filing is to eliminate the gateway of Omaha, Nebr.

No. MC–127042 (Sub-No. E6), filed April 14, 1974. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, Sioux City, Iowa 51108. Applicant's representative: Joseph W. Harvey (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products and meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk) from the plant site and storage facilities of Blue Ribbon Beef Packing, Inc., near Le Mars, Iowa, to points in Montana. The purpose of this filing is to eliminate the gateway of West Point, Nebr.

No. MC–127042 (Sub-No. E9), filed April 14, 1974. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, Sioux City, Iowa 51108. Applicant's representative: Joseph W. Harvey (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk) from West Point, Nebr., to points in Minnesota. The purpose of this filing is to eliminate the gateway of Hospers, Iowa.

No. MC–128273 (Sub-No. E1), filed May 2, 1974. Applicant: MIDWESTERN DISTRIBUTION, INC., P.O. Box 189, Fort Scott, Kans. 66701. Applicant's representative: Harry Ross (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products* (A) from Savannah, Ga., and the facilities of Union Camp Corp., in Autauga County, Ga., to Chicago, Ill.; (B) from Lock Haven, Pa., to Mobile, Ala.; (C) from Franklin, Va., to those points in Tennessee on and west of U.S. Highway 45 and 45E; (D) from Memphis, Tenn., to points in Indiana, Illinois, Michigan, Wisconsin, Minnesota, Pennsylvania, New York, New Jersey, Delaware, Massachusetts, Connecticut, Rhode Island, New Hampshire, Vermont, Maine, and West Virginia, restricted to the transportation of traffic originating at the facilities of Kimberly-Clark Corporation at Memphis, Tenn.; and (E) from Mobile, Ala., and Moss Point, Miss., to points in Michigan, Minnesota, and Wisconsin; and (2) *paper*, from points in Talladega County, Ala., to points in Michigan, Minnesota, and Wisconsin. The purpose of this filing is to eliminate the gateway of Wickliffe, Ky.

No. MC–128383 (Sub-No. E44), filed May 1, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk and automobiles), between John F. Kennedy International Airport, New York, N.Y., and Bradley International Airport, Hartford County, Conn., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Tweed-New Haven Airport, New Haven County, Conn.

No. MC–128383 (Sub-No. E49), filed May 1, 1974. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, 303 N. Frederick Ave., Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: General commodities (except commodities in bulk and automobiles), between John F. Kennedy International Airport, New York, N.Y., and Oneida County Airport, Oneida County, N.Y., restricted to the transportation of traffic having a prior or subsequent movement by air. The purpose of this filing is to eliminate the gateway of Schenectady County Airport, Schenectady County, N.Y.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Notice No. 39]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

MAY 10, 1974.

The following publications (except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application), are governed by the new Special Rule 1100.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

The publications hereinafter set forth reflect the scope of the applications as filed by applicant, and may include descriptions, restrictions, or limitations which are not in a form acceptable to the Commission. Authority which ultimately may be granted as a result of the applications here noticed will not necessarily reflect the phraseology set forth in the application as filed, but also will eliminate any restrictions which are not acceptable by the Commission.

MOTOR CARRIERS OF PROPERTY

No. MC 6607 (Sub-No. 12) (CORRECTION OF A REPUBLICATION), filed May 11, 1973, and published in the FEDERAL REGISTER issues of July 12, 1973, and May 5, 1974, and in third publication this issue. Applicant: J. J. MINNEHAN, INC., P.O. Box 433, Scarborough, Maine 04074. Applicant's representative: Frederick T. O'Sullivan, 622 Lowell Street, Peabody, Mass. 01960. An order of the Commission, Operating Rights Board, dated April 10, 1974, and served April 23, 1974, finds, that operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, of (1) *corn products and blends of corn products with other sweeteners*, from Boston, Mass., to points in (a) New Hampshire, Vermont, and Rhode Island, (b) that part of Maine bounded by a line beginning at the junction of U.S. Highway 2 and the Maine State-New Hampshire-line and extending in any easterly direction along U.S. Highway 2 to Norridgewock, Maine, thence in a northerly direction along Alternate U.S. Highway 201 to junction U.S. Highway 201, thence along U.S. Highway 201 to Bingham, Maine, thence in a easterly direction along Maine Highway 16 through Milo and La Grange, Maine, to junction Maine Highway 43, thence along the western shore of the Penobscot River and Penobscot Bay to Atlantic Ocean to the Maine-New Hampshire State Line, and thence along the Maine-New Hampshire State Line to the point of beginning, and (c) that part of Connecticut on and east of a line beginning at the junction of Connecticut Highway 159 and the Connecticut-Massachusetts State Line and extending in a southerly direction along Connecticut Highway 159 to Hartford, Conn., thence in a southerly direction along Interstate Highway 91 to the junction of Interstate Highway 91 and U.S. Highway 5 thence in a southerly direction along U.S. Highway 5 to New Haven, Conn., including points on the above-described boundary lines, under a continuing contract or contracts with Amstar Corporation, of New York, N.Y., and Revere Sugar Refinery of Charlestown, Mass., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder.

The purpose of this correction is to more clearly indicate the authority granted. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a permit in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 124251 (Sub-No. 33) (REPUBLICATION), filed November 12, 1973, and published in the FEDERAL REGISTER issue of December 20, 1973, and republished this issue. Applicant: JACK JORDAN, INCORPORATED, P.O. Box 689, Dalton, Ga. 30702. Applicant's representative: Archie B. Culbreth, 1252 West Peachtree St. NW., Suite 246, Atlanta, Ga. 30309. An Order of the Commission, Operating Rights Board, dated April 18, 1974, and served May 3, 1974, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, of *Hydrated and calcined alumina*, dry, in bulk, from points

V 39 195
MAY 15 74
XUM

in Murray County, Ga., to points in Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to clarify the commodity description. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 129427 (Sub-No. 4) (REPUBLICATION), filed August 21, 1973, and published in the FEDERAL REGISTER issue of October 31, 1973, and republished this issue. Applicant: JOSEPH GEORGIANA, 26 Lafayette Street, Somerset, N.J. 08873. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. An Order of the Commission, Operating Rights Board, dated April 8, 1974, and served April 29, 1974, finds that operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, of *cigar boxes, books, book and record slip cases, records, record albums, corrugated containers, and pulpboard and pulpboard boxes*, between New Brunswick and Bloomfield, N.J., on the one hand, and, on the other, New Berlin, Wis., Kingsport, Tenn., and Winchester, Va., under continuing contracts with Alexander Ungar, Inc., and Harry F. Ungar Corp., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to show the addition of books as a commodity to be transported. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a permit in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 133363 (Sub-No. 3) (REPUBLICATION), filed September 12, 1972, and published in the FEDERAL REGISTER issue of October 5, 1972, and republished this issue. Applicant: WILLIAM T. HARRIS and THEATRIS HARRIS, a Partnership, doing business as HARRIS BROS. CO., 1317–1325 South 49th Street, Philadelphia, Pa. 19134. Applicant's representative: Morris J. Levin, 1620 I Street NW., Washington, D.C. 20006. A Decision and Order of the Commission, Division 1, dated April 8, 1974, and served April 16, 1974, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, of (1) *stereo equipment, radios, sewing machines, and cabinets, parts and materials* therefor, (a) from Savannah, Ga., New York, N.Y., Los Angeles, Calif., Seattle, Wash., and Philadelphia, Pa., to the facilities of Morse Electro Products Corp., at Atlanta, Ga., New York, N.Y., Framingham, Mass., Chicago, Ill., Kent, Wash., Pacoima, Calif., and Dallas, Tex., restricted to the transportation of traffic having an immediately prior movement by water in foreign commerce, and (b) between the facilities of Morse Electro Products Corp., at Atlanta, Ga., New York, N.Y., Framingham, Mass., Chicago, Ill., Kent, Wash., Pacoima, Calif., Dallas, Tex., Lenexa, Kans., Taylor, Mich., Jessup, Md., Solon, Ohio, and King of Prussia, Pa., (2) *cabinets for stereo equipment, radios, and sewing machines*, from Birmingham, Ala., and Memphis and Nashville, Tenn., to the facilities of Morse Electro Products Corp. at Atlanta, Ga., New York, N.Y., Framingham, Mass., Chicago, Ill., Kent, Wash., Pacoima, Calif., and Dallas, Tex., and (3) *parts and materials for stereo equipment, radios, and sewing machines*, from Miami and Jacksonville, Fla., to the facilities of Morse Electro Products, Corp., at Atlanta, Ga., New York, N.Y., Framingham, Mass., Chicago, Ill., Kent, Wash., Pacoima, Calif., and Dallas, Tex.. under a continuing contract with Morse Electro Products Corp., of Brooklyn, N.Y.

The purpose of this republication is to show that the shipper's Massachusetts facilities are located in Framingham rather than Boston, Mass. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a permit in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 2253 (Sub-No. 40) (NOTICE OF FILING OF PETITION TO ELIMINATE AN OFF ROUTE POINT SERVICE RESTRICTION), filed April 19, 1974. Petitioner: CAROLINA FREIGHT CARRIERS CORPORATION, Highway 150 East, P.O. Box 697, Cherryville, N.C. 28021. Petitioner's representative: W. C. Mauldin (same address as petitioner). Petitioner holds a motor common carrier certificate in No. MC 2253 (Sub-No. 40), issued February 27, 1970, authorizing transportation, over regular routes, of *General commodities* (except those of unusual value, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Kings Mountain, N.C., and New York, N.Y., serving the intermediate points of Gastonia, Belmont, Charlotte, Concord, Albemarle, China Grove, Salisbury, Thomasville, Lexington, High Point, Greensboro, Burlington, Durham, Oxford, Troy, Biscoe, Carthage, Sanford, Raleigh, Franklinton, Henderson, and Kannapolis, N.C., Richmond, Va., Baltimore and Havre de Grace, Md., Wilmington, Del., Chester and Philadelphia, Pa., and Trenton and Newark, N.J.; and the off-route points of Lincolnton, Hickory, Maiden, Newton, Mt. Holly, Statesville, Winston-Salem, Reidsville, and Chapel Hill, N.C., York, Norristown, West Chester, and Pittsburgh, Pa., Camden, Stanton, Bridgeton, Paterson, Bayonne, Jersey City, Perth Amboy, and Hoboken, N.J., Canden, Wyoming, and Houston, Del., Danville, Lynchburg, and Newport News, Va., and Salisbury and Cumberland, Md.; (a) from Kings Mountain over U.S. Highway 29 via Salisbury, N.C., to Greensboro, N.C. (also from junction U.S. Highway 29 and Alternate U.S. Highway 29 near Concord, N.C., over Alternate U.S. Highway 29 to Junction U.S. Highway 29 near China Grove, N.C., and thence over U.S. Highway 29 to Salisbury), thence over U.S. Highway 70 to Durham, N.C., thence over U.S. Highway 15 to Oxford, N.C., thence over U.S. Highway 158 to Henderson, N.C., thence over U.S. Highway 1 to Baltimore, Md., thence over U.S. Highway 40 to junction U.S. Highway 13, thence over U.S. Highway 13 to Philadelphia, Pa., thence over U.S. Highway 1 to New York, and return over the same routes; and (b) from Kings Mountain over U.S. Highway 29 to Charlotte, N.C., thence over North Carolina Highway 27 to Carthage, N.C., thence over U.S. Highway 15 to junction U.S. Highway 1, thence over U.S. Highway 1 to Henderson, N.C., thence to New York as specified above, and return over the same route; and (2) between Charlotte, N.C., and New York, N.Y., serving the intermediate and off-route points of Rocky Mount, Tarboro, Aberdeen, Fayetteville, New Bern, Wilson, Greenville, Goldsboro, and Elizabeth City, N.C., Suffolk, Portsmouth, and Norfolk, Va., and Dover, Del.; from Charlotte over North Carolina Highway 27 to Carthage, N.C., thence over U.S. Highway 15 to junction U.S. Highway 1, thence over U.S. Highway 1 to Raleigh, N.C., thence over U.S. Highway 64 to Tarboro, N.C., thence over U.S. Highway 258 to Franklin, Va., thence over U.S. Highway 58 to Norfolk, Va., thence across the Chesapeake Bay to Cape Charles, Va., thence over U.S. Highway 13 to Chester, Pa., thence across the Delaware River to junction unnumbered highway, thence over unnumbered highway to junction U.S. Highway 130, thence over U.S. Highway 130 to junction U.S. Highway 206, thence over U.S. Highway 206 to Trenton, N.J., thence over U.S. Highway 1 to New York, and return over the same route. By the instant petition petitioner seeks to eliminate the off-route points of Pittsburgh, Pa., from the above quoted restriction. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views, or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

No. MC 119738 (Sub-No. 1) (NOTICE OF FILING OF PETITION TO MODIFY A COMMODITY DESCRIPTION), filed April 29, 1974. Petitioner: HAGGARD HEAVY HAULING, INC., 2100 Guinotte, Kansas City, Kans. 64102. Petitioner's representative: Louis J. Amato, 1301 Ambassador Building, St. Louis, Mo. 63101. Petitioner holds a motor *common carrier* certificate in No. MC 119738 (Sub-No. 1), issued September 27, 1973, authorizing, as pertinent, transportation, over irregular routes, *of heavy machinery and construction materials*, between points in Missouri and Kansas. By the instant petition, petitioner seeks to modify its commodity description to read: "heavy machinery, construction materials, and commodities, the transportation of which because of size or weight require the use of special equipment and related articles and supplies when their transportation is incidental to the transportation of commodities which by reason of size or weight require special equipment, and self-propelled articles, each weighing 15,000 pounds or more, and related machinery, tools, parts, and supplies moving in connection therewith". Any interested person or persons desiring to participate may file an original and six copies of his written representations, views, or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under Sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto. (49 C.F.R. 1.240).

MOTOR CARRIERS OF PROPERTY

APPLICATION FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATION UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE.

No. MC 112107 (Sub-No. 9) (CORRECTION), filed March 6, 1974, published in the FEDERAL REGISTER issue of April 24, 1974, and republished as corrected this issue. Applicant: NEW ENGLAND MOTOR FREIGHT, INC., 520 Main Street, Wallington, N.Y. 07057. Applicant's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving points in Connecticut as off-route points in connection with carrier's regular routes between Paterson, N.J., and Providence, R.I. (also between New London, Conn., and Providence, R.I.).

NOTE.—The purpose of this republication is to correct MC–F–12163 in lieu of MC–12163 which was previously published incorrectly. The purpose of this application is to convert the Certificate of Registration issued to Reliable Warehouse Company in MC–99328 (Sub-No. 1) to a Certificate of Public Convenience and Necessity. This is a matter directly related to the Section 5 proceeding in MC–F–12163 published in the FEDERAL REGISTER issue of March 20, 1974. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC–F–11775. (Supplemental) (J. V. McNICHOLAS TRANSFER COMPANY—CONTROL—TOM'S EXPRESS, INC.), published in the January 24, 1973, issue of the FEDERAL REGISTER on pages 2368 and 2369. The merger of Tom's Express, Inc., of Weirton, W. Va., into J. V. McNicholas Transfer Company, of Youngstown, Ohio, subject to the present republication, was authorized by order of the Commission, Appellate Division 3, dated March 21, 1974, which modified the order of the Commission, Review Board 5, dated December 17, 1973, authorizing the acquisition by J. V. McNicholas of control of Tom's Express, Inc., through the purchase of all of Tom's stock for $1,000,000. The Division, in the same order, also authorized the acquisition by Henry J. McNicholas, of control of the operating rights and property of Tom's through the merger. The Interstate operating rights of Tom's Express, Inc., to be merged into J. V. McNicholas Transfer Company are those described in certificates issued in Nos. MC–10788, MC–10788 (Sub-Nos. 3 and 4), to the extent described in the order of December 17, 1973.

No. MC–F–12185 (Correction) (McLEAN TRUCKING COMPANY—CONTROL—SOUTH TEXAS MOTOR LINES, INC.), published in the April 17, 1974, issue of the FEDERAL REGISTER on page 13828. Prior notice should be modified to read: McLEAN TRUCKING COMPANY—CONTROL AND MERGER—SOUTH TEXAS MOTOR LINES, INC., and to include applicant's attorneys: Francis W. McInerny, and Harry J. Jordan, both of 1000 Sixteenth St. NW., Washington, D.C. 20036.

No. MC–F–12210: Authority sought for purchase by (A) JONES TRUCK LINES, INC., 610 E. Emma Ave., Springdale, Ark. 72764, of a portion of the operating rights of JOHN L. KERR AND G. O. KERR, JR., doing business as SHIPPERS EXPRESS, 1651 Kerr Drive, Jackson, MS 39204, and (B) JOHN L. KERR AND G. O. KERR, JR., doing business as SHIPPERS EXPRESS, purchase a portion of the operating rights of JONES TRUCK LINES, INC., and for acquisition by HARVEY JONES, also of Springdale, Ark. 72764, of control of such rights through the purchase. Applicant's attorney: A. Alvis Layne, 915 Pennsylvania Bldg., Washington, D.C. 20004. Operating rights sought to be transferred: (A) *General commodities*, excepting among others, classes A and B explosives, household goods and commodities in bulk, as a *common carrier*, over irregular routes, between Jackson, Miss., on the one hand, and, on the other, points in that part of Mississippi on and south of Mississippi Highway 4, on and west of Interstate Highway 55, and on and north of Mississippi Highway 8, except points on U.S. Highway 51 and points in their commercial zones; and (B) General commodities, except those of unusual value, Classes A and B explosives, liquid commodities in bulk, and household goods as defined by the Commission, over regular routes, between Memphis, Tenn., and Winona, Miss., serving all intermediate points, with restriction. (A) Vendee is authorized to operate as a *common carrier* in all of the States in the United States (except Alaska and Hawaii), and (B) Vendee is authorized to operate as a *common carrier* in Mississippi. Application has not been filed for temporary authority under section 210a(b).

NOTE.—MC–111231 (Sub-No. 186), is a matter directly related.

No. MC–F–12212. Authority sought for purchase by DELTA LINES, INC., 333 Hegenberger Rd., Oakland, CA 94621, of a portion of the operating rights and property of RINGSBY TRUCK LINES, INC., 5773 So. Prince St., Littleton, CO 80120, and for acquisition by DELTA CALIFORNIA INDUSTRIES, 600 Montgomery St., San Francisco, CA 94111, of control of such rights and property through the purchase. Applicants' attorneys: Marshall G. Berol, 100 Bush St., 21st Floor, San Francisco, CA 94104, and Alvin J. Meiklejohn, 1660 Lincoln St., Suite 1600, Denver, CO 80203. Operating rights sought to be transferred: *General commodities*, with exceptions, as a *common carrier* over regular routes, between San Bernardino, Calif., and Las Vegas, Nev., between Los Angeles, and San Bernardino, Calif., between Las Vegas, and Boulder City, Nev., between Las Vegas, and Mercury, Nev., between Battle Mountain, and Tonopah, Nev., with restriction, between junction U.S. Highway 6 and Nevada Highway 47, and Silverpeak, Nev., between Beatty, Nev., and Mojave, Calif., between Tonopah, and Las Vegas, Nev., between Los Angeles, and Death Valley Junction, Calif., between junction U.S. Highway 95 and Nevada Highway 29, and Death Valley Junction, Calif., between Death Valley Junction, Calif., and Beatty, Nev., between Las Vegas, and Henderson, Nev., serving various intermediate and off-route points; *general commodities*, with exceptions over irregular routes, from Tonopah, Nev., to Manhattan, Round Mountain, Gold Point, Cuprite, Lida, Goldfield, Klondyke, Silverbeak, Blair Junction, Gilbert, Millers, and Coaldale, Nev., and points within five miles of each and return to Tonopah, Nev., over one alternate route for operating convenience only. Vendee is authorized to operate as a *common carrier* in California and Nevada. Application has been filed

V 39 I 95 MAY 15 74 XUM

for temporary authority under section 210a(b).

NOTE.—MC-56640 (Sub-No. 33), is a directly related matter.

No. MC-F-12213. Authority sought for purchase by C & H TRANSPORTATION CO., INC., P.O. Box 5976, Dallas TX 75222, of a portion of the operating rights of A. A. MARTIN TRANSPORTATION CO., INC., 194 W. First St., South Boston, MA 02127. and for acquisition by TYLER CORPORATION, 3121 Southland Center, Dallas, TX, of control of such rights through the purchase. Applicants' attorneys: Thomas E. James, P.O. Box 5976, Dallas, TX 75222, and Frank J. Weiner, 15 Court Square, Boston, MA 02108. Operating rights sought to be transferred: *Heavy machinery, and such commodities,* requiring specialized handling or rigging because of size or weight, as a *common carrier* over irregular routes, between Boston, Mass., and points in Massachusetts within 25 miles of Boston, on the one hand, and, on the other, points in New Hampshire and that part of Maine south of a line beginning at the Atlantic Ocean, 5 miles north of Cutler, Maine, and extending in a westerly direction through Machias, Bangor, and Wilsons Mills to the Maine-New Hampshire State line, between points in Maine, between points in Vermont. Vendee is authorized to operate as a *common carrier* in all States in the United States (except Alaska and Hawaii). Application has not been filed for temporary authority under section 210a(b).

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

REPORT UNDER FEDERAL IMPOUNDMENT AND INFORMATION ACT

V 39 I 95 MAY 15 74 XUM

OFFICE OF MANAGEMENT AND BUDGET

REPORT UNDER THE FEDERAL IMPOUNDMENT AND INFORMATION ACT

Hon. GERALD T. FORD,
President of the Senate,
Washington, D.C. 20510.

MAY 3, 1974.

DEAR MR. PRESIDENT: The enclosed report is submitted pursuant to the Federal Impoundment and Information Act, as amended. In accordance with that Act, the report is being transmitted to the Congress and to the Comptroller General of the United States, and will be published in the FEDERAL REGISTER.

Sincerely,

ROY L. ASH,
Director.

BUDGETARY RESERVES AS OF APRIL 20, 1974

The Apportionment and Reservation of Funds Process.—The Antideficiency Act (31 U.S.C. 665) requires, with certain exceptions, that all appropriations, funds, and contract authority be apportioned so as to: prevent obligation of funds in a manner which would require deficiency or supplemental appropriations; achieve the most effective and economical use of amounts made available; provide for contingencies; and effect savings. The Act also requires that apportionments shall be reviewed at least four times each year, and it authorizes reapportionments and the establishment of reserves. The authority granted by this Act is exercised by the Director of the Office of Management and Budget under authority delegated by the President.

Apportionments specify the amounts that may be obligated during specific time periods, usually within the current fiscal year. In some cases, specific provisions of law provide that funds should be available over a period longer than one year. In cases where the amount of contract authority available a year in advance is specified by law, a distinction is made in the accompanying report (Attachment D) between the 1974 and 1975 programs.

The practice of withholding some amounts—"reserving" them—from apportionment, either temporarily or for longer periods, is one of long-standing and has been exercised by all recent administrations as a customary part of financial management. The Antideficiency Act authorizes the withholding of funds from apportionment to provide for contingencies or to effect savings made possible by or through changes in requirements, greater efficiency of operations, or other developments subsequent to the date on which the funds were made available. When funds are, by law, made available beyond the current fiscal year, they are generally not fully apportioned in the current year. The unapportioned part is withheld to be released later for use in subsequent years, as required.

In some legislative and appropriation actions, the Congress has required the withholding of specified funds. For example, the 1973 Agriculture-Environmental and Consumer Protection Appropriation Act (Pub. L. 92-399) explicitly required that an amount be placed in reserve pending an administrative determination of need. In other cases, notably the 1974 Labor-HEW Appropriations Act (Pub. L. 93-192), Congress has authorized the withholding from obligation and expenditure of specified amounts or percentages of appropriated funds. A table showing the amounts withheld under Pub. L. 93-192 is Attachment A to this report. A similar withholding was authorized by the 93d Congress in the Agriculture-Environmental and Consumer Protection Appropriation Act of 1974. The Act provided an indefinite authorization to make insured loans in the Rural Electrification and Telephone Revolving Fund as follows (dollars in millions):

	Not less than—	Not more than—
Electric loans	618	750
Telephone loans	140	200
Total	758	950

The 1974 authority to spend debt receipts to finance loan activity was apportioned at the $758 million level.

In yet another case, Congress has made funds available only upon the arrival of certain contingencies. The 1974 Supplemental Appropriations Act (Pub. L. 93-245) set aside a contingency reserve for the Interior Department's Office of Oil and Gas which is to become available only upon enactment of emergency energy legislation.

These Congressional directives are, however, the exception rather than the rule. Most reserves are established at the initiative of the Executive Branch and are based on operational knowledge of the status of specific projects or activities. For example, when a particular objective can be accomplished at less cost than had been anticipated when the appropriation was made, a reserve assures that savings can be realized and, if appropriate, returned to the Treasury. In other cases, apportionments sometimes await (1) development by the affected agencies of approved plans and specifications, (2) completion of studies for the effective use of the funds, including necessary coordination with the other Federal and non-Federal parties that might be involved, (3) establishment of a necessary organization and designation of accountable officers to manage the programs, or (4) the arrival of certain contingencies under which the funds must by statute be made available (e.g., certain direct Federal credit aids when private sector loans are not available). From time to time, reserves are established for the purpose of conforming to the requirements of other laws. An example is the Executive's responsibility to stay within the statutory limitation on the outstanding public debt.

Most, but not all, funds provided by the Congress are subject to the apportionment process. Subsection (f) of the Antideficiency Act authorizes a series of exemptions. Temporary continuing appropriations are exempt from the apportionment process (Pub. L. 93-52, as amended, Section 103). Appropriations provided under such temporary continuing appropriation acts are usually indefinite in amount. In addition, some laws establish funding arrangements which are either outside the apportionment process or require Executive determinations before they become subject to apportionment. The Federal Water Pollution Control Act of 1972 (Pub. L. 92-500), for example, vests discretion in the Administrator of the Environmental Protection Agency to allot less than the maximum amounts authorized by the Act.[1a] Under the provisions of the Act, authority to make contracts does not exist until the allotment is made. Consequently, fund availability (budget authority) exists only when allotments are made and only allotted funds move through the apportionment process. At this date, funds authorized by the Federal Water Pollution Control Act have been allotted on the following basis (dollars in billions):

Fiscal years	Authorized	Allotted	Unallotted
1973	5	2	3
1974	6	3	3
1975	7	4	3

Funding of certain housing programs of the Department of Housing and Urban Development (HUD) presents a unique situation with respect to the apportionment process. For five housing programs, the Congress provides commitment authority that allows the Secretary of HUD to sign long-term contracts requiring annual payments to specific housing units. The commitment authority is not subject to the apportionment (and thus the reserve) process since it does not represent obligational authority of a given year. Rather, it represents an authorization to enter into contracts which will result in a requirement for obligational authority (payments) in each of the years covered by the contract. Current plans anticipate that the commitments for annual payments will be some $299 million under the level made available by the Congress for four of these programs. If used, the $299 million of authority could result in outlays of up to $10 billion over the life of the contracts. As the payments under the contracts come due, they are met by annual appropriations (provided under the account "Housing payments" which also covers low-rent public housing).

[1a] Whether the discretion exists at the allotment stage or at some later stage is now before the courts.

Thus, funds are only required to meet annual payments under the contracts. They are not required at the time the contracts are signed and are made available only when actually appropriated. Since reserves are established only on the basis of fund availability, and since funds appropriated for this program are needed for making payments at an early date, no reserves have been established for the subsidized housing programs.

The amount of funds apportioned or held in reserve at any one time is heavily dependent upon events both preceding and following initial apportionment actions. Key among the predecessor events is the passage of the annual appropriation bills. Apportionments for most Federal programs are made within 30 days of enactment of the appropriation bills. The earlier in the fiscal year these apportionments occur, the greater is the chance that reserves will accompany them. Early in the fiscal year, program and project plans are incomplete and allowances need to be made for contingencies which may occur later in the year. As administrative plans are completed and other event occur during the year, the need for reserving funds diminishes. Thus, for any one fiscal year, the amount in reserve is relatively low at the beginning of the year (reflecting primarily multi-year funds), peaks 30 days after passage of most of the appropriation bills, and then steadily diminishes as the end of the fiscal year approaches.

Reserves as of April 20, 1974.—All but $3.1 billion of the $10.4 billion in reserve for 1974 is accounted for by reserve actions in three areas: Federal-aid highways ($3.4 billion), emergency security assistance for Israel ($2.2 billion which was released on April 25, 1974), and programs of the Department of Defense ($1.7 billion). Virtually all of the $6.3 billion in reserve for 1975 is in the Federal-aid highways account and other highway programs.

The reduction of $1.4 billion in budgetary reserves for 1974 reflects the completion of program and project plans since the February 4 report. Reserves have been maintained in some programs to await program development and to meet contingencies during the remainder of the 1974 program-year. In other programs, funds are being held in reserve to meet increased pay costs in the fourth quarter and thus eliminate the need for supplemental appropriations. In the case of programs which have been provided obligational authority beyond the current fiscal year, reserves have been maintained to ensure that funds will be available beyond FY 1974 as needed.

Report Required by Law.—This report is submitted in fulfillment of the requirements of the "Federal Impoundment and Information Act," as amended, which provides for a report of "impoundments" and certain other information pertaining thereto. This report lists the budgetary reserves that were in effect as of April 20, 1974.

The Antideficiency Act requires that all apportionments be reviewed at least quarterly, and that reapportionments be made or reserves be established, modified, or released as may be necessary to further the effective use of the funds concerned. Thus, in answer to item Number 5 of the Federal Impoundment and Information Act, the period of time during which funds are to be in reserve is dependent in all cases upon the results of such later review.

Attachment D lists, by agency, all accounts for which some funds are reserved. An asterisk (*) identifies those accounts added to the listing since the last report (i.e., such accounts contained no reserves on February 4, 1974). The listing:

Presents the amount currently apportioned for the fiscal year 1974;

Presents the amount in reserve as of April 20, 1974;

States whether the amount reserved will be legally available for obligation in fiscal year 1975;

Indicates the date of the reserve action and the effective date of the current reserve;

Presents a code which relates to the reason for the current reserve action, without necessarily exhausting all possible reasons; and

Presents a code which indicates the estimated fiscal, economic, and budgetary impact of the current reserve.

Codes used in the remainder of this report relating to the reasons for and estimated fiscal, economic, and budgetary impact of the reserve actions are described in Attachments B and C. The codes and footnotes listed for each entry relate to conditions which were in effect as of the date of the reserve action.

V 39 I 95 MAY 15 74 XUM

ATTACHMENT A

1974 LABOR/HEW APPROPRIATIONS - FUNDS WITHHELD FROM OBLIGATION AND EXPENDITURE

The 1974 appropriations act for the Departments of Labor, and Health, Education, and Welfare, and related agencies (P.L. 93-192) contains the provision that "not to exceed $400 million, ... may be withheld from obligation and expenditure...." The appropriation language also specifies that no individual appropriation provision may be reduced by more than five percent. In addition, the conference report (H.R. 93-682) establishes dollar limitations for the reductions that may be made to specified programs.

The following table shows the effect of the amounts withheld from programs receiving appropriations under this act. A comparison is drawn between amounts authorized to be withheld in the conference report and actual amounts withheld, as reflected in the 1975 Budget Appendix:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

3/ In the 1975 Budget Appendix, this figure is shown as an unobligated balance lapsing.

Attachment B

REASON FOR CURRENT RESERVE

Code	
1	"To provide for contingencies" (31 USC 665(c)(2)).
2	"To effect savings whenever savings are made possible by or through changes in requirements, greater efficiency of operations, or other developments subsequent to the date on which such (funds were) made available" (31 USC 665(c)(2)).
3	To reduce the amount of or to avoid requesting a deficiency or supplemental appropriation in cases of appropriations available for obligation for only the current year (31 USC 665(c)(1)). This explanation includes amounts anticipated to be used to absorb or partially absorb the costs of recent pay raises grant pursuant to law.
4	"To achieve the most effective and economical use" of funds available for periods beyond the current fiscal year (31 USC 665(c)(1)). This explanation includes reserves established to carry out the Congressional intent that funds provided for periods greater than one year should be so apportioned that they will be available for the future periods.
5	Temporary deferral pending the establishment of administrative machinery (not yet in place) or the obtaining of sufficient information (not yet available) to apportion the funds properly and to insure that the funds will be used in "the most effective and economical" manner (31 USC 665(c)(1)). This explanation includes reserves for which apportionment awaits the development by the agency of approved plans, designs, specifications.
6	The President's constitutional duty to "take care that the laws be faithfully executed" (U.S. Constitution, Article II, Section 3):
6a	-- Obligation at this time of the amount in reserve is likely to contravene law regarding the environment; or the amount in reserve is being held pending further study to evaluate the environmental impact of the affected projects (activities) as required by law.

V 39 I 95 MAY 15 74 XUM

2

6b	-- Existing tax laws and the statutory limitation on the national debt are not expected to provide sufficient funds in the current and ensuing fiscal years to cover the total of all outlays in these years contemplated by the individual acts of Congress.
6c	-- Action taken consistent with the President's responsibility to help maintain economic stability without undue price and cost increases.
6d	-- Amount apportioned reflects the level of obligations implicitly approved by the Congress in its review of and action on the appropriation required to liquidate obligations under existing contract authority.
6e	-- Other. See footnote for each item so coded.
7	The President's constitutional authority and responsibility as Commander in Chief (U.S. Constitution, Article II, Section 2).
8	The President's constitutional authority and responsibility for the conduct of foreign affairs (U.S. Constitution, Article II, Section 2).
9.	Other. See footnote for each item so coded.
10	Not applicable or no reason required. (In most cases where a previous reserve has been apportioned in its entirety.)

Attachment C

ESTIMATED FISCAL, ECONOMIC, AND BUDGETARY EFFECT

I.	Same effect as set forth in the most recently submitted budget document, of which this item is an integral part.
II.	The reserve action will bring the budgetary impact of this program to a level nearer or equal to that contemplated in the most recently submitted budget document and contribute to the reduction of inflationary pressures.
III.	The change from the previous reserve is expected to contract the budgetary impact of this program and contribute to the reduction of inflationary pressures.
IV.	The release or reduction of the previous reserve will facilitate use and expenditure of the available funds consistent with current program needs and economic conditions in the area affected.
V.	Other. See footnote for each item so coded.
VI.	Not applicable or no explanation required. (In most cases where a previous reserve has been apportioned in its entirety.)

V 39 I 95 MAY 15 74 XUM

XUM MAY 15 1974 VOL 39 | 95

1/ Funds have not been apportioned pending review of plan.

2/ Funds reserved pending Presidential decisions.

2a/ This reserve was released on April 25, 1974.

3/ The amount apportioned is consistent with the limitation on the Foundation's activities according to P.L. 93-52 as amended.

4/ Funds in excess of $10,000,000 are not available in FY 1974 pursuant to P.L. 93-240.

5/ The 1973-74 Rural Environmental Assistance Program funds lapsed on December 31, 1973. The September 30 report incorrectly listed the funds as available beyond FY 1974.

6/ The funds in reserve have been apportioned pursuant to a U.S. District Court order which reinstated the 1973 REAP Program.

7/ The amount apportioned in this account is also apportioned in the Agricultural Stabilization and Conservation Service, Salaries and expenses account.

8/ The program level is above the amount reflected in the FY 1975 Budget.

9/ The amount apportioned in this account is required to finance a loan approved at the end of FY 1973.

10/ This apportionment action was inadvertently excluded from the September 30 report.

11/ The FY 1974 appropriation provides for program operation for the summer of calendar year 1974.

12/ FY 1972 contract authority in the amount of $24.6 million will lapse on 6/30/74.

13/ Code 6d was inadvertently excluded from the September 30 report.

14/ Anticipated deposits are currently estimated at $5 million more than anticipated in the budget estimates submitted to the Congress in January 1973.

15/ Funds are being held in reserve to cover operating costs during the exhibition period.

16/ This account title was changed from "Research, Development, and Facilities" on 12/31/73.

17/ The reserve is to be applied against increased pay costs when transfer authority is approved by Congress.

18/ This account was combined with the "Operations, Research, and Facilities" account on 12/31/73.

19/ Reason code 1 was incorrectly applied to the entries in the September 30 report.

20/ The reserve was made at the request of the Canal Zone Government as a contingency for possible future inspection services.

21/ The reserve action will increase the program level to a level greater than that contemplated in the most recently submitted budget document.

22/ The apportionment releasing the reserve was incorrectly excluded from the September 30 report.

23/ The apportionment of funds in reserve is temporarily deferred until sufficient information is available for implementing the new public land survey program. The new program was funded for the first time in the 1974 supplemental, (P.L. 93-245) enacted January 3, 1974.

24/ Each reserve includes $30 million of contract authority which becomes available at the first of each fiscal year and expires at the end of each fiscal year (16 U.S.C. 460L-10a); all other funds are available beyond 1974.

25/ The Department of the Interior has no present plans for the use of these funds which are available only for the development of water wells on public lands.

26/ Reason code 5 was incorrectly included in the September 30 report.

27/ Reason code 4 was inadvertently excluded from the September 30 report.

28/ Reason code 6b was incorrectly included in the September 30 report.

29/ No replacement or operation and maintenance work is currently necessary. (See footnote 30.)

V 39 | 95 MAY 15 74 XUM

30/ 66 Stat. 754 requires that certain miscellaneous revenues be deposited in a special fund to provide for the replacement of the project works and to defray annual operating and maintenance expenses when necessary.

31/ The reserve, made at the request of the Department of Labor, does not change expected payments for benefits as estimated in the latest budget document. The reserve reflects reimbursements from other agencies in excess of the amounts estimated in the budget document. The release of the reserve would increase availability above expected needs. The reserve is available for benefit payments if required benefit payments exceed current estimates.

32/ This amount is potentially available for use under 1975 contract authority; the amount to be made available to each State for obligation in 1975 is anticipated to be announced by the Department of Transportation on July 1, 1974.

33/ The September 30 report incorrectly reported the reserve as unavailable beyond FY 1974.

34/ $9,000,000 was transferred by the 1974 Department of Transportation Appropriation Act to the Traffic and Highway Safety account.

35/ The authority for loan approval expired on June 27, 1973.

36/ The amount apportioned is the full amount legally available until action is taken on the amendment to the Rail Passenger Service Act of 1970.

37/ The reserve is required because the Congress previously provided permanent, indefinite authority (P.L. 92-500) for the subsidy payment. The funds in reserve will be written off in FY 1974.

38/ Contract authority of $75 million expires at the end of FY 1974; the balance is available beyond FY 1974.

39/ This reserve action was taken at the request of the Occupational Safety and Health Review Commission due to hiring delays. The reserve is available as a contingency against an increase in future contested citations.

40/ The September 30 report incorrectly reported the reserve as available beyond FY 1974.

41/ The funds in reserve were not needed and written off on April 8, 1974.

42/ The Commission on American Shipbuilding (authorized under the Merchant Marine Act of 1970, P.L. 91-469) was terminated on December 20, 1973. The funds in reserve that are not needed in FY 1974 will be written off.

"Bureaucrat's Bible" or
"Guerrilla Handbook"?

United States Government Manual

1973/74 Edition

The Manual has been called the "bureaucrat's bible." It has also been called a "guerrilla warfare handbook for citizens tired of jousting with windmills."

As the United States Government Organization Manual, it has been a familiar aid to businessmen, researchers, lawyers, and students seeking current information about the Federal Government. This year, the title has been changed to reflect a broader emphasis on consumer-interest programs, although the agency organization charts are still included.

A fresh, modern format highlights a "Sources of Information" section for most agencies, with addresses and telephone numbers for obtaining information on:

- Employment
- Government contracts
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

RESOLUTION CHART

100 MILLIMETERS

INSTRUCTIONS Resolution is expressed in terms of the lines per millimeter recorded by a particular film under specified conditions. Numerals in chart indicate the number of lines per millimeter in adjacent "T-shaped" groupings.

In microfilming, it is necessary to determine the reduction ratio and multiply the number of lines in the chart by this value to find the number of lines recorded by the film. As an aid in determining the reduction ratio, the line above is 100 millimeters in length. Measuring this line in the film image and dividing the length into 100 gives the reduction ratio. Example: the line is 20 mm. long in the film image, and 100/20 = 5.

Examine "T-shaped" line groupings in the film with microscope, and note the number adjacent to finest lines recorded sharply and distinctly. Multiply this number by the reduction factor to obtain resolving power in lines per millimeter. Example: 7.9 group of lines is clearly recorded while lines in the 10.0 group are not distinctly separated. Reduction ratio is 5, and 7.9 x 5 = 39.5 lines per millimeter recorded satisfactorily. 10.0 x 5 = 50 lines per millimeter which are not recorded satisfactorily. Under the particular conditions, maximum resolution is between 39.5 and 50 lines per millimeter.

Resolution, as measured on the film, is a test of the entire photographic system, including lens, exposure, processing, and other factors. These rarely utilize maximum resolution of the film. Vibrations during exposure, lack of critical focus, and exposures yielding very dense negatives are to be avoided.
